

Microsoft

Exam Questions MD-100

Windows 10

NEW QUESTION 1

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

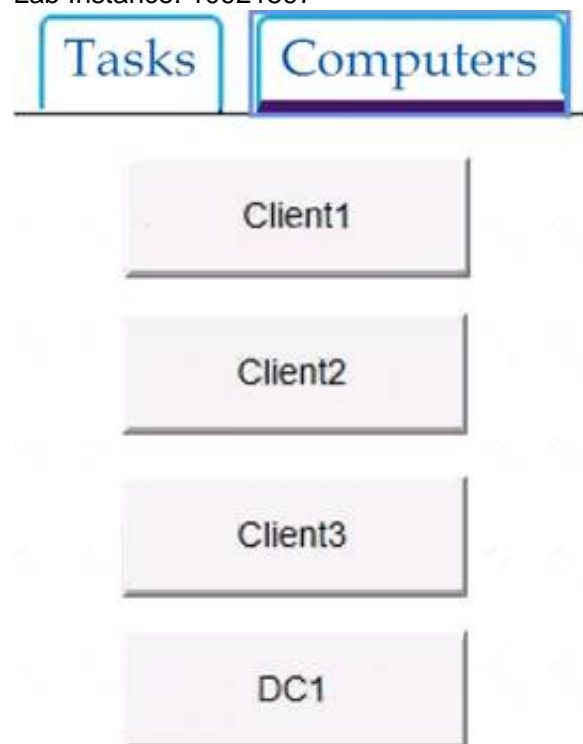

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.
- > On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.
- > A window will pop up asking you whether or not you want to encrypt the file and its parent folder. Select the "Encrypt the file only" and click OK.

- Private.txt will now show its file name in green color.
- Right-click Private.txt and then select Properties.
- Click Advanced on the General tab.
- Click Details on the Advanced Attributes tab to open the User Access dialog box.
- Click Add to open the Encrypting File System dialog box and then select User1.
- Click OK to add User1 to the list of users who have access to the file.
- Click OK until you've exited out of the dialog boxes.

NEW QUESTION 2

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You need to ensure that when Computer 1 is low on disk space, the computer automatically cleans up temporary files and empties the Recycle Bin.

What should you use?

- A. Optimize Drives
- B. Disk Cleanup
- C. Storage Sense
- D. Storage Spaces

Answer: C

NEW QUESTION 3

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

You need to modify the registry of Computer1 by using Registry Editor from Computer2. Which two registry hives can you modify? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. HKEY_CURRENT_USER
- B. HKEY_LOCAL_MACHINE
- C. HKEY_USERS
- D. HKEY_CLASSES_ROOT
- E. HKEY_CURRENT_CONFIG

Answer: BC

NEW QUESTION 4

- (Exam Topic 4)

You have 100 computers that run Windows 10. The computers are joined to an Azure AD tenant and enrolled in Microsoft Intune. The computers are in remote locations and connected to public networks.

You need to recommend a solution for help desk administrators that meets the following requirements:

- Connect remotely to a user's computer to perform troubleshooting.
- Connect to a user's computer without disrupting the desktop of the computer.
- Remotely view services, performance counters, registry settings, and event logs.

Which tool should you include in the recommendation?

- A. Quick Assist
- B. Intune
- C. Remote Assistance
- D. Windows Admin Center

Answer: C

NEW QUESTION 5

- (Exam Topic 4)

You are a network administrator at your company.

A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.

You start the computer in the recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

▼	▼
Bootrec	/FixMbr
Diskpart	/RebuildBcd
Sfc	/ScanNow
	/offbootdir

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References: <https://neosmart.net/wiki/bootmgr-is-missing/>

NEW QUESTION 6

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10.

You need to configure Windows Hello for sign-in to Computer1 by using a physical security key. What should you use?

- A. a USB 3.0 device that supports BitLocker Drive Encryption (BitLocker)
- B. a USB device that supports FIDO2
- C. a USB 3.0 device that has a certificate from a trusted certification authority (CA)
- D. a USB device that supports RSA SecurID

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/user-help/security-info-setup-security-key>

NEW QUESTION 7

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer2, you enable PowerShell Remoting.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 8

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to ensure that Computer1 will respond to ping requests.

How should you configure Windows Defender Firewall on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Rule to create:

A server-to-server connection security rule
An authentication exemption connection security rule
An inbound rule
An outbound rule

Protocol type to allow:

ICMPv4
IGMP
PGM
TCP
UDP

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Rule to create:

A server-to-server connection security rule

An authentication exemption connection security rule

An inbound rule

An outbound rule

Protocol type to allow:

ICMPv4

IGMP

PGM

TCP

UDP

NEW QUESTION 9

- (Exam Topic 4)
You have a Windows 11 Pro device.
You need to perform a scan in Microsoft Defender to check for rootkits. Which type of scan should you use?

- A. full
- B. offline
- C. custom
- D. quick

Answer: B

NEW QUESTION 10

- (Exam Topic 4)
You have the computers shown in the following table.

Name	Windows 10 edition	Servicing channel
Computer1	Windows 10 Education	Semi-annual
Computer2	Windows 10 Pro	Semi-annual
Computer3	Windows 10 Enterprise	Semi-annual

You apply the 20H2 feature update as soon as the update is available.
How many months of servicing does each computer support without installing another feature update? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Computer1:

6 months

12 months

18 months

30 months

Computer2:

6 months

12 months

18 months

30 months

Computer3:

6 months

12 months

18 months

30 months

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2.

Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe. Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>

NEW QUESTION 11

- (Exam Topic 4)

You have a Microsoft 365 Enterprise E3 license.

You have a computer named Computer1 that runs Windows 10.

You need to ensure that you can access the files on Computer1 by using a web browser on another computer. What should you configure?

A. Sync your settings in the Settings app

B. the File Explorer desktop app

C. the Microsoft OneDrive desktop app

D. Default apps in the Settings app

Answer: C

NEW QUESTION 12

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

A. Windows Configuration Designer

B. MSConfig

C. Local Group Policy Editor

D. an MMC console that has the Group Policy Object Editor snap-in

Answer: C

NEW QUESTION 16

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant.

Some users sign in to that computer by using Windows hello for Business. A user User1 purchases a new computer and joins the computer to Azure AD.

User1 attempts to configure the sign-in options and receives the error message shown in the exhibit. (Click the Exhibit tab.)

Sign-in options

***Some settings are hidden or managed by your organization.**

Windows Hello

Sign in to Windows, apps and services by teaching Windows to recognize you.

Windows Hello isn't available on this device.

[See how it works and find compatible devices.](#)

You open device Manager and confirmed that all the hardware works correctly.

You need to ensure that user1 can use Windows Hello for Business facial recognition to sign in to the computer.

What should you do first.

- A. Purchase an infrared (IR) camera.
- B. Install a virtual TPM driver.
- C. Enable UEF Secure Boot.
- D. Upgrade the computer to windows 10 Enterprise.

Answer: D

NEW QUESTION 21

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, Press Windows+R
- Type lusrmgr.msc
- Right click Groups and click New Group.
- Type in the Group name and a description.
- Click Add to add members to this group. Specify the name of the user or group or computer to be added.
- Click Create and Close.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

NEW QUESTION 24

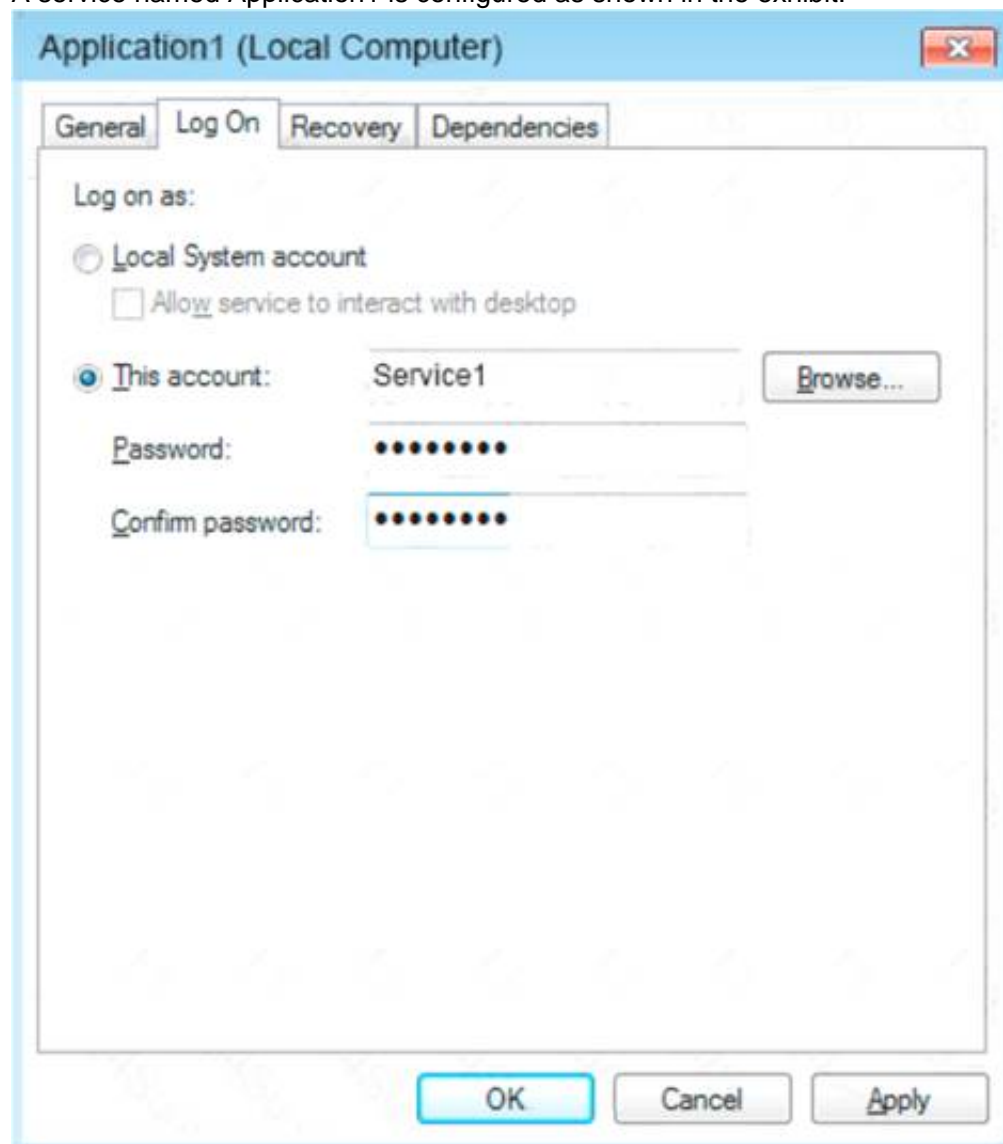

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on as a service user right. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-as-a-s>

NEW QUESTION 25

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

NEW QUESTION 28

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to be able to recover the computer by using System Image Recovery.

What should you use to create a system image?

A. Windows System Image Manager (Windows SIM)

B. Backup and Restore (Windows 7)

C. File History

D. System Protection

Answer: B

Explanation:

NEW QUESTION 31

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains computers that run Windows 11.

You have a workgroup computer named Computer1 that runs Windows 11 and contains a user named User1. Each computer contains a folder named C:\Folder1.

Each C:\Folder1 contains three files named Image1.jpg.

Image2.jpg. and Image3.jpg.

Contoso.com has the Default Domain Policy configured as shown in the following table.

Policy	Value
Minimum password length	7
Desktop Wallpaper	Enabled C:\Folder1\Image1.jpg

Contoso.com has the Default Domain Controllers Policy configured as shown in the following table.

Policy	Value
Minimum password length	10
Desktop Wallpaper	Enabled C:\Folder1\Image2.jpg

Computer1 has a local Group Policy configured as shown in the following table.

