

PL-100 Dumps

Microsoft Power Platform App Maker

<https://www.certleader.com/PL-100-dumps.html>

NEW QUESTION 1

HOTSPOT - (Topic 4)

You are configuring security to enable users to analyze data by using Microsoft Excel templates.

You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.

Power Apps

File Save and Close Actions Help

Security role: TemplateAdministrator Working on solutions: Default Solution

Entity	Create	Read	Write	Delete	Append	Append To	Assign	Share
Business Unit								
Channel Property Group								
Currency								
Document Template								
Mailbox Auto Tracking Folder								
Organization								
Personal Document Template								

Privacy Related Privileges
Enabling these privileges will allow users to extract customer data from Microsoft Dynamics 365. For more information, review the corresponding user documentation.

Document Generation		Dynamics 365 for mobile	
Export to Excel		Go Offline in Outlook	
Mail Merge		Print	
Sync to Outlook		Use Dynamics 365 App for Outlook	

Miscellaneous Privileges

Act on Behalf of Another User		Approve Email Addresses for Users or Queues	
Assign manager for a user		Assign position for a user	
Assign Territory to User		Bulk Edit	

Key
 None Selected
 User
 Business Unit
 Parent: Child Business Unit
 Organization

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

You need to ensure that User1 can see the pre-configured example templates.

Which permission should you change?

▼

Bulk Edit

Export to Excel

Read on Document Template

Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template.

Which permission should you change?

▼

NEW QUESTION 2

DRAG DROP - (Topic 4)

You have a basic user security role in a test environment. You create a canvas app without customization in the environment.

You need to send the app to production administrators for production deployment. Which three actions should you perform in sequence? To answer, move the appropriate

actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Add the app to the solution.		
Export the solution.		
Send the solution to production administrators.		
Select the canvas app in the Maker portal.	➤	➤
Export the package.	➤	➤
Send the package to production administrators.		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions		Answer Area
Add the app to the solution.		Select the canvas app in the Maker portal.
Export the solution.		Export the package.
Send the solution to production administrators.		Send the package to production administrators.
Select the canvas app in the Maker portal.	➤	
Export the package.	➤	
Send the package to production administrators.		

NEW QUESTION 3

DRAG DROP - (Topic 4)

A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories.

You are creating an app to manage requests for new products.

The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not allow for misspellings.

Only two new tables should be created in Microsoft Dataverse:

? Products: Holds the products that can be requested.

? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category.

You need to identify the data types to use when building the table columns in Dataverse.

Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Data types	Answer Area	Data types
Lookup	Scenario Create a column in the Products table that displays the category of the product Create a column in the Products table for the product ID of the product Create a column in the Requests table that allows the user to select form a list of available products	Data type
Choice		Data type
Text		Data type

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Text

Text columns can contain text characters. This column type has several format options that will change the presentation of the text.

Box 2: Lookup

When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.

Box 3: Choice

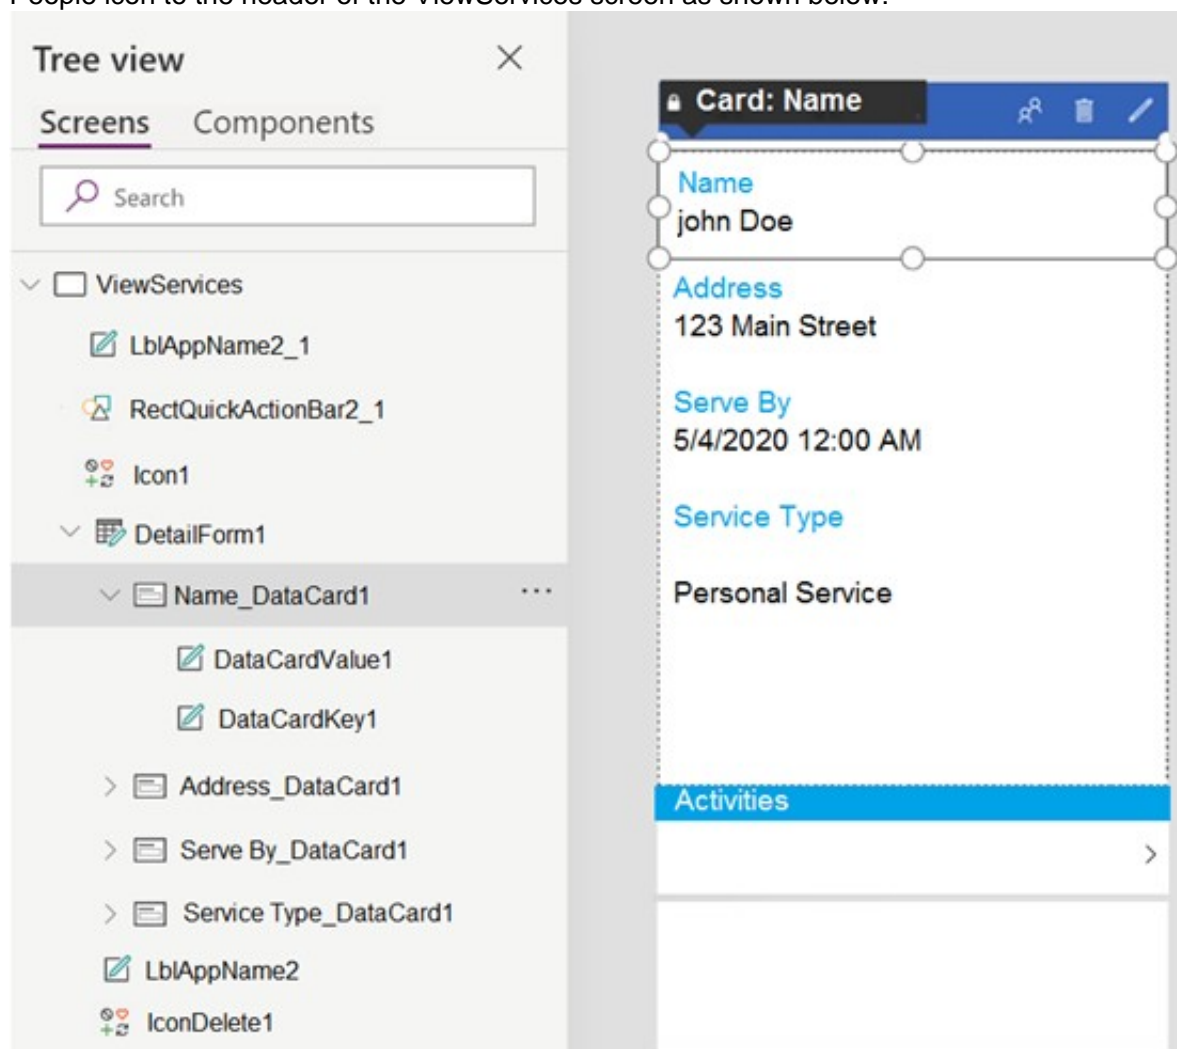

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 4

HOTSPOT - (Topic 4)

You create a canvas app for a service company.

Using the Tree view, you navigate to the ViewServices screen. The screen contains a form named DetailForm1 that only contains Label controls. You add the People icon to the header of the ViewServices screen as shown below:

When you select the icon a new Activity form opens. You must set the value of the Name field on the new Activity form to the value of the name field from DetailForm1.

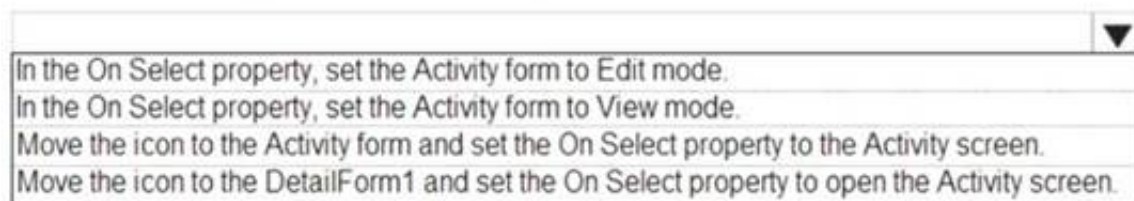

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Which formula must you enter in the Name field on the Activity form to default the Name from DetailForm1?

Which action should you perform on the People icon?

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Name_DataCardValue1.Default

Box 2: Move the icon to the Activity form and set the On Select property to the Activity screen.

The Select function simulates a select action on a control as if the user had clicked or tapped the control. As a result, the OnSelect formula on the target control is evaluated.

