

Microsoft

Exam Questions MS-100

Microsoft 365 Identity and Services

NEW QUESTION 1

You company has a Microsoft Azure Active Directory (Azure AD) tenant that contains the users shown in the following table. The tenant includes a security group named Admin1. Admin1 will be used to manage administrative accounts. You need to identify which users can perform the following administrative tasks:

- ▶ Create guest user accounts.
- ▶ Add User3 to Admin1.

Which users should you identify for each task? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Create guest user accounts:

| |
|--------------------------------|
| ▼ |
| User4 only |
| User2 only |
| User3 only |
| User2 and User3 only |
| User1, User2 and User3 only |
| User1, User2, User3, and User4 |

Add User3 to Admin1:

| |
|--------------------------------|
| ▼ |
| User4 only |
| User2 only |
| User3 only |
| User2 and User3 only |
| User1, User2 and User3 only |
| User1, User2, User3, and User4 |

Answer:

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles>

NEW QUESTION 2

Your network contains an Active Directory forest named contoso.local. You purchase a Microsoft 365 subscription. You plan to move to Microsoft and to implement a hybrid deployment solution for the next 12 months. You need to prepare for the planned move to Microsoft 365. What is the best action to perform before you implement directory synchronization? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Purchase a third-party X.509 certificate.
- B. Rename the Active Directory forest.
- C. Purchase a custom domain name.
- D. Create an external forest trust.

Answer: C

NEW QUESTION 3

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. You purchase a domain named contoso.com from a registrar and add all the required DNS records. You create a user account named User1. User1 is configured to sign in as user1@contoso.onmicrosoft.com. You need to configure User1 to sign in as user1@contoso.com. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

| Actions | Answer Area |
|---|-------------|
| Run Set-MsolDomainAuthentication - TenantID contoso.com | |
| Modify the email address of User1. | |
| Modify the username of User1. | |
| Verify the custom domain. | |
| Add a contoso.com as a SAN for an X.509 certificate. | |
| Add a custom domain name. | |

Answer:

Explanation:

| Actions | Answer Area |
|---|-------------------------------|
| Run Set-MsolDomainAuthentication - TenantID contoso.com | Add a custom domain name. |
| Modify the email address of User1. | Verify the custom domain. |
| Modify the username of User1. | Modify the username of User1. |
| Verify the custom domain. | |
| Add a contoso.com as a SAN for an X.509 certificate. | |
| Add a custom domain name. | |

NEW QUESTION 4

Your network contains a single Active Directory domain and two Microsoft Azure Active Directory (Azure AD) tenants. You plan to implement directory synchronization for both Azure AD tenants. Each tenant will contain some of the Active Directory users. You need to recommend a solution for the planned directory synchronization. What should you include in the recommendation?

- A. Deploy two servers that run Azure AD Connect, and then filter the users for each tenant by using organizational unit (OU)-based filtering.
- B. Deploy one server that runs Azure AD Connect, and then specify two sync groups.
- C. Deploy one server that runs Azure AD Connect, and then filter the users for each tenant by using organizational unit (OU)-based filtering.
- D. Deploy one server that runs Azure AD Connect, and then filter the users for each tenant by using domainbased filtering.

Answer: A

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/plan-connect-topologies#multiple-azure-adtenant>

NEW QUESTION 5

Your company uses Gmail as a corporate email solution. You purchase a Microsoft 365 subscription and plan to move all email data to Microsoft Exchange Online. You plan to perform the migration by using the Exchange admin center. You need to recommend which type of migration to use and which type of data to migrate. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Migration type to use:

- Cutover migration
- Staged migration
- Remote move migration
- IMAP migration

Data to include in the migration:

- Email only
- Email and calendar only
- Email, calendar and contacts only
- Email, calendar, contacts, and tasks

Answer:

Explanation: References:
<https://docs.microsoft.com/en-us/exchange/mailbox-migration/migrating-imap-mailboxes/migrate-g-suite-mailb>

NEW QUESTION 6

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes the users shown in the following table.

| Name | Usage location | Membership |
|-------|----------------|----------------|
| User1 | Not applicable | Group1 |
| User2 | United States | Group2 |
| User3 | United States | Not applicable |

Group2 is a member of Group1.

You assign a Microsoft Office 365 Enterprise E3 license to User2 as shown in the following exhibit.

License options

Office 365 Enterprise E3

| | | |
|------------------------------------|------------------------------|--|
| Azure Rights Management | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Exchange Online (Plan 2) | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Flow for Office 365 | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Microsoft Forms (Plan E3) | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Microsoft Planner | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Microsoft StaffHub | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Microsoft Teams | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Office 365 ProPlus | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Office Online | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| PowerApps for Office 365 | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| SharePoint Online (Plan 2) | <input type="checkbox"/> Off | <input checked="" type="checkbox"/> On |
| Skype for Business Online (Plan 2) | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Stream for Office 365 | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Sway | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| To-Do (Plan 2) | <input type="checkbox"/> Off | <input type="checkbox"/> On |
| Yammer Enterprise | <input type="checkbox"/> Off | <input type="checkbox"/> On |

You assign Office 365 Enterprise E3 licenses to Group1 as shown in the following exhibit.

License options

Office 365 Enterprise E3

| | | |
|------------------------------------|---|--|
| Azure Rights Management | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Exchange Online (Plan 2) | <input type="checkbox"/> Off | <input checked="" type="checkbox"/> On |
| Flow for Office 365 | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Microsoft Forms (Plan E3) | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Microsoft Planner | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Microsoft StaffHub | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Microsoft Teams | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Office 365 ProPlus | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Office Online | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| PowerApps for Office 365 | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| SharePoint Online (Plan 2) | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Skype for Business Online (Plan 2) | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Stream for Office 365 | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Sway | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| To-Do (Plan 2) | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |
| Yammer Enterprise | <input checked="" type="checkbox"/> Off | <input type="checkbox"/> On |

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

| Statements | Yes | No |
|---|-----------------------|-----------------------|
| User1 is licensed to use Microsoft Exchange Online. | <input type="radio"/> | <input type="radio"/> |
| User1 is licensed to use Microsoft Exchange Online and Microsoft Share Point Online. | <input type="radio"/> | <input type="radio"/> |
| If you add User3 to Group2, the user will be licensed to use Microsoft Exchange Online. | <input type="radio"/> | <input type="radio"/> |

Answer:

Explanation: Group-based licensing currently does not support groups that contain other groups (nested groups). If you apply a license to a nested group, only the immediate first-level user members of the group have the licenses applied.

References:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-group-advanced>

NEW QUESTION 7

You have a Microsoft 365 tenant that contains Microsoft Exchange Online.

You plan to enable calendar sharing with a partner organization named adatum.com. The partner organization also has a Microsoft 365 tenant. You need to ensure that the calendar of every user is available to the users in adatum.com immediately. What should you do?

- A. From the Exchange admin center, create a sharing policy.
- B. From the Exchange admin center, create a new organization relationship
- C. From the Microsoft 365 admin center, modify the Organization profile settings.
- D. From the Microsoft 365 admin center, configure external site sharing.

Answer: B

Explanation: References:
<https://docs.microsoft.com/en-us/exchange/sharing/organization-relationships/create-an-organization-relationshi>

NEW QUESTION 8

Your organization has an on-premises Microsoft Exchange Server 2016 organization. The organization is in the company's main office in Melbourne. The main office has a low-bandwidth connection to the Internet. The organization contains 250 mailboxes. You purchase a Microsoft 365 subscription and plan to migrate to Exchange Online next month. In 12 months, you plan to increase the bandwidth available for the Internet connection. You need to recommend the best migration strategy for the organization. The solution must minimize administrative effort. What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. network upload
- B. cutover migration
- C. hybrid migration
- D. staged migration

Answer: C

NEW QUESTION 9

Your company has a Microsoft Office 365 subscription that contains the groups shown in the following table.

| Name | Members |
|--------|--------------|
| Group1 | User1, User2 |
| Group2 | User3 |

You have the licenses shown in the following table.

| License | Included service | Assigned to |
|---------------|-----------------------------|---------------------|
| Microsoft 365 | Microsoft Exchange Online | Group1 |
| Microsoft 365 | Microsoft SharePoint Online | User1, User2, User3 |

Another administrator removes User1 from Group1 and adds Group2 to Group1. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

| Statements | Yes | No |
|--|-----------------------|-----------------------|
| User1 is licensed for SharePoint Online. | <input type="radio"/> | <input type="radio"/> |
| User2 is licensed for SharePoint Online. | <input type="radio"/> | <input type="radio"/> |
| User3 is licensed for SharePoint Online. | <input type="radio"/> | <input type="radio"/> |

Answer:

Explanation: The users are assigned SharePoint licenses directly. Their group memberships have no effect on licenses directly assigned to the user accounts.

NEW QUESTION 10

You are configuring an enterprise application named TestApp in Microsoft Azure as shown in the following exhibit.

Test Application

Click here to verify application configuration.