Policy	Value
Minimum password length	5
Desktop Wallpaper	Enabled C:\Folder1\Image3.jpg

You join Computer1 to contoso.com and User1 signs in to the computer.

What is the minimum password length and the desktop wallpaper for User1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Minimum password length:

5

Image3.jpg

Desktop wallpaper:

Image3.jpg

Image1.jpg

Image2.jpg

Image3.jpg

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Desktop wallpaper:

Image3.jpg

Image1.jpg

Image2.jpg

image3.jpg

NEW QUESTION 36

- (Exam Topic 4)
You have the network shown in the following exhibit.

Computer1. Computed, and Computed run Windows 10. Windows Defender Firewall is configured to allow ICMP traffic RTR1 is a router.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If Computer1 pings the IP address of Computer2, Computer1 will receive a reply.	<input type="radio"/>	<input type="radio"/>
If Computer1 pings the IP address of Computer3, Computer1 will receive a reply.	<input type="radio"/>	<input type="radio"/>
If Computer2 pings the IP address of Computer3, Computer2 will receive a reply.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:
Answer Area

Statements	Yes	No
If Computer1 pings the IP address of Computer2, Computer1 will receive a reply.	<input checked="" type="radio"/>	<input type="radio"/>
If Computer1 pings the IP address of Computer3, Computer1 will receive a reply.	<input checked="" type="radio"/>	<input type="radio"/>
If Computer2 pings the IP address of Computer3, Computer2 will receive a reply.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 39

- (Exam Topic 4)

You are troubleshooting an issue that prevents you from installing Windows 10 updates. You discover that the issue relates to corrupt protected system files. You need to restore the corrupt system files. Which command should you run?

- A. scanstate
B. sfc
C. chldslc
D. chkntfs

Answer: B

Explanation:
References:

<https://support.microsoft.com/en-us/topic/use-the-system-file-checker-tool-to-repair-missing-or-corrupted-syste>

NEW QUESTION 43

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User1 on Computer1.

Does this meet the goal?

- A. Yes
B. No

Answer: B

Explanation:
References:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges. User1 is a standard user. References:
<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 44

- (Exam Topic 4)

You deploy Windows 10 to several computers. The computers will be used by users who frequently present their desktop to other users.

You need to prevent applications from generating toast notifications in the notification area. Which settings should you configure from the Settings app?

- A. Shared experiences
- B. Privacy
- C. Focus assist
- D. Tablet mode

Answer: C

Explanation:

Focus Assist will automatically hide incoming notifications, so they don't pop up and distract you while you're playing a game, giving a presentation, or using a full-screen application.

NEW QUESTION 46

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro.

You have a mobile device. You use Bluetooth to pair the mobile device to Computer1. You want to enable dynamic lock on Computer1.

What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

➤ On Computer1, select the Start button > Settings > Accounts > Sign-in options.

➤ Under Dynamic lock, select the Allow Windows to automatically lock your device when you're away check box.

Reference:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 47

- (Exam Topic 4)

You have 10 computers that run Windows 10 and have BitLocker Drive Encryption (BitLocker) enabled. You plan to update the firmware of the computers.

You need to ensure that you are not prompted for the BitLocker recovery key on the next restart. The drive must be protected by BitLocker on subsequent restarts.

Which cmdlet should you run?

- A. Unlock-BitLocker
- B. Disable-BitLocker
- C. Add-BitLockerKeyProtector
- D. Suspend-BitLocker

Answer: D

Explanation:

References:

<https://support.microsoft.com/en-us/help/4057282/bitlocker-recovery-key-prompt-after-surface-uefi-tpm-firmwa>

NEW QUESTION 52

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Several users have signed in to Computer1 and have a profile.

You create a taskbar modification file named LayoutModification.xml.

You need to ensure that LayoutModification.xml will apply to all users who sign in to Computer1. To which folder should you copy LayoutModification.xml?

- A. C:\Users\Public\Public Desktop
- B. C:\Windows\ShellExperiences
- C. C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\
- D. C:\Windows\System32\Configuration

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/start-layout-xml-desktop>

NEW QUESTION 56

- (Exam Topic 4)

You have two computers named Computer1 and Computer2 that run Windows 10. The computers are in a workgroup.

You perform the following configurations on Computer1:

- Create a user named User1.
- Add User1 to the Remote Desktop Users group. You perform the following configurations on Computer2:
- Create a user named User1 and specify the same user password as the one set on Computer1.
- Create a share named Share2 and grant User1 Full control access to Share2.

> Enable Remote Desktop.
What are the effects of the configurations? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

If User1 attempts to access Share2 from Computer1, the user will:

	▼
Access Share2 without a prompt	
Be prompted for credentials	
Be denied access to Share2	

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

	▼
Sign in to Remote Desktop without a prompt	
Be prompted for credentials and be able to sign in as User1.	
Be prompted for credentials and be prevented from signing in as User1.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

If User1 attempts to access Share2 from Computer1, the user will:

	▼
Access Share2 without a prompt	
Be prompted for credentials	
Be denied access to Share2	

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

	▼
Sign in to Remote Desktop without a prompt	
Be prompted for credentials and be able to sign in as User1.	
Be prompted for credentials and be prevented from signing in as User1.	

NEW QUESTION 60

- (Exam Topic 4)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. NEW QUESTION 63

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains the folders shown in the following table.

Name	Path
FolderA	C:\FolderA
FolderB	C:\FolderA\FolderB
FolderC	C:\FolderA\FolderB\FolderC

You create the groups shown in the following table.

Name	Members
Group1	User1, User2
Group2	User2, User3
Group3	User1, User3

On FolderA, you remove permission inheritance. To each folder, you assign the NTFS permissions shown in the following table.

Folder	Permission
FolderA	Modify to Group1 Read to Group2
FolderB	Write to Group2
FolderC	Read to Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can read and write all files in FolderC.	<input type="radio"/>	<input type="radio"/>
User2 can delete all files in FolderB.	<input type="radio"/>	<input type="radio"/>
User3 can delete all files in FolderC.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

YES YES NO

NEW QUESTION 66

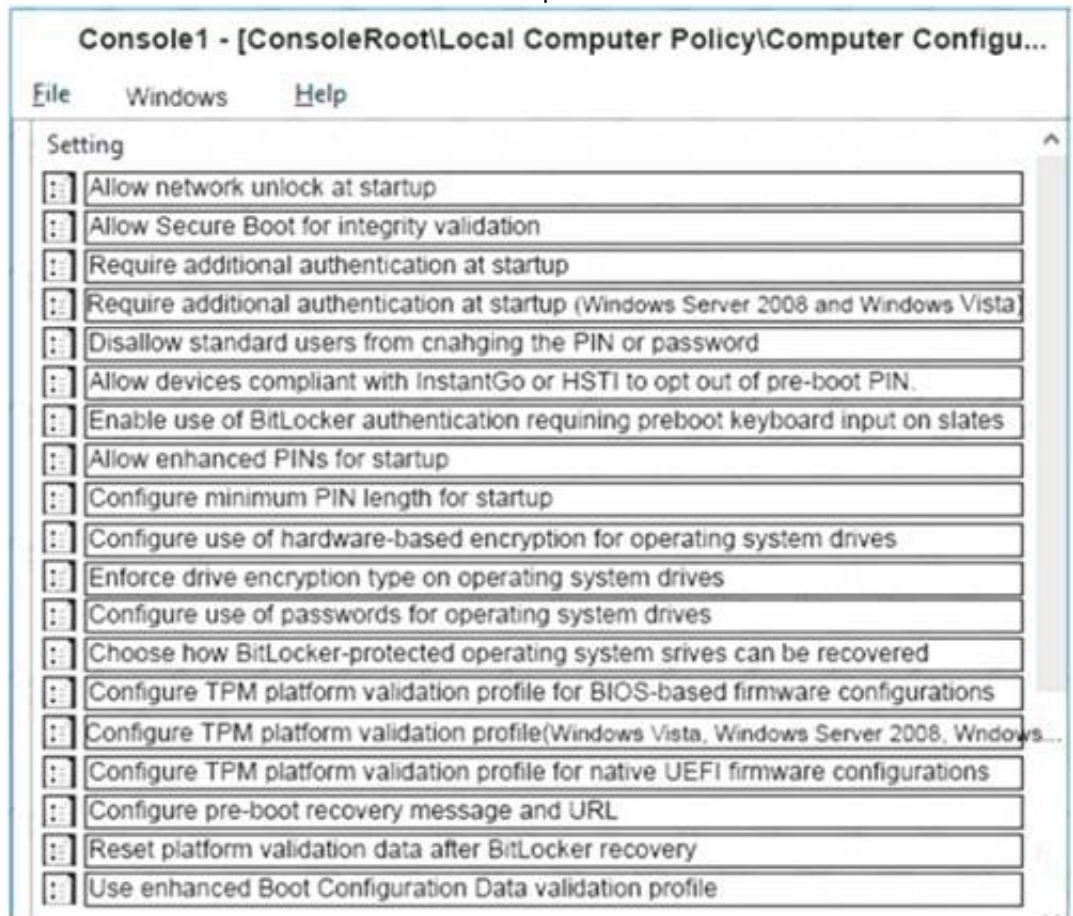

- (Exam Topic 4)

Your domain contains named Computer named Computer1 that runs Windows 10. Computer1 does not have a TPM.

You need to be able to encrypt the C drive by using BitLocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 70

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Domain Admins
User2	Backup Operators

The domain contains a computer named Computer1. Computer1 contains the users shown in the following table.

Name	Member of
User3	Administrators
User4	Users

On Computer1, you create a restore point named RP1.

Which users can restore RP1 on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Can restore RP1 on Computer1 while Windows is running:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

Can restore RP1 if Computer1 restarts by using Advanced startup:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 73

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11. Client1 hosts a Hyper-V virtual machine named VM1 that runs Windows 11 Pro. VM1 is in the running state.

You need to enable Windows Sandbox on VM1.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

From VM1, run the Enable-WindowsOptionalFeature cmdlet.

Stop VM1.

From Client1, run the Set-VmProcessor cmdlet.

From Client1, run the Enable-WindowsOptionalFeature cmdlet.

Sign in to VM1.

Start VM1.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

From VM1, run the Enable-WindowsOptionalFeature cmdlet.

Stop VM1.

From Client1, run the Set-VmProcessor cmdlet.

From Client1, run the Enable-WindowsOptionalFeature cmdlet.

Sign in to VM1.

Start VM1.

Answer Area

Stop VM1.

From Client1, run the Set-VmProcessor cmdlet.

From Client1, run the Enable-WindowsOptionalFeature cmdlet.

Sign in to VM1.

Start VM1.

NEW QUESTION 77

- (Exam Topic 4)
You have a file named Reg1.reg that contains the following content.
Windows Registry Editor Version 5.00

```
[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad]

[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad\command]
@="notepad.exe"
```

What is the effect of importing the file?

- A. A key named command will be renamed as notepad.exe.
- B. In a key named Notepad, the command value will be set to @="notepad.exe".
- C. In a key named command, the default value will be set to notepad.exe.

Answer: C

NEW QUESTION 78

- (Exam Topic 4)
You are a network administrator at your company.
The company uses an application that checks for network connectivity to a server by sending a ping request to the IPv6 address of the server replies, the application loads.
A user cannot open the application.
You manually send the ping request from the computer of the user and the server does not reply. You send the ping request from your computer and the server replies.
You need to ensure that the ping request works from the user's computer. Which Windows Defender firewall rule is a possible cause of the issue?

- A. File and Printer Sharing (NB-Datagram-In)
- B. File and Printer Sharing (Echo request ICMPv6-Out)
- C. File and Printer Sharing (NB-Datagram-Out)
- D. File and Printer Sharing (Echo Request ICMPv6-In)

Answer: B

NEW QUESTION 79

- (Exam Topic 4)

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2.

Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe. Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 80

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

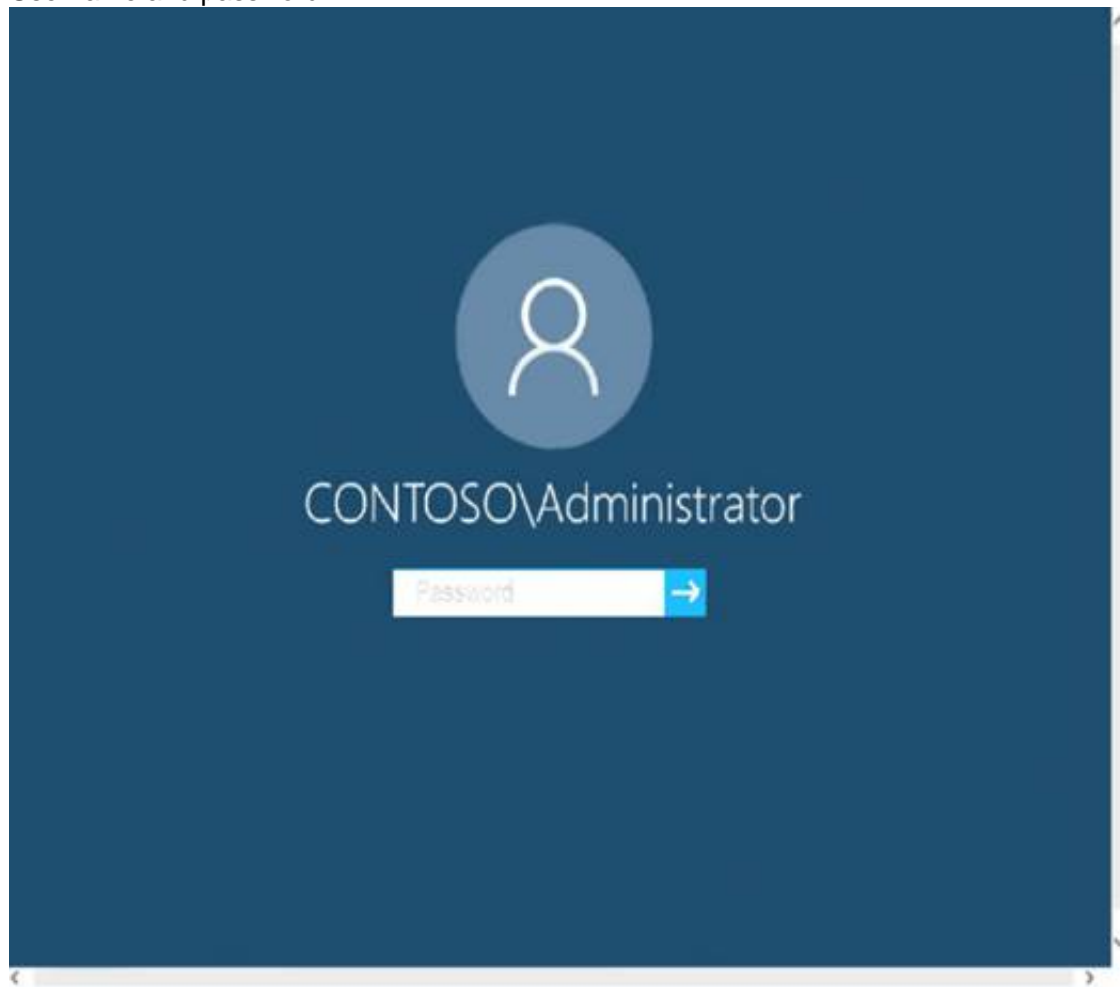

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

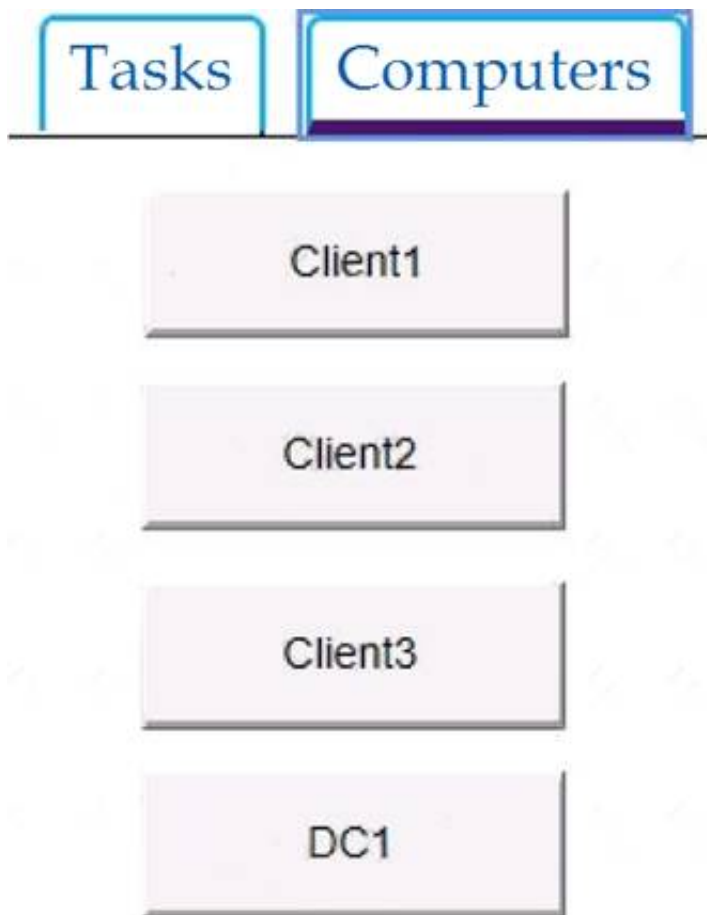

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a user account named User5 on Client2. The solution must meet the following requirements:

- Prevent User5 from changing the password of the account.
- Ensure that User5 can perform backups.
- Use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, press the Win + X keys on your keyboard. Then, click or tap the Computer Management option from the menu.
- Expand the Local Users and Groups from the left side of the window, and select Users.
- Right-click somewhere on the blank space found in the middle section of the window, and click or tap on New User. This opens the New User window, where you can enter all the details about the new user account.
- Type the user name and, optionally, its full name and description.
- Type the password to be used for that user and confirm it.
- Select the User cannot change password check box.
- Click Create and Windows immediately creates the user account. When you are done creating user accounts, click Close in the New User window.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Back up files and directories policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/user-rights-assignm>

NEW QUESTION 81

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the users accounts shown in the following table:

Name	Member of
User1	Administrators
User2	Users, Administrators
User3	Users

Computer1 has the local Group Policy shown in the following table.

Setting	Value
Startup script	ScriptA1
Shutdown script	ScriptA2
Logon script	ScriptA3
Logoff script	ScriptA4

You create the Local Computer\Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptB1
Logoff script	ScriptB2

You create the Local Computer\Non-Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptC1
Logoff script	ScriptC2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
If User1 shuts down Computer1, script ScriptA2 will run.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Computer1, scripts ScriptA3, ScriptB1, and ScriptC1 will run.	<input type="radio"/>	<input type="radio"/>
If User3 signs out of Computer1, scripts ScriptC2 and ScriptA4 will run.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291\(v=ws.10\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291(v=ws.10))

NEW QUESTION 83

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows10. Computer1 is in a workgroup. Computer1 contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1
User3	Group1
User4	Users
Admin1	Administrators

You need to apply the same Group Policy settings to only User1, User2 and User3. The solution must use a minimum number of local Group Policy objects (GPOs).

How many local GPOs should you create?

- A. 1
B. 2
C. 3

Answer: A

Explanation:

You can use security filtering to restrict the GPO to the required users. Only users with the Read and Apply Group Policy permissions will have the GPO applied to them.

NEW QUESTION 88

- (Exam Topic 4)

A user has a computer that runs Windows 10.The user has access to the following storage locations:

- A USB flash drive
- Microsoft OneDrive
- OneDrive for Business
-

A drive mapped to network share

➤ A secondary partition on the system drive

You need to configure Back up using File History from the Settings app.

Which two storage locations can you select by using File History? Each correct answer presents complete solution.

NOTE: Each correct selection is worth one point.

- A. OneDrive for Business
- B. OneDrive
- C. the USB flash drive
- D. the secondary partition on the system drive
- E. the drive mapped to a network share

Answer: CE

NEW QUESTION 92

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 96

- (Exam Topic 4)

You have a computer that runs Windows 10.

You discover that Windows updates are failing to install on the computer.

You need to generate a log file that contains detailed information about the failures. Which cmdlet should you run?

- A. Get-LogProperties
- B. Get-WindowsErrorReporting
- C. Get-WindowsUpdateLog
- D. Get-WinEvent

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdate-log?view=win10-ps>

NEW QUESTION 97

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled.

You need to configure a Windows Sandbox environment. The solution must meet the following requirements:

- Support a virtual GPU.
- Mount the C:\Temp folder as read only.
- Prevent users from copying files to the sandbox by using the clipboard.

How should you complete the configuration file? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Values

Answer Area

```
<Configuration>
  <VGpu>  </VGpu>
  <Networking>Disable</Networking>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\temp</HostFolder>
      <ReadOnly>  </ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\users\WDAGUtilityAccount\Desktop\Temp\startup.cmd</Command>
  </LogonCommand>
  <ProtectedClient>  </ProtectedClient>
  <ClipboardRedirection>Default</ClipboardRedirection>
  <MemoryInMB>6144</MemoryInMB>
</Configuration>
```

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

```
<Configuration>
  <VGpu>  </VGpu>
  <Networking>Disable</Networking>

```

NEW QUESTION 98

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. Users in the finance department use the computers. You have a computer named Computer1 that runs Windows 10. From Computer1, you plan to run a script that executes Windows PowerShell commands on the finance department computers. You need to ensure that you can run the PowerShell commands on the finance department from Computer1. What should you do on the finance department computers?

- A. From the local Group Policy, enable the Allow Remote Shell Access setting.
- B. From the local Group Policy, enable the Turn on Script Execution setting.
- C. From the Windows PowerShell, run the Enable-MMAgent cmdlet.
- D. From the Windows PowerShell, run the Enable-PSRemoting cmdlet.

Answer: D

Explanation:

References:
<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-6>

NEW QUESTION 99

- (Exam Topic 4)
 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
 After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
 A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.
 Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com. User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."
 You need to ensure that User2 can connect to Share1.
 Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1.
 Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417>

NEW QUESTION 103

- (Exam Topic 4)
 You have the source files shown in the following table.

Source	Location
Custom Windows 10 image	D:\Folder1\Image1.wim
Windows 10 language pack DVD	E:\

You mount an image from Image1.wim to a folder named C:\Mount. You need to add the French language pack to the mounted image.
 How should you complete the command? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

▼

Add-WindowsCapability
Add-WindowsFeature
Dism.exe
Setup.exe

/Image:

▼

"C:\Mount"
"C:\Mount\Windows"
"C:\Windows"
"D:\Folder1\Image1.wim"

/Add-Package /PackagePath: "E:\x64\langpacks\Microsoft-Windows-Client-Language-Pack_x64_fr-fr.cab"

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Note: The referenced document has the mount directory as C:\Mount\Windows. In this question, the mount directory is C:\Mount.
 Reference:
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-language-packs-to-windows>

NEW QUESTION 108

- (Exam Topic 4)
 You have 200 computers that run Windows 10 and are joined to an Active Directory domain.
 You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy. Which three actions should you perform? Each correct answer presents part of the solution.
 NOTE: Each correct selection is worth one point.

- A. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- B. Enable the Windows Firewall: Allow inbound remote administration exception setting.
- C. Enable the Allow remote server management through WinRM setting.
- D. Enable the Windows Firewall: Allow inbound Remote Desktop exceptions setting.
- E. Enable the Allow Remote Shell access setting.

