

# Exam Questions MD-101

Managing Modern Desktops (beta)

<https://www.2passeasy.com/dumps/MD-101/>

### NEW QUESTION 1

What should you use to meet the technical requirements for Azure DevOps?

- A. An app protection policy
- B. Windows Information Protection (WIP)
- C. Conditional access
- D. A device configuration profile

**Answer:** C

**Explanation:** References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/accounts/manage-conditional-access?view=azure-devops>

### NEW QUESTION 2

You need to recommend a solution to meet the device management requirements.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**For the Research department employees:**

<input type="checkbox"/>	An app configuration policy
<input type="checkbox"/>	An app protection policy
<input type="checkbox"/>	Azure information Protection
<input type="checkbox"/>	iOS app provisioning profiles

**For the Sales department employees:**

<input type="checkbox"/>	An app configuration policy
<input type="checkbox"/>	An app protection policy
<input type="checkbox"/>	Azure information Protection
<input type="checkbox"/>	iOS app provisioning profiles

**Answer:**

**Explanation:** Reference:

<https://github.com/MicrosoftDocs/IntuneDocs/blob/master/intune/app-protection-policy.md> <https://docs.microsoft.com/en-us/azure/information-protection/configure-usage-rights#do-not-forward-option-fo>

### NEW QUESTION 3

What should you configure to meet the technical requirements for the Azure AD-joined computers?

- A. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.
- B. The Accounts options in an endpoint protection profile.
- C. The Password Policy settings in a Group Policy object (GPO).
- D. A password policy from the Microsoft Office 365 portal.

**Answer:** A

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-inorgani>

### NEW QUESTION 4

You need to capture the required information for the sales department computers to meet the technical requirements.

Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

**Answer:** A

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

Topic 2, Contoso Ltd

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and

other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd, is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

Contoso has the users and computers shown in the following table.

Location	Users	Laptops	Desktop computers	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

The company has IT, human resources (HR), legal (LEG), marketing (MKG) and finance (FIN) departments. Contoso uses Microsoft Store for Business and recently purchased a Microsoft 365 subscription.

The company is opening a new branch office in Phoenix. Most of the users in the Phoenix office will work from home.

Existing Environment

The network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure

Active Directory (Azure AD).

All member servers run Windows Server 2016. All laptops and desktop computers run Windows 10 Enterprise.

The computers are managed by using Microsoft System Center Configuration Manager. The mobile devices are managed by using Microsoft Intune.

The naming convention for the computers is the department acronym, followed by a hyphen, and then four numbers, for example, FIN-6785. All the computers are joined to the on-premises Active Directory domain.

Each department has an organization unit (OU) that contains a child OU named Computers. Each computer account is in the Computers OU of its respective department.

Intune Configuration

The domain has the users shown in the following table.

Name	Role	Member of
User1	Intune administrator	GroupA
User2	None	GroupB

User2 is a device enrollment manager (DEM) in Intune.

The devices enrolled in Intune are shown in the following table.

Name	Platform	Encryption	Member of
Device1	Android	Disabled	Group1
Device2	iOS	Not applicable	Group2, Group3
Device3	Android	Disabled	Group2, Group3
Device4	iOS	Not applicable	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require encryption	Assigned
Policy1	Android	Not configured	Yes
Policy2	iOS	Not applicable	Yes
Policy3	Android	Require	Yes

The device compliance policies have the assignments shown in the following table:

Name	Include	Exclude
Policy1	Group3	None
Policy2	Group2	Group3
Policy3	Group1	None

The device limit restrictions in Intune are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Restriction1	15	GroupB
2	Restriction2	10	GroupA
Default	All users	5	All users

#### Requirements Planned Changes

Contoso plans to implement the following changes:

- ▶ Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.
- ▶ Start using a free Microsoft Store for Business app named App1.
- ▶ Implement co-management for the computers.

#### Technical Requirements:

Contoso must meet the following technical requirements:

- ▶ Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
- ▶ Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- ▶ Monitor the computers in the LEG department by using Windows Analytics.
- ▶ Create a provisioning package for new computers in the HR department.
- ▶ Block iOS devices from sending diagnostic and usage telemetry data.
- ▶ Use the principle of least privilege whenever possible.
- ▶ Enable the users in the MKG department to use App1.
- ▶ Pilot co-management for the IT department.

#### NEW QUESTION 5

You need to meet the technical requirements for the iOS devices. Which object should you create in Intune?