NEW QUESTION 5

- (Topic 4)

You create a canvas app within a Power Platform environment.

You need to identify potential accessibility issues for the canvas app before making the app available to other users.

Which tool should you use?

- A. Portal Checker
- B. App Checker
- C. Solution Checker

Answer: B

Explanation:

Find accessibility issues

* 1. In the upper-right corner of Power Apps Studio, select the icon for the App checker.

* 2. In the menu that appears, select Accessibility.

A list of issues appears, sorted first by severity and then by screen.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

NEW QUESTION 6

DRAG DROP - (Topic 4)

A company uses a canvas app.

The finance team and sales team require access to the canvas app. You must perform the following actions:

- Add members of the sales team to the app as users.
- Add members of the finance team to the app as co-owners.

The app must be shareable with current and future team members.

You need to request creation of group types for team members. This must enable sharing of the app with the least amount of effort.

Which group types should you request? To answer, drag the appropriate group types to the correct activities. Each group type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Group types

Security group

Distribution group

Dynamic group

Answer Area

Activity

Add members of the sales team to the app as users.
Add members of the finance team to app as co-owners.

Group type

Dynamic group

Security group

NEW QUESTION 7

DRAG DROP - (Topic 4)

You are designing an app to track time off for employees. Employee data, including employee ID number, is stored in an existing data source used by other apps. Employees must be able to look up their employee ID number and enter time-off start and end dates in the app.

You need to configure the elements of the data source.

Which data elements should you use? To answer, drag the appropriate data elements to the correct data. Each data element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Data elements

Table

View

Record reference

Answer Area

Data

Time-off dates for all employees
Employee ID number

Data element

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Data elements

Table

View

Record reference

Answer Area

Data

Time-off dates for all employees

NEW QUESTION 8

DRAG DROP - (Topic 4)

You create an app with multiple screens.

Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.

You need to create a reusable gallery that displays information based on the current record.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

Add a gallery control.

Add an input property.

Create a component.

Add a screen.

Create a form.

Add an output property.

Answer Area

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

- Create a component
- Add an input property
- Add a gallery control

From <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component> step 10 and 11

NEW QUESTION 9

DRAG DROP - (Topic 4)

You have a solution that contains a Power Automate flow, an environment variable, and a

Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select the managed solution.

Adjust the version number.

Publish all changes.

Select the unmanaged solution.

Answer Area

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Step 1: Adjust the version number. Step 2: Select the managed solution.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Step 3: Publish all changes.

NEW QUESTION 10

DRAG DROP - (Topic 4)

: 186 DRAG DROP

A company uses Power Apps.

The company requires a canvas app that connects to the following sources:

- SharePoint list
- Microsoft 365 mailbox
- SOAP API

You need to select connector types.

Which connector types should you use? To answer, drag the appropriate connector types to the correct sources. Each connector type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Connector types

Standard

Custom

Answer Area

Sources

SharePoint list

Microsoft 365 mailbox

SOAP API

NEW QUESTION 10

- (Topic 4)

You create a dashboard in Power BI. You share the dashboard with the sales team. Sales team members report that they can see information for the entire company. You need to ensure that the team is able to see only data for their team.

Where must you configure this restriction?

- A. Dashboard
B. Report
C. Dataset
D. Settings

Answer: C

Explanation:

Restrict access to the dataset.

Note: Another way of setting access is through manage permission in the dashboard, report, or dataset. If you share a dashboard, by default the report and the

dataset will also be shared as read-only for users.
Reference:
<https://radacad.com/dashboard-sharing-and-manage-permissions-in-power-bi-simple-but- useful>

NEW QUESTION 15

HOTSPOT - (Topic 4)

A company uses Power Apps. The company gathers product improvement suggestions at tradeshow by using tablet devices. A product improvement suggestion has two parts: a topic and a comment. Attendees can enter up to 10 suggestions. You create a canvas app to allow attendees to enter suggestions. The wireless network connection inside the tradeshow is unreliable. You need to ensure that the tablet devices save all suggestions. Which solution technologies should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Action	Solution technology
Save suggestions while visitors enter data.	<div>Collection</div> <div>Collection</div> <div>Variable</div> <div>Connection</div> <div>Text input</div>
Save suggestions for future processing.	<div>Export</div> <div>Export</div> <div>Import</div> <div>Container</div> <div>Data table</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Solution technology
Save suggestions while visitors enter data.	<div>Collection</div>
Save suggestions for future processing.	<div>Export</div>

NEW QUESTION 19

DRAG DROP - (Topic 4)

A company plans to use Microsoft Power Platform to modernize their business. Sales commissions are given only to the representatives who sell items from a designated category of products. The company wants to minimize the effort needed to manage data security. You need to describe how to store real-world objects to the business stakeholders. What should you use? To answer, drag the appropriate tables to the correct objects. Each table may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Tables	Answer Area								
<div>Organization-owned standard table</div> <div>User-owned standard table</div> <div>Activity table</div> <div>Virtual table</div>	<table><thead><tr><th>Object</th><th>Table</th></tr></thead><tbody><tr><td>Item manufacturer</td><td></td></tr><tr><td>Item model</td><td></td></tr><tr><td>Item inventory</td><td></td></tr></tbody></table>	Object	Table	Item manufacturer		Item model		Item inventory	
Object	Table								
Item manufacturer									
Item model									
Item inventory									

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Tables	Answer Area								
<div>Organization-owned standard table</div> <div>User-owned standard table</div> <div>Activity table</div> <div>Virtual table</div>	<table><thead><tr><th>Object</th><th>Table</th></tr></thead><tbody><tr><td>Item manufacturer</td><td>Organization-owned standard table</td></tr><tr><td>Item model</td><td>User-owned standard table</td></tr><tr><td>Item inventory</td><td>Virtual table</td></tr></tbody></table>	Object	Table	Item manufacturer	Organization-owned standard table	Item model	User-owned standard table	Item inventory	Virtual table
Object	Table								
Item manufacturer	Organization-owned standard table								
Item model	User-owned standard table								
Item inventory	Virtual table								

NEW QUESTION 21

DRAG DROP - (Topic 4)

DRAG DROP

A company is creating Power Apps apps for their customer service team.
You must create a final released solution to export to their test environment that cannot be changed in the new environment.
You need to determine the types of solutions to use.
Which type of solution should you use? To answer, drag the appropriate solution types to the correct conditions. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Solution type	Condition	Solution type
Managed	Assign a publisher for the first time	Solution type
Unmanaged	Export the solution	Solution type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Unmanaged
Unmanaged solutions are used in development environments while you make changes to your application.
Box 2: Managed
Managed solutions are used to deploy to any environment that isn't a development environment for that solution.

NEW QUESTION 26

- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.
Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.
You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Category classification model.
Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

A Category classification model categorizes text by its meaning. Reference:
<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/>

NEW QUESTION 27

- (Topic 4)
A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.
A user updates the Excel file daily with updated data.
The company needs a solution that automatically displays the latest analytics.
You need to create a basic report that contains pie charts that display the most profitable channels.
You need to propose the right solution.
Solution: Microsoft Power Apps canvas app having an Excel file imported into the app and Pie chart control.
Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 28

DRAG DROP - (Topic 4)
You are designing a data model for a new app. The app will be supported by two tables. TableA will contain data that is unique to your industry. TableB will provide access to readonly data from an Azure SQL database.
You need to configure the tables.
Which table type should you use? To answer, drag the appropriate table types to the correct tables. Each table type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Table types	Table	Table type
Custom	TableA	
Standard	TableB	
Virtual		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table types

NEW QUESTION 30

DRAG DROP - (Topic 4)

A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties. You need to create a solution for the apps.

Which objects should you use? To answer, drag the appropriate objects to the correct to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects

Entity

Component

Component library

Component framework

Requirement

Reuse the custom control for multiple canvas apps.

Receive input data through a custom property.

Object

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Component library

Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.

By creating a component library, app makers easily share and update one or more components with other makers.

Component libraries are containers of component definitions that make it easy to: Discover and search components.

Publish updates.

Notify app makers of available component updates.

Box 2: Component

A component can receive input values and emit data if you create one or more custom properties.

NEW QUESTION 31

- (Topic 4)

A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able to provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?