F. Set the Startup Type of the Remote Registry service to Automatic.

Answer: ABC

Explanation:

References:

<https://support.auvik.com/hc/en-us/articles/204424994-How-to-enable-WinRM-with-domain-controller-Group-P>

NEW QUESTION 111

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You attempt to start Computer1 but you receive the following error message: Bootmgr is missing.

You need to be able to start Computer1.

What should you do?

- A. Start the computer in recovery mode and run the boocrec /rebuildbcd command.
- B. Start the computer in recovery mode and run the dislcparc /repair command.
- C. Start the computer in recovery mode and run the bcdboot /s command.
- D. Start the computer in recovery mode and run the booccfg /debug command.

Answer: A

Explanation:

Reference:

<https://neosmart.net/wiki/bootmgr-is-missing/>

NEW QUESTION 113

- (Exam Topic 4)

You have an app named App1 that uses an on-premises Microsoft SQL Server database named DB1. You plan to migrate DB1 to an Azure SQL managed instance.

You need to enable customer-managed Transparent Data Encryption (TDE) for the instance. The solution must maximize encryption strength.

Which type of encryption algorithm and key length should you use for the TDE protector?

- A. RSA2048
- B. RSA4096
- C. RSA3072
- D. AES256

Answer: D

NEW QUESTION 118

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Change access to Share1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/storage/files/storage-files-active-directory-enable#assign-access-permiss>

NEW QUESTION 122

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to configure the local computer policy to meet the following requirements:

- An event must be created in the Security log when changes are made to local users or groups.
- The local administrator and guest accounts must be renamed.

Which Security Settings should you modify? To answer, select the appropriate options in the answer area.

Create an event when local users or groups change:

Rename the local administrator and guest accounts:

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: Audit Policy Box 2: Security options

NEW QUESTION 126

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The Guest account is enabled on both computers. The computers contain the users shown in the following table.

Computer name	User name	User password
Computer1	User1	P@ssword1
Computer1	User2	P@ssword2
Computer2	User1	P@ssword1
Computer2	User2	P@ssword2
Computer2	User3	P@ssword3

The computers contain the shared folders shown in the following table.

Computer name	Shared folder name	Permission
Computer1	Share1	Everyone – Read
Computer2	Share2	Everyone – Read

Computer1 has password-protected sharing turned on. Computer2 has password-protected sharing turned off. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
From Computer1, User1 can access Share2.	<input type="radio"/>	<input type="radio"/>
From Computer2, User2 can access Share1.	<input type="radio"/>	<input type="radio"/>
From Computer2, User3 can access Share1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

When password protected sharing is turned on, only people who have a user account and password on your computer can access shared files.

Box 1: Yes

Password protected sharing is turned off on Computer2 so User1 can access Share2 from Computer1.

Box 2: Yes

Password protected sharing is turned on on Computer1. User2 has an account on Computer1 so User2 can access Share1 from Computer2.

Box 3: Yes

The answer to this question depends on which version of Windows 10 is running on the computers. This isn't specified in the question so it's likely that the question will be updated in future.

Password protected sharing is turned on on Computer1. User3 does not have an account on Computer1 so User3 cannot access Share1 from Computer2.

However, the Guest account is enabled which could provide access depending on which version of Windows 10 is running. If it is Windows 10 Home or Pro, then the answer to this question is Yes. The Guest account does provide access. However, in later versions of Windows 10 Enterprise and Windows 10 Education (from build 1709 onwards), the Guest account does not enable access to the shared folder.

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/networking/guest-access-in-smb2-is-disabled-by>

NEW QUESTION 128

- (Exam Topic 4)

You have a computer that runs Windows 10 and has File History enabled. File History is configured to save copies of files every 15 minutes.

At 07:55, you create a file named D:\Folder1\File1.docx.

You add D:\Folder1 to File History and manually run File History at 08:00. You modify File1.docx at the following times:

> 08:05

> 08:12

> 08:20

> 08:24

> 08:50

At 08:55, you attempt to restore File1.docx.

How many previous versions of File1.docx will be available to restore?

A. 2

B. 3

C. 4

D. 5

Answer: C

NEW QUESTION 132

- (Exam Topic 4)

You have 100 computers that run Windows 10 and are members of an Active Directory domain.

Two support technicians named Tech1 and Tech2 will be responsible for monitoring the performance of the computers.

You need to configure the computers to meet the following requirements:

> Ensure that Tech1 can create and manage Data Collector Sets (DCSs).

> Ensure that Tech2 can start and stop the DCSs.

> Use the principle of least privilege.

To which group should you add each technician? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tech1:	<div><div></div><div>Event Log Readers</div><div>Performance Log Users</div><div>Performance Monitor Users</div><div>Remote Management Users</div></div>
Tech2:	<div><div></div><div>Event Log Readers</div><div>Performance Log Users</div><div>Performance Monitor Users</div><div>Remote Management Users</div></div>

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 135

- (Exam Topic 4)

Your network contains an Active Directory domain. All users have been issued with computers that run Windows 8.1.

A user named Mia Hamm has a computer named Computer1. You upgrade Computer1 to Windows 10 by performing a clean installation of Windows 10 without formatting the drives.

You need to migrate the settings for Mia Hamm from Windows 8.1 to Windows 10. Which two actions should you perform?

NOTE: Each correct selection is worth one point.

- A. Run scanstate.exe and specify the C:\Users folder
- B. Run loadstate.exe and specify the C:\Windows.old folder
- C. Run usmultils.exe and specify the C:\Users folder
- D. Run scanstate.exe and specify the C:\Windows.old folder
- E. Run loadstate.exe and specify the C:\Users folder
- F. Run usmultils.exe and specify the C:\Windows.old folder

Answer: DE

Explanation:

D: As we have performed a clean installation of Windows 10 without formatting the drives, User1's Windows 8.1 user profile will be located in the \Windows.old folder. Therefore, we need to run scanstate.exe on the \Windows.old folder.

E: User1's Windows 10 profile will be in the C:\Users folder so we need to run loadstate.exe to apply the changes in the C:\Users folder.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-how-it-works>

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-common-migration-scenarios#bkmk-fourpcrc>

NEW QUESTION 137

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Accounts in the Settings app, you turn off Sync settings. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 139

- (Exam Topic 4)

A user has a computer that runs Windows 10.

When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.