- A. A compliance policy
- B. An app protection policy
- C. ADeployment profile
- D. A device profile

**Answer: D**

**Explanation:** References:  
<https://docs.microsoft.com/en-us/intune/device-restrictions-configure> <https://docs.microsoft.com/en-us/intune/device-restrictions-ios>

NEW QUESTION 6

You need to meet the technical requirements for the LEG department computers.  
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Configure the commercial ID on the LEG department computers.

Create an Azure Machine Learning service workspace.

Create an Azure Log Analytics workspace.

Install the Microsoft Monitoring Agent on the LEG department computers.

Add a solution to a workspace.

Answer Area

Answer:

**Explanation:** Reference:  
<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-azure-portal>

NEW QUESTION 7

You need to meet the technical requirements for the new HR department computers.  
How should you configure the provisioning package? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Specify ComputerName as:

"HR" + RAND(4)

"HumanResources-" + RAND(????)

HR-%RAND:4%

HR-????

HumanResources-%RAND:4%

Specify AccountOU as:

CN=Computers, CN=HR, DC=Contoso, DC=com

Computers/HumanResources/Contoso.com

Contoso.com/HR/Computers

OU=Computers, OU=HR, DC=Contoso, DC=com

Answer:

**Explanation:** Reference:  
<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

NEW QUESTION 8

You need to meet the technical requirements for the IT department. What should you do first?

- A. From the Azure Active Directory blade in the Azure portal, enable Seamless single sign-on.
- B. From the Configuration Manager console, add an Intune subscription.
- C. From the Azure Active Directory blade in the Azure portal, configure the Mobility (MDM and MAM) settings.
- D. From the Microsoft Intune blade in the Azure portal, configure the Windows enrollment settings.

Answer: C

Explanation: Reference:  
<https://docs.microsoft.com/en-us/sccm/comange/tutorial-co-manage-clients>

Topic 3, Misc. Questions

NEW QUESTION 9

Your network contains an Active Directory domain named contoso.com.  
You create a provisioning package named Package1 as shown in the following exhibit.

Steps

Set up device

Set up network

Account management

Add applications

Add certificates

Finish

Summary

Set up device

Enter device name  
Share devices  
Remove pre-installed software

Comp%RAND:1%  
No  
No

Network settings

Network

Wired

Account management

Domain name  
Domain user name  
Domain user password

Contoso.com  
contoso\administrator  
\*\*\*\*\*

Add applications

Add certificates

Protect your package

Protect the content of your package by specifying a password.  
The password length must be 8-16 characters.

☐ No

What is the maximum number of devices on which you can run Package1 successfully?

- A. 1
- B. 10
- C. 25
- D. unlimited

Answer: D

NEW QUESTION 10

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Maintenance Scheduler settings, you configure Automatic Maintenance Activation Boundary.  
Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation: Reference:  
<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

NEW QUESTION 10

Your network contains an Active Directory domain named constoso.com that is synced to Microsoft Azure Active Directory (Azure AD). All computers are enrolled in Microsoft Intune.  
The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 8.1 Enterprise
Computer2	Windows 10 Enterprise without the latest feature update
Computer3	Windows 10 Enterprise without the latest feature update

You are evaluating which Intune actions you can use to reset the computers to run Windows 10 Enterprise with the latest update. Which computers can you reset by using each action? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

**Fresh Start action:**

<input type="checkbox"/>	Computer1 only
<input type="checkbox"/>	Computer2 only
<input type="checkbox"/>	Computer3 only
<input type="checkbox"/>	Computer2 and Computer3 only
<input type="checkbox"/>	Computer1, Computer2, and Computer3

**Wipe action:**

<input type="checkbox"/>	Computer1 only
<input type="checkbox"/>	Computer2 only
<input type="checkbox"/>	Computer3 only
<input type="checkbox"/>	Computer2 and Computer3 only
<input type="checkbox"/>	Computer1, Computer2, and Computer3

**Answer:**

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/intune/device-fresh-start> <https://docs.microsoft.com/en-us/intune/devices-wipe>

#### NEW QUESTION 11

Your company has a Microsoft Azure Active Directory (Azure AD) tenant. All users in the company are licensed for Microsoft Intune. You need to ensure that the users enroll their iOS device in Intune. What should you configure first?

