

Exam Questions PSM-II

Professional Scrum Master II

<https://www.2passeasy.com/dumps/PSM-II/>

NEW QUESTION 1

Which role would know the most about the progress toward a business objective or a release, and be able to explain clearly the alternatives?

- A. The Product Owner
- B. The Release Manager
- C. The Development Team
- D. The Scrum Master

Answer: A

NEW QUESTION 2

What factors are best considered when defining the Sprint length?

- A. How often team membership changes and the size of the Development Team.
- B. Having consistent Sprint length across all Scrum Teams.
- C. The level of expertise over the technology to be used, ability to release an Increment to the end users, and the risk of being disconnected from the stakeholders.

Answer: C

NEW QUESTION 3

The Product Owner's primary concern is the flow of value reflected in the ordering of the Product Backlog.

- A. True
- B. False

Answer: A

Explanation:

The Product Owner is also known as the value maximizer. He is responsible for maximizing the value of the work that the Development Team does. This is done through the ordering of the Product Backlog.

NEW QUESTION 4

According to the Scrum Guide, where should the Daily Scrum be held?

- A. Wherever the Development Team decides is most suitable.
- B. In a room where management can attend.
- C. In the same location where the Development Team is seated.
- D. In front of the Scrum board.
- E. Wherever the Scrum Master decides is best.

Answer: A

Explanation:

Because the Daily Scrum is owned and managed by the Development Team, it is up to them to decide on the most effective place and time to hold the Daily Scrum.

NEW QUESTION 5

How should multiple Scrum Teams, working from the same Product Backlog, select the Product Backlog items their teams plan to work on?

- A. The Product Owner will present the work and the Development Teams will select the items they will work on.
- B. The Product Owner creates separate Product Backlogs for each Development Team.
- C. Each Scrum Team would select an equal number of items.
- D. The Product Owner assigns the work to each team.
- E. The Scrum Team with the highest productivity will select the items first.

Answer: A

Explanation:

The ones doing the work are the best ones to decide what they can do and how to do it.

NEW QUESTION 6

A Scrum Master teaches those who are interested in the Development Team's progress that progress in Scrum comes from inspecting an Increment at the Sprint Review.

- A. True
- B. False

Answer: A

Explanation:

Working software is the primary measure of progress.

NEW QUESTION 7

What should a Development Team do with non-functional requirements?

- A. Ensure they are addressed in every Increment.
- B. Assign them to the technical leads on the team.
- C. They will be addressed in the Integration Sprints.
- D. Add them to a separate non-functional requirements list.

Answer: A

Explanation:

Non-functional requirements should be worked on alongside functional development.

NEW QUESTION 8

What would be the main benefits of self-organization?

- A. Increased rule compliance, self-accountability, commitment.
- B. Increased rule compliance, self-accountability, output.
- C. Increased capacity, accuracy of estimates, output.
- D. Increased creativity, self-accountability, commitment.

Answer: D

Explanation:

Self-organized teams allow teams to creatively solve difficult problems, be accountable for the work they do, and commit to each other and the goals of the team.

NEW QUESTION 9

A new member has just joined an existing Development Team that has been together for several Sprints. During the Sprint, the individual has been trying to share his ideas and viewpoints but is continuously ignored by the rest of the Development Team.

Which three Scrum Values has the Development Team been neglecting? (Choose three.)

- A. Commitment
- B. Respect
- C. Transparency
- D. Focus
- E. Openness
- F. Courage

Answer: BEF

Explanation:

The Scrum Team members have courage to do the right thing and work on challenging problems. The Scrum Team agree to be open (to speak and listen) about all the work and the challenges with performing the work. Scrum Team members respect each other's skills, experience, and opinions.

NEW QUESTION 10

Who should manage the tasks of Development Team during the Sprint?

- A. The Project Manager.
- B. The Product Owner.
- C. The Scrum Master.
- D. The Development Team.
- E. All of the above.

Answer: D

Explanation:

The Development Team is responsible for managing and tracking the progress of their work during a Sprint

NEW QUESTION 10

Kevin is a senior developer that has recently joined an existing Scrum Team. The existing team members are unable to get along with Kevin and conclude that he is not a culture fit.

If necessary, who is responsible for removing the new team member, and why?