- A. Lookup
- B. Choice
- C. Choices
- D. Text

Answer: A

NEW QUESTION 36

HOTSPOT - (Topic 3)

You need to implement the student attendance requirements.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Table type or ownership
Cooking class ownership	<div>User owned by instructors</div> <div>User owned by students</div> <div>User owned by instructors</div> <div>User owned by chefs</div> <div>Organization owned</div>
Student attendance	<div>Appointment</div> <div>Task</div> <div>Appointment</div> <div>Custom activity</div> <div>Recurring appointment</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Table type or ownership
Cooking class ownership	<div>User owned by instructors</div> <div>User owned by students</div> <div>User owned by instructors</div> <div>User owned by chefs</div> <div>Organization owned</div>
Student attendance	<div>Appointment</div> <div>Task</div> <div>Appointment</div> <div>Custom activity</div> <div>Recurring appointment</div>

NEW QUESTION 37

- (Topic 3)

You need to resolve the instructor's issue and ensure that the same issue does not occur again. What should you use?

- A. Gallery
- B. Combo box
- C. Custom component
- D. Choices

Answer: D

NEW QUESTION 42

- (Topic 3)

You need to design the data model for the cooking classes.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Data	Component
Dish	<div>Microsoft SharePoint document</div> <div>Custom table</div> <div>Microsoft SharePoint document</div> <div>Global choice</div>
Student type	<div>Connection role</div> <div>Connection role</div> <div>Custom column</div> <div>Lookup column</div>

- B. Not Mastered

Answer: A

ate

tion.

pool.

Select the appropriate

of the appropriate

Component

chatbot

How

S

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Model-driven app

The Sales app must meet the following requirements:

? Provide a central location for all sales pipeline and quote information that is easily accessible and maintains all of the versions of the estimate, quote, and engineering documents.

Compared to canvas apps, model-driven apps in PowerApps are based on underlying data

— specifically, the data stored in Common Data Service (CDS).

Box 2: Power BI Desktop

You can create a KPI in Power BI Desktop.

? Open your report editor in Power BI Desktop then select a report on which you are working.

? On your right, you will see a Visualizations pane and a Fields pane.

? From the Visualizations pane, select the KPI visual.

? Etc.

Box 3: Power Automate

NEW QUESTION 52

- (Topic 2)

You need to resolve the user's issue with the time tracking app.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add a component to the time tracking screen for tracking total time.
- B. Create a new component inside of the component library for the time tracking app.
- C. Upload the component to AppSource.
- D. Add the Total Time field to the screen and set the value of the field property to Rollup

Answer: AB

Explanation:

Scenario Issue: Users want to be able to see their weekly total time entered from all screens.

A component library provides a centralized and managed repository of components for reusability.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>

NEW QUESTION 57

- (Topic 2)

You need to connect to the data source for the Job Setup app. What should you do?

- A. Configure a scheduled synchronization with the Common Data Service database
- B. Configure SQL Server database permissions
- C. Create a stored procedure that retrieves time records for a specific employee
- D. Configure an on-premises data gateway

Answer: D

Explanation:

Scenario: The Job Setup entity must store its data in the existing on-premises SQL Server instance.

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, Power Apps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/gateway-reference>

NEW QUESTION 61

HOTSPOT - (Topic 2)

You need to configure the system to meet the sales requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Ensure that work estimates are complete before entering estimated sales values into the Sales Log.	<div><div></div><div>Use a Business Process flow</div><div>Use a UI flow</div></div>
Prevent modification of timesheet entries by an employee.	<div><div></div><div>Add a custom control to the Business Process flow</div><div>Use a formula to set the DisplayMode property</div><div>Use a business rule</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Use a Business Process flow

Scenario: The Sales Log app must enforce process standards related to the completion of estimates and supporting materials needed during the sales lifecycle.

Box 2: Use a formula to set the DisplayMode property

DisplayMode - The mode to use for data cards and controls within the form control. Derived from the Mode property based and cannot be set independently:

Mode	DisplayMode	Description
FormMode.Edit	DisplayMode.Edit	Data cards and controls are editable, ready to accept changes to a record.
FormMode.New	DisplayMode.Edit	Data cards and controls are editable, ready to accept a new record.
FormMode.View	DisplayMode.View	Data cards and controls are not editable and optimized for viewing.

NEW QUESTION 66

- (Topic 2)

You need to implement the change requested by the operations manager. Which control should you use?

BF70D5D

- A. Camera
- B. Shape
- C. Add picture
- D. Image

Answer: D

Explanation:

Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.

Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image>

NEW QUESTION 71

- (Topic 2)

You need to implement logic in the app for lost sales. What should you do?

- A. Create a business process flow.
- B. Define a business rule for the Sales Log edit form.
- C. Set the required field property of the Won/Lost field to Required.
- D. Create a formula for the Description field that uses the Update function.

Answer: B

Explanation:

Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:

? Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

NEW QUESTION 74

HOTSPOT - (Topic 2)

If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

You need to configure the system to meet the requirements.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Feature	Setting
Create the relationship between the Job Setup and Time Tracking entities.	<div>▼</div> <div>1:N</div> <div>N:N</div> <div>Self-referential</div>
Configure ownership for the Time Tracking entity.	<div>▼</div> <div>Business-owned</div> <div>Organization-owned</div> <div>User or Team owned</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: 1:N

Scenario: A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.

Box 2: User or Team owned

Scenario: Employees must only be able to access their own time tracking records from the app.

User or team: Data belongs to a user or a team. Actions that can be performed on these records can be controlled on a user level.

NEW QUESTION 75

- (Topic 1)

You need to provide all app components of the application to Tailwind Traders. What should you do?

- A. Package the application and flow components into a single solution for export.
- B. Run the app checker and flow checker prior to publishing each component for export.
- C. Export each component separately but use the same version number for each component.
- D. Publish the application and flow solutions at the same time before exporting each one.

Answer: B

Explanation:

Scenario: When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.

Power Apps has added components to the rule set that encourages best practices in the Power Apps Checker. You can check your canvas apps and flows that are included in solutions and then review all issues in a single, consolidated report.

Reference:

<https://docs.microsoft.com/en-us/power-platform-release-plan/2019wave2/microsoft-powerapps/checker-includes-rules-canvas-apps-flows>

NEW QUESTION 79

- (Topic 1)

You need to configure functionality for submitting status reports. What should you do?

- A. Determine whether the application is offline when a user selects submit button and call the Sec () function.
- B. Determine whether the application is offline when the app load
- C. Use the SaveDaca () function in the OnSelect property.
- D. Determine whether the application is offline when a user selects the submit button and call the SaveDaca () function.
- E. Determine whether the application is offline when the app load
- F. Use the LoadDaca () function in the Submit button.

Answer: C

Explanation:

Scenario: The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.

When data is submitted offline, the data must be stored in the app until the app is back online.

Mobile users often need to be productive even when they have limited or no connectivity. LoadData and SaveData combine to form a simple mechanism to store small amounts of data on a local device. By using these functions, you can add simple offline capabilities to your app.

The SaveData function stores a collection for later use under a name.

The LoadData function reloads a collection by name that was previously saved with SaveData. You can't use this function to load a collection from another source.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function->

NEW QUESTION 82

- (Topic 4)

A company uses Power Apps. The company creates a solution that contains the following items:

- environment setting
- flow that accesses Microsoft Dataverse
- plug-in with an unsecure configuration
- environment variable with a default value

The company plans to import solutions manually.

You need to document the solution component type that prompts for user input. Which component type should you document?

- A. Environment variable
- B. Environment setting
- C. Connection reference

Answer: D

NEW QUESTION 84

HOTSPOT - (Topic 4)

A coworker creates a canvas app.

The canvas app contains the following formula. The formula is attached to the OnVisible property of the first screen that users see:

```
Collect(  
Toolbox,  
{  
    Tool: "Hammer",  
    Quantity: 1  
},  
{  
    Tool: "Screwdriver",  
    Quantity: 2  
}  
)
```

You are updating the canvas app.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	Yes	No
The formula will update multiple records in a data source named Toolbox if the records exist.	<input type="radio"/>	<input type="radio"/>
A local collection is created to store data if a data source named Toolbox does not already exist.	<input type="radio"/>	<input type="radio"/>
If a collection named Toolbox exists the formula will clear any existing records before making any changes.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: No

Records are added, not updated.

Box 2: Yes

The Collect function adds records to a data source. Syntax: Collect(DataSource, Item, ...)

DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.

Item(s) - Required. One or more records or tables to add to the data source.

Box 3: No

No records are cleared.