Basic Settings

* Internal Url

External Url

Pre Authentication

Connector Group

Additional Settings

Backend Application Timeout

Use HTTP-Only-Cookie

Translate URLs In

Headers

Application Body

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

To ensure that when users access TestApp, the proxy automatically scans for internal URLs published through the Application Proxy, set [answer choice].

| |
|---|
| |
| Use Http-Only Cookie to Yes |
| Translate URLs in Headers to No |
| Translate URLs in Application Body to Yes |

To protect TestApp from Cross-Site Scripting (XSS), set [answer choice].

| |
|---|
| |
| Use Http-Only Cookie to Yes |
| Translate URLs in Headers to No |
| Translate URLs in Application Body to Yes |

Answer:

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy-configure-hard-coded-li>

NEW QUESTION 10

Your network contains an Active Directory domain named contoso.com. All users authenticate by using a third-party authentication solution. You purchase Microsoft 365 and plan to implement several Microsoft 365 services. You need to recommend an identity strategy that meets the following requirements:

- Provides seamless SSO
- Minimizes the number of additional servers required to support the solution
- Stores the passwords of all the users in Microsoft Azure Active Directory (Azure AD)
- Ensures that all the users authenticate to Microsoft 365 by using their on-premises user account You are evaluating the implementation of federation.

Which two requirements are met by using federation? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. minimizes the number of additional servers required to support the solution
- B. provides seamless SSO
- C. stores the passwords of all the users in Azure AD
- D. ensures that all the users authenticate to Microsoft 365 by using their on-premises user account.

Answer: BD

NEW QUESTION 14

Your network contains an Active Directory forest named local.

You have a Microsoft 365 subscription. You plan to implement a directory synchronization solution that will use password hash synchronization.

From the Microsoft 365 admin center, you verify the contoso.com domain name. You need to prepare the environment for the planned directory synchronization solution.

What should you do first?

- A. From the public DNS zone of contoso.com, add a new mail exchanger (MX) record.
- B. From Active Directory Domains and Trusts, add contoso.com as a UPN suffix
- C. From the Microsoft 365 admin center, verify the contoso.com domain name.
- D. From Active Directory Users and Computers, modify the UPN suffix for all users.

Answer: B

NEW QUESTION 19

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You add an app named App1 to the enterprise applications in contoso.com. You need to configure self-service for App1. What should you do first?

- A. Assign App1 to users and groups.
- B. Add an owner to App1.
- C. Configure the provisioning mode for App1.
- D. Configure an SSO method for App1.

Answer: A

Explanation: References:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/manage-self-service-access>

NEW QUESTION 21

Your company has a hybrid deployment of Microsoft 365.

Users authenticate by using pass-through authentication. Several Microsoft A/wt AD Connect Authentication Agents are deployed.

You need to verify whether all the Authentication Agents are used for authentication.

What should you do?

- A. From the Azure portal, use the Troubleshoot option on the Pass-through authentication page.
- B. From Performance Monitor, use the #PTA authentications counter.
- C. From the Azure portal use the Diagnostics settings on the Monitor blade.
- D. From Performance Monitor, use the Kerberos authentications counter.

Answer: A

NEW QUESTION 23

Your network contains an on-premises Active Directory domain. You have a Microsoft 365 subscription.

You implement a directory synchronization solution that uses pass-through authentication.

You configure Microsoft Azure Active Directory (Azure AD) smart lockout as shown in the following exhibit.

You discover that Active Directory users can use the passwords in the custom banned passwords list. You need to ensure that banned passwords are effective for all users.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From a domain controller, install the Azure AD Password Protection Proxy.
- B. From a domain controller, install the Microsoft AAD Application Proxy connector.
- C. From Custom banned passwords, modify the Enforce custom list setting.
- D. From Password protection for Windows Server Active Directory, modify the Mode setting.
- E. From all the domain controllers, install the Azure AD Password Protection DC Agent.
- F. From Active Directory, modify the Default Domain Policy.

Answer: ACE

NEW QUESTION 25

Your company has a main office and 20 branch offices in North America and Europe. Each branch office connects to the main office by using a WAN link. All the offices connect to the Internet and resolve external host names by using the main office connections.

You plan to deploy Microsoft 365 and to implement a direct Internet connection in each office.

You need to recommend a change to the infrastructure to provide the quickest possible access to Microsoft 365 services.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. For all the client computers in the branch offices, modify the MTU setting by using a Group Policy object (GPO).
- B. In each branch office, deploy a proxy server that has user authentication enabled.
- C. In each branch office, deploy a firewall that has packet inspection enabled.
- D. In each branch office, configure name resolution so that all external hosts are redirected to public DNS servers directly.

Answer: D

NEW QUESTION 29

Your network contains an Active Directory domain named contoso.com. The domain contains five domain controllers.

You purchase Microsoft 365 and plan to implement several Microsoft 365 services.

You need to identify an authentication strategy for the planned Microsoft 365 deployment. The solution must meet the following requirements:

- Ensure that users can access Microsoft 365 by using their on-premises credentials.
- Use the existing server infrastructure only.
- Store all user passwords on-premises only.
- Be highly available.

Which authentication strategy should you identify?

- A. pass-through authentication and seamless SSO
- B. pass-through authentication and seamless SSO with password hash synchronization
- C. password hash synchronization and seamless SSO
- D. federation

Answer: A

NEW QUESTION 30

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.
 You need to view a list of the features that were recently updated in the tenant.
 Solution: You review the Security & Compliance report in the Microsoft 365 admin center. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 33