- A. The Scrum Master because he/she is responsible for removing Impediments.
- B. The Development Team is responsible because it is an internal team issue, and may request help from the Scrum Master.
- C. The HR department, as they are responsible for the hiring process.
- D. The Product Owner because he/she is responsible for managing the team.

Answer: B

Explanation:

The ones closest to the problem are the best ones to understand and solve the problems. The Scrum Master can remove members (if empowered). The QUESTION NO: is focused on the ownership of the root problem. The Development Team is responsible for addressing internal conflicts and may request help from the Scrum Master if needed. Because this is a localized issue, they are the ones that must initiate the actions for the results they desire.

NEW QUESTION 13

During the Sprint Review, the Product Owner decides to release the current Increment to production. The stakeholders suggest temporarily delaying the next Sprint in order to respond more quickly to user feedback after the release. The Product Owner prefers to continue to the next Sprint and make progress towards the next release. Steven, the Scrum Master, begins facilitating the discussion. What would be two acceptable outcomes of the discussion? (Choose two.)

- A. Continue with the Sprints and include the customer feedback in the Product Backlog.
- B. Delay the next Sprint to allow the Development Team to work on new customer feedback.
- C. Continue with the Sprints but shorten the Sprint time-boxes to allow for shorter feedback loops.
- D. Continue with the Sprints but allow the Sprint Goal within the Sprint to change according to the customer feedback.

Answer: AC

Explanation:

A new Sprint starts immediately after the conclusion of the previous Sprint. Delaying the start of the next Sprint interrupts progress and can reduce the Time-to-Market. Shortening the Sprint length allows the team to respond quicker to changes outside of the Sprint plan and while still allowing delivery of business value. Adding user feedback to the Product Backlog helps the Product Owner with ordering the backlog to maximize the flow of value. During the Sprint no changes are made that would endanger the Sprint Goal.

NEW QUESTION 14

A PO (Product Owner) is essentially the same thing as a traditional PM (Project Manager).

- A. True
- B. False

Answer: B

NEW QUESTION 15

Your organization requires all Increments to pass user acceptance testing (UAT) before it is allowed to be released to production. Is it a good idea to postpone UAT until the end of the project to prevent the Development Team from being disrupted during the Sprints?

- A. No, because the state of the Product Increment won't be transparent and the feedback loop would be too long.
- B. It depends on the team's Definition of Done.
- C. Yes, because the Development Team is a self-organizing team and should not be disrupted during development.
- D. Yes, because UAT is done in a hardening Sprint before the release Sprint.

Answer: A

Explanation:

The purpose of each Sprint is to deliver Increments of potentially releasable functionality that adhere to the Scrum Team's current definition of "Done". At the end of a Sprint, the new Increment must be "Done", which means it must be in useable condition and meet the Scrum Team's definition of "Done". An increment is a body of inspectable, done work that supports empiricism at the end of the Sprint. If UAT is a part of the team or organizational standard, then any delay in this activity will reduce transparency and increase risk.

NEW QUESTION 18

Steven is a Scrum Master asked to assist in creating five new Scrum Teams that will be working to build a highly anticipated product. He talks with them about the importance of being able to integrate their Increments by the end of their Sprints. This includes the first Sprints. The product is very important to both the end users and the organization.

Of the choices raised by future team members, what would Steven encourage?

- A. Each Scrum Team delivers Increments in its own code branch
- B. After UAT is performed at the Sprint Review, the code branch is isolated until enough Increments are considered acceptable
- C. All code branches will then be merged during the release phase.
- D. Each Scrum Team delivers functionality at the end of each Sprint
- E. New Product Backlog items will then be added to the next Sprint Backlog to integrate their functionality with the other teams to create a unified Increment.
- F. All Scrum Teams agree on a mutual understanding of 'done' that defines all work necessary to deliver a potentially shippable Increment that includes all previous Increments delivered for the product.
- G. Wait until enough of the infrastructure and architecture is in place before starting the first Sprint
- H. This will increase the success of delivering integrated Increments in Sprint 1.