NEW QUESTION 89

HOTSPOT - (Topic 4)

A company creates a Power Apps app that allows service representatives to record information about on-site client visits. Service representatives perform a one-hour site visit with each client each quarter.

Service representatives use the app to perform the following activities:

? View their scheduled visits for the day.

? Record notes from service visits.

? Schedule service technicians for issues uncovered during site visits.

? Scan and upload service quote forms to a folder named Service Quote folder on

Microsoft OneDrive once the customer has signed a service quote.

Service quotes that are over \$10,000 are automatically sent to the service manager for review and approval.

Visits that are not closed at the end of the day are automatically moved to the following day unless it is the last day of the quarter. All client visits not performed for the quarter are escalated to the service manager for follow-up.

You need to create flows to meet the requirements.

Which type of flows should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Type of flow
Move client visits not completed for the day.	<div>▼</div> <div>Scheduled flow</div> <div>Automated flow</div> <div>Adaptive card flow</div> <div>Team flow</div>
Approve service quote.	<div>▼</div> <div>Automated flow</div> <div>Button flow</div> <div>Scheduled flow</div> <div>Team flow</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Adaptive card flow

Adaptive Cards are a platform-agnostic method of sharing and displaying blocks of information without the complexity of customizing CSS or HTML to render them.

Directing content to Teams channels:

Post your own adaptive card as the Flow bot to a channel

This action posts an adaptive card as a Flow bot to a specific Teams channel. In this case, you will be prompted for Teams instance, and a channel where the card will be posted. The flow-maker will have to have access to the Teams instance in order to post an adaptive card there. In this case, only URL buttons function by redirecting to the URL configured within the flow.

Box 2: Button flow

Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

NEW QUESTION 93

DRAG DROP - (Topic 4)

A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database.

You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration.

Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Answer Area	
	Data	Component
Column	Excel data	Component
Table	Customer data	Component
Row	Customer identifier	Component
Data source	Product data	Component

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Table

Box 2: Data source Box 3: Column

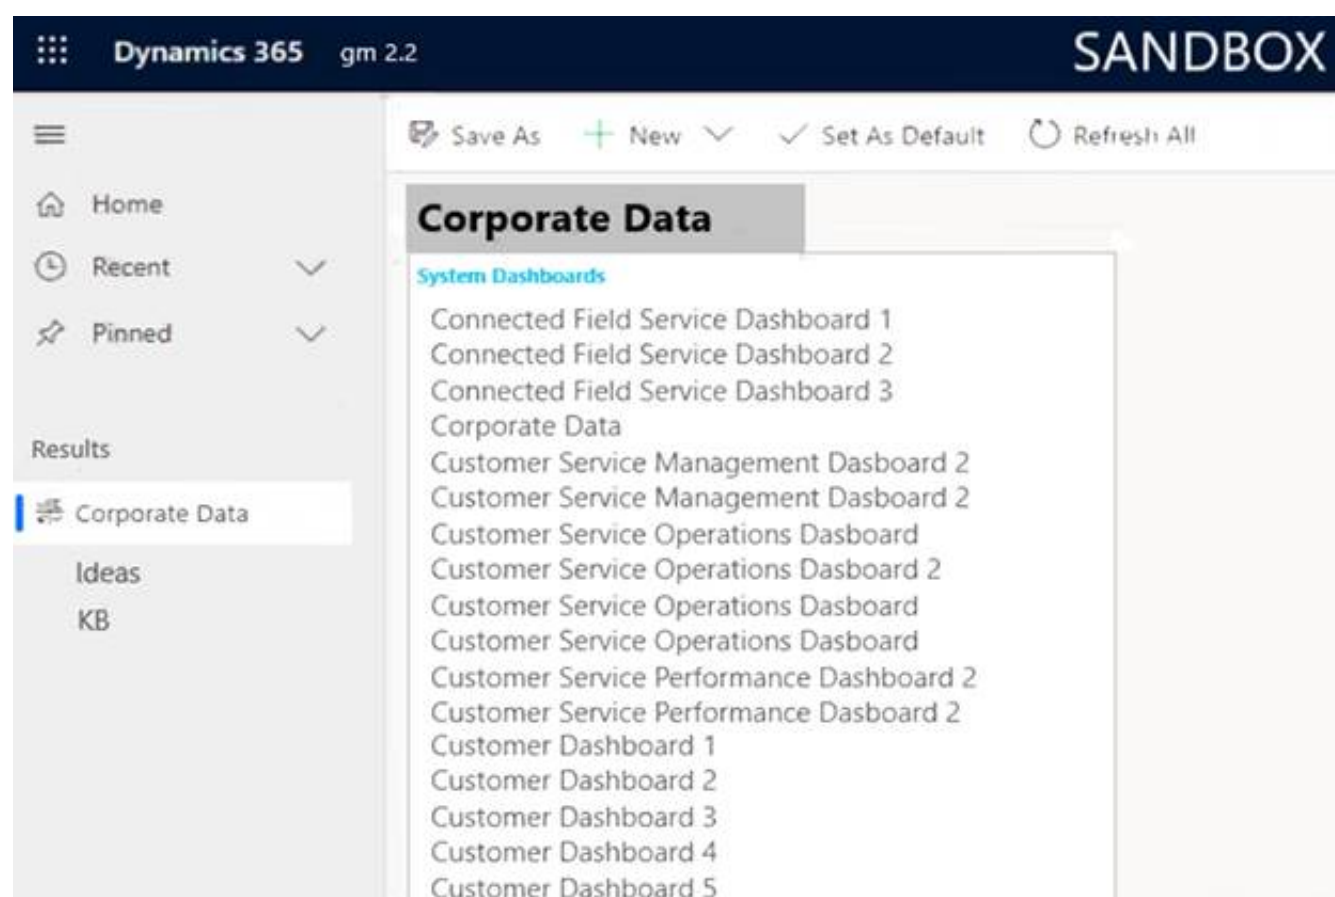

Box 4: Row

NEW QUESTION 97

HOTSPOT - (Topic 4)

The managers in an organization use a model-driven app. The app should display only one dashboard named Corporate Data.

The managers observe that several dashboards are displayed.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

How do you remove all the dashboards from the list of dashboards displayed?

	▼
Open the model-driven app in the app designer and clear all dashboard check boxes except the Corporate Data dashboard.	
Open the site map in the sitemap designer and clear all dashboard check boxes except the Corporate Data subarea except for the Corporate Data dashboard.	
Open the solution and delete all dashboards from the solution except for the Corporate Data dashboard.	

You need to remove the Ideas dashboard from the navigation bar. What should you do?

	▼
Open the model-driven app in the app designer and clear the check box for the ideas dashboard	
Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group	
Open the solutions and delete all the Ideas dashboards from the solution	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table

Description automatically generated

Box 1: Open the model-driven app in the app designer.

* 1. On the app designer canvas, select the Dashboards tile.

On the app designer canvas, the right pane shows dashboards that are available in the default solution.

* 2. Clearing the corresponding check box.

Box 2: Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group

Site maps define the manner by which users move between tables in a model-driven app.

NEW QUESTION 99

- (Topic 4)

A company uses Microsoft Power Apps.

You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.

You need to propose the right solution.

Solution: Add Power Apps to Power BI using Power Apps for Power BI visualization. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 104

DRAG DROP - (Topic 4)

A call center manager monitors incoming phone calls. The manager analyzes the performance of phone reps by using a custom view. The view contains a custom field named Phone call Duration in Minutes.

The call center manager must present an Excel spreadsheet daily to upper management. The spreadsheet must contain the call center performance for further trending analysis and corrective actions.

You need to create the spreadsheet.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a pivot table, and then use the Phone call Duration in Minutes field as a category area and the Rep field as a series

Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes field as a series

Set the formula for phone call duration in minutes to Average and add a pie chart linked the pivot table

Export the custom view to an Excel dynamic spreadsheet

Export the custom view to an Excel dynamic pivot table

Save the spreadsheet and upload it back to the system

Export the custom view to an Excel template

Answer Area

>

<

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Timeline

Description automatically generated with low confidence

Step 1: Export the custom view to an Excel dynamic pivot table

You can export app data to an Office Excel PivotTable to see patterns and trends in data. An Excel PivotTable is a great way to summarize, analyze, explore, and present your app data.

Step 2: Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes as field as series

Step 3: Set the formula for phone call duration in minutes to Average and add a pie chart linked to the pivot table

Step 4: Save the spreadsheet and upload it back to the system.