You have a Microsoft 365 subscription.
 You use the Microsoft Office Deployment tool to install Office 365 ProPlus. You create a configuration file that contains the following settings.

```
<Configuration>
  <Add SourcePath="\\Server1\Office"
    OfficeClientEdition="32"
    Channel="Broad"
    AllowCdnFallback="False">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
      <Language ID="ja-jp" />
    </Product>
    <Product ID="VisioProRetail">
      <Language ID="en-us" />
      <Language ID="ja-jp" />
    </Product>
  </Add>
  <Remove All="TRUE">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
    </Product>
    <Product ID="VisioProRetail">
      <Language ID="en-us" />
    </Product>
  </Remove>
  <Updates Enabled="TRUE"
    UpdatePath="\\Server1\Office"
    Channel="Broad" />
  <Display Level="None" AcceptEULA="TRUE" />
  <Logging Level="Standard" Path="%temp%" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

The [answer choice] will be uninstalled from the computers.

| |
|---|
| ▼ |
| MSI version of Microsoft Visio only |
| C2R version of Microsoft Visio only |
| MSI and C2R versions of Microsoft Visio |

If the Office share on Server1 is missing the Japanese language pack, Office 365 ProPlus will [answer choice].

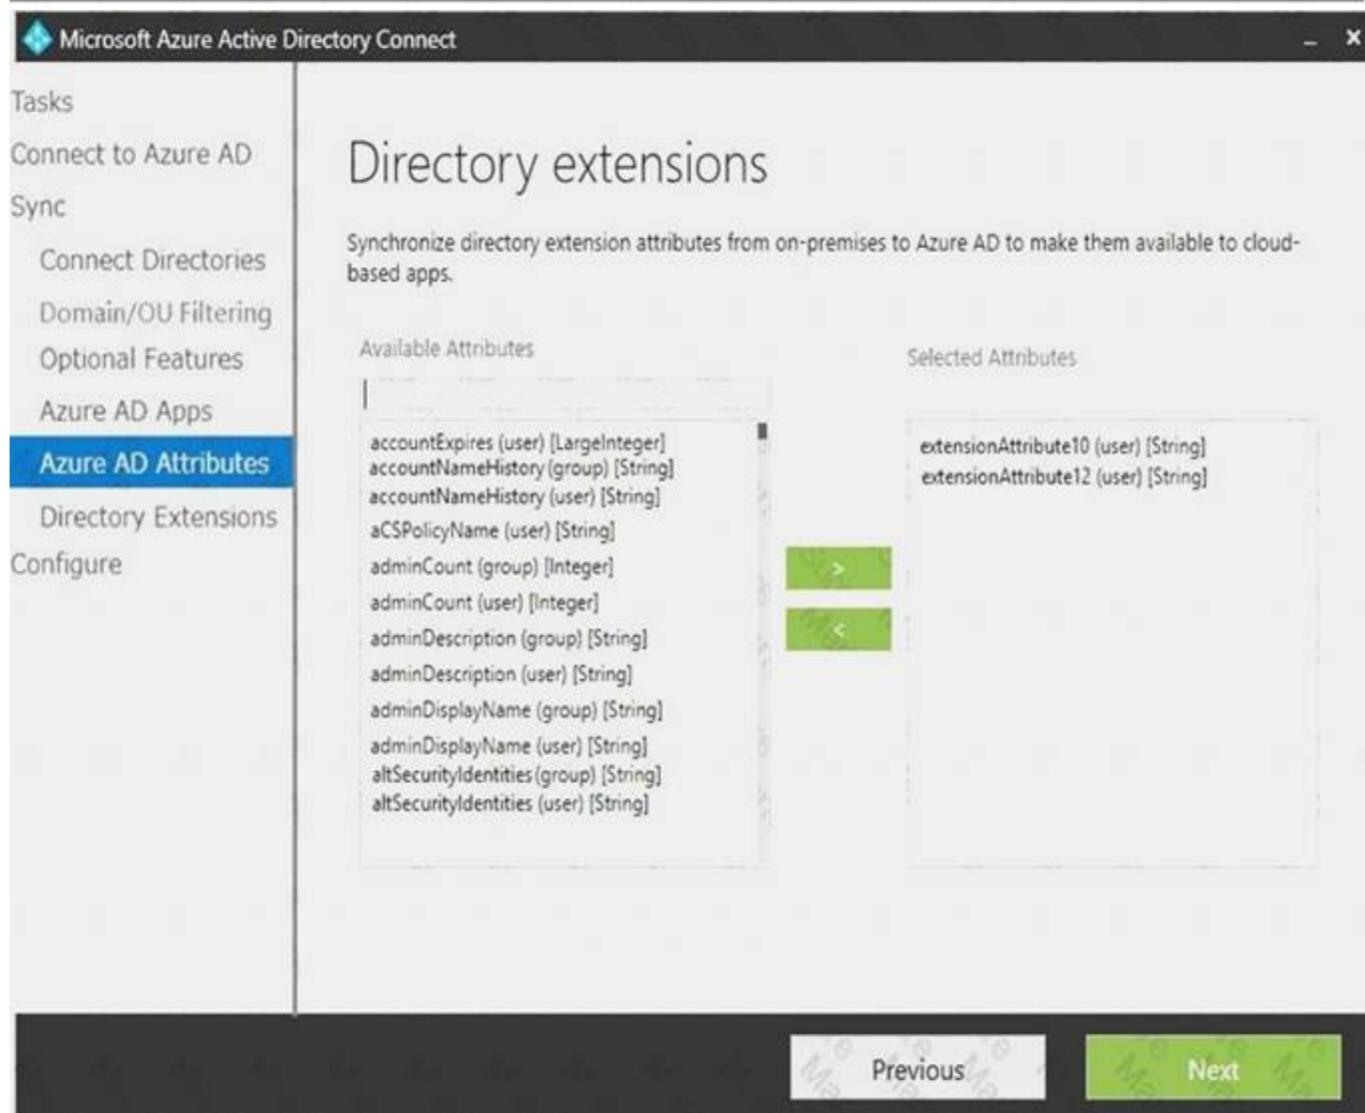

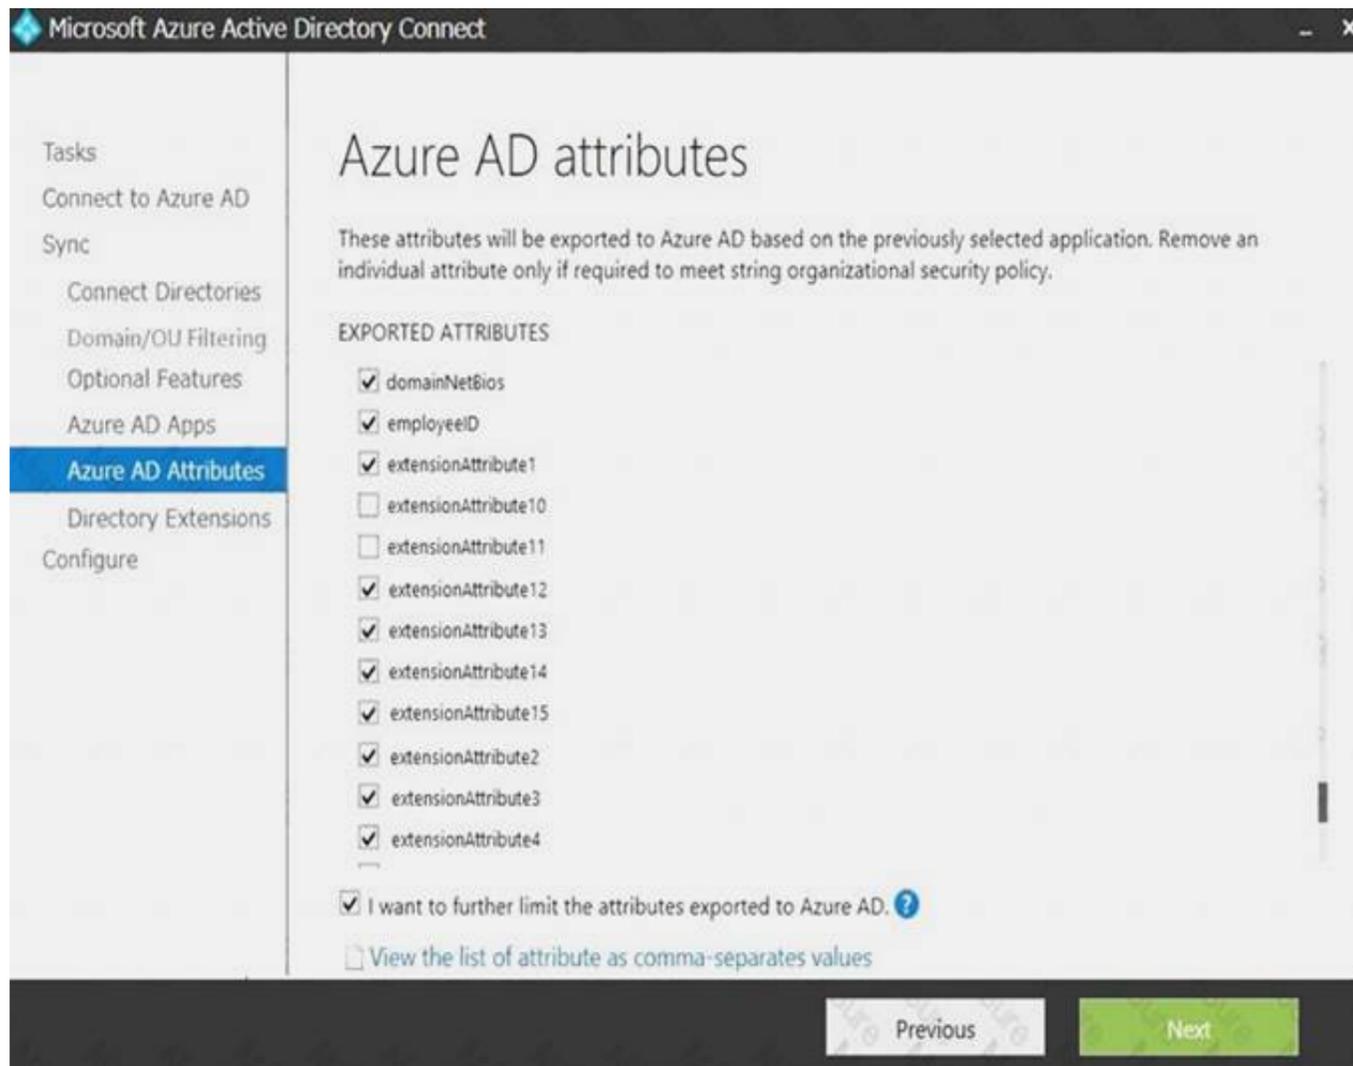

| |
|--|
| ▼ |
| be installed in English only |
| be installed in a randomly selected language |
| NOT be installed |

Answer:

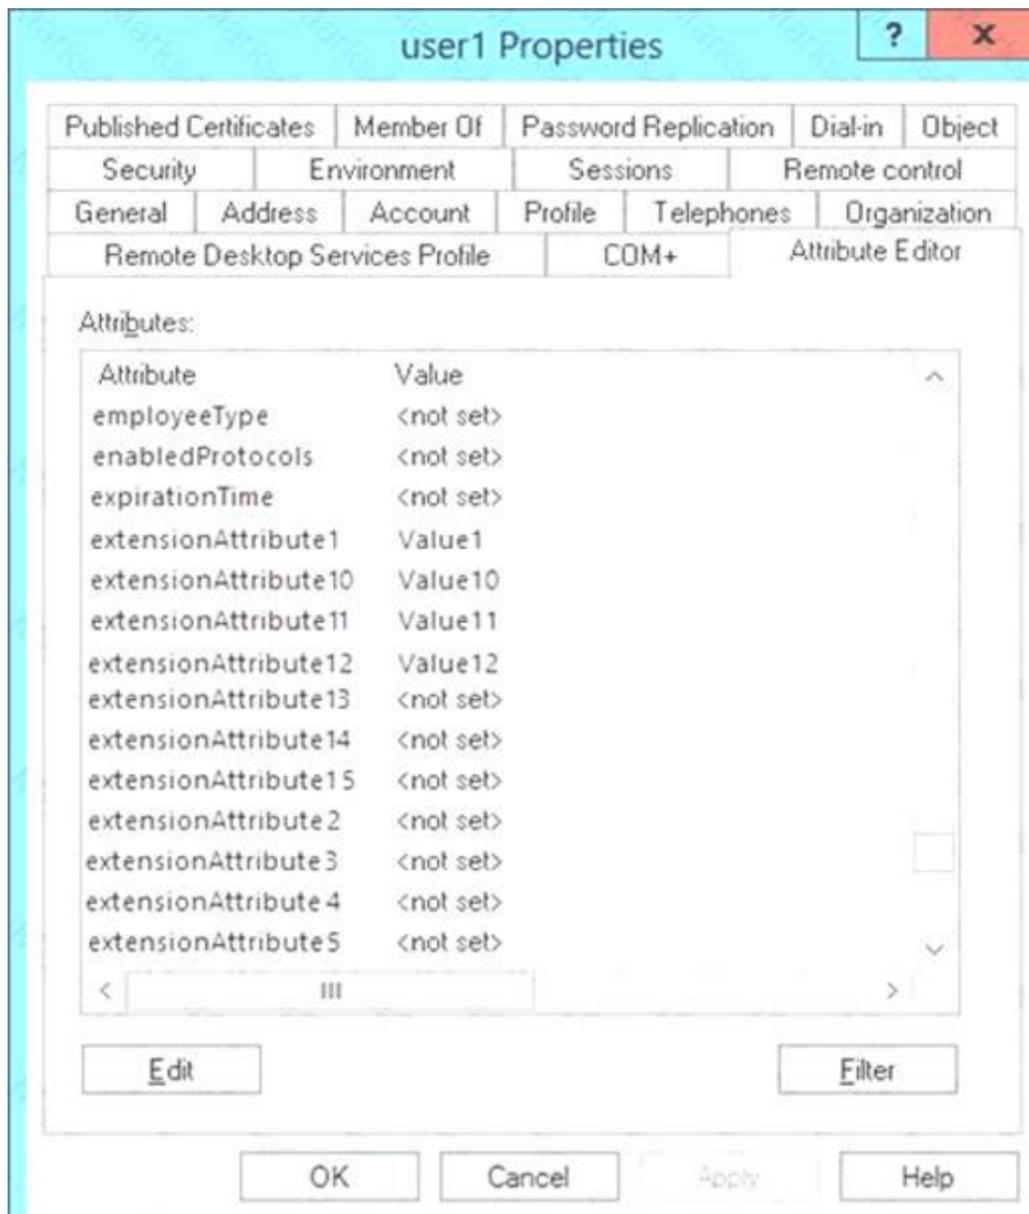

Explanation: References:
<https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool>

NEW QUESTION 37

Your network contains an on-premises Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD) as shown in the following two exhibits.

You create a user named User1 in Active Directory as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

| Statements | Yes | No |
|--|-----------------------|-----------------------|
| The value of extensionAttribute1 is synchronized to Azure AD. | <input type="radio"/> | <input type="radio"/> |
| The value of extensionAttribute10 is synchronized to Azure AD. | <input type="radio"/> | <input type="radio"/> |
| The value of extensionAttribute11 is synchronized to Azure AD. | <input type="radio"/> | <input type="radio"/> |
| The value of extensionAttribute12 is synchronized to Azure AD. | <input type="radio"/> | <input type="radio"/> |

Answer:

Explanation:

| Statements | Yes | No |
|--|----------------------------------|----------------------------------|
| The value of extensionAttribute1 is synchronized to Azure AD. | <input checked="" type="radio"/> | <input type="radio"/> |
| The value of extensionAttribute10 is synchronized to Azure AD. | <input checked="" type="radio"/> | <input type="radio"/> |
| The value of extensionAttribute11 is synchronized to Azure AD. | <input type="radio"/> | <input checked="" type="radio"/> |
| The value of extensionAttribute12 is synchronized to Azure AD. | <input checked="" type="radio"/> | <input type="radio"/> |

NEW QUESTION 39

Your network contains an on premises Active Directory domain named contoso.com. The domain contains five domain controllers. Your company purchases Microsoft 365 and creates a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. You plan to establish federation authentication between on premises Active Directory and the Azure AD tenant by using Active Directory Federation Services (AD FS). You need to establish the federation. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

Action to perform before establishing the federation:

- From the Azure portal, add a custom domain name.