Answer: C

Explanation:

When a Product Backlog item or an Increment is described as "Done", everyone must understand what "Done" means. If there are multiple Scrum Teams working on the system or product release, the Development Teams on all the Scrum Teams must mutually define the definition of "Done" to have a shared understanding of what it means for work to be complete, to ensure transparency. Each Increment is additive to all prior Increments and thoroughly tested, ensuring that all Increments work together.

NEW QUESTION 19

Steven is a Scrum Master on a new Scrum Team.

What would be the best way for him to determine if the Product Owner is interacting enough with the Development Team during a Sprint?

- A. Check whether the Product Owner is actively engaged at the Daily Scrums.
- B. Check whether the Increment presented at the Sprint Review meets the Product Owner's expectations.
- C. See whether the Product Owner has provided enough information at the Sprint Planning to make his/her presence optional during the Sprint
- D. The level of autonomy within Development Team can be the result of having the right presence from the Product Owner.
- E. The Product Owner must always be present with the Development Team
- F. Unavailability of the Product Owner is prohibited in Scrum.

Answer: C

Explanation:

Outcomes of the Scrum Team are affected by the Product Owner's participation and availability. During a Sprint he/she is responsible for answering questions from the Development Team about items in the current Sprint and optimizing the value of the work the Development Team does.

NEW QUESTION 24

Scrum is based on which of the following?

- A. Defined process.
- B. Complex process.
- C. Empiricism.
- D. Hybrid model

Answer: C

Explanation:

Scrum addresses complex problems in complex environments and asserts that knowledge comes from experience and making decisions based on what is known. What is known can only be discovered in hindsight.

NEW QUESTION 26

Which of the following is true about the Product Owner role?

- A. Can be shared between multiple people on a Scrum Team, Is the same as a Project Manage
- B. Is played by a committee or a team of people.
- C. Is one perso
- D. Can be influenced by a committe
- E. Is accountable for ordering the Product Backlog.

Answer: B

NEW QUESTION 29

Peter, the Product Owner, has been giving positive recognition to individual Development Team members who have moved their work to 'done' during the Daily Scrum. Peter wants to ensure the team is adhering to the ideal guideline on the burndown chart. What would be two valid actions for Steven, the Scrum Master, to take? (Choose two.)

- A. Steven talks with Peter about concerns of how his behavior might impact the team members and request that he stop attending for now.
- B. Steven coaches Peter on best practices for updating the burndown chart as it provides accurate information on how well the team is performing.
- C. Nothin
- D. Steven is optional at the Daily Scrum and it is the responsibility of the team to decide how to best run it.
- E. Steven coaches the Scrum Team about the purpose of the Daily Scrum.

Answer: AD

Explanation:

The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. Scrum Masters do this by helping everyone understand Scrum theory, practices, rules, and values.

The Scrum Master is a servant-leader for the Scrum Team. The Scrum Master helps the Scrum Team understand which of their interactions are helpful and which aren't.

The Scrum Master helps everyone change these interactions to maximize the value created by the Scrum Team.

NEW QUESTION 30

By the end of the Sprint, a Product Backlog item in the Sprint Backlog does not meet the team's Definition of Done. What two things should happen with the item? (Choose two.)

- A. It will be inspected at the Sprint Review and if it is acceptable by the stakeholders then include it in the Increment.
- B. Do not include the item in the Increment for the Sprint.
- C. Split the item and add the estimation of the completed work to the current Sprint so not to impact the velocity and add the 'undone' work to the next Sprint.
- D. Estimate the remaining work needed to make it 'done' and add it to the Product Backlog for the Product Owner to decide what to do with it.

Answer: BD

Explanation:

At the end of a Sprint, the new Increment must be 'Done', which means it must be in useable condition and meet the Scrum Team's definition of 'Done'. Scrum Team members must have a shared understanding of what it means for work to be complete, to ensure transparency. This is the Definition of Done for the Scrum Team and it is used to assess when work is complete on the product Increment.

NEW QUESTION 32

An organization is using Scrum to build five new products.

What would be the best two options for the number of Product Owners the organization should have? (Choose two.)

- A. There is one Product Owner for each product (so five in total). Each Product Owner may delegate, share and align work within their individual Product Backlog.
- B. Enough Product Owners to delegate as much work needed to maximize utilization of all Development Team members.
- C. There is one Product Owner responsible for all five product
- D. This person is not allowed to delegate any of the Product Owner responsibilities as he/she is accountable for the success of each product.
- E. There is one Product Owner responsible for all five product
- F. In order to scale his/her role, he/she can delegate some of the individual Product Owner responsibilities to others within each product but would still remain accountable for the value of the work produced.