NEW QUESTION 105

DRAG DROP - (Topic 4)

You are design ng a dashboard for a model driven app Users are licensed to use Dynamics 365 Seles Professional

Users must be able to filter the dashboard. You need to determine how to apply the filters.

Which type of dashboard should you use? To answer, drag the appropriate dashboard types to the correct requirements. Each dashboard type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Dashboard types

Standard

Interactive

Power BI embedded

Answer Area

Requirement

Filter all dashboard elements using a timeframe.

Display data from multiple tables and views.

Dashboard type

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Dashboard types

Standard

Interactive

Power BI embedded

Answer Area

Requirement

Filter all dashboard elements using a timeframe.

Display data from multiple tables and views.

Dashboard type

Interactive

Standard

NEW QUESTION 110

- (Topic 4)

You have a Power Platform solution that uses Common Data Service.

You need to secure all fields that support field-level security. Which field can you secure?

- A. createdon
B. accountid
C. owninguser
D. description

Answer: D

Explanation:

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.

ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

NEW QUESTION 112

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a business rule on the appropriate data entity with a scope of entity.

Does the solution meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft->

NEW QUESTION 114

DRAG DROP - (Topic 4)

You create the following apps for a company that provides financial guidance services: a model-driven app for financial advisers that work in the company's offices and a canvas app for remote financial advisers.

You need to create business rules for a custom counselling entity used by all financial advisers.

Who will be affected by the business rules?

To answer, drag the appropriate financial adviser types to the correct business rules. Each financial adviser type may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Financial adviser types	Answer Area	
Office-based financial advisers only	Business rule	Financial adviser type
Remote financial advisers only	Set a field value with the scope set to Entity	Financial adviser type
Office-based and remote financial advisers	Clear a field value with the scope set to All Forms	Financial adviser type
	Set visibility of a field with the scope set to Entity	Financial adviser type

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Office-based and remote financial advisers

Model driven apps can use all actions available on business rules, however not all business rule actions are available for canvas apps at this time.

Box 2: Office-based financial advisers only
If you're building a Canvas app, you must use table as the scope (not All forms, not a specific form)
Box 3: Office-based financial advisers only
The following actions are not available on Canvas apps :
Show or hide columns Enable or disable columns
Create business recommendations based on business intelligence.

NEW QUESTION 115

- (Topic 4)
You create a new solution publisher and include a publisher prefix value.
Which two actions can you perform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. You can change contact details of a publisher after you create the publisher
- B. When you change a solution publisher prefix, you can change the schema name for existing components
- C. You can change the schema name of a publisher after creating the publisher
- D. You can add a component from one solution to another solution that has a different publisher

Answer: AD

Explanation:

Once you introduce a publisher for a component in a managed solution, you can't change the publisher for the component.
Reference:
<https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm#solution-publisher>

NEW QUESTION 118

HOTSPOT - (Topic 4)
A company uses two SQL Server environments and two Common Data Service environments.
The company policy states that only specific administrators can create environments. SQL Server and Common Data Service groups must be distinct.
You need to assign security access.
What should you assign? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Role	Security access
Admin users for SQL environments	<div>▼</div> <div>Environment Maker</div> <div>Environment Admin</div> <div>System Administrator and Environment Security group</div> <div>Power Platform Administrator and Environment Security group</div>
Admin users for Common Data Service environments	<div>▼</div> <div>Environment Maker</div> <div>Environment Admin</div> <div>Global Administrator</div> <div>System Administrator</div>
Users that create Common Data Service apps	<div>▼</div> <div>System Customizer</div> <div>Environment Maker</div> <div>Environment Admin</div> <div>System Administrator</div>
Users that create SQL apps	<div>▼</div> <div>System Customizer</div> <div>Environment Maker</div> <div>Environment Admin</div> <div>System Administrator</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: System Administrator and Environment Security group Security model for the databases
When a database is created, the users who have environment roles assigned to them, will continue to maintain those privileges.
Users with Environment Admin role are now assigned to System Administrator role. Users with Environment Maker continue to possess the same role.
Box 2: Environment Admin
The Environment Admin role can perform all administrative actions on an environment, including the following:
? Add or remove a user from either the Environment Admin or Environment Maker role.
Box 3: Environment Maker
Environment Maker: Can create new resources associated with an environment, including apps, connections, custom APIs, gateways, and flows using Microsoft Power Automate. However, this role doesn't have any privileges to access data within an environment. More information:
Box 4: System Customizer
System Customizer: Has full permission to customize the environment. However, users with this role can only view records for environment entities that they create.

NEW QUESTION 122

HOTSPOT - (Topic 4)

You create a Power Automate cloud flow that runs when a user creates a Microsoft Dataverse lead record.

The cloud flow must update a custom score column on the lead record based on other column values. The flow must perform the following activities:

- Update the Microsoft Dataverse record.
- Evaluate whether the Microsoft Dataverse record should be updated. You need to configure the flow components.

Which components should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component
Update the Microsoft Dataverse record.	<div>Action</div> <div>Action</div> <div>Trigger</div> <div>Function</div>
Evaluate whether the Microsoft Dataverse record should be updated.	<div>Condition</div> <div>Action</div> <div>Condition</div> <div>Data operation</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Component
Update the Microsoft Dataverse record.	<div>Action</div>
Evaluate whether the Microsoft Dataverse record should be updated.	<div>Condition</div>

NEW QUESTION 123

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD.

Proposed solution:

Create a custom rollup field of type currency on the country/region table that aggregates all the total amounts for the orders from that country/region and display this rollup field in a Power BI chart.

Does the solution meet the goal?

- A. Yes
B. No

Answer: B

Explanation:

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

NEW QUESTION 125

DRAG DROP - (Topic 4)

You have the following Common Data Service entities: BusinessContracts and

You need to configure an N:N relationship between the two entities.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Select Add relationship and then select the many-to-many relationship option.	
Select the BusinessAccounts entity as the related entity.	
Open the relationship tab of the BusinessContracts entity.	
Choose the Relationship Name and Relationship Entity Prefix.	

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Step 1: Open the relationship tab of the BusinessContracts entity. View entity relationships
From the Power Apps portal, select either Model-driven or Canvas design mode. Select Data > Entities and select the entity that has the relationships you want to view. With the Relationships tab selected, you can select the following views:
Step 2: Select Add relationship.. Create relationships
While viewing entity relationships, in the command bar, select Add relationship and choose Many-to-many.
Step 3: Select the BusinessAccounts entity as the related entity.

NEW QUESTION 127

- (Topic 4)
You create a canvas app that uses the following resources:
• Power Automate cloud flow
• Custom connector
• Microsoft Dataverse customization
• Connection
You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

- A. Custom connector
- B. Connection
- C. Microsoft Dataverse customization
- D. Power Automate cloud flow

Answer: D

NEW QUESTION 130

- (Topic 4)
You create a canvas app.
You need to ensure that there are no screen reader issues in the app.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Open Test Studio.

Select **Formula**.

Open the App checker.

Select **Accessibility**.

Select **Error**.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Open Test Studio.

Select **Formula**.

Open the App checker.

Select **Accessibility**.

Select **Error**.

Answer Area

Open the App checker.

Select **Accessibility**.

Select **Error**.

NEW QUESTION 135

- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app.
You need to automatically detect bicycles in pictures taken with the camera.
Proposed solution:
? Create a Category Classification custom model in AI Builder.
? Train the model with pictures of bicycles and then publish the trained model.
? Add the Object Detector control to your canvas app.
Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 138

DRAG DROP - (Topic 4)

You have an existing Power Apps environment.

You need to create a Common Data Service database for the environment.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Select Create my database	
Configure currency and language settings	
Configure database collation settings	
Set the environment type to Production	
Select an existing environment	

➤
➤

⬆
⬇

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Select an existing environment Add a database in the admin center:

- * 1. In the admin center, in the left navigation pane, select Environments.
- * 2. Select the environment to which you want to add the database.

Step 2: Select Create my database

- * 3. Select + Add database

Step 3: Configure currency and language settings

- * 4. Enter the following, and then select Add.

Setting	Description
Language	The default language for this environment.
Currency	The base currency used for reporting.
Enable Dynamics 365 apps	Select Yes and make a selection to automatically deploy apps such as Dynamics 365 Sales and Dynamics 365 Customer Service.
Deploy sample apps and data	Select Yes to include sample apps and data. Sample data gives you something to experiment with as you learn. You must select No for Enable Dynamics 365 apps for this setting to appear.
Security group	Select a security group to restrict access to this environment.