- From the Azure portal, configure an authentication method.
- From a domain controller, install a Pass-through Authentication Agent.
- From a domain controller, install Windows Identity Foundation 3.5.

Tool to use to establish the federation:

- Active Directory Domains and Trusts
- Azure AD Connect
- The AD FS console
- The Azure portal

Answer:

Explanation:

Action to perform before establishing the federation:

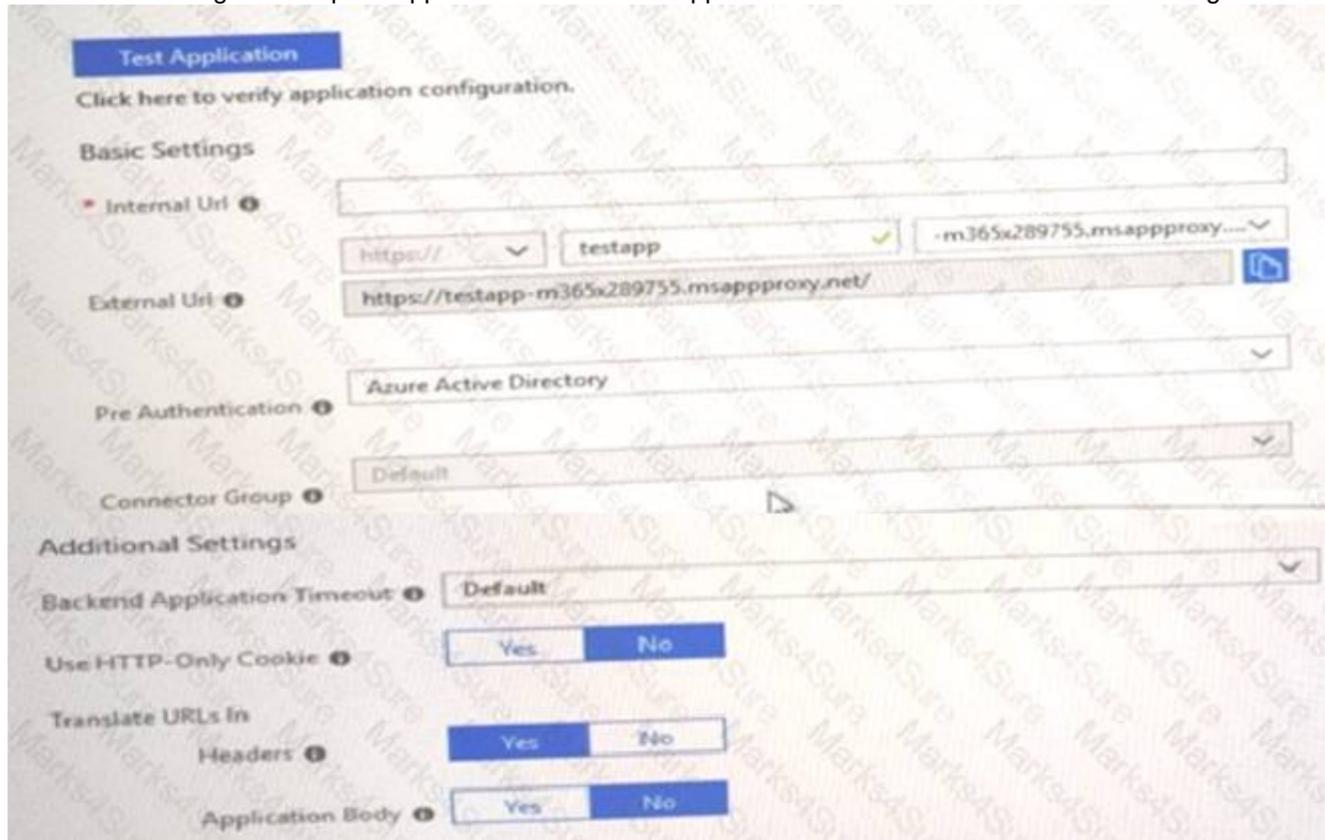

- From the Azure portal, add a custom domain name.
- From the Azure portal, configure an authentication method.
- From a domain controller, install a Pass-through Authentication Agent.
- From a domain controller, install Windows Identity Foundation 3.5.

Tool to use to establish the federation:

- Active Directory Domains and Trusts
- Azure AD Connect
- The AD FS console
- The Azure portal

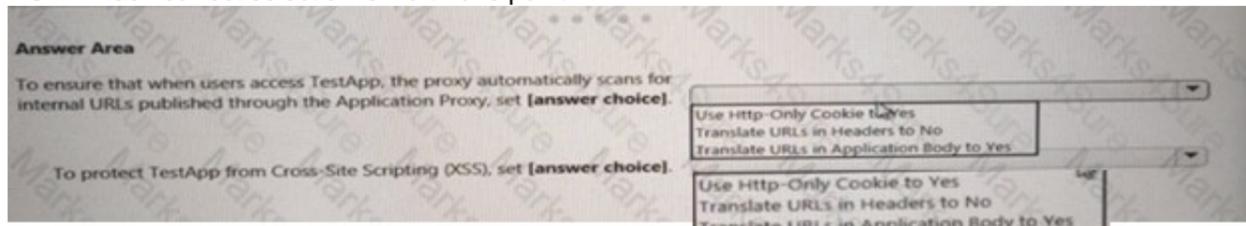

NEW QUESTION 40

You are confirming an enterprise application named Test App in Microsoft Azur as shown in the following exhibit.

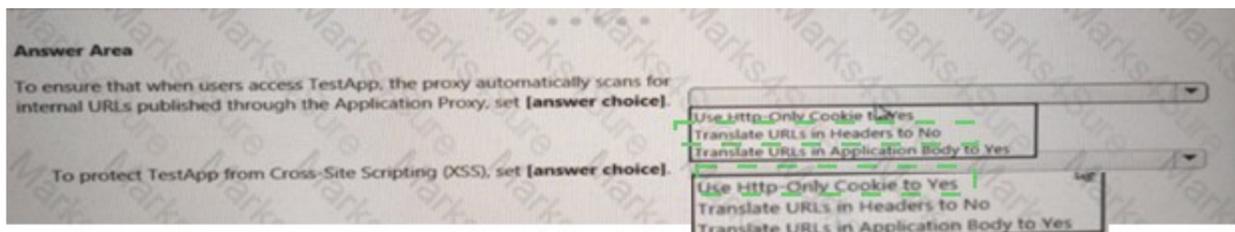

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION 42

Your company has a Microsoft 365 subscription. All identities are managed in the cloud. The company purchases a new domain name. You need to ensure that all new mailboxes use the new domain as their primary email address. What are two possible ways to achieve the goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. From Microsoft Exchange Online PowerShell, run the Update-EmailAddressPolicy policy command.
- B. From the Exchange admin center, click mail flow, and then configure the email address policies.
- C. From the Microsoft 365 admin center, click Setup, and then configure the domains.
- D. From Microsoft Exchange Online PowerShell, run the Set-EmailAddressPolicy policy command.
- E. From the Azure Active Directory admin center, configure the custom domain names.

Answer: BD

NEW QUESTION 45

Your company has three main offices and one branch office. The branch office is used for research. The company plans to implement a Microsoft 365 tenant and to deploy multi-factor authentication. You need to recommend a Microsoft 365 solution to ensure that multi-factor authentication is enforced only for users in the branch office. What should you include in the recommendation?

- A. Microsoft Azure Active Directory (Azure AD) conditional access.
- B. Microsoft Azure Active Directory (Azure AD) password protection.
- C. a device compliance policy
- D. a Microsoft Intune device configuration profile

Answer: A

NEW QUESTION 46

Your network contains the servers shown in the following table.

| Server name | Software | Configuration |
|-------------|----------------------------------|-------------------|
| Server1 | Windows Server 2008 | Domain controller |
| Server2 | Windows Server 2012 | Domain controller |
| Server3 | Microsoft Exchange Server 2007 | Not applicable |
| Server4 | Microsoft SharePoint Server 2010 | Not applicable |
| Server5 | Microsoft Lync Server 2013 | Not applicable |

You purchase Microsoft 365 Enterprise E5 and plan to move all workloads to Microsoft 365 by using a hybrid identity solution and a hybrid deployment for all workloads.

You need to identify which server must be upgraded before you move to Microsoft 365. What should you identify?

- A. Server 2
- B. Server 3
- C. Server 5
- D. Server 1
- E. Server 4

Answer: B

NEW QUESTION 48

Your company has 500 client computers that run Windows 10. You plan to deploy Microsoft Office 365 ProPlus to all the computers. You create the following XML file for the planned deployment.