- A. ADevice Enrollment Program (DEP) token.
- B. An Intune device configuration profile.
- C. ADevice enrollment manager (DEM) account.
- D. An Apple MDM Push certificate.

**Answer:** A

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/intune/device-enrollment-program-enroll-ios>

#### NEW QUESTION 13

You have the 64-bit computers shown in the following table.

Name	Operating system	Memory	BitLocker Drive Encryption (BitLocker)
Computer1	32-bit version of Windows 7 Service Pack 1 (SP1)	1 GB	Enabled
Computer2	64-bit version of Windows 7 Service Pack 1 (SP1)	4 GB	Enabled
Computer3	32-bit version of Windows 8.1	2 GB	Enabled
Computer4	64-bit version of Windows 8.1	4 GB	Disabled

You plan to perform an in-place upgrade to the 64-bit version of Windows 10. Which computers can you upgrade to the 64-bit version of Windows 10 in their current state?

- A. Computer2 and Computer4 only
- B. Computer4 only
- C. Computer3 and Computer4 only
- D. Computer1, Computer2, Computer3 and Computer4
- E. Computer2, Computer3, and Computer4 only

Answer: A

Explanation: References:  
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios>

NEW QUESTION 15

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.  
You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.  
Solution: You perform a remote Windows AutoPilot Reset. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation: <https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset-remote>

NEW QUESTION 16

Your company has a Microsoft Azure Active Directory (Azure AD) tenant.  
The company uses Microsoft Intune to manage iOS, Android, and Windows 10 devices.  
The company plans to purchase 1,000 iOS devices. Each device will be assigned to a specific user.  
You need to ensure that the new iOS devices are enrolled automatically in Intune when the assigned user signs in for the first time.  
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Create a device compliance policy.		
Add a Device Enrollment Program (DEP) token.		
Assign an enrollment profile.		
Create a device enrollment manager (DEM) account.		
Create a Windows AutoPilot self-deploying deployment profile.		
Create an Apple enrollment profile.		

Answer:

Explanation: Reference:  
<https://docs.microsoft.com/en-us/intune/device-enrollment-program-enroll-ios>

#### NEW QUESTION 21

Your company has a main office and six branch offices. The branch offices connect to the main office by using a WAN link. All offices have a local Internet connection and a Hyper-V host cluster.

The company has a Microsoft System Center Configuration Manager deployment. The main office is the primary site. Each branch has a distribution point. All computers that run Windows 10 are managed by using both Configuration Manager and Microsoft Intune.

You plan to deploy the latest build of Microsoft Office 365 ProPlus to all the computers.

You need to minimize the amount of network traffic on the company's Internet links for the planned deployment.

What should you include in the deployment plan?

- A. From Intune, configure app assignments for the Office 365 ProPlus suite. In each office, copy the Office 365 distribution files to a Microsoft Deployment Toolkit (MDT) deployment share.
- B. From Intune, configure app assignments for the Office 365 ProPlus suite. In each office, copy the Office 365 distribution files to a Configuration Manager distribution point.
- C. From Configuration Manager, create an application deployment. Copy the Office 365 distribution files to a Configuration Manager cloud distribution point.
- D. From Configuration Manager, create an application deployment. In each office, copy the Office 365 distribution files to a Configuration Manager distribution point.

**Answer:** D

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/deployoffice/deploy-office-365-proplus-with-system-center-configurationmanager>

#### NEW QUESTION 23

You have a Microsoft 365 subscription.

All computers are enrolled in Microsoft Intune.

You have business requirements for securing your Windows 10 environment as shown in the following table.

Requirement	Detail
Requirement1	Ensure that Microsoft Exchange Online can be accessed from known locations only.
Requirement2	Lock a device that has a high Windows Defender Advanced Threat Protection (Windows Defender ATP) risk score.

What should you implement to meet each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Requirement1

☐

☒ A conditional access policy
 ☐ A device compliance policy
 ☐ A device configuration profile

#### Requirement2

☐

☒ A conditional access policy
 ☐ A device compliance policy
 ☐ A device configuration profile

**Answer:**

**Explanation:** Reference:

<https://github.com/MicrosoftDocs/IntuneDocs/blob/master/intune/advanced-threat-protection.md>

#### NEW QUESTION 25

Your network contains an Active Directory named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. Folder Redirection is configured for a domain user named User1. The AppData\Roaming folder and the Desktop folder are redirected to a network share.