NEW QUESTION 140

- (Topic 4)

A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. SQL Server Management Studio
- D. Visual Studio Code

Answer: BC

Explanation:

There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to- one) relationships:
? You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal
? You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer
Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n- relationships>

NEW QUESTION 141

- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app.
You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:
? Create an Object Detection custom model in AI Builder.
? Train the model with pictures of bicycles and then publish the trained model.
? Add the Object Detector control to your canvas app.
Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

To train an object detection model to recognize your objects, you have to gather images that contain those objects.
The first thing you'll do when you create an AI Builder object detection model is to define its domain.
Upload images
Then Train and publish your object detection model
The object detector component takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.
Reference:
<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 146

DRAG DROP - (Topic 4)
You perform repeatable tasks using software installed on a home computer. The operating system includes Microsoft Power Automate Desktop.
You need to decide which tasks to automate using Power Automate Desktop.
Which tasks can you automate? To answer, drag the appropriate can automate responses to the correct tasks. Each can automate response may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content
NOTE: Each correct selection is worth one point.

Options

Yes

No

Answer Area

Task	Can automate
Move files from one folder to another, rename them, and put into archive.	<div></div>
When an email arrives, save attachments from Outlook to your OneDrive folder.	<div></div>
Read product prices from an online shop and add them to an Excel file.	<div></div>
Schedule reading currency exchange rates and save them to an Excel file each day at 7:00 a.m.	<div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Options

Yes

No

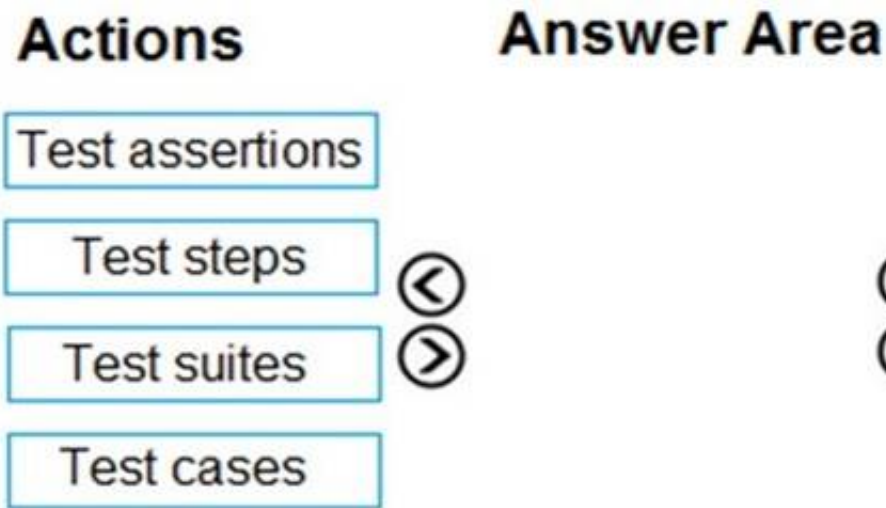

Answer Area

Task	Can automate
Move files from one folder to another, rename them, and put into archive.	<div>Yes</div>
When an email arrives, save attachments from Outlook to your OneDrive folder.	<div>Yes</div>
Read product prices from an online shop and add them to an Excel file.	<div>Yes</div>
Schedule reading currency exchange rates and save them to an Excel file each day at 7:00 a.m.	<div>Yes</div>

NEW QUESTION 150

DRAG DROP - (Topic 4)
You have a canvas app that uses multiple inputs for calculations.
You must use Test Studio to create automated tests and confirm that the app works as expected.
You need to organize your test scenarios into a hierarchy.
In which order should you create the objects? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct

order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Test suites

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases. An app can contain one or more test suites.

Step 2: Test cases

Depending on how you want to organize or group your tests, you can create multiple test cases in a test suite. Each case can test a specific feature or a subset of functionalities in your app.

Step 3: Test steps Step 4: Test assertions

A test case consists of test steps that contain actions. Test actions are written using Power

Apps expressions that perform a task. You can use the recorder to automatically generate the test steps as you interact with your app. After you record, you can update the test case, add new steps, delete steps, and write test assertions to validate the result of your test.

NEW QUESTION 151

- (Topic 4)

A company uses a canvas app. The last published version of the app is version 18.

You edit the app. You save your updates and run the app. When you test the app, you discover you deleted a screen.

You need to restore the last published version of the app.

What is the version number of the app after you successfully restore it?

- A. 17
- B. 18
- C. 18.1
- D. 20

Answer: B

NEW QUESTION 154

- (Topic 4)

You create a Microsoft Power BI report with multiple visualizations displayed together. The report must be available to users in all security roles. You need to display the report in a model-driven app. What should you embed?

- A. Power BI dashboard on a model-driven form.
- B. Power BI tile on a model-driven form.
- C. Power BI dashboard on a model-driven dashboard.
- D. Power BI tile on a model-driven dashboard.

Answer: D

NEW QUESTION 159

- (Topic 4)

A company stores financial files in Microsoft SharePoint document libraries. When a user uploads a new file, the user's manager must approve the request. You need to design a cloud flow to meet The requirement.

Which three actions should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. When a file is created trigger
- B. Get direct reports action
- C. Wait for an approval action
- D. When an item or a file is modified trigger
- E. When an item is created trigger
- F. Assign manager action
- G. Start and wait for an approval action
- H. Get manager action

Answer: AFG

NEW QUESTION 162

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a Power Automate flow with conditions that use entered data as default data.

Does the solution meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows>

NEW QUESTION 163

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Power Apps. The company has a SharePoint list that contains the names of partner organizations and the country/region of the partners. The company requires a canvas app that has a gallery screen to display the information in the SharePoint list. Users must be able to:

* Return results for the exact word that was searched.

* View the latest records at the top of the gallery.

* Use a dropdown control to list the countries/regions of the partners. The list must display each country/region only once.

You need to create the gallery screen in a canvas app.

Which functions should you use? To answer, drag the appropriate functions to the correct activities. Each function may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NEW QUESTION 166

- (Topic 4)

You work in a warehouse. You build an app for physical inventory counts that is used by different staff members. The typical count takes 14 hours.

The app has a warehouse screen with a gallery that contains the aisles in the warehouse. When a staff member selects an aisle record, another screen displays all the items stored in that aisle. The staff must know how long each aisle takes to do a physical inventory count.

You need to add logic to the app. What should you do?

- A. Configure a timer control, add it to the aisle screen, and then reset it when exiting the aisle screen
- B. Create and configure a stopwatch custom control, and then add it to the gallery
- C. Create and configure a stopwatch custom component, and then add it to the aisle screen
- D. Configure a timer control, add it to the gallery, and then reset it when the selection changes

Answer: C

Explanation:

Reference:
<https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst>

NEW QUESTION 170

- (Topic 4)

You are creating a canvas app.

A small amount of tabular data must be available only to the app. The data must be available before user inter action. You need to create the data source for this data. What should you do?

- A. Use a formula to populate a table when the app starts.
- B. Use the Excel Online connector to retrieve the data.
- C. Create a Microsoft Dataverse table and use the Microsoft Dataverse connector.
- D. Read the data from a file on the device.

Answer: B

NEW QUESTION 173

- (Topic 4)

Engineers in an organization plan to attend an international product show.

The engineers must be able to capture information about presented products based on personal assessment and interest. The engineers must capture the information by taking pictures of the booth, brochures, and other product-specific materials.

You need to provide a button flow to streamline the process.

Which two AI Builder models should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Language detection
- B. Sentiment analysis
- C. Category classification
- D. Business card reader
- E. Form processing

Answer: AD

Explanation:

International product show: The language detection prebuilt model identifies the predominant language of a text document. The model analyzes the text and returns the detected language and a numeric score from 0 through 1. Scores close to 1 indicate higher confidence in the result. The detected language is returned as the "script" of the language. For instance, for the phrase "I have a dog", it will return"en"instead of"en-US". The response for languages that can't be detected isunknown.

Use the AI Builder business card reader component to detect business cards and extract their information. You can take photos directly in the component or load images that you've taken. Data is extracted and identified by using the properties listed below.