Answer: AD

Explanation:

The Product Owner is the sole person responsible for maximizing the value of the product through the ordering and management of the Product Backlog. This reduces complexity in communication and understanding who to go to when there are QUESTION NO:s about the product. The Product Owner may delegate

his/her responsibilities but still remains accountable for the outcome of those responsibilities.

NEW QUESTION 34

The Scrum Master is no longer needed when teams become self-organized.

- A. True
- B. False

Answer: B

NEW QUESTION 39

Steven, the Scrum Master, observes that one of the Development Team members is not attending the Daily Scrum. The Development Team feels this is ok as they all sit in the same area and already have constant communication throughout the day.

Which is the best action for Steven to take?

- A. Start running the Daily Scrum and require all members to be in attendance.
- B. Talk to the Development Team member privately and tell him that he needs to be a team player.
- C. Ask the Development Team, what value will result from having all team members present at the Daily Scrum and what are the risks if members don't attend.
- D. The Daily Scrum is owned by the Development Team and it is their responsibility to decide which team members must participate.

Answer: C

Explanation:

The Scrum Master is responsible for ensuring that the Scrum Team understands the purpose and value of the Scrum events. Because the Daily Scrum is owned by the Development Team, it will decide how best to run the event. And if needed the Scrum Master will coach the team to ensure the decisions stay within the boundaries of the Scrum framework.

NEW QUESTION 43

What could be a reason for a Product Owner to delay the start of a new Sprint after the conclusion of the previous Sprint?

- A. The QA team has not finished testing the previous Increment before declaring it ready to ship.
- B. The stakeholders were disappointed with the Increment produced in the previous Sprint.
- C. There is no acceptable reason
- D. A new Sprint starts immediately after the conclusion of the previous Sprint.
- E. The Product Owner needs additional time to identify the next initiatives.
- F. There's not enough work in the Product Backlog to work on in the upcoming Sprint.

Answer: C

NEW QUESTION 46

Collaboration issues and technical dependencies between multiple Scrum Teams working on the same product can be fully resolved by using the correct version control tools.

- A. True
- B. False

Answer: B

Explanation:

When working on complex problems in complex environments, it cannot be guaranteed that applying a specific process or tool will fix the problem. Although, process and tools are important it's more important that people collaborate and try to find different solutions together and not rely solely on a tool to fix the problem.

NEW QUESTION 49

Which Scrum Value is impacted by trust?

- A. Respect
- B. Courage
- C. Commitment
- D. Openness
- E. Focus
- F. All of the above

Answer: F

Explanation:

Without trust, team members will have difficulties acting and behaving in the ways that reflect the Scrum values and how effective they apply empiricism.

NEW QUESTION 51

Doing your best and helping other Scrum Team members demonstrates which of the following?

- A. Value of Commitment
- B. Increased Revenue
- C. Increased Profit
- D. Maximizing utilization
- E. High Performance

Answer: A

Explanation:

People personally commit to achieving the goals of the Scrum Team by doing their best and helping others.

NEW QUESTION 54

Which approach would you recommend to ensure that the Product Backlog items discussed at Sprint Planning are well understood, actionable, and easier to forecast?

- A. Having a separate group of business analysts and functional testers analyzing high-ordered Product Backlog items before Sprint Planning.
- B. Having the Product Owner work with stakeholders between the end of the last Sprint and before beginning the next to prepare the Product Backlog items so not to interrupt the Development Team.
- C. Having the business analysts in the Development Team create the upcoming Product Backlog items during a Sprint and adding them to the next Sprint's forecast.
- D. Having the Development Team use some time during each Sprint to help the Product Owner analyze, estimate, and design items at the top of the Product Backlog that is projected to be worked on in the upcoming Sprint.

Answer: D

Explanation:

Product Backlog refinement is the act of adding detail, estimates, and order to items in the Product Backlog. This is an ongoing process in which the Product Owner and the Development Team collaborate on the details of Product Backlog items. During Product Backlog refinement, items are reviewed and revised. The Scrum Team decides how and when refinement is done. Refinement usually consumes no more than 10% of the capacity of the Development Team. However, Product Backlog items can be updated at any time by the Product Owner or at the Product Owner's discretion.

