Case Study: 1 Contoso, Ltd Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The company has the employees and devices shown in the following table.

| Location | Employees | Laptops | Desktops | Mobile devices |
|----------|-----------|---------|----------|----------------|
| Montreal | 2,500 | 2,800 | 300 | 3,100 |
| Seattle | 1,000 | 1,100 | 200 | 1,500 |
| New York | 300 | 320 | 30 | 400 |

Contoso recently purchased a Microsoft 365 ES subscription.

Existing Environment Requirement

The network contains an on-premises Active Directory forest named contoso.com. The forest contains the servers shown in the following table.

| Name | Configuration |
|---------|------------------------------------|
| Server1 | Domain controller |
| Server2 | Member server |
| Server3 | Network Policy Server (NPS) server |
| Server4 | Remote access server |
| Server5 | Microsoft Azure AD Connect server |

All servers run Windows Server 2016. All desktops and laptops are Windows 10 Enterprise and are joined to the domain.

The mobile devices of the users in the Montreal and Seattle offices run Android. The mobile devices of the users in the New York office run iOS.

The domain is synced to Azure Active Directory (Azure AD) and includes the users shown in the following table.

| Name | Azure AD role |
|-------|---------------------------------|
| User1 | None |
| User2 | Application administrator |
| User3 | Cloud application administrator |
| User4 | Global administrator |
| User5 | Intune administrator |

The domain also includes a group named Group1.

Planned Changes

Contoso plans to implement the following changes:

- Implement Microsoft 365.
- Manage devices by using Microsoft Intune.
- Implement Azure Advanced Threat Protection (ATP).
- Every September, apply the latest feature updates to all Windows computers. Every March, apply the latest feature updates to the computers in the New York office only.

Technical Requirements

Contoso identifies the following technical requirements:

- When a Windows 10 device is joined to Azure AD, the device must enroll in Intune automatically.
- Dedicated support technicians must enroll all the Montreal office mobile devices in Intune.
- User1 must be able to enroll all the New York office mobile devices in Intune.
- Azure ATP sensors must be installed and must NOT use port mirroring.
- Whenever possible, the principle of least privilege must be used.
- A Microsoft Store for Business must be created.

Compliance Requirements

Contoso identifies the following compliance requirements:

- Ensure that the users in Group1 can only access Microsoft Exchange Online from devices that are enrolled in Intune and configured in accordance with the corporate policy.
- Configure Windows Information Protection (WIP) for the Windows 10 devices.

NEW QUESTION 143

You need to meet the compliance requirements for the Windows 10 devices. What should you create from the Intune admin center?

- A. a device compliance policy
- B. a device configuration profile

- C. an application policy
- D. an app configuration policy

Answer: D

Case Study: 2

A. Datum Case Study: Overview

Existing Environment

This is a case study Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question. Current Infrastructure

A. Datum recently purchased a Microsoft 365 subscription. All user files are migrated to Microsoft 365.

All mailboxes are hosted in Microsoft 365. The users in each office have email suffixes that include the country of the user, for example, user1@us.adatum.com or user2#uk.ad3tum.com.

Each office has a security information and event management (SIEM) appliance. The appliances come from three different vendors.

A. Datum uses and processes Personally Identifiable Information (PII).

Problem Statements Requirements

A. Datum entered into litigation. The legal department must place a hold on all the documents of a user named User1 that are in Microsoft 365. Business Goals

A. Datum wants to be fully compliant with all the relevant data privacy laws in the regions where it operates.

A. Datum wants to minimize the cost of hardware and software whenever possible.

Technical Requirements

A. Datum identifies the following technical requirements:

- Centrally perform log analysis for all offices.
- Aggregate all data from the SIEM appliances to a central cloud repository for later analysis.
- Ensure that a SharePoint administrator can identify who accessed a specific file stored in a document library.
- Provide the users in the finance department with access to Service assurance information in Microsoft Office 365.
- Ensure that documents and email messages containing the PII data of European Union (EU) citizens are preserved for 10 years.
- If a user attempts to download 1,000 or more files from Microsoft SharePoint Online within 30 minutes, notify a security administrator and suspend the user's user account.
- A security administrator requires a report that shows which Microsoft 36S users signed in Based on the report, the security administrator will create a policy to require multi-factor authentication when a sign in is high risk.
- Ensure that the users in the New York office can only send email messages that contain sensitive US. PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitive U.S. PII data.