You run the ipconfig command and receive the following output.

```
Connection-specific DNS Suffix . : 
Description . . . . . : Ethernet 1
Physical Address. . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . : 192.168.0.1
DHCP Server . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . : 536891574
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . : 131.107.10.60
                        192.168.0.3
NetBIOS over Tcpip. . . . . : Enabled
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

Answer: A

NEW QUESTION 143

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users
User2	Users, Administrators

Computer1 contains an image file named C:\Folder\Image.jpg.

Computer1 has the Local Computer\Administrators Policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Not configured
Desktop Wallpaper	Disabled

Computer1 has the Local Computer\Non-Administrators Policy shown in the following table.

Setting	State	Path
Remove Recycle Bin icon from desktop	Enabled	<i>Not applicable</i>
Desktop Wallpaper	Enabled	C:\Folder\Image.jpg

Computer1 has the local computer policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Disabled
Desktop Wallpaper	Not configured

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can change the desktop wallpaper.	<input type="radio"/>	<input type="radio"/>
User2 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>
User1 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated

NEW QUESTION 145

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from the Audit Policy in

the local Group Policy, you configure Audit directory service access.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 146

- (Exam Topic 4)

Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers. You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add a task sequence step that adds a provisioning package.
- B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
- C. Add a custom command to the Unattend.xml file.
- D. Add a configuration setting to Windows Deployment Services (WDS).
- E. Add a task sequence step that runs dism.exe.

Answer: AE

Explanation:

References:

Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 148

- (Exam Topic 4)

You have four computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of
Computer1	Workgroup named WG1
Computer2	Workgroup named WG1
Computer3	Workgroup named WG2
Computer4	Active Directory domain named contoso.com

On Computer1, you create a user named User1. In the domain, you create a user named User2. You create the groups shown in the following table.

Name	Created on/in
Group3	Computer3
Group4	Computer4
Group5	Contoso.com

You need to identify to which computers User1 can sign in, and to which groups you can add User2.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1 can sign in to:

Computer1 only

Computer1 and Computer2 only

Computer1, Computer2, and Computer3 only

Computer1, Computer2, and Computer4 only

Computer1, Computer2, Computer3, and Computer4

You can add User2 to:

Group5 only

Group4 and Group5 only

Group3, Group4, and Group5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Computer 1 only.

User1's account was created on Computer1. The account is a local account on Computer1. Therefore, User1 can only sign in to Computer1.

Box 2: Group5 only.

User2's account was created in the domain. A domain is a security boundary. Therefore, you can only add User2 to groups in the domain.

NEW QUESTION 150

- (Exam Topic 4)

You have a computer that runs Windows 10. You use the computer to test new Windows features. You need to configure the computer to receive preview builds of Windows 10 as soon as possible. What should you configure from Update & Security in the Settings app?

- A. Windows Insider Program
- B. Windows Update
- C. Delivery Optimization
- D. For developer

Answer: A

Explanation:

Reference:

<https://insider.windows.com/en-us/getting-started/>

NEW QUESTION 154

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From PowerShell, you run `$env:Path += ";d:\scripts"`. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/about/about_environment_varia

NEW QUESTION 155

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.

Solution: You enable File History on Computer1. You then encrypt the contents of Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

Reference:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

NEW QUESTION 158

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You need to provide a user with the ability to remotely create and modify shares on the computers. The solution must use the principle of least privilege.

To which group should you add the user?

- A. Power Users
- B. Remote Management Users
- C. Administrators
- D. Network Configuration Operators

Answer: C

NEW QUESTION 161

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You are troubleshooting connectivity issues on Computer1.

You need to view the remote addresses to which Computer1 has active TCP connections. Which tool should you use?

- A. Performance Monitor
- B. Task Manager
- C. Resource Monitor
- D. Windows Defender Firewall with Advanced Security

Answer: C

NEW QUESTION 162

- (Exam Topic 4)

You have a computer that runs Windows 10 and hosts four Hyper-V virtual machines that run Windows 10. You upgrade the computer to Windows 11.

You need to ensure that the virtual machines support hibernation. What should you do?

- A. Update the configuration version of the virtual machines.
- B. Enable integration services.
- C. Rebuild the virtual machines as generation 2 virtual machines.
- D. Delete any virtual machine checkpoints.

Answer: A

NEW QUESTION 165

- (Exam Topic 4)

You have the computers shown in the following table.

Name	Windows 10 edition
Computer1	Windows 10 Pro
Computer2	Windows 10 Pro Workstations
Computer3	Windows 10 Enterprise

You need to identify which computers support the features.

- > BitLocker Drive Encryption (BitLocker)
- > Microsoft Application Virtualization (App-V)

Which computers support the features? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

BitLocker:

Computer1 only

Computer2 only

Computer3 only

Computer1 and Computer3 only

Computer2 and Computer3 only

Computer1, Computer2, and Computer3

App-V:

Computer1 only

Computer2 only

Computer3 only

Computer1 and Computer3 only

Computer2 and Computer3 only

Computer1, Computer2, and Computer3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://www.microsoft.com/en-us/windowsforbusiness/compare>

NEW QUESTION 168

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. the sc command
- B. Task Manager
- C. Services
- D. the sfc command

Answer: A

NEW QUESTION 169

- (Exam Topic 3)

You need to ensure that you can manage Computer2 by using Windows Admin Center on Server1. What should you do on Computer2?

- A. Install the Remote Server Administration Tool (RSAT) optional features.
- B. Run the winrm quickconfig command.
- C. Set the Windows Management Service Startup type to Automatic and start the service.
- D. Run the Sec-Location cmdlet.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/manage/windows-admin-center/azure/manage-azure-vms>

NEW QUESTION 173

- (Exam Topic 3)

Which users can sign in to Computer3 when the computer starts in Safe Mode?

- A. User31 only
- B. User31 and User32 only
- C. User31 andAdmin1 only
- D. User31, User 32, User33, and Admin1
- E. User31,User32, and User33 only

Answer: A

Explanation:

Only users with membership of the local Administrators group can log on to a computer in safe mode. Admin1 cannot log in because Computer3 is not joined to the domain.

References:

<https://support.microsoft.com/en-us/windows/advanced-startup-options-including-safe-mode-b90e7808-80b5-a2>

NEW QUESTION 174

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://www.sciencedirect.com/topics/computer-science/security-event-log>

NEW QUESTION 178

- (Exam Topic 3)

You need to ensure that you can manage Computer2 by using Windows Admin Center on Server1. What should you do on Computer2?

- A. Allow the Windows Remote Management (WinRM) feature through Windows Defender Firewall.
- B. Run the set - Location cmdlet
- C. Allow the Windows Device Management feature through Windows Defender Firewall.
- D. Run the winrm quickconfig command.

Answer: D

NEW QUESTION 179

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 184

- (Exam Topic 3)

On Computer1, you need to configure the custom Visual Effects performance settings. Which user accounts can you use?

- A. Admm1,User11, and User13 only
B. Admin1 only
C. Admin1, User11, and User12 only
D. Admin1, User11, User12, and User13
E. Admin1 and User11 only

Answer: D

NEW QUESTION 187

- (Exam Topic 3)

You implement the planned changes for Computer1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User2 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User3 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with low confidence

Box 1: Yes

User1 already has full control access through membership of Group1. Therefore, User1 can write to the file. Box 2: No

The planned changes will grant User2 full control access to the file. However, User2 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User2 will not be able to write to the file.

Box 3: No
The planned changes will grant User3 full control access to the folder. That permission will be inherited by the file. However, User3 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User3 will not be able to write to the file.

NEW QUESTION 191

- (Exam Topic 2)
You need to meet the technical requirements for the HR department users.
Which permissions should you assign to the HR department users for the D:\Reports folder? To answer, select the appropriate permissions in the answer area.
NOTE: Each correct selection is worth one point.

Permission Entry for Reports

Principal: HR (CONTOSO\HR) [Select a principal](#)

Type: Allow

Applies to: This folder only

Advanced permissions:

☐ Full control

☐ Traverse folder / execute file

☐ List folder / read data

☐ Read attributes

☐ Read extended attributes

☐ Create files / write data

☐ Create folders / append data

☐ Write attributes

☐ Write extended attributes

☐ Delete subfolders and files

☐ Delete

☐ Read permissions

☐ Change permissions

☐ Take ownership

☐ Only apply these auditing settings to objects and/or containers within this container

[Show basic permissions](#)

Clear all

Add a condition to limit the scope of this auditing entry. Security events will be logged only if conditions are met.

[Add a condition](#)

OK

Cancel

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
References:
<https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

NEW QUESTION 193

- (Exam Topic 1)
You need to implement a solution to configure the contractors' computers.
What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:

Microsoft Deployment Toolkit (MDT)

Windows AutoPilot

Windows Configuration Designer

Windows Deployment Services (WDS)

File type to create:

CAB

PPKG

WIM

XML

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
References:
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

NEW QUESTION 194

- (Exam Topic 1)

You need to reduce the amount of time it takes to restart Application1 when the application crashes. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Tool to use:	<div>▼</div> <div>Event Viewer</div> <div>Performance Monitor</div> <div>Windows Memory Diagnostic</div> <div>Windows Performance Analyzer</div>
Task to perform:	<div>▼</div> <div>Create a subscription</div> <div>Attach a task to an event</div> <div>Enable an event trace provider</div> <div>Create an alert</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://www.howto-connect.com/how-to-attach-a-task-to-this-event-in-event-viewer-in-windows-10/>

NEW QUESTION 197

- (Exam Topic 1)

You need to recommend a solution to monitor update deployments. What should you include in the recommendation?

- A. Windows Server Update (WSUS)
- B. the Update Management solution in Azure Automation
- C. the Update Compliance solution in Azure Log Analytics
- D. the Azure Security Center

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-monitor>

NEW QUESTION 200

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You are logged on as the local administrator on a Computer named Computer1.

A user named Mia Hamm has a computer named Computer2. Mia Hamm reports that she is experiencing problems with Computer2.

You want to use Event Viewer on Computer1 to view the event logs on Computer2. What should you do?

- A. On Computer1, run the Connect-WSMan -ComputerName "Computer1" cmdlet.
- B. On Computer1
- C. run the Get-Eventlog -List -ComputerName "Computer1" cmdlet.
- D. On Computer1
- E. log on as a domain administrator, then open Event Viewer and select the Connect to another computer... option.
- F. On Computer1
- G. open the Windows Defender Firewall and enable the Remote Event Log Management inbound rule

Answer: C

Explanation:

You are logged on as a local administrator. You need the required permissions to access Event Viewer logs on all remote Windows computers.

Reference:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

NEW QUESTION 201

- (Exam Topic 4)

You enable controlled folder access in audit mode for several computers that run Windows 10. You need to review the events audited by controlled folder access. Which Event Viewer log should you view?

- A. Applications and Services\Microsoft\Windows\Windows Defender\Operational
- B. Applications and Services\Microsoft\Windows\Known Folders\Operational
- C. Windows\Security

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/evaluate-controlled-folder-access>

NEW QUESTION 205

- (Exam Topic 4)

You have computers that run Windows 10 as shown in the following table.

Name	IP address
CLIENT1	192.168.0.10
CLIENT2	192.168.1.10
CLIENT3	192.168.0.250
CLIENT4	192.168.0.240

CLIENT1 has the following IP configuration.