NEW QUESTION 58

A Development Team member has notified the Scrum Master of a potential data security risk. What action should the Scrum Master take?

- A. Notify the test team.
- B. Add a Product Backlog item to address the security issue.
- C. Ask the Development Team member to share the issue with the team as soon as possible.
- D. Wait until the Sprint Retrospective to add security to the definition of "Done".

Answer: C

Explanation:

It is best to coach the Development Team members to collaborate on issues regardless of severity. They may consult the Scrum Master or Product Owner if needed.

NEW QUESTION 63

Which is the best description of a Product Owner?

- A. Requirements developer.
- B. Value optimizer.
- C. Team leader.
- D. Go-between between development team and stakeholders.

Answer: B

NEW QUESTION 68

What would be two boundaries, defined in Scrum, that give guidance for teams to effectively self-organize? (Choose two.)

- A. Timeboxing the events in Scrum to allow for regular inspection and adaptation creating opportunities to adjust course in any given path.
- B. Clearly defined functional teams within the Development Team to define handoff phases during development.
- C. Creating an integrated and potentially shippable Increment by the end of each Sprint.
- D. Having a mixture of different levels of skills and experience to promote domain knowledge sharing.

Answer: AC

Explanation:

Time-boxing promotes regularity and focus for self-organized teams. Having shippable Increments allows teams to collaboratively make decisions on what needs to be done next.

NEW QUESTION 73

Who manages the progress of work during a Sprint?

- A. The Scrum Master
- B. The Product Owner
- C. The Team Lead
- D. The Development Team

Answer: D

Explanation:

The Development Team is self-organized, thus manages and decides how to manage their own progress.

NEW QUESTION 76

Which of the following are feedback loops in Scrum?

- A. Daily Scrum, Sprint Review, and Sprint Retrospective
- B. Daily Standup, Sprint Review, and Sprint Retrospective
- C. Release Planning, Daily Scrum, and Sprint Review
- D. Grooming, Daily Status, and Sprint Review

Answer: A

NEW QUESTION 77

When multiple Scrum Teams are working from the same Product Backlog, also known as scaled Scrum, they must still work in conformance of the Scrum guide.

- A. True
- B. False

Answer: A

Explanation:

Scrum is a framework with built in flexibility to support multiple Scrum Teams working on a single product.

NEW QUESTION 82

Three Development Teams are currently building a single product and pulling work from the same Product Backlog. All three teams have identified that they will need Dan, a database specialist, to work full time in their team for the next several Sprints.

What should Steven, the Scrum Master, do to solve this potential problem?

- A. Manage the items in the Sprint Backlogs so that Dan can be utilized evenly for each team.
- B. Assign Dan to the team with the most urgent tasks first and then move him to the next team and so on until the required support is completed.
- C. Facilitate a discussion with all Development Teams on how they want to deal with this issue, and help them implement their preferred solution.
- D. Ask Dan to work with the HR department to recruit and hire additional database specialist
- E. In the meantime, have the Product Owner move items that do not depend on Dan to the top of the Product Backlog.

Answer: C

Explanation:

As a servant/leader, the Scrum Master facilitates conversations through open ended QUESTION NO:s in order to help the team members make the best possible decisions according to what is known at the time. He/she does not approve or reject team decisions but ensures the team stays within the boundaries of the Scrum framework.

NEW QUESTION 83

Steven, who is a Scrum Master, on one of the Scrum Teams has approached you asking for advice. Their Daily Scrum requires more than 15 minutes and the team has suggested dividing themselves into two separate teams in order to stay within the time box.

As another Scrum Master, what would be the best response?

- A. Agree – this is an appropriate solution to the problem.
- B. Disagree – as the root cause may not be that the team is too big.
- C. Unsure – dividing a team into two cannot be decided based on this informatio
- D. You offer to observe.
- E. Agree – You agree that dividing the team into two is a good strategy to allow the teams to learn how to run Daily Scrums quickly and effective
- F. Once they've learned to limit the Daily Scrum to 15 minutes, you can merge the teams again.