Reference:
<https://docs.microsoft.com/en-us/ai-builder/prebuilt-language-detection> <https://docs.microsoft.com/en-us/ai-builder/business-card-reader-component-in-powerapps>

NEW QUESTION 175

DRAG DROP - (Topic 4)

You are designing a canvas app that will be used by all users including users who have

Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Outcomes

Not visible to any users

Visible to sighted users only

Visible to screen-reader users only

Visible to both sighted and screen-reader users

Answer Area

Action

Set the values for the X and Y properties of a control to move the control off-screen.

Set the Color and other related properties of a control to transparent.

Set the Height and Width properties of a control to 1.

Outcome

Outcome

Outcome

Visible to sighted users only

Visible to screen-reader users only

Visible to both sighted and screen-reader users

Answer Area

Action

Set the values for the X and Y properties of a control to move the control off-screen.

Set the Color and other related properties of a control to transparent.

Set the Height and Width properties of a control to 1.

Outcome

Visible to sighted users only

Visible to screen-reader users only

Not visible to any users

NEW QUESTION 176

DRAG DROP - (Topic 4)

A company uses Power Automate.

The company requires three cloud flows for the following:

- Send email notifications to a team member after an expense request is approved.
- If a document is uploaded to OneDrive, forward the document as an email attachment.
- Send an email at 4:00 PM on Fridays to remind team members to submit timesheets. You need to create the cloud flows.

Which cloud flow types should you create? To answer, drag the appropriate cloud flows to the correct activities. Each cloud flow may be used once, more than once, or not at all. You

NOTE: Each correct selection is worth one point.

Cloud flows		Activity	Cloud flow
Automated		Send notifications after expense request approvals.	
Scheduled		Forward new OneDrive documents as attachments.	
Instant		Send timesheet reminder emails at 4:00 PM on Fridays.	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Cloud flows		Activity	Cloud flow
Automated		Send notifications after expense request approvals.	Instant
Scheduled		Forward new OneDrive documents as attachments.	Automated
Instant		Send timesheet reminder emails at 4:00 PM on Fridays.	Scheduled

NEW QUESTION 181

- (Topic 4)

A company uses Microsoft Teams. A coworker creates a chatbot. The coworker observes unexpected behavior with the chatbot. You need to troubleshoot the chatbot.

Which two actions should you recommend to the coworker? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Ask the coworker to assign you to the owner role for the team.
B. In Advanced tools, select Monitor.
C. Ask the coworker to add you to their team.
D. Select the chatbot and then select the Share button.

Answer: AB

NEW QUESTION 186

HOTSPOT - (Topic 4)

A company uses several forms for biannual performance evaluations. The company several performance areas that have a score of 1-10. A paragraph explains the score.

The company must scan completed performance evaluations into a Common Data Service entity by using a Power Apps app. The information in the documents must automatically map to entities and convert into quantifiable information.

If any key phrases in the scored topics cause concern, the company must follow a series of actions to prepare for a follow up.

You need to extract the information and perform the actions when the evaluations are scanned.

Which component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Component
Convert the evaluations from images to data	<div>▼</div> <div>AI Builder</div> <div>Power BI</div> <div>Dataflows</div> <div>Business rules</div>
Convert a form processing variable to an integer	<div>▼</div> <div>Initialize variable</div> <div>Add dynamic content</div> <div>Append to string variable</div> <div>Extract entities and their types from text</div>
Use the flow action to convert a form processing variable to an integer	<div>▼</div> <div>Scope</div> <div>Do until</div> <div>Condition</div> <div>Apply to each</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: AI Builder

The object detection component of AI Builder for PowerApps takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.

Box 2: Extract entities and their types from text

The Entity extraction prebuilt model identifies and classifies key elements from text into pre-defined entities. You can use the prebuilt model out of the box in power apps and power automate.

Box 3: Scope

Scope is a simple way to put similar actions and conditions together like a Stage.

NEW QUESTION 188

- (Topic 4)

You are developing a canvas app to monitor time. The app includes a Text Input control named TIC1 and a Timer control named TIM1.

You need to set TIM1 to a default value. What should you do?

- A. In the OnChange property of TIC1, set the value of the Text property for TIC1 to a context variable that stores the duration value
B. Assign the value of the variable to the OnTimerStart property for TIM1.
C. Assign the Text property of TIC1 to the Duration property of TIM1.
D. Assign the Text property of TIC1 to the OnSelect property of a TIM1.
E. Write code in the OnChange property of TIC1 that assigns the value of the Duration property of the Timer control to Text property of the TIC1. In the OnChange property of TIC1, assign the value to the Duration property for TIM1.

Answer: C

Explanation:

The OnTimerStart, OnTimerEnd and OnSelect are the configurations where you can add your code.

Reference:

<https://sharepains.com/2019/08/22/all-about-timers-in-powerapps/>

NEW QUESTION 190

DRAG DROP - (Topic 4)

You create a custom field on the Account entity.

Members of TeamA must have full access to the field. Members of TeamB must have no access to the field.

You need to configure security.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add TeamA to the field security profile.	
Create a field security profile and set all the permissions for the custom attribute to Yes .	
Add TeamB to the field security profile.	
Create a field security profile and set all the permissions for the custom attribute to No .	
Enable field-level security for the field.	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Step 1: Enable field security for the field

Step 2: Create a field security profile and set all the permissions for the custom attribute to Yes.

Step 3: Add TeamA to the field security profile.

Note: Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.

? Enable field security on one or more fields for a given entity.

? Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

NEW QUESTION 192

DRAG DROP - (Topic 4)

DRAG DROP

You are Designing a Power Virtual Agents chatbot in Microsoft Teams. You create an outline to describe how a conversation should be structured.

You need to configure the chatbot.

Which chatbot component should you use? To answer, drag the appropriate components to the correct conversation elements. Each component may be used once, more than once, or not at all. You may need to drag the spirt bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION 196

- (Topic 4)

You are creating an employee directory canvas app. The app must display name, address, and a photo of each employee. You need to select a control type that will display the

- A. Address input
- B. List box
- C. Gallery
- D. Data table

Answer: C

NEW QUESTION 201

HOTSPOT - (Topic 4)

A company is creating new app for use by technicians.

Previous versions of the app do not render properly on tablets and phones. You need to ensure that the new app renders properly on all devices.

Which design element should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Design element
Create an app that does not specify a screen size in the design	<div>▼</div> <div>Phone form factor</div> <div>Tablet form factor</div> <div>Blank canvas app</div> <div>Model-driven app</div>
Lock the screen size for an app that needs to be set to a specific resolution	<div>▼</div> <div>Aspect ratio</div> <div>Orientation</div> <div>Image positioning</div> <div>Display mode</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Tablet form factor Box 2: Aspect version

Customize a canvas app by changing its screen size.

? Sign in to Power Apps.

? Open the app to edit.