```
<Configuration>
  <Add OfficeClientEdition="64" Channel="Broad" ForceUpgrade="TRUE">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us"/>
      <ExcludeApp ID="Groove"/>
      <ExcludeApp ID="Publisher"/>
    </Product>
  </Add>
  <Updates Enabled="TRUE" Channel="Broad" Deadline="03/31/2019, 00:00"
  UpdatePath="\\sccm\updates"/>
  <Display Level="Full" AcceptEULA="TRUE"/>
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

When the installation is complete [answer choice].

| |
|--|
| |
| all users will be prompted to accept the EULA |
| all users will be prompted to install several updates |
| all semi-channel updates will be installed automatically |

Office 365 ProPlus will [answer choice].

| |
|--|
| |
| include Microsoft OneDrive for Business and Microsoft Outlook only |
| be installed on all the computers |
| be installed only on the computers that run a 64-bit version of Windows 10 |

Answer:

Explanation:

When the installation is complete [answer choice].

| |
|--|
| |
| all users will be prompted to accept the EULA |
| all users will be prompted to install several updates |
| all semi-channel updates will be installed automatically |

Office 365 ProPlus will [answer choice].

| |
|--|
| |
| include Microsoft OneDrive for Business and Microsoft Outlook only |
| be installed on all the computers |
| be installed only on the computers that run a 64-bit version of Windows 10 |

NEW QUESTION 50

You create a Microsoft 365 subscription.