Answer: C

Explanation:

The relationship between cause and effect can become more clear when more information emerges.

NEW QUESTION 88

Which three statements best describe the purpose of having a Definition of Done? (Choose three.)

- A. It is a checklist to monitor the Development Team member's progress on a task.
- B. It provides guidance to the Development Team when they are forecasting their Sprint Backlog during the Sprint Planning.
- C. As the Development Team is doing the work, it provides guidance on the remaining work needed to create the potentially shippable Increment by the end of the Sprint.
- D. It helps the Development Team defer any pending work to subsequent Sprints.
- E. It creates transparency and provides a common understanding of the 'done' state of the Increment at the Sprint Review.
- F. It helps the Scrum Team decide how much time is needed before the Sprint can end.

Answer: BCE

Explanation:

When a Product Backlog item or an Increment is described as 'Done', everyone must understand what 'Done' means. Scrum Team members must have a shared understanding of what it means for work to be complete, to ensure transparency and is used to assess when work is complete on the product Increment. This Definition of Done provides the team guidance on what it takes to make the increment shippable.

NEW QUESTION 91

How much time is allowed between the conclusion of the current Sprint and the start of the next Sprint?

- A. Maximum of one day for Sprints that are time-boxed to two weeks.
- B. Non
- C. A new Sprint starts immediately following the conclusion of the previous Sprint.
- D. Enough time for the last Increment to finish testing.
- E. Enough time for the Product Owner to prepare the Product Backlog for Sprint Planning.
- F. All of the above are allowed.

Answer: B

NEW QUESTION 93

What activities would a Product Owner do during an active Sprint?

- A. Engage with the stakeholders and answer QUESTION NO:s from the Development Team.
- B. Prioritize the Sprint Backlog.
- C. Participate at the Daily Scrum.
- D. Update the burndown chart.

Answer: A

NEW QUESTION 98

Cross-functional teams are specialized for working on specific system components (e.g. design, database, backend, frontend).

- A. True
- B. False

Answer: B

Explanation:

Cross-functional teams have all the skills and competencies needed to deliver end-to-end work.

NEW QUESTION 99

Why is it important that there is only one Product Owner per product?

- A. The Scrum Master knows who will be his back-up whenever he is unavailable, it saves the organization time and money, and the Development Team knows who to request tasks from.
- B. It is clear who is accountable for the ultimate success of the product, the Development Team always knows who determines priorities, and it helps avoid barriers to effective communication and rapiddecision- making.
- C. It isn't important as multiple Product Owners can easily share a single Product Backlog.

Answer: B

NEW QUESTION 104

What might be a valid reason for abnormally cancelling a Sprint?

- A. When the Development Team discovers it cannot meet their Sprint commitments.
- B. When the work becomes too difficult for the Development Team.
- C. When the sales department discovers features that add more value than the current work being done.
- D. When the Sprint Goal becomes obsolete.

Answer: D

NEW QUESTION 105

Individual Development Team members have been approaching Steven, the Scrum Master, to complain about Chris. Chris has the most experience on the system they are building. He often QUESTION NO:s the choices team members make in design and architecture making them feel bad. What are two good ways for Steven to address this problem? (Choose two.)

- A. Steven observes whether this topic is raised at the Sprint Retrospectiv
- B. If not, then he checks with the team on how comfortable they are with the way the design and architecture is being handled.
- C. Steven suggests facilitating a session with the full team to help resolve the issue.
- D. Steven tells the concerned members that Chris' opinions should be respected as he has the most experience and understands what is best for long term sustainability.
- E. Steven shares his concerns with Chris and the impact on the other team members and that he should be a team player.
- F. Steven takes the time between Sprints to organize a team building session to build a stronger relationship.

Answer: AB

Explanation:

Conflicts are a natural occurrence and the Scrum Master coaches the Development Team on the value of resolving conflicts. Leaving conflicts unresolved can impact the Scrum values of openness and respect diminishing trust. Lower trust levels will impact the Scrum Team's effectiveness and can cause impediments in the future. It is the responsibility of the Scrum Master to remove impediments that hinder the team through conflict resolution and facilitation.

NEW QUESTION 106

A new Product Owner is hired to work on an existing product that has ongoing for five Sprints. He/she is unsure about all of the responsibilities of a Product Owner. Which of these Product Owner's activities are defined in Scrum?