```
Connection-specific DNS Suffix . :  
IPv4 Address. . . . . : 192.168.0.10  
Subnet Mask . . . . . : 255.255.255.0  
Default Gateway . . . . . : 192.168.0.1
```

From CLIENT1, you ping CLIENT2 and CLIENT3 successfully, but when you ping CLIENT4, you get a Request timed out response. From CUENT3. you ping CLIENT4 successfully. Which computer and setting are misconfigured? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Misconfigured computer:

CLIENT2

CLIENT3

CLIENT4

Misconfigured setting:

Default gateway

IP address

Subnet mask

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Misconfigured computer:

CLIENT2
CLIENT3
CLIENT4

Misconfigured setting:

Default gateway
IP address
Subnet mask

NEW QUESTION 207

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group1

You create a folder named Folder1 that has the permissions shown in the following table.

Principal	Access	Inherited from	Applies to
Group2	Deny Write	None	This folder, subfolders, and files
Group1	Allow Full control	None	This folder, subfolders, and files
Administrators	Allow Full control	None	This folder, subfolders, and files

You create a file named File1.txt in Folder1 and allow Group2 Full control permissions to File1.txt. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can create a new file in Folder1	<input type="radio"/>	<input type="radio"/>
User1 can save changes to File1.txt	<input type="radio"/>	<input type="radio"/>
User2 can view the content of File1.txt	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.dell.com/support/article/za/en/zadhs1/sln156352/understanding-file-and-folder-permissions-in-win>

NEW QUESTION 212

- (Exam Topic 4)

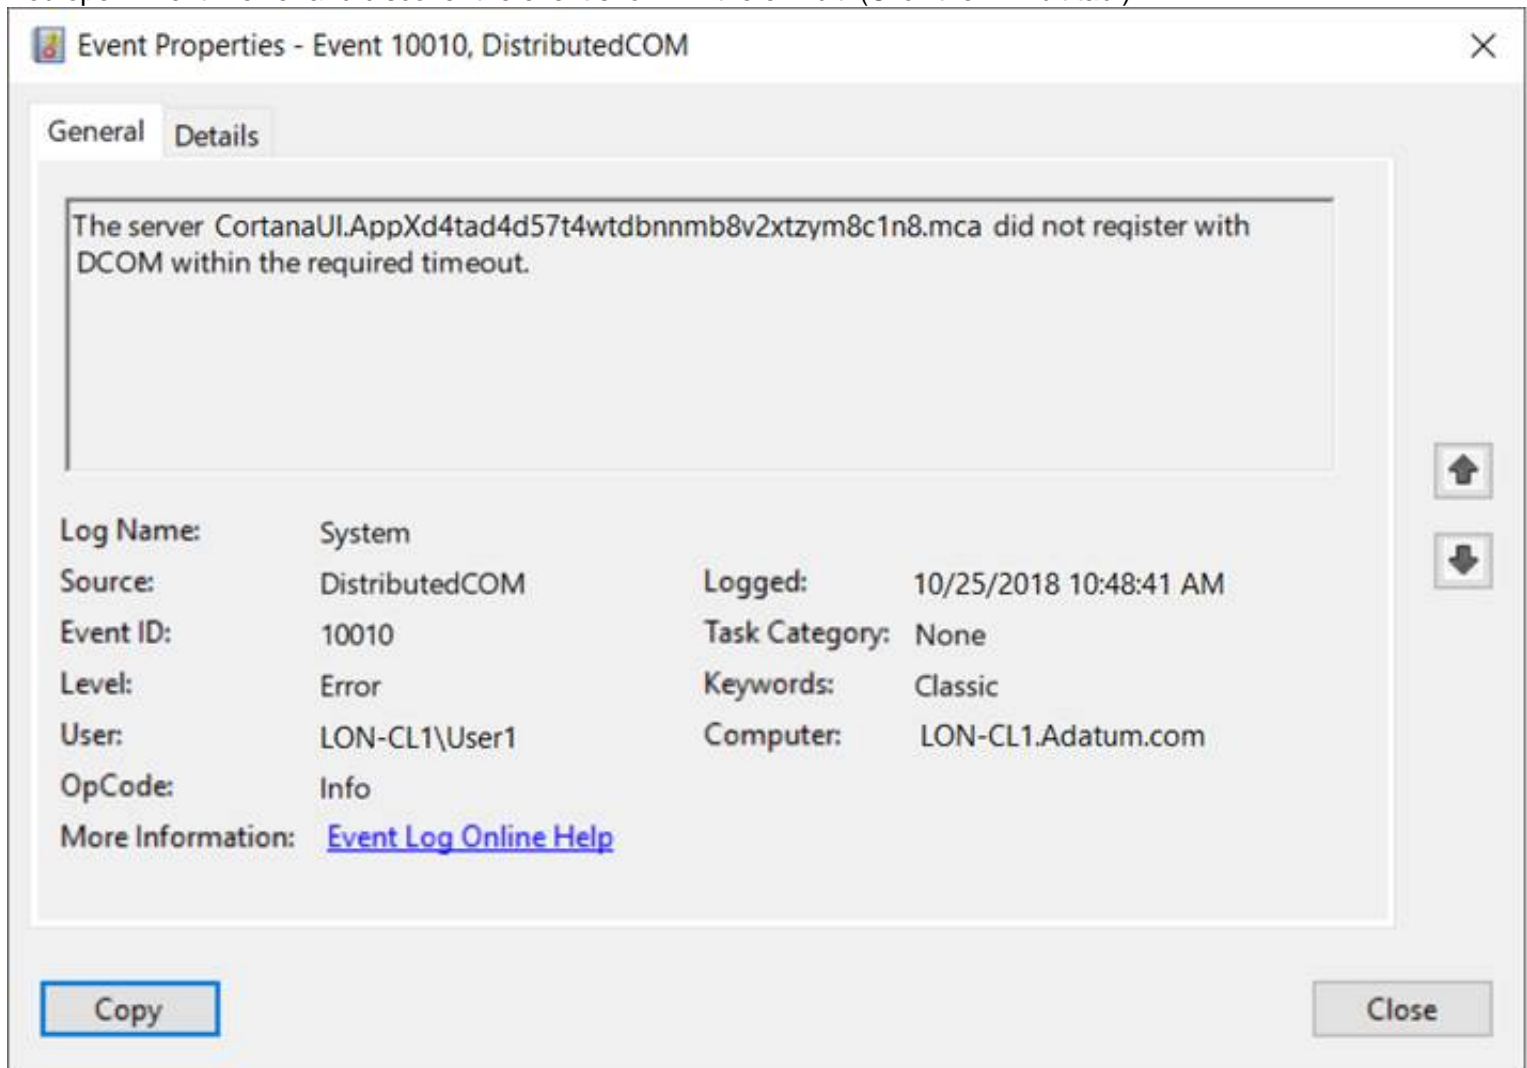

You have a computer named LON-CL1.Adatum.com that runs Windows 10.

From Event Viewer, you create a custom view named View1 that has the following filter:

- > User: User1
- > Logged: Any time

- > Event logs: System
- > Computer: LON-CL1
- > Event IDs: 10000 – 11000
- > Event level: Error, Verbose

You open Event Viewer and discover the event shown in the exhibit. (Click the Exhibit tab.)

The event does not appear in View1.

You need to ensure that the event appears in View1. What should you do?

- A. Add a Task Category setting to the filter.
- B. Add the computer account to the Event Log Readers group.
- C. Create an event subscription.
- D. Modify the Computer setting in the filter.

Answer: A

Explanation:

References:

<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

NEW QUESTION 214

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts a Hyper-V virtual machine named VMI. You create the disks shown in the following table.

Name	Format	Type	Parent
Base1	VHD	Fixed size	<i>Not applicable</i>
Base2	VHDX	Fixed size	<i>Not applicable</i>
Disk1	VHD	Dynamically expanding	<i>Not applicable</i>
Disk2	VHD	Differencing	Base1.vhd
Disk3	VHDX	Dynamically expanding	<i>Not applicable</i>
Disk4	VHDX	Differencing	Base2.vhdx

You add Disk1, Disk2, Disk3, and Disk4 to a SCSI controller attached to VMI. You need to identify the following:

Which disks will increase in size automatically when files are copied to the disks. Which disks can be manually increased in size while VMI is running.

What should you identify? To answer, select the appropriate options in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, Word, website Description automatically generated

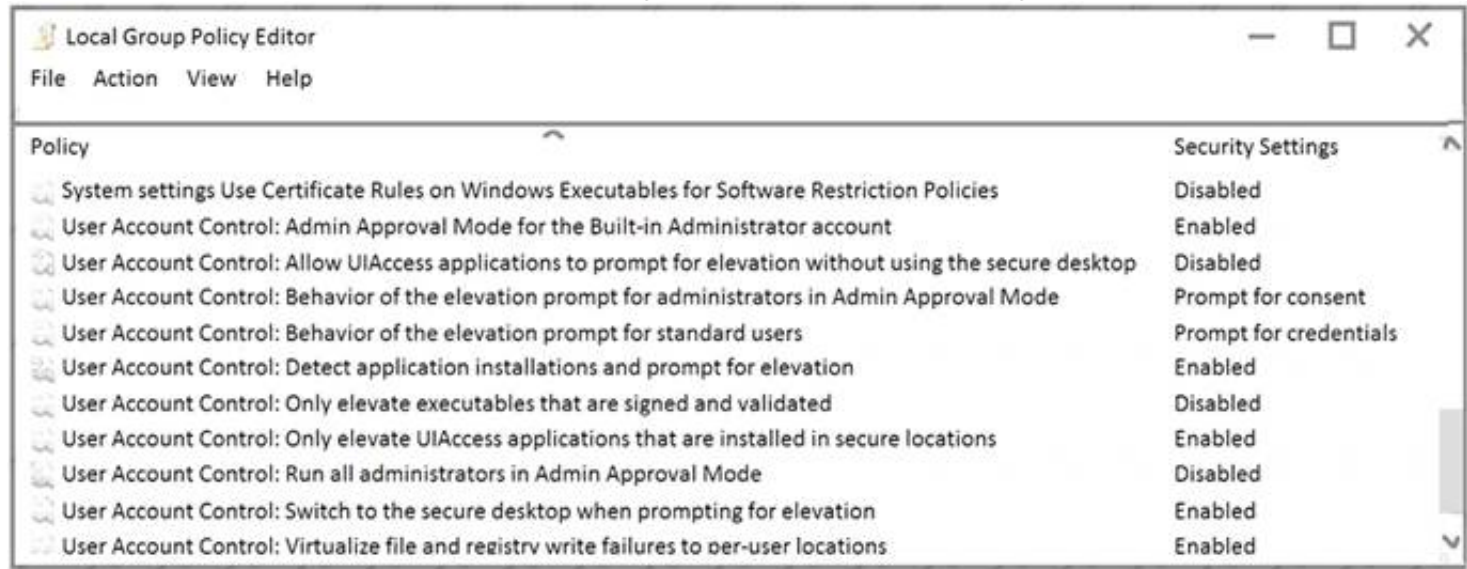

NEW QUESTION 218

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users

User Account Control (UAC) on Computer1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
When Administrator opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User1 opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User2 opens a command prompt by using the Run as administrator option, the user will be prompted for credentials.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 2: Yes

User1 is a member of Administrators group.

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 3: Yes

User Account Control: Behavior of the elevation prompt for standard users is set to Prompt for credentials (Default) When an operation requires elevation of privilege, the user is prompted to enter an administrative user name and password. If the user enters valid credentials, the operation continues with the applicable privilege.

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-contro>

NEW QUESTION 223

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains two local user accounts named User1 and User2. User2 is a member of the local Administrators group.

User1 performs the actions shown in the following table.

Time	Name	Action
9:00 AM	C:\Users\User1\Documents\File1.docx	Create a file.
9:01 AM	D:\Folder1\File2.txt	Create a file.
10:10 AM	C:\Users\User1\Documents\File1.docx	Save the file.
10:14 AM	D:\Folder1\File2.txt	Save the file.
10:19 AM	D:\Folder1\File2.txt	Save the file.
10:25 AM	D:\Folder1\File2.txt	Save the file.

User2 performs the actions shown in the following table.

Time	Action
9:49 AM	Sign in.
9:50 AM	Add D:\Folder1 to the Documents library.
10:00 AM	Turn on File History and configure File History to save copies of files every 20 minutes.
10:05 AM	Create a restore point.
10:06 AM	Sign out.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can use File History to restore File1.docx to the contents contained in the file at 10:05 AM.	<input type="radio"/>	<input type="radio"/>
User1 can use File History to restore File2.txt to the contents contained in the file at 10:15 AM.	<input type="radio"/>	<input type="radio"/>
User1 can use File History to restore File2.txt to the contents contained in the file at 10:20 AM.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 226

- (Exam Topic 4)

You need to ensure that User1 can add a third-party driver package for a printer to the driver store of the computer. The solution must use the principle of the least privilege.

To which local group should you add User 1, and what should User1 run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Group:

Run:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 Graphical user interface, text, application Description automatically generated

NEW QUESTION 229

- (Exam Topic 4)
 You have a computer that runs Windows 8.1.
 You upgrade the computer to Windows 10.
 You need to analyze the actions that occurred during the upgrade and review the performance statistics for errors by using Windows Event Log viewer.
 What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Event log file:

File location:

- A. Mastered
- B. Not Mastered

Answer: A

File location:

NEW QUESTION 231

- (Exam Topic 4)

You have an isolated network segment that contains only three computers named Computer1, Computer2, and Computer3 that run Windows 10. The network settings for each computer are shown in the following table.

Name	TCP/IPv4		TCP/IPv6
	General	Alternate configuration	
Computer1	IP assignment: Automatic (DHCP)	Automatic private IP address	Obtain an IPv6 address automatically
Computer2	IP assignment: Manual IP address: 169.254.15.10 Mask: 255.255.0.0	<i>Not applicable</i>	IPv6 address: 2001::15 Subnet prefix length: 64
Computer3	IP assignment: Manual IP address: 192.168.15.5 Mask: 255.255.0.0	<i>Not applicable</i>	IPv6 address: FE80::5 Subnet prefix length: 64

Windows Defender Firewall is configured to allow ICMP and ICMPv6 traffic.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
On Computer1, the ping Computer2 command will return a successful result.	<input type="radio"/>	<input type="radio"/>
On Computer1, the ping FE80::5 command will return a successful result.	<input type="radio"/>	<input type="radio"/>
On Computer1, the ping 192.168.15.5 command will return a successful result.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
On Computer1, the ping Computer2 command will return a successful result.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer1, the ping FE80::5 command will return a successful result.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer1, the ping 192.168.15.5 command will return a successful result.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 234

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is joined to an Active Directory domain named adatum.com. The domain contains two groups named Group1 and Group2.

Computer1 contains a folder named C:\Folder1 that has the file permissions shown in the following table.

Group	Permission
Administrators	Full control
Group1	Read

You need to share C:\Folder1. The solution must ensure that the members of Group2 can access all the files in the share.

What should you do?

- A. From File Explorer, use Network File and Folder Sharin
- B. Assign the Read permission to Group2.
- C. From File Explorer, use Advanced Sharin
- D. Assign the Read share permission to Group2.
- E. From Control Panel, use Advanced sharing setting
- F. Configure file and printer sharing for the network profile of the domain.
- G. At a command prompt, run the nee share Share=C:\Folder1 /granc:adacum\group2, read command.

Answer: D

Explanation:

Reference:

<https://techgenix.com/net-share-command-30/>

NEW QUESTION 239

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users, Group1
User2	Administrators

Computer1 contains the folders shown in the following table.

Name	Path	Permission	Share permission
Folder1	D:\Folder1	Administrators: Full control Group1: Read	Group1: Full control
Folder2	E:\Folder2	Administrators: Full control	None

You move Folder1 into Folder2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can connect to Folder1 by using a path of \\Computer1\Folder1 UNC.	<input type="radio"/>	<input type="radio"/>
User1 can read the content in E:\Folder2\Folder1 when the user signs in to Computer1.	<input type="radio"/>	<input type="radio"/>
User2 can connect to Folder1 by using a path of \\Computer1\E\$\Folder2\Folder1 UNC.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

If you move a shared folder, the share will no longer work.

Box 2: No

Folder1 will inherit the permissions of Folder2. User1 does not have permission to access Folder2. Box 3: Yes

User2 is a member of the Administrators group so he can access the administrative share \\Computer1\E\$. User2 has Full Control permission to Folder2 so he can access \\Computer1\E\$\Folder2.