User1 signs in to Computer1 and performs the following tasks:

- Configures screen saver to start after five minutes of inactivity
- Modifies the default save location for Microsoft Word
- Creates a file named File1.docx on the desktop
- Modifies the desktop background

You need to identify what will be retained when User1 signs in to Computer2. What should you identify?

- A. File1.docx and the desktop background only
- B. File1.docx, the screen saver settings, the desktop background, and the default save location for Word
- C. File1.docx only
- D. File1.docx, the desktop background, and the default save location for Word only

Answer: B

Explanation: Reference:

<https://docs.microsoft.com/en-us/windows-server/storage/folder-redirection/folder-redirection-rup-overview>

### NEW QUESTION 30

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All Windows 10 devices are enrolled in Microsoft Intune.

You configure the following settings in Windows Information Protection (WIP):

- ▶ Protected apps: App1
- ▶ Exempt apps: App2
- ▶ Windows Information Protection mode: Silent App1, App2, and App3 use the same file format.

You create a file named File1 in App1.

You need to identify which apps can open File1.

What apps should you identify? To answer, select the appropriate options in the answer area, NOTE: Each correct selection is worth one point.

You can open File1 from:

<input type="checkbox"/>	App1 only
<input type="checkbox"/>	App1, and App2 only
<input type="checkbox"/>	App1 and App3 only
<input type="checkbox"/>	App1, App2, and App3

An action will be logged when you attempt to open File1 from:

<input type="checkbox"/>	App1 only
<input type="checkbox"/>	App3 only
<input type="checkbox"/>	App1, and App2 only
<input type="checkbox"/>	App2 and App3 only
<input type="checkbox"/>	App1, App2, and App3

Answer:

Explanation: Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/creating-a-policy> <https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/creating-a-policy>

### NEW QUESTION 33

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You create a new Windows AutoPilot self-deploying deployment profile. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation: Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying>

### NEW QUESTION 35

You have a Microsoft Azure Log Analytics workplace that collects all the event logs from the computers at your company.

You have a computer named Computer1 that runs Windows 10. You need to view the events collected from Computer1.

Which query should you run in Log Analytics?

- A. Event| where Computer == "Computer1"
- B. ETWEvent| where SourceSystem == "Computer1"
- C. ETWEvent| where Computer == "Computer1"
- D. Event| where SourceSystem == "Computer1"

Answer: A

Explanation: Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/data-sources-windows-events>

### NEW QUESTION 36

Your company has an infrastructure that has the following:

- ▶ A Microsoft 365 tenant
- ▶ An Active Directory forest
- ▶ Microsoft Store for Business
- ▶ A Key Management Service (KMS) server
- ▶ A Windows Deployment Services (WDS) server
- ▶ A Microsoft Azure Active Directory (Azure AD) Premium tenant

The company purchases 100 new computers that run Windows 10.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:

<input type="checkbox"/>
<input checked="" type="checkbox"/> Azure Active Directory admin center
<input checked="" type="checkbox"/> Microsoft Store for Business
<input checked="" type="checkbox"/> Volume Activation Management Tool console
<input checked="" type="checkbox"/> Windows Deployment Services console

Required information from each computer:

<input type="checkbox"/>
<input checked="" type="checkbox"/> Device serial number and hardware hash
<input checked="" type="checkbox"/> MAC address and computer name
<input checked="" type="checkbox"/> Volume License Key and computer name

Answer:

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

### NEW QUESTION 38

Your company has computers that run Windows 8.1, Windows 10, or macOS. The company uses Microsoft Intune to manage the computers.

You need to create an Intune profile to configure Windows Hello for Business on the computers that support it.

Which platform type and profile type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Platform type:

<input type="checkbox"/>
<input checked="" type="checkbox"/> macOS
<input checked="" type="checkbox"/> Windows 10 and later
<input checked="" type="checkbox"/> Windows 8.1 and later

Profile type:

<input type="checkbox"/>
<input checked="" type="checkbox"/> Device restrictions
<input checked="" type="checkbox"/> Device restrictions (Windows 10 Team)
<input checked="" type="checkbox"/> Endpoint protection

Answer:

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-configure>

### NEW QUESTION 39

You use the Antimalware Assessment solution in Microsoft Azure Log Analytics.

From the Protection Status dashboard, you discover the computers shown in the following table.