- A. Writing User Stories.
- B. Interacting with stakeholders and ensuring that the most valuable functionality is always produced first.
- C. Describing features as Use Cases.
- D. Ensuring work is completed within scope and time.

Answer: B

NEW QUESTION 109

Steven, a Scrum Master, is approached by the Development Team members complaining that one of the senior engineers is using too much time during the Daily Scrums to share technical solutions.

Which are the best two actions for Steven to take? (Choose two.)

- A. Coach the Development Team to help them find a way to solve the problem, and for them to take ownership of the solution.
- B. Contact the team member's direct manager and to resolve this problem.
- C. Suggest that the team members timebox the amount of time each person can speak at the Daily Scrum to a maximum of two minutes.
- D. Suggest using a token to limit who is allowed to speak during the Daily Scrum.
- E. Speak with the person privately and coach him on the purpose of the Daily Scrum.

Answer: AE

Explanation:

The Scrum Master serves the Development Team in several ways, including: Coaching the Development Team in self-organization and cross-functionality; Facilitating Scrum events as requested or needed.

It is the Scrum Master's responsibility to teach the Scrum Team the value and objective of each Scrum event in order to help them maximize the benefits of each event in accordance to the Scrum values and theory.

NEW QUESTION 113

The Development Team discovers that it doesn't have the tools and infrastructure to make each selected Product Backlog item done.

What is the most appropriate action for the Scrum Master to take?

- A. Stop the Sprint and have the Development team work on the infrastructure before continuing.
- B. Encourage the Product Owner to accept partially done Increments and complete the work in the Hardening Sprint.
- C. Coach the Development Team to improve its skills, tools and infrastructure over time and establish a Definition of "Done" that is actually possible to achieve given the current circumstances.

Answer: C

Explanation:

The Scrum Master serves the Development Team by coaching it in self-organization and cross-functionality.

NEW QUESTION 118

Steven, a Scrum Master, has been hired by an organization that is new to Scrum. He has been invited to meet the IT and product management team to kick-off the project. During the meeting the Product Owner asks how many Sprints will be needed to address the entire architecture and infrastructure before working on the features for the new product.

What are the two best responses for Steven to explain how such work is handled in Scrum? (Choose two.)

- A. You explain that product management should not worry about technical solution
- B. You inform them that the developers will work with the IT department when needed and keep the Product Owner updated on additional time required for each Sprint
- C. The additional effort will be added to the top of the Sprint Backlog before Sprint Planning.
- D. You explain that it is more effective when architecture and infrastructure emerge alongside the development of business functionality
- E. The additional advantage is that business value is created more quickly and earlier.
- F. You confirm that architecture and infrastructure is needed before starting on business functionality but the estimated budget will be difficult to estimate
- G. You suggest that the first Sprint will be dedicated towards building the technical foundation in order to get an accurate estimation for any additional budget and time required.
- H. You coach the Product Owner and Development Team to add this work to Product Backlog to ensure transparency, have the Development Team estimate the work and do this in early Sprints while also creating some business functionality in the early Sprints.

Answer: BD

Explanation:

When working on complex problems in complex environments, it is difficult to fully predict all future needs and the best solutions will emerge as the work is being performed.

NEW QUESTION 121

What action can the Scrum Master take to ensure communication between the Development Team and Product Owner is effective?

- A. Ensure all communication goes through the Scrum Master first.
- B. Teach the Product Owner to talk in terms of technology and technical requirements.
- C. Observe the communications between them and facilitate discussions if needed or by request.
- D. Translate the technologies used by the Development Team in order for the Product Owner to make decisions.

Answer: C

Explanation:

One of the primary responsibilities of a Scrum Master is the ability to facilitate regardless of the context or setting.

NEW QUESTION 122

The purpose of a Sprint is to produce a potentially releasable product Increment.

- A. True
- B. False

Answer: A

Explanation:

Sprints promote iterative and incremental development.

NEW QUESTION 123

During the Sprint Review, one of the stakeholders announces that due to recent market changes, there is risk that funding might be reduced for the project. This triggers tensions to rise and arguments to break out between members.

As a Scrum Master, what would be the best two actions to take? (Choose two.)