Folder1 will inherit the permissions of Folder2 so User2 can access \\Computer1\E\$\Folder2\Folder1.

NEW QUESTION 243

- (Exam Topic 4)

Your network contains an Active Directory domain named Contoso.com.

A user named User1 has a personal computer named Computer that runs Windows 10 Pro. User1 has a VPN connection to the corporate network.

You need to ensure that when User1 connection to the corporate network.

You need to ensure that when user1 connects to the VPN, network traffic uses a proxy located in the corporate network. The solution must ensure that User1 can access the internet when disconnected from the VPN.

What should you do?

- A. From the Settings app, modify the properties of the VPN connection.
- B. From the Setting app, modify proxy settings for the local computer.
- C. From Control panel, modify the properties of the VPN connection
- D. From Control Panel, modify the Windows Defender Firewall settings

Answer: A

NEW QUESTION 248

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have two computers named Computer1 and Computer2 that run Windows 10.
You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.
You sign in to Computer1 by using admin@contoso.com.
You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you enable the Remote Event Log Management inbound rule from Windows Defender Firewall.
Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>

NEW QUESTION 250

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You deploy Windows 10 to a computer named Computer1.
Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.
You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 to File History.
Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

adding c:\Folder1 to File History WILL allow you to use the Previous Versions on that folder. Assuming you are able to turn File History on in the first place.
Reference:
<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 255

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History.
You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the General settings of D:\Folder1
- B. From File Settings app, configure the Backup settings
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

Answer: B

Explanation:

To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.
References:
<https://www.groovypost.com/howto/configure-windows-10-file-history/>

NEW QUESTION 256

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a group named Group1.
All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.
You add a folder named C:\Documents\Templates to each computer.
_ You need to configure the NTFS permissions to meet the following requirements: All domain users must be able to open the files in the Templates folder.
_ Only the members of Group1 must be allowed to edit the files in the Templates folder.
How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Inheritance:

▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users:

▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1:

▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Inheritance:

▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users:

▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1:

▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

NEW QUESTION 259

- (Exam Topic 4)
You have a computer that runs Windows 10 Home.
You need to upgrade the computer to Windows 10 Enterprise as quickly as possible. The solution must retain the user settings.
What should you do first?

- A. Run the scanspace command.
- B. Perform an in-place upgrade to Windows Pro.
- C. Install the latest feature updates.
- D. Run the sysprep command.

Answer: B

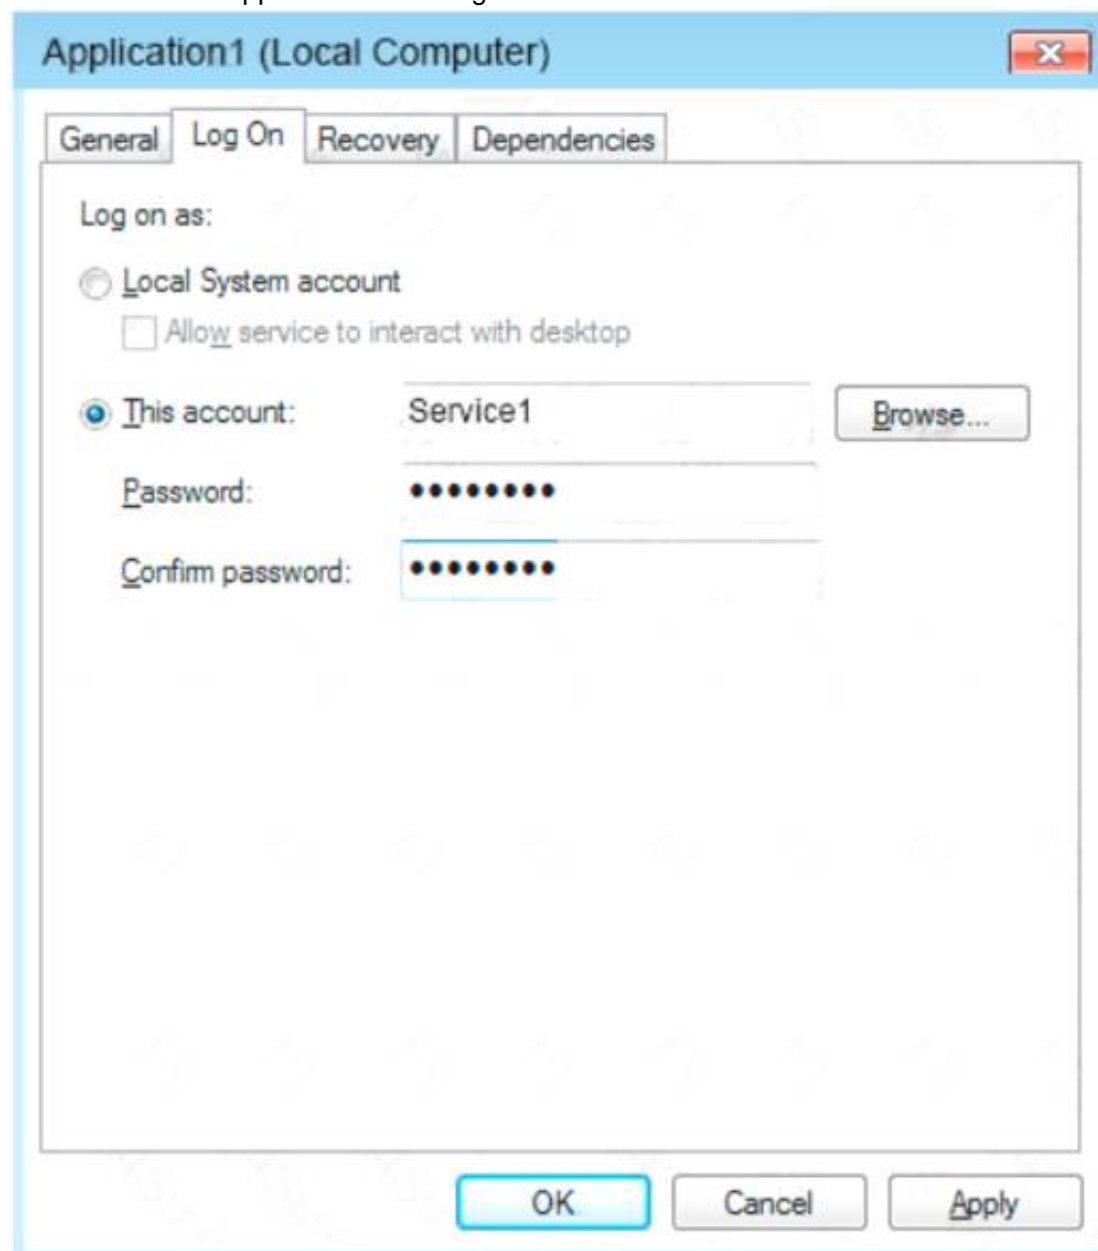

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

NEW QUESTION 263

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a computer named Computer1 that runs Windows 10. A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files. You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege. Solution: On Computer1, you assign Service1 the deny log on locally user right. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-locall>

NEW QUESTION 264

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a computer named Computer1 that runs Windows 10. You test Windows updates on Computer1 before you make the updates available to other users at your company. You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1. Solution: From an elevated command prompt, you run the wusa.exe command and specify the /uninstall parameter. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

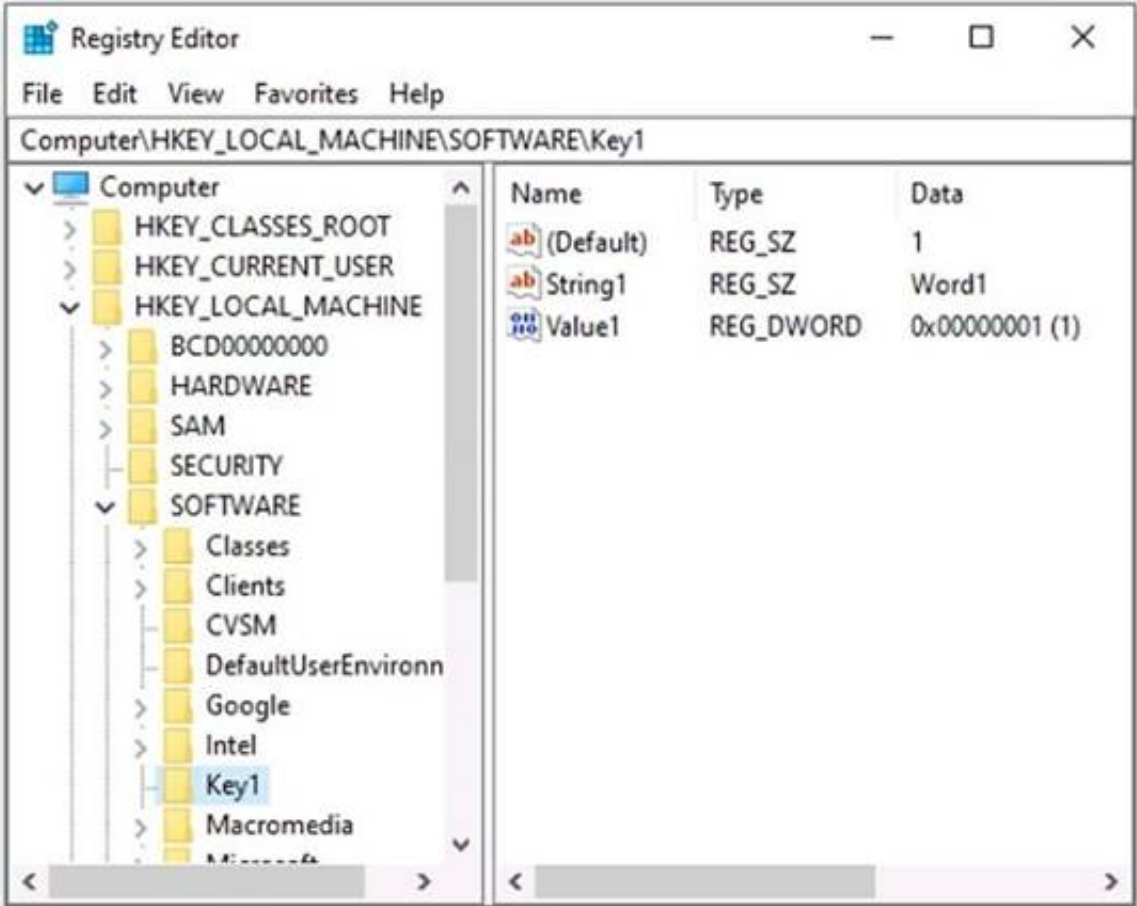

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

NEW QUESTION 268

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains a registry key named Key1 that has the values shown in the exhibit. (Click the Exhibit tab.).

You have a Registration Entries (.reg) file named File1.reg that contains the following text.
Windows Registry Editor Version 5.00 [HKEY_LOCAL_MACHINE\SOFTWARE\Key1]
"String1"=
@="2"
You need to identify the effect of importing File1.reg to Computer1.
What should you identify? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

String1 will:

be deleted

have a value of –

have a value of Word1

have no value

Value1 will:

be deleted

have a value of 1

have a value of 2

have no value

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: String1 will be deleted.
To delete a value, append equals and then minus to the value. For example: "String1"=Box 2: Value1 will have a value of 1
@="2" sets the default value to 1 but Value1 already has a DWORD value.
A DWORD (32-bit) value is a hexadecimal value. Value1 is 0x00000001 which is 1. References:
<https://www.computerhope.com/issues/ch000848.htm> <https://www.computerperformance.co.uk/vista/reg-create/>

NEW QUESTION 271

- (Exam Topic 4)
You have a computer that runs Windows 10. You need to configure a picture password.
What should you do? D18912E1457D5D1DDCBD40AB3BF70D5D

- A. From Control Panel, configure the User Accounts settings.
- B. From the Settings app, configure the Sign-in options.
- C. From the Local Group Policy Editor, configure the Account Policies settings.
- D. From Windows PowerShell, run the Set-LocalUser cmdlet and specify the InputObject parameter.

Answer: B

NEW QUESTION 275

- (Exam Topic 4)

You have a computer named Computed that runs Windows 11. A feature update is installed on Computed.

You need to use the Go back recovery option to revert to the previous version. For how many days will the Go back option be available?

- A. 10
- B. 30
- C. 90
- D. 180

Answer: B

NEW QUESTION 278

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You need to configure the computers to send the error events in the System log to a computer named Computer1 that runs Windows 10.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Computer1:

- | | |
|--------------------------|--|
| <input type="checkbox"/> | Create a source-initiated subscription. |
| <input type="checkbox"/> | Create a collector-initiated subscription. |
| <input type="checkbox"/> | Create a custom view in Event Viewer. |
| <input type="checkbox"/> | Configure Event Forwarding by using a Group Policy Object (GPO). |

100 Windows 10 computers:

- | | |
|--------------------------|--|
| <input type="checkbox"/> | Create a source-initiated subscription. |
| <input type="checkbox"/> | Create a collector-initiated subscription. |
| <input type="checkbox"/> | Create a custom view in Event Viewer. |
| <input type="checkbox"/> | Configure Event Forwarding by using a Group Policy Object (GPO). |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Source-initiated subscriptions allow you to define a subscription on an event collector computer without defining the event source computers, and then multiple remote event source computers can be set up (using a group policy setting) to forward events to the event collector computer. Source:

<https://learn.microsoft.com/en-us/windows/win32/wec/creating-a-source-initiated-subscription>

NEW QUESTION 281

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.

You enable Windows PowerShell remoting on the computers.

You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.

To which group should you add Admin1?

- A. Access Control Assistance Operators
- B. Power Users
- C. Remote Desktop Users
- D. Remote Management Users

Answer: D

Explanation:

References:

<https://4sysops.com/wiki/enable-powershell-remoting/>

NEW QUESTION 282

- (Exam Topic 4)

You need to Windows 10 to 20 new laptops.

The laptops will be recommend a solution to lock the laptop when the users leave their laptop for an extended period.

Which two actions should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the settings app, configure the Dynamic lock settings.
- B. From the Settings app, configure the lock screen settings.
- C. Enable Bluetooth discovery.
- D. From the Settings app, configure the Screen timeout settings
- E. Pair the Android device the laptop.
- F. From Sign-in option, configure the Windows hello settings.

Answer: BE

Explanation:

<https://support.microsoft.com/en-us/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you->

NEW QUESTION 285

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other computers. You install a quality update that conflicts with a customer device driver.

You need to remove the update from Computer1.

Solution: From an elevated command prompt, you run the vmic qfe delete command. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 290

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup. You need to prevent users from using Microsoft Store apps on their computer.

What are two possible ways to achieve the goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From Security Settings in the local Group Policy, configure Security Options.
- B. From Administrative Templates in the local Group Policy, configure the Store settings.
- C. From Security Settings in the local Group Policy, configure Software Restriction Policies.
- D. From Security Settings in the local Group Policy, configure Application Control Policies.

Answer: BD

Explanation:

References:

<https://www.techrepublic.com/article/how-to-manage-your-organizations-microsoft-store-group-policy/>

NEW QUESTION 295

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the user accounts shown in the following table.