You plan to deploy Microsoft Office 365 ProPlus applications to all the client computers at your company. You prepare the following XML file for the planned deployment.

```
<Configuration>
  <Add OfficeClientEdition="32"
  Channel="Broad">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
    </Product>
  </Add>
  <Updates Enabled="TRUE"
  UpdatePath=""
  Channel="Targeted" />
  <Display Level="None"
  AcceptEULA="TRUE" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

Office 365 ProPlus feature updates will be installed [answer choice].

| |
|-----------------------|
| ▼ |
| once a month |
| once every six months |
| once a year |

Office 365 ProPlus security updates will be installed [answer choice].

| |
|---|
| ▼ |
| once a month |
| every six months in January and July |
| every six months in March and September |

Answer:

Explanation: References:

<https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool#update> <https://docs.microsoft.com/en-us/deployoffice/overview-of-update-channels-for-office-365-proplus>

NEW QUESTION 52

Your company has a Microsoft 365 subscription.

You plan to move several archived PST files to Microsoft Exchange Online mailboxes. You need to create an import job for the PST files.

Which three actions should you perform before you create the import job? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a Microsoft Azure Storage account.
- B. From Security & Compliance, retrieve the SAS key.
- C. Run azcopy.exe to copy the PST files to Microsoft Azure Storage
- D. Use Microsoft Azure Storage Explorer to copy the PST files to Azure Storage.
- E. Create a PST import mapping file.

Answer: BCE

Explanation: References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/use-network-upload-to-import-pst-files>

NEW QUESTION 57

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You use the View service requests option in the Microsoft 365 admin center. Does this meet the goal?

- A. Yes
- B. NO

Answer: B

NEW QUESTION 59

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com that contains the users shown in the following table.

| Name | Role |
|-------|------------------------|
| User1 | Password administrator |
| User2 | Security administrator |
| User3 | User administrator |
| User4 | None |

You need to identify which users can perform the following administrative tasks:

- Reset the password of User4.
- Modify the value for the manager attribute of User4.

Which users should you identify for each task? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Reset the password of User4:

| |
|-------------------------|
| ▼ |
| User1 only |
| User2 only |
| User1 and User2 only |
| User1 and User3 only |
| User1, User2, and User3 |

Modify the value for the manager attribute of User4:

| |
|-------------------------|
| ▼ |
| User1 only |
| User2 only |
| User3 only |
| User1 and User3 only |
| User1, User2, and User3 |

Answer:

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles>

NEW QUESTION 60

Your company has a Microsoft Azure Active Directory (Azure AD) directory tenant named contoso.onmicrosoft.com. All users have client computers that run Windows 10 Pro and are joined to Azure AD. The company purchases a Microsoft 365 E3 subscription. You need to upgrade all the computers to Windows 10 Enterprise. The solution must minimize administrative effort. You assign licenses from the Microsoft 365 admin center. What should you do next?

- A. Add a custom domain name to the subscription.
- B. Deploy Windows 10 Enterprise by using Windows Autopilot.
- C. Create provisioning package, and then deploy the package to all the computers.
- D. Instruct all the users to log off of their computer, and then to log in again.

Answer: B

NEW QUESTION 63

Your company has an on-premises Microsoft Exchange Server 2013 organization. The company has 100 users. The company purchases Microsoft 365 and plans to move its entire infrastructure to the cloud. The company does NOT plan to sync the on-premises Active Directory domain to Microsoft Azure Active Directory (Azure AD). You need to recommend which type of migration to use to move all email messages, contacts, and calendar items to Exchange Online. What should you recommend?

- A. cutover migration
- B. IMAP migration
- C. remote move migration
- D. staged migration

Answer: A

Explanation: References:
<https://docs.microsoft.com/en-us/exchange/mailbox-migration/cutover-migration-to-office-365>

NEW QUESTION 64

You have a Microsoft 365 subscription. You need to prevent phishing email messages from being delivered to your organization. What should you do?

- A. From the Exchange admin center, create an anti-malware policy.
- B. From Security & Compliance, create a DLP policy.
- C. From Security & Compliance, create a new threat management policy.
- D. From the Exchange admin center, create a spam filter policy.

Answer: C

Explanation: References:
<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-anti-phishing-policies>

NEW QUESTION 65

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com that contains a user named User1. You suspect that an imposter is signing in to Azure AD by using the credentials of User1. You need to ensure that an administrator named Admin1 can view all the sign in details of User 1 from the

past 24 hours.

To which three roles should you add Admin1? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Security administrator
- B. Password administrator
- C. User administrator
- D. Compliance administrator

Answer: ABC

NEW QUESTION 69

You recently migrated your on-premises email solution to Microsoft Exchange Online and are evaluating which licenses to purchase. You want the members of two groups named IT and Managers to be able to use the features shown in the following table.

| Feature | Available to |
|--|--------------------------|
| Microsoft Azure Active Directory (Azure AD) conditional access | IT group, Managers group |
| Microsoft Azure Active Directory (Azure AD) Privileged Identity Management | IT group |

The IT group contains 50 users. The Managers group contains 200 users.

You need to recommend which licenses must be purchased for the planned solution. The solution must minimize licensing costs.

Which licenses should you recommend?

- A. 250 Microsoft 365 E3 only
- B. 50 Microsoft 365 E 3 and 200 Microsoft 365 E5
- C. 250 Microsoft 365 E5 only
- D. 200 Microsoft 365 E3 and 50 Microsoft 365 E5

Answer: D

NEW QUESTION 73

You have an on premises web application that is published by using a URL of <https://app.contoso.local>. You purchase a Microsoft 36S subscription. Several external users must be able to connect to the web application

You need to recommend a solution for external access to the application. The solution must support multi-factor authentication.

Which two actions should you recommend? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From an on-premises server, install a connector, and then publish the app.
- B. From the Azure Active Directory admin center, enable an Application Proxy.
- C. From the Azure Active Directory admin center, create a conditional access policy.
- D. From an on premises server, install an Authentication Agent.
- E. Republish the web-application by using <http://app.contoso.com>

Answer: AB

Explanation: References:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy-add-on-premises-applic>

NEW QUESTION 77

Your company has a Microsoft 365 subscription.

You need to identify all the users in the subscription who are licensed for Microsoft Office 365 through a group membership. The solution must include the name of the group used to assign the license.

What should you use?

- A. the Licenses blade in the Azure portal
- B. Reports in the Microsoft 365 admin center
- C. Active users in the Microsoft 365 admin center
- D. Report in Security & Compliance

Answer: A

NEW QUESTION 82

Your network contains an Active Directory domain named contoso.com. You have a Microsoft 365 subscription.

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. You implement directory synchronization.

The developers at your company plan to build an app named App1. App1 will connect to the Microsoft Graph API to provide access to several Microsoft Office 365 services.

You need to provide the URI for the authorization endpoint that App1 must use. What should you provide?

- A. <https://login.microsoftonline.com/>
- B. <https://contoso.com/contoso.onmicrosoft.com/app1>
- C. <https://login.microsoftonline.com/contoso.onmicrosoft.com/>
- D. <https://myapps.microsoft.com>

Answer: C

NEW QUESTION 83

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes the users shown in the following table.

| Name | Usage location | Membership |
|-------|----------------|----------------|
| User1 | United States | Group1, Group2 |
| User2 | Not applicable | Group2 |
| User3 | Not applicable | Group1 |
| User4 | Canada | Group1 |

Group2 is a member of Group1.

You assign a Microsoft Office 365 Enterprise E3 license to Group1. You need to identify how many Office 365 E3 licenses are assigned. What should you identify?

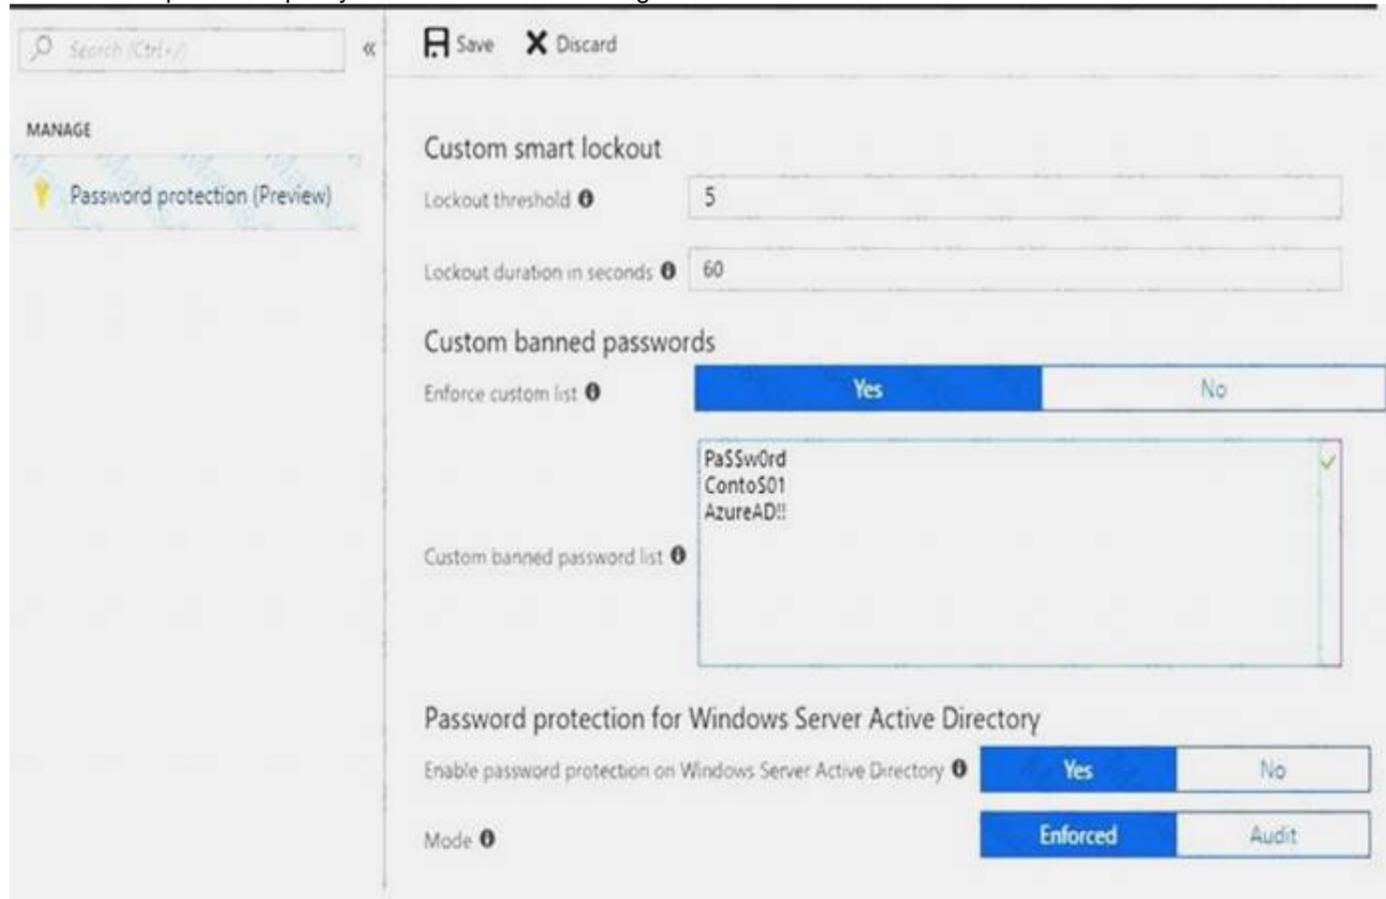

- A. 1
- B. 2
- C. 3
- D. 4

Answer: C

NEW QUESTION 85

You have a Microsoft 365 Enterprise subscription.

You create a password policy as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

If users are locked out of their account, they have [answer choice].

- five sign-in attempts each subsequent minute
- one sign-in attempt each subsequent minute
- five sign-in attempts every five minutes
- one sign-in attempt every five minutes

Users can create a password of [answer choice].

- Password11
- Conto\$01PaSSword
- AzureAD!!111
- paSSw0rd

Answer:

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad>

NEW QUESTION 88

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You use Message center in the Microsoft 365 admin center.

Does this meet the goal?

- A. Yes
- B. NO

Answer: A

NEW QUESTION 90

Your Network contains an on-premises Active Directory domain named contoso.local. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates a Microsoft Azure Active Directory (Azure AD) tenant named .contoso.onmicrosoft.com.

You plan to implement pass-through authentication.

You need to prepare the environment for the planned implementation of pass-through authentication. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Modify the email address attribute for each user account.
- B. From the Azure portal, add a custom domain name.
- C. From Active Directory Domains and Trusts, add a UPN suffix.
- D. Modify the User logon name for each user account.
- E. From the Azure portal, configure an authentication method.
- F. From a domain controller, install an authentication Agent.

Answer: BCD

NEW QUESTION 93

Your company has a Microsoft 365 subscription that has multi-factor authentication configured for all users. Users on the network report that they are prompted for multi-factor authentication multiple times a day.

You need to reduce the number of times the users are prompted for multi-factor authentication on their company-owned devices. What should you do?

- A. Enable the multi-factor authentication trusted IPs setting, and then verify each device as a trusted device.
- B. Enable the remember multi-factor authentication setting, and then verify each device as a trusted device.
- C. Enable the multi-factor authentication trusted IPs setting, and then join all client computers to Microsoft Azure Active Directory (Azure AD).
- D. Enable the remember multi-factor authentication setting, and then join all client computers to Microsoft Azure Active Directory (Azure AD).

Answer: B

Explanation: References:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfa-mfasettings>

NEW QUESTION 98

Your company has a Microsoft 365 subscription and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

An external vendor has a Microsoft account that has a username of user1@outlook.com. You plan to provide user1@outlook.com with access to several resources in the subscription.

You need to add the external user account to contoso.onmicrosoft.com. The solution must ensure that the external vendor can authenticate by using user1@outlook.com.

What should you do?

- A. From Azure Cloud Shell, run the New-AzureADUser cmdlet and specify –UserPrincipalName user1@outlook.com.
- B. From the Microsoft 365 admin center, add a contact, and then specify user1@outlook.com as the email address.
- C. From the Azure portal, add a new guest user, and then specify user1@outlook.com as the email address.
- D. From the Azure portal, add a custom domain name, and then create a new Azure AD user and use user1@outlook.com as the username.

Answer: C

NEW QUESTION 102

You have a Microsoft 365 subscription that contains several Microsoft SharePoint Online sites. You discover that users from your company can invite external users to access files on the SharePoint sites. You need to ensure that the company users can invite only authenticated guest users to the sites. What should you do?

- A. From the Microsoft 365 admin center, configure a partner relationship.
- B. From SharePoint Online Management Shell, run the set-SPOSite cmdlet.
- C. From the Azure Active Directory admin center, configure a conditional access policy.
- D. From the SharePoint admin center, configure the sharing settings.

Answer: D

NEW QUESTION 106

Your company has an on-premises Microsoft Exchange Server 2016 organization and a Microsoft 365 Enterprise subscription. You plan to migrate mailboxes and groups to Exchange Online.

You start a new migration batch.

Users report *low performance when they use the on premises Exchange Server organization. You discover that the migration is causing the slow performance. You need to reduce the impact of the mailbox migration on the end-users. What should you do?

- A. Create a mail flow rule.
- B. Configure back pressure
- C. Modify the migration endpoint setting
- D. Create a throttling policy.

Answer: C

Explanation: You can reduce the maximum number of concurrent mailbox migrations.

NEW QUESTION 108

You have a Microsoft 365 subscription. All users have client computers that run Windows 10 and have Microsoft Office 365 ProPlus installed. Some users in the research department work for extended periods of time without an Internet connection. How many days can the research department users remain offline before they are prevented from editing Office documents?

- A. 10
- B. 30
- C. 90
- D. 120

Answer: B

NEW QUESTION 111

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest. You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- Users passwords must be 10 characters or more.

Solution: Implement password hash synchronization and configure password protection in the Azure AD tenant.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 114

Your company has a Microsoft 365 subscription.

You upload several archive PST files to Microsoft 365 by using the Security & Compliance admin center. A month later, you attempt to run an import job for the PST files.

You discover that the PST files were deleted from Microsoft 365.

What is the most likely cause of the files being deleted? More than one answer choice may achieve the goal. Select the BEST answer.

- A. The PST files were corrupted and deleted by Microsoft 365 security features.
- B. PST files are deleted automatically from Microsoft 365 after 30 days.
- C. The size of the PST files exceeded a storage quota and caused the files to be deleted.
- D. Another administrator deleted the PST files.

Answer: B

Explanation: References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365>

NEW QUESTION 119

You create a Microsoft 365 Enterprise subscription. You assign licenses for all products to all users.

You need to ensure that all Microsoft Office 365 ProPlus installations occur from a network share. The solution must prevent the users from installing Office 365 ProPlus from the Internet.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From your computer, run setup.exe /download downloadconfig.xml.
- B. Create an XML download file.
- C. From the Microsoft 365 admin center, deactivate the Office 365 licenses for all the users.
- D. From each client computer, run setup.exe /configure installconfig.xml.
- E. From the Microsoft 365 admin center, configure the Software download settings.

Answer: BDE

Explanation: References:

<https://docs.microsoft.com/en-us/deployoffice/overview-of-the-office-2016-deployment-tool#download-the-inst>

NEW QUESTION 122

Your network contains an Active Directory forest named adatum.local. The forest contains 500 users and uses adatum.com as a UPN suffix. You deploy a Microsoft 365 tenant. You implement directory synchronization and sync only 50 support users. You discover that five of the synchronized users have usernames that use a UPN suffix of onmicrosoft.com. You need to ensure that all synchronized identities retain the UPN set in their on-premises user account. What should you do?

- A. From the Microsoft 365 admin center, add adatum.com as a custom domain name.
- B. From Windows PowerShell, run the Set-ADDomain –AllowedDNSSuffixes adatum.com command.
- C. From Active Directory Users and Computers, modify the UPN suffix of the five user accounts.
- D. From the Microsoft 365 admin center, add adatum.local as a custom domain name.

Answer: C

NEW QUESTION 123

Your network contain*, an on-premises Active Directory forest. You are evaluating the implementation of Microsoft 365 and the deployment of authentication strategy. You need to recommend an authentication strategy that meets the following requirements:

- Allows users to sign in by using smart card-based certificates
- Allows users to connect to on premises and Microsoft 365 services by using SSO Which authentication strategy should you recommend?

- A. password hash synchronization and seamless SSO
- B. federation with Active Directory Federation Services (AD FS)
- C. pass-through authentication and seamless SSO

Answer: B

Explanation: References:
<https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn>

NEW QUESTION 128

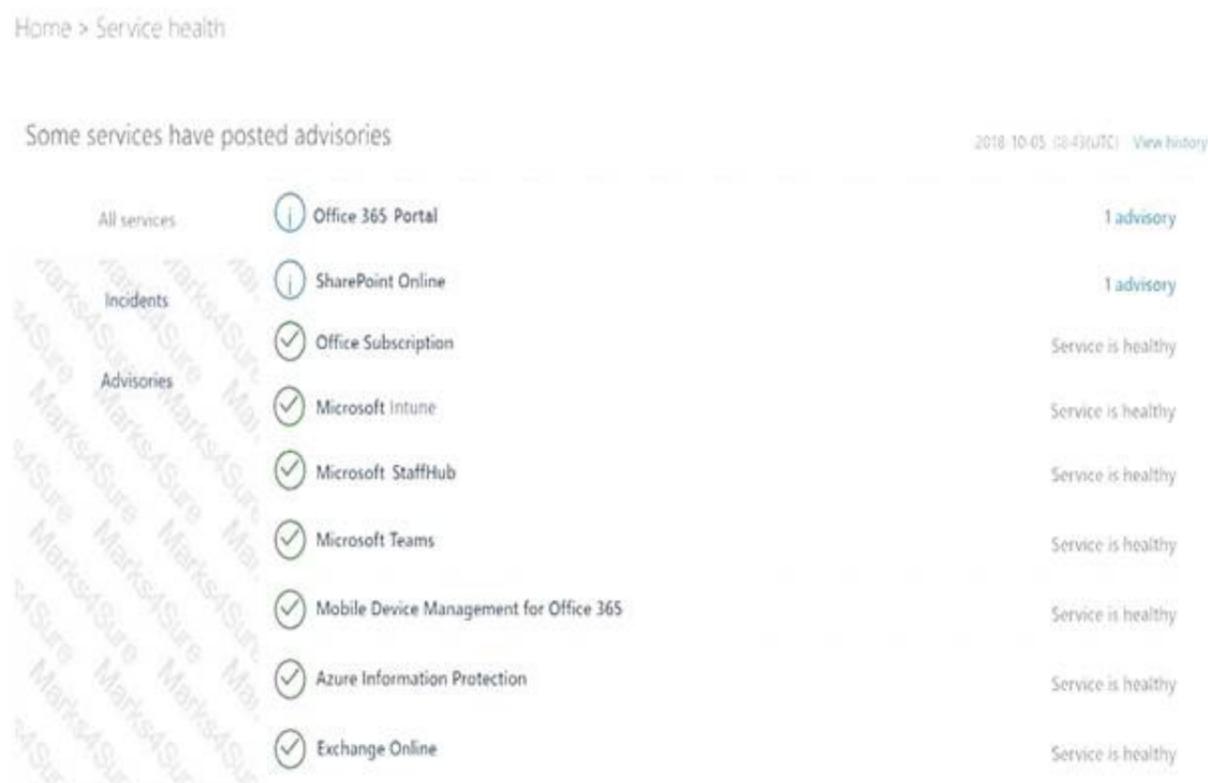

Your network contains three Active Directory forests. You create a Microsoft Azure Active Directory (Azure AD) tenant. You plan to sync the on premises Active Directory (Azure AD). You need to recommend a synchronization solution. The solution must ensure that the synchronization can complete successfully and as quickly as possible if a single server fails. What should you include in the recommendation?

- A. Three Azure AD Connect sync servers and three Azure AD Connect sync servers in staging mode
- B. One Azure AD Connect sync servers one Azure AD Connect sync servers in staging mode
- C. Three Azure AD Connect sync servers and one Azure AD Connect sync servers in staging mode
- D. six Azure AD Connect sync servers and three Azure AD Connect sync servers in staging mode

Answer: B

NEW QUESTION 133

You have a Microsoft 365 subscription. You view the service advisories shown in the following exhibit.

You need to ensure that users who administer Microsoft SharePoint Online can view the advisories to investigate health issues. Which role should you assign to the users?

- A. SharePoint administrator
- B. Message Center reader
- C. Reports reader

D. Service administrator

Answer: D

Explanation: References:
<https://docs.microsoft.com/en-us/office365/admin/add-users/about-admin-roles?view=o365-worldwide>

NEW QUESTION 138

Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant. You implement directory synchronization for all 10,000 users in the organization. You automate the creation of 100 new user accounts. You need to ensure that the new user accounts synchronize to Azure AD as quickly as possible. Which command should you run? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

| | | |
|-------------------------|-------------|---------|
| | -PolicyType | |
| Start-ADSyncSyncCycle | | Delta |
| Set-ADSyncScheduler | | Initial |
| Invoke-ADSyncRunProfile | | Full |

Answer:

Explanation:

Answer Area

| | | |
|-------------------------|-------------|---------|
| | -PolicyType | |
| Start-ADSyncSyncCycle | | Delta |
| Set-ADSyncScheduler | | Initial |
| Invoke-ADSyncRunProfile | | Full |

NEW QUESTION 141

Your network contains an Active Directory domain named .Ki.ituin.com that is synced to Microsoft Azure Active Directory (Azure AD). The domain contains 100 user accounts. The city attribute for all the users is set to the city where the user resides. You need to modify the value of the city attribute to the three letter airport code of each city. What should you do?

- A. from Active Directory Administrative Center, select the Active Directory users, and then modify the Property settings.
- B. From the Microsoft 365 admin center, select the users, and then use the Bulk actions option.
- C. From Azure Cloud Shell, run the Get-AzureADUsers, and then use the Bulk actions option.
- D. From Azure Cloud Shell, run the Get-AzureADUser and set-AzureADUser cmdlets.
- E. From Windows PowerShell on a domain controller, run the Get-AzureADUser and Set-AzureADUser cmdlets.

Answer: A

NEW QUESTION 143

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has a Microsoft Office 365 tenant. You suspect that several Office 365 features were recently updated. You need to view a list of the features that were recently updated in the tenant. Solution: You use Dashboard in Security & Compliance. Does this meet the goal?

- A. Yes
- B. NO

Answer: B

NEW QUESTION 146

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your network contains an Active Directory forest. You deploy Microsoft 365. You plan to implement directory synchronization. You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- Users passwords must be 10 characters or more.

Solution: Implement pass-through authentication and configure password protection in the Azure AD tenant. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 151

Your company has a Microsoft 365 subscription. Your plan to add 100 newly hired temporary users to the subscription next week. You create the user accounts for the new users. You need to assign licenses to the new users. Which command should you run?