- A. Defend the original budget and request the stakeholders to adhere to the original agreed funding for the product.
- B. Encourage the stakeholders and Product Owner to focus on delivering the highest value items for the next Sprint.
- C. Be objective and request for a short break for people to calm down.
- D. Avoid getting involved as it is the Product Owner's responsibility to manage stakeholder expectations.
- E. Inform everyone that the team needs to stay busy until the information is formally announced.

Answer: BC

Explanation:

The Scrum Master is responsible for promoting and supporting Scrum by helping everyone embody the values of commitment, courage, focus, openness and respect.

NEW QUESTION 128

What should a Development Team do if they don't understand a functional requirement?

- A. Request a specialist to be added to the Development Team.
- B. Move the item to a future Sprint.
- C. Complete as much as possible and add the remaining work as a new Product Backlog item.
- D. Work with the Product Owner to determine what is possible and acceptable.

Answer: D

NEW QUESTION 132

What action should a Scrum Master take if the Development Team has decided that Retrospectives are no longer necessary?

- A. Start facilitating more productive and useful Retrospectives.
- B. Suggest reducing the frequency of the Retrospectives.
- C. Extend the Sprint time-box in order to fit the Retrospectives.
- D. Comply with the team's decision.

Answer: A

NEW QUESTION 136

What is management's role in Scrum?

- A. To provide the necessary environment and support needed as defined by the Scrum Guide by providing insights and resources that help the Scrum Teams continue moving forward.
- B. Identifying and removing people that are performing poorly.
- C. Monitoring skill levels of the Development Team.
- D. Monitoring the Development Team's velocity.

Answer: A

Explanation:

Getting the support from the business side helps facilitate the changes that fosters empiricism, self- organization, bottom-up intelligence, and intelligent release of software.

NEW QUESTION 140

You have a Scrum Team that has been working together for over a year. The Development Team consists of eleven members who rarely collaborate and work within their functional boundaries. There are no Sprint Goals and most of the items in the Sprint Backlog are unrelated. The Scrum Team has concluded that it is not possible to create Sprint Goals based on the items in the Product Backlog.

What might explain why the Scrum Team is finding it difficult to craft Sprint Goals? (Choose all that apply.)

- A. The Sprints are too long.
- B. The Product Owner is not empowered to make decisions about items in the Product Backlog nor how they are ordered.
- C. The Product Owner doesn't set objectives that he/she wants to achieve with upcoming Sprints.
- D. Scrum might not be the best framework for this team.
- E. The Development Team is too big.

Answer: BCD

Explanation:

Many people misinterpret the Scrum Guide as stating the Development Team size is limited to 3-9 members. In reality, it only states that there is inherent risk attached to having less than 3 members and more than 9 members. As the number of members increases, the lines of communication also increase. This can be calculated using the Group intercommunication formula: $n(n-1) / 2$ where n is the number of members. Some teams are able to handle the risk and “synergize” whereas others might struggle. Saying that, the relationship between defining a Sprint Goal and Development Team size is unclear.

But the relationship between the ordering of the Product Backlog, the PO having clear objectives, and the Sprint Goal are direct. The Product Owner typically comes to the Sprint Planning with a business objective in mind and Product Backlog items related to the business objective. After deciding what can be done for the upcoming Sprint, the Scrum Team will craft a Sprint Goal that would be met through the implementation of the items. This is not dependent on the size of the team nor length of the Sprint.

Scrum is also a framework that's fit for purpose. Some projects/products are not fit for Scrum... or, better stated, Scrum is not suitable for all projects/products.

NEW QUESTION 143

What is the most appropriate action for the Scrum Master to take if the Product Owner is having difficulties managing the Product Backlog?

- A. Have the Development Team order the work instead of the Product Owner.
- B. Have the Product Owner order the items based on size, having the Development Team work on the smallest items first.
- C. Offer the Product Owner help in understanding that the goal of ordering the Product Backlog is to maximize the flow of value.
- D. Delegate the work to the Assistant Product Owner.
- E. Delay the Sprint in order for the Product Owner to have enough time to prioritize the Product Backlog.

Answer: C

Explanation:

The Product Owner's primary concern is the flow of value reflected in the ordering of the Product Backlog.