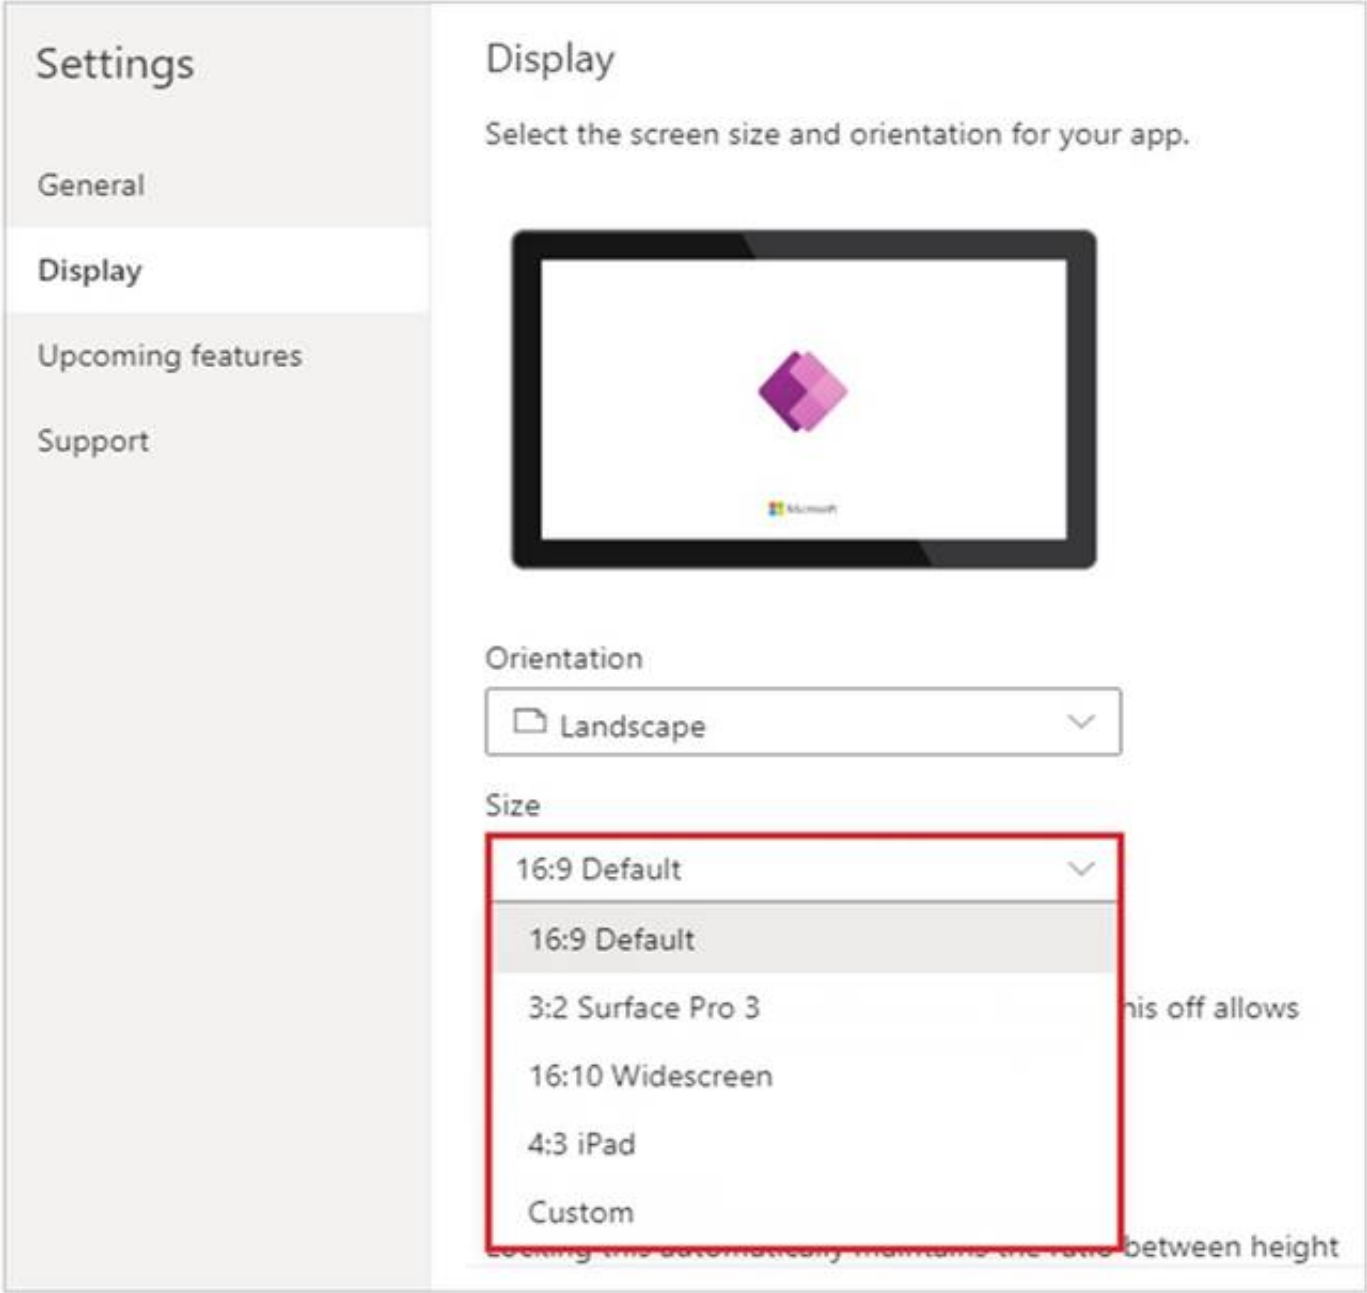

? Select Settings.

? Select Display.

? (Tablet apps only) Under Aspect ratio, perform either of these steps:

? Select the ratio that matches the target device for this app.

? Select Custom to set your own size, and then specify a width between 50 - 3840 and a height between 50 - 2160.

NEW QUESTION 202

- (Topic 4)
A company uses a canvas app to encourage employees to take reading breaks during their work schedule. The reading breaks are created automatically as Outlook tasks in the employees Outlook app. The app must trigger a Power Automate cloud flow when specific data is captured in the canvas app. You need to create and configure the flow. Which flow step should you configure first?

- A. Flow button for mobile
- B. Power Apps step with trigger conditions
- C. New Microsoft Outlook task
- D. Condition step

Answer: A

NEW QUESTION 205

DRAG DROP - (Topic 4)
DRAG DROP
You are designing several new Microsoft Power Platform apps for a company. You have the following requirements:
All apps must be able to run from the Power Apps mobile app.
You need to determine which app type to create for each department.
Which app type should you use? To answer, drag the appropriate app types to the correct departments. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

- A. Mastered
- B. Not Mastered

Answer Area

Open the maker app and navigate to the student table

Create new options for College - 1 Year and College - 2 years

Publish the student entity

NEW QUESTION 219

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app.

Solution:

? Add a display form to Screen_AccountDetail.

? Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).

? Set the data source of the form to Accounts.

? Set the Item property of the form to Selected.

? Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Does the solution meet the goal?

A. Yes

B. No

Answer: A

Explanation:

If you add a Display form control, the user can display all fields of a record or only the fields that you specify.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail>

NEW QUESTION 223

- (Topic 4)

You use a Microsoft SharePoint list to record information about customers.

You must perform a series of actions only when a new item is added to a SharePoint list. You need to configure a Power Automate flow.

Which trigger should you use?

- A. When an item is created
- B. When an item is created or modified
- C. When a file is created (properties only)
- D. For a selected item

Answer: A

Explanation:

Trigger - When an item is created Triggers when an item is created.

MS Flow will trigger when an item is created in the list. It will return all list item properties which can be used in the Flow.

Reference:

<https://www.c-sharpcorner.com/article/sharepoint-based-triggers-in-ms-flow-part-2/>

NEW QUESTION 224

- (Topic 4)

You have a Power Apps solution that includes three model-driven apps, a business process flow, and a scheduled flow. The solution is deployed to a datacentre in the United States.

You plan to deploy the solution to Canada.

You need to identify applicable government regulations for all components of the solution. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. View results in the Service Trust portal.
- B. Check the results of the Solution checker.
- C. Identify regulations for the region where the tenant resides.
- D. Identify all regulations for the region where the Common Data Service database resides.
- E. Configure data loss prevention (DLP) policies in the Power Platform Admin center.

Answer: ADE

Explanation:

A: The Microsoft Service Trust Portal provides a variety of content, tools, and other resources about Microsoft security, privacy, and compliance practices.

D: The Service Trust Portal contains details about Microsoft's implementation of controls and processes that protect our cloud services and the customer data therein.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trust-portal>

NEW QUESTION 226

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

? Create a Prediction custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model

Note: AI Builder prediction models analyze patterns in historical data that you provide. Prediction models learn to associate those patterns with outcomes. Then, we use the power of AI to detect learned patterns in new data, and use them to predict future outcomes.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview>

NEW QUESTION 228

- (Topic 4)

You are creating a canvas app. You plan to use variables that are scoped to a screen to store values.

You need to create and update the value of the variables.

Which three functions can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Collect
- B. Patch
- C. Navigate
- D. Set
- E. UpdateContext

Answer: BCE

Explanation:

B: Use the Patch function to modify records in complex situations. Such as, when you do updates that require no user interaction or use forms that span multiple screens.

CE: Context variables are scoped for Screen. They are great for passing values to a screen, much like parameters to a procedure in other languages. Can be referenced from only one screen.

Functions available for context variables: UpdateContext

Navigate Note:

Use the UpdateContext function to create a context variable, which temporarily holds a piece of information, such as the number of times the user has selected a button or the result of a data operation.

Context variables are also preserved when a user navigates between screens. You can use Navigate to set one or more context variables for the screen that the formula will display, which is the only way to set a context variable from outside the screen. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-patch>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-updatecontext>

NEW QUESTION 232

- (Topic 4)

A company uses Microsoft Power Apps.

You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.

You need to propose the right solution.

Solution: Append filter parameter to Power BI report URL. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A