```
A. $NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "";
   $NewStaff | foreach {Set-AzureADUser -LicenseOptions "contoso:ENTERPRISEPACK"}

B. $NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "US" -UnlicensedUsersOnly;
   $NewStaff | foreach {Set-AzureADUserLicense -AddLicenses "contoso:ENTERPRISEPACK"}

C. $NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "";
   $NewStaff | foreach {Set-AzureADUserLicense -LicenseOptions "contoso:ENTERPRISEPACK"}

D. $NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "US" -UnlicensedUsersOnly;
   $NewStaff | foreach {Set-AzureADUser -AddLicenses "contoso:ENTERPRISEPACK"}
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: B

Explanation: Topic 2, Contoso, Ltd

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York. The offices have the users and devices shown in the following table.

| Office | Users | Laptops | Desktops | Mobile devices |
|----------|-------|---------|----------|----------------|
| Montreal | 2,500 | 2,800 | 300 | 3,100 |
| Seattle | 1,000 | 1,100 | 200 | 1,500 |
| New York | 300 | 320 | 30 | 400 |

Contoso recently purchased a Microsoft 365 E5 subscription.

Existing Environment

The network contains an Active directory forest named contoso.com and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. You recently configured the forest to sync to the Azure AD tenant. You add and then verify adatum.com as an additional domain name. All servers run Windows Server 2016.

All desktop computers and laptops run Windows 10 Enterprise and are joined to contoso.com.

All the mobile devices in the Montreal and Seattle offices run Android. All the mobile devices in the New York office run iOS.

Contoso has the users shown in the following table.

| Name | Role |
|-------|----------------------------------|
| User1 | None |
| User2 | None |
| User3 | Customer Lockbox access approver |
| User4 | None |

Contoso has the groups shown in the following table.

| Name | Type | Membership rule |
|---------|----------|---------------------------------|
| Group1 | Assigned | Not applicable |
| Group 2 | Dynamic | (user.department -eq "Finance") |

Microsoft Office 365 licenses are assigned only to Group2.

The network also contains external users from a vendor company who have Microsoft accounts that use a suffix of @outlook.com.

Requirements Planned Changes

Contoso plans to provide email addresses for all the users in the following domains:

- East.adatum.com

- ▶ Contoso.adatum.com
- ▶ Humongousinsurance.com

Technical Requirements

Contoso identifies the following technical requirements:

- ▶ All new users must be assigned Office 365 licenses automatically.
- ▶ The principle of least privilege must be used whenever possible.

Security Requirements

Contoso identifies the following security requirements:

- ▶ Vendors must be able to authenticate by using their Microsoft account when accessing Contoso resources.
- ▶ The members of Group1 must be required to answer a security question before changing their password.
- ▶ User3 must be able to manage Office 365 connectors.
- ▶ User4 must be able to reset User3 password.

NEW QUESTION 153

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to assign User2 the required roles to meet the security requirements. Solution: From the Office 365 admin center, you assign User2 the Security Reader role. From the Exchange admin center, you assign User2 the Help Desk role.

Does this meet the goal?

- A. Yes
- B. NO

Answer: B

NEW QUESTION 157

You need to Add the custom domain name* to Office 365 K> support the planned changes as quickly as possible.

What should you create to verify the domain names successfully?

- A. three alias (CNAME) record
- B. one text (TXT) record
- C. one alias (CNAME) record
- D. three text (TXT) record

Answer: D

NEW QUESTION 160

You need to meet the technical requirements for the user licenses.

Which two properties should you configure for each user? To answer, select the appropriate properties in the answer area.

NOTE: Each correct selection is worth one point.

Identity

NEW QUESTION 161

To which Azure AD role should you add User4 to meet the security requirement?

- A. Password administrator
- B. Global administrator
- C. Security administrator
- D. Privileged role administrator

Answer: B

NEW QUESTION 166

You need to meet the security requirements for User3. The solution must meet the technical requirements. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to use to add User3 to the role:

Role to assign to User3:

Answer:

Explanation: References:

<https://docs.microsoft.com/en-us/office365/SecurityCompliance/eop/feature-permissions-in-eop>

NEW QUESTION 167

You need to meet the security requirement for the vendors. What should you do?

- A. From the Azure portal, add an identity provider.
- B. From Azure Cloud Shell, run the New-AzureADUser cmdlet and specify the –UserPrincipalName parameter.
- C. From the Azure portal, create guest accounts.
- D. From Azure Cloud Shell, run the New-AzureADUser cmdlet and specify the –UserType parameter.

Answer: C

NEW QUESTION 168

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to assign User2 the required roles to meet the security requirements.

Solution: From the Office 365 admin center, you assign User2 the Security Reader role. From the Exchange admin center, you assign User2 the Compliance Management role.

Does this meet the goal?

- A. Yes
- B. NO

Answer: A

NEW QUESTION 169

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to assign User2 the required roles to meet the security requirement.

Solution: From the Office 365 admin center, you assign User2 the Records Management role. From the Exchange 365 admin center, you assign User2 the Help Desk role.

Does that meet the goal?

- A. Yes
- B. NO

Answer: B

NEW QUESTION 173

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to assign User2 the required roles to meet the security requirements.

Solution: From the Office 365 admin center, you assign User2 the Security Administrator role. From the Exchange admin center, you add User2 to the View-Only Management role.

Does this meet the goal?

- A. Yes
- B. NO

Answer: B

Explanation: Topic 3, Fabrikam, Inc

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Overview

Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide.

Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States.

Existing Environment

Active Directory Environment

The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication.

Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts.

All users authenticate to on-premises applications by signing in to their device by using a UPN format of

username@fabrikam.com.

Fabrikam does NOT plan to implement identity federation.

Network Infrastructure

Each office has a high-speed connection to the Internet.

Each office contains two domain controllers. All domain controllers are configured as a DNS server. The public zone for fabrikam.com is managed by an external DNS server.

All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed.

All shared company documents are stored on a Microsoft SharePoint Server farm.

Requirements Planned Changes

Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription.

Fabrikam plans to implement two pilot projects:

- ▶ Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
 - ▶ Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.
- Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

Technical Requirements

Fabrikam identifies the following technical requirements:

- ▶ All users must be able to exchange email messages successfully during Project1 by using their current email address.
- ▶ Users must be able to authenticate to cloud services if Active Directory becomes unavailable.
- ▶ A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.
- ▶ Microsoft Office 365 ProPlus applications must be installed from a network share only.
- ▶ Disruptions to email address must be minimized.

Application Requirements

Fabrikam identifies the following application requirements:

- ▶ An on-premises web application named App1 must allow users to complete their expense reports online.
- ▶ The installation of feature updates for Office 365 ProPlus must be minimized.

Security Requirements

Fabrikam identifies the following security requirements:

- ▶ After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
- ▶ The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically.
- ▶ After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.
- ▶ The principle of least privilege must be used.

NEW QUESTION 178

You create the Microsoft 365 tenant.

You implement Azure AD Connect as shown in the following exhibit.

Azure Active Directory admin center

Home > Azure AD Connect

Azure AD Connect
 Azure Active Directory

✖ Troubleshoot ↻ Refresh

SYNC STATUS

| | | | |
|--|---------------|----------------------|--|
| | Sync Status | Enabled | |
| | Last Sync | Less than 1 hour ago | |
| | Password Sync | Enabled | |

USER SIGN-IN

| | | | |
|--|-----------------------------|----------|-----------|
| | Federation | Disabled | 0 domains |
| | Seamless single sign-on | Disabled | 0 domain |
| | Pass-through authentication | Disabled | 0 agents |

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

Sales department users can access [answer choice] applications by using SSO.

| |
|----------------------------------|
| ▼ |
| both on-premises and cloud-based |
| only cloud-based |
| only on-premises |

If Active Directory becomes unavailable, users can access the resource [answer choice].

| |
|-----------------------------------|
| ▼ |
| both on-premises and in the cloud |
| in the cloud only |
| on-premises only |

Answer:

NEW QUESTION 183

You need to prepare the environment for Project1. You create the Microsoft 365 tenant.

Which three actions should you perform in sequence next? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Configure the required DNS records and verify fabrikam.com as a custom domain.
- Implement directory synchronization.
- Create a Microsoft Azure Active Directory (Azure AD) tenant.
- Modify the Exchange ActiveSync Access Settings.
- Run the Hybrid Configuration wizard.

Answer Area

| |

- Modify the Exchange ActiveSync Access Settings.
- Run the Hybrid Configuration wizard.

Answer Area

- Create a Microsoft Azure Active Directory (Azure AD) tenant.
- Configure the required DNS records and verify fabrikam.com as a custom domain.
- Implement directory synchronization.

NEW QUESTION 185

You need to create the UserLicenses group. The solution must meet the security requirements. Which group type and control method should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Group type:

- Distribution list
- Office 365 group
- Security group

Control method:

- a conditional access policy
- a retention policy
- an access review
- an alert policy

Answer:

Explanation: Answer Area

Group type:

- Distribution list
- Office 365 group
- Security group

Control method:

- a conditional access policy
- a retention policy
- an access review
- an alert policy

NEW QUESTION 188

Which migration solution should you recommend for Project1?

- A. From Exchange Online PowerShell, run the New-MailboxImportRequest cmdlet.
- B. From Exchange Online PowerShell, run the New-MailboxExportRequest cmdlet.
- C. From the Microsoft 365 admin center, start a data migration and click Upload PSST as the data service.
- D. From the Exchange admin center, start a migration and select Remote move migration

Answer: D

NEW QUESTION 191

You are evaluating the required processes for Project1. You need to recommend which DNS record must be created before you begin the project. Which DNS record should you recommend?

- A. mail exchanger (MX)
- B. alias (CNAME)
- C. host (A)
- D. host (AAA)

Answer: A