Name	Member of
User1	Users
User2	Users, Event Log Readers
User3	Users, Backup Operators

In Event Viewer, you create two custom views named View1 and View2. View1 shows errors and warnings from the Security event log. View2 shows errors and warnings from the System event log. Which users can use the views? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

Answer Area

View1: ▼

User2 only
User2 and User3 only
User1, User2, and User3

View2: ▼

User2 only
User2 and User3 only
User1, User2, and User3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

View1: ▼

User2 only
User2 and User3 only
User1, User2, and User3

View2: ▼

User2 only
User2 and User3 only
User1, User2, and User3

NEW QUESTION 297

- (Exam Topic 4)

Your network contains an Active Directory forest. The forest contains a root domain named contoso.com and a child domain named corp.contoso.com.

You have a computer named Computer1 that runs Windows 10. Computer1 is joined to the corp.contoso.com domain.

Computer1 contains a folder named Folder1. In the Security settings of Folder1, Everyone is assigned the Full control permissions.

On Computer1, you share Folder1 as Share1 and assign the Read permissions for Share1 to the Users group. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
All the local users on Computer1 have Read access to \\Computer1\Share1.	<input type="radio"/>	<input type="radio"/>
All the users in the corp.contoso.com domain have Read access to \\Computer1\Share1.	<input type="radio"/>	<input type="radio"/>
All the users in the contoso.com domain have Read access to \\Computer1\Share1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

References:

<https://www.techrepublic.com/article/learn-the-basic-differences-between-share-and-ntfs-permissions/>

NEW QUESTION 302

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Power Users, Users
User3	Backup Operators, Users
User4	Users

You plan to add a key named Key1 to the following three registry branches:

- > HKEY_CURRENT_CONFIG\Software
- > HKEY_LOCAL_MACHINES\Software
- > HKEY_CURRENT_USER\Software

You need to identify which users can add Key1.

What user or users should you identify for each branch? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

HKEY_CURRENT_CONFIG\Software:

User1 only

User1 and User2 only

User1 and User3 only

User1, User2, User3, and User4

HKEY_LOCAL_MACHINE\Software:

User1 only

User1 and User2 only

User1 and User3 only

User1, User2, User3, and User4

HKEY_CURRENT_USER\Software:

User1 only

User1 and User2 only

User1 and User3 only

User1, User2, User3, and User4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1 and Box 2.
These are system-wide registry keys so only Administrators can modify them. Box 3.
This key affects only the logged in user. Therefore, any user can modify this key.

NEW QUESTION 305

- (Exam Topic 4)
You have a Windows 10 device.
You need to ensure that only priority notifications are displayed during business hours.
Which settings in the Settings app should you configure, and where will standard notifications be sent during business hours? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Settings:

Focus assist

Focus assist

Ease of Access

Shared experiences

Notifications & actions

Send notifications to:

Action center

Event Viewer

Action center

Task Manager

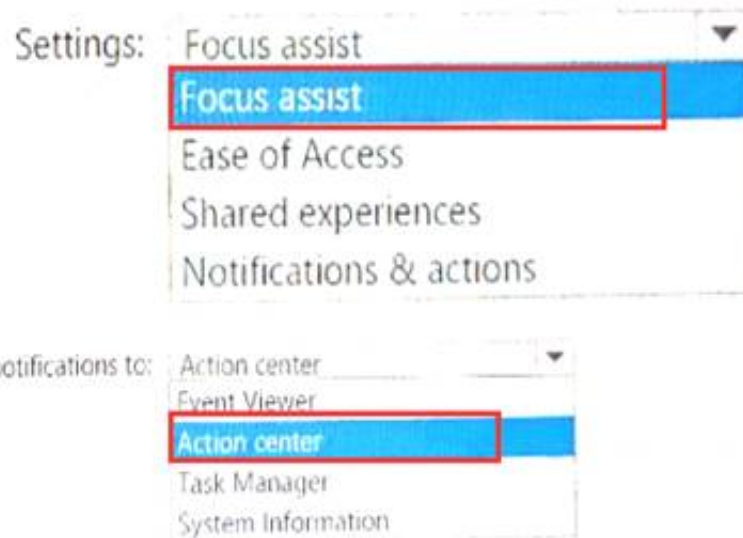

System Information

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 308

- (Exam Topic 4)

Your network contains an Active directory domain. The domain contains 1,000 computers that run Windows 10.

You need to prevent computers of the research department from appearing in network in File Explorer. What should you do?

- A. Disable the Network List Service
- B. Configure DNS to use an external provider
- C. Turn off network discovery
- D. Modify the %systemroot%\system32\drivers\etc\Network ile

Answer: C

NEW QUESTION 313

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11. You plan to change a registry setting on Computer1.

You need to ensure that you can revert to the previous registry setting if the change causes an issue on Computer1. The solution must minimize administrative effort.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Enable system protection.
- B. Enable controlled folder access.
- C. Create a restore point.
- D. Create a recovery drive.
- E. Configure a dynamic lock policy.

Answer: AC

NEW QUESTION 318

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: At a command prompt, you run set.exe path=d:\scripts. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 323

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You set up Backup and Restore (Windows 7) and include Folder1 in the backup. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

https://support.microsoft.com/en-za/help/17128/windows-8-file-history

NEW QUESTION 324

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains the users shown in the following table.

Name	Member of
User1	Group1, Group3
User2	Group1, Group2
User3	Group2, Group3

The domain contains a computer named Computer1 that runs Windows10. Computer1 has a file named File1.txt that has the permissions shown in the exhibit.
(Click the Exhibit tab.)

Name: C:\Folder1\File1.txt

Owner: administrator (ADATUM\administrator) Change

Permissions

Share

Auditing

Effective Access

For additional information, double-click a permission entry. To modify a permission entry, select the entry and click Edit (if available).

Permission entries:

Type	Principal	Access	Condition
Allow	Domain Admins (...)	Full control	
Allow	Group1 (ADATUM\...)	Read	Member of each ({Group1 (ADATUM\Group1), Group3 (ADATUM\Group3)})
Allow	Group2 (ADATUM\...)	Full control	Not member of any ({Group3 (ADATUM\Group3)})
Allow	Group3 (ADATUM\...)	Read	Not member of any ({Group1 (ADATUM\Group1), Group2 (ADATUM\Group2)})

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User2 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User3 can read File1.txt.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 only has Read access to the file. Box 2: Yes

User2 is in Group2 which has full control. The condition states that if the user is also a member of Group3, the permission would not apply. However, User2 is not in Group3 so the full control permission does apply.

Box 3: No

User3 is in Group3 which does have Read access. However, the condition states that if the user is also in Group1 or Group2 then the permission does not apply. User3 is in Group2 so the Read permission granted to Group3 does not apply to User3.

NEW QUESTION 328

- (Exam Topic 4)

You have a computer named Computer 1 that runs Windows 10.

You turn on System Protection and create a restore point named Point1. You perform the following changes:

- Add four files named File1.txt, File2.dll, File3.sys, and File4.exe to the desktop. Run a configuration script that adds the following four registry keys:
- Key1 to HKEY_CURRENT_USER
 - Key2 to HKEY_CLASSES_ROOT
 - Key3 to HKEY_LOCAL_MACHINE\SYSTEM
 - Key4 to HKEY_CURRENT_CONFIG

You restore Point1.

Which files and registry keys are removed? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Removed files:

File2.dll only
File2.dll and File3.sys only
File2.dll, File3.sys, and File4.exe
File1.txt, File2.dll, File3.sys, and File4.exe

Removed keys:

Key1 only
Key1 and Key2 only
Key2, Key3, and Key4 only
Key1, Key2, Key3, and Key4

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 330

- (Exam Topic 4)

You need to enable BitLocker Drive Encryption (BitLocker) on a computer named Computer1 that runs Windows 10. Computer1 has the following configurations:

- > Contains only one 200-GB NTFS volume named C:\
- > Contains 50 GB of unallocated disk space
- > Is the member of a workgroup
- > Has TPM enabled

What should you do first?

- A. Create a VHD.
B. Disable TPM.
C. Create an additional volume.
D. Join Computer1 to an Azure Active Directory (Azure AD) tenant.

Answer: C

Explanation:

Two partitions are required to run BitLocker because pre-startup authentication and system integrity verification must occur on a separate partition from the encrypted operating system drive. This configuration helps protect the operating system and the information in the encrypted drive.

NEW QUESTION 335

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts. You need to ensure that all users who sign in to Computer1 see a picture named image1.jpg as the desktop background.

What should you do?

- A. Desktop.jpg and copy the picture to the C:\Users\Default\Desktop folder
B. From the Settings app, modify the Background settings.
C. From the local Group Policy Edito
D. modify the Desktop settings.
E. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Windows\system32\ folder.

Answer: B

NEW QUESTION 336

- (Exam Topic 4)

Your network contains an Active Directory domain. the domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2

Computer contains the shared folders shown in the following table.

Name	Path	Access-based enumeration
Share1\$	D:\Folder1	Disabled
Share2	D:\Folder2	Enabled

The shared folders have the permissions shown in the following table.

Name	Security permission	Sharing permission
Share1\$	Group1: Read Group2: Full control	Everyone: Read Group2: Full control
Share2	Group2: Full control	Everyone: Read Group2: Full control

For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 connects to \\Computer1, Share1\$ is visible.	<input type="radio"/>	<input type="radio"/>
When User2 connects to \\Computer1\Share1\$, the contents of D:\Folder1 are accessible.	<input type="radio"/>	<input type="radio"/>
When User1 connects to \\Computer1\Share2, the contents of D:\Folder2 are accessible.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
Share1\$ is a hidden share (dollar sign appended) so the share will never be visible. Box 2: Yes
User2 is in Group1 and Group2. Both groups have access to Share1\$. Therefore, the contents of the shared folder will be visible.
Box 3: No
User1 is in Group1. Group1 does not have the necessary security permission to access Share2. You need both security permissions (NTFS permissions) AND share permissions to view the contents of a shared folder. User1 has the necessary share permissions (Everyone: Read), but not the security permission.