Name	Issue
Computer1	No real time protection
Computer2	Not reporting

You verify that both computers are connected to the network and running.

What is a possible cause of the issue on each computer? To answer, drag the appropriate causes to the correct computers. Each cause may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Possible Causes**

The Microsoft Monitoring Agent is uninstalled.

The Microsoft Windows Malicious Software Removal Tool is installed.

Windows Defender Application Guard is misconfigured.

Windows Defender is disabled.

**Answer Area**

Computer1:

Computer2:

**Answer:**

**Explanation:** Reference:

<https://docs.microsoft.com/ga-ie/azure/security-center/security-center-install-endpoint-protection>

#### NEW QUESTION 40

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You need to ensure that only applications that you explicitly allow can run on the computers. What should you use?

- A. Windows Defender Credential Guard
- B. Windows Defender Exploit Guard
- C. Windows Defender Application Guard
- D. Windows Defender Antivirus.

**Answer:** C

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/device-guard/introduction-to-device-guardv-based-security-and-windows-defender-application-control>

#### NEW QUESTION 42

Your company plans to deploy tablets to 50 meeting rooms.

The tablets run Windows 10 and are managed by using Microsoft Intune. The tablets have an application named App1.

You need to configure the tablets so that any user can use App1 without having to sign in. Users must be prevented from using other applications on the tablets.

Which device configuration profile type should you use?

- A. Kiosk
- B. Endpoint protection
- C. Identity protection
- D. Device restrictions

**Answer:** A

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows/configuration/kiosk-single-app>

#### NEW QUESTION 47

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You redirect Windows known folders to Microsoft OneDrive for Business. Which folder will be included in the redirection?

- A. Saved Games
- B. Documents
- C. Music
- D. Downloads

**Answer:** B

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders>

#### NEW QUESTION 49

You have 10 computers that run Windows 7 and have the following configurations:

- ☐ A single MBR disk
- ☐ A disabled TPM chip
- ☐ Disabled hardware virtualization
- ☐ UEFI firmware running in BIOS mode
- ☐ Enabled Data Execution Prevention (DEP)

You plan to upgrade the computers to Windows 10.

You need to ensure that the computers can use Secure Boot.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Convert the MBR disk to a GPT disk
- B. Enable the TPM chip.
- C. Disable DEP
- D. Enable hardware virtualization
- E. Convert the firmware from BIOS to UEFI.

**Answer:** AE

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/boot-to-uefi-mode-or-legacy-biosmod>

#### NEW QUESTION 54

You manage 1,000 computers that run Windows 10. All the computers are enrolled in Microsoft Intune. You manage the servicing channel settings of the computers by using Intune.

You need to review the servicing status of a computer. What should you do?

- A. From Device configuration- Profiles, view the device status.
- B. From Device compliance, view the device compliance.
- C. From Software updates, view the audit logs.
- D. From Software updates, view the Per update ring deployment state.

**Answer:** D

**Explanation:** References:

<https://docs.microsoft.com/en-us/intune/windows-update-compliance-reports>

#### NEW QUESTION 58

Your company uses Microsoft Intune.

More than 500 Android and iOS devices are enrolled in the Intune tenant.

You plan to deploy new Intune policies. Different policies will apply depending on the version of Android or iOS installed on the device.

You need to ensure that the policies can target the devices based on their version of Android or iOS. What should you configure first?

- A. Corporate device identifiers in Intune
- B. Device settings in Microsoft Azure Active Directory (Azure AD)
- C. Device categories in Intune
- D. Groups that have dynamic membership rules in Microsoft Azure Active Directory (Azure AD)

**Answer:** B

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/intune/compliance-policy-create-android> <https://docs.microsoft.com/en-us/intune/compliance-policy-create-ios>

#### NEW QUESTION 60

You have computers that run Windows 10 and are configured by using Windows AutoPilot. A user performs the following tasks on a computer named Computer1:

- ☐ Creates a VPN connection to the corporate network
- ☐ Installs a Microsoft Store app named App1
- ☐ Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

The Wi-Fi connection will be:

	⌵
Removed	
Retained and the passphrase will be retained	
Retained but the passphrase will be reset	

App1 will be:

	⌵
Reinstalled at sign-in	
Removed	
Retained	

The VPN connection will be:

	⌵
Removed	
Retained and the credentials will be cached	
Retained but the credentials will be reset	

Answer:

Explanation: Reference:
