PL-900 Dumps

Microsoft Power Platform Fundamentals

https://www.certleader.com/PL-900-dumps.html
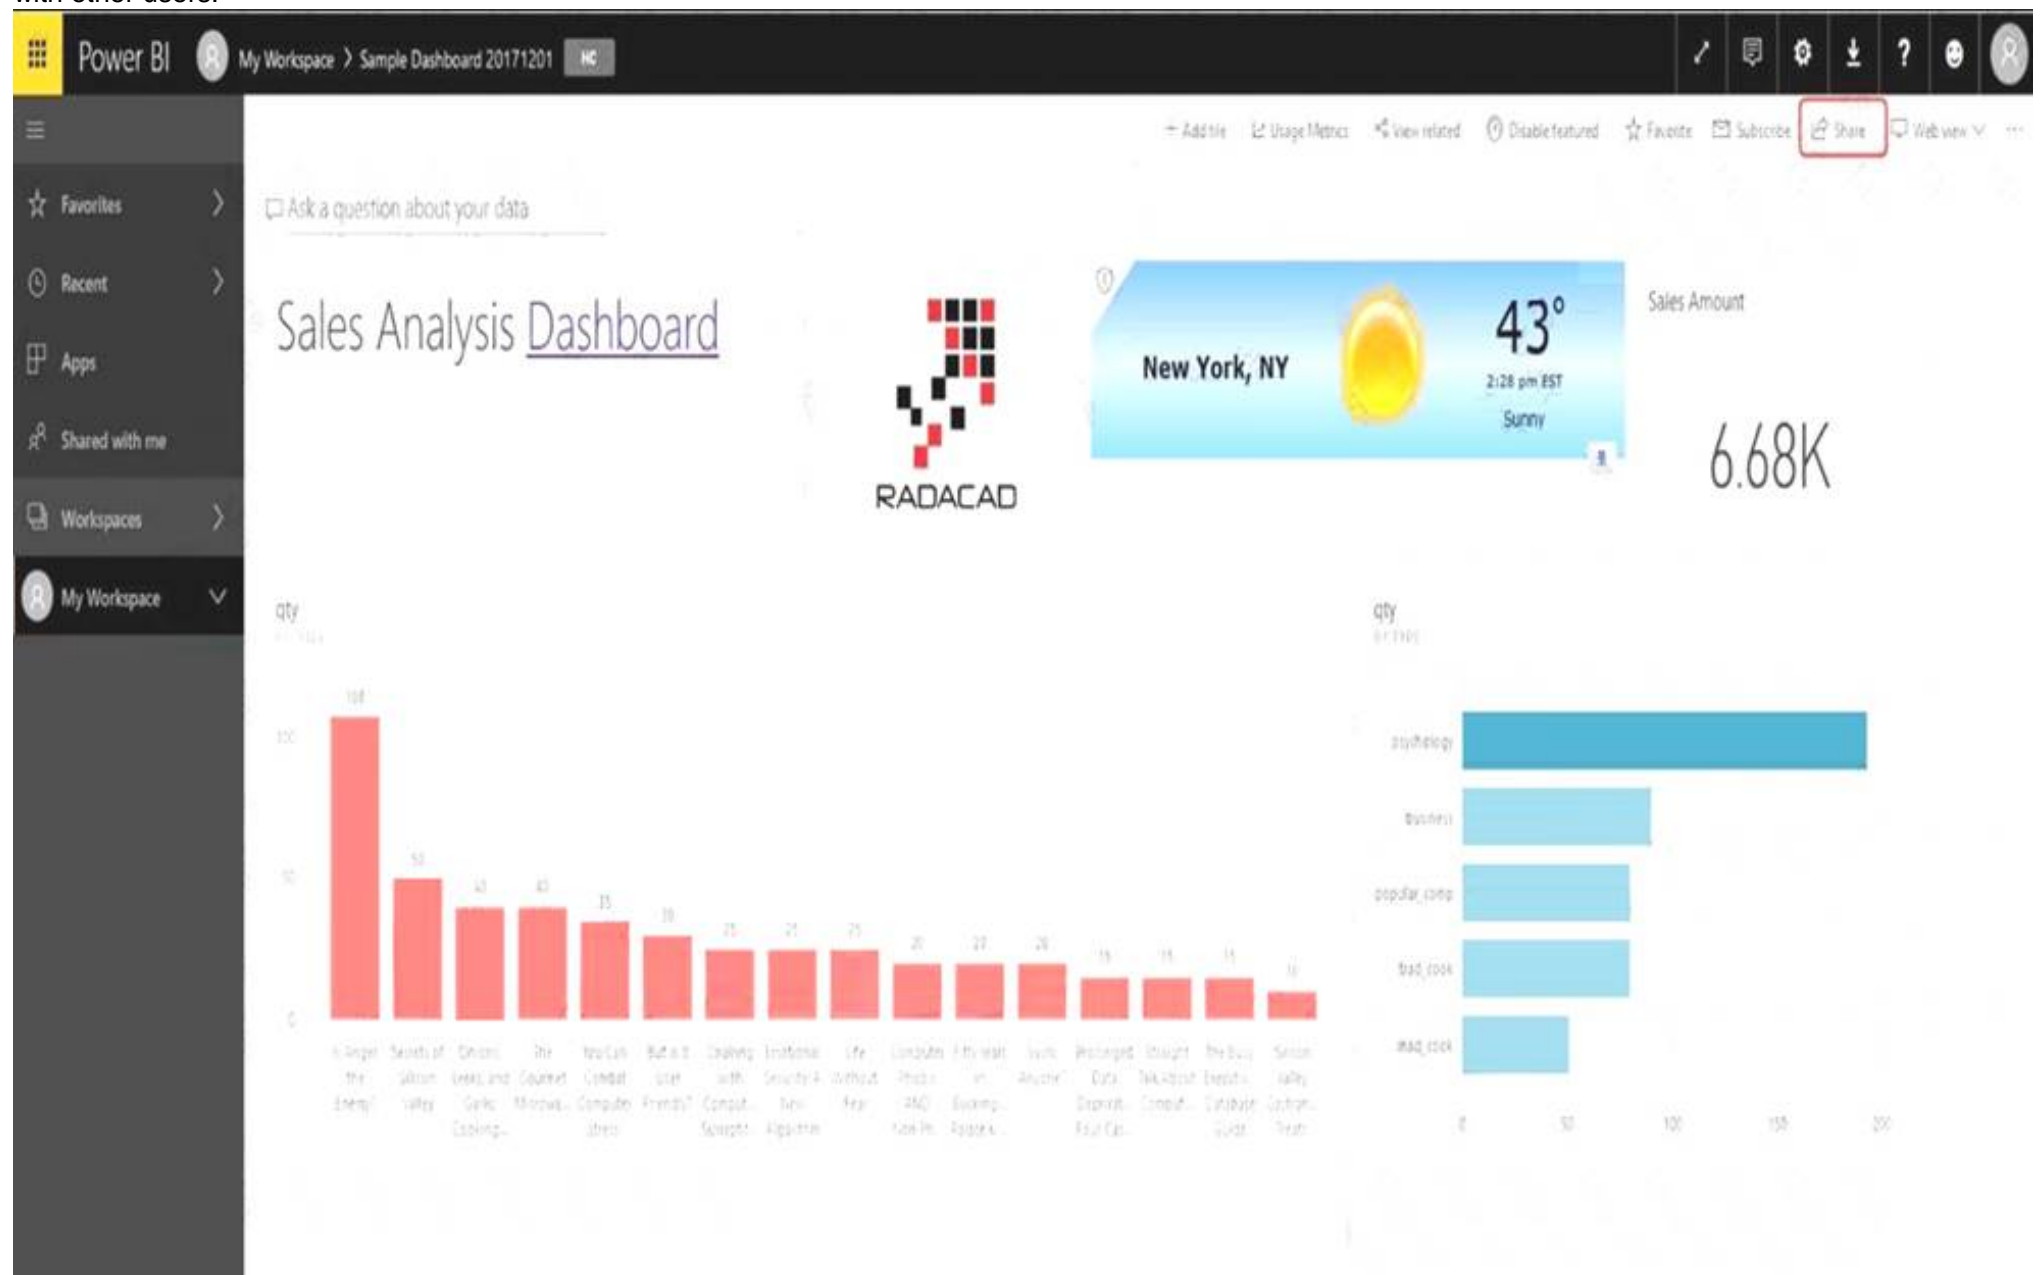

NEW QUESTION 1
You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement. You need to share the Power BI dashboard with coworkers.
What are three possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Create a Power BI workspace and grant coworkers permissions.
B. Publish the dashboard as an app to your coworkers.
C. Export the data into Common Data Service for others to manipulate in Power BI.
D. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
E. Embed reports in your company's internal web portal.

Answer: ABE

Explanation:
A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the
Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment.
Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.
Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.
E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive.
Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.
Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it

NEW QUESTION 2
You use Microsoft Flow to create a flow that automatically sends email to a project manager when project team members mark a task as complete.
Project team members are prematurely marking tasks as complete. You must add quality control into the process by sending an email to a project lead for confirmation that the task is in fact complete before sending the email to the project manager.
You need to modify the flow. Which component should you use?

A. a process argument
B. a condition
C. an expression
D. a trigger
E. an action

Answer: B

Explanation:
Use a condition and set the action to send an email.

NEW QUESTION 3
You are creating a model-driven Power Apps app. You want to ensure that the app can be used by individuals who have vision impairments.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
Power Apps apps can be built with hot key support and designed so they do not require a touch screen or mouse.	O	O
Only model-driven Power Apps have support for using a screen reader without the need for a connector.	O	O
The accessibility checker can be run for your Power Apps app to provide notifications of accessibility violations as well as tips for making it even more user friendly.	O	O

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
You can use keyboard shortcuts in PowerApps. Keyboard shortcuts give you an alternate way to do common tasks instead of using your mouse or tapping with your finger. They help in seamless navigation of the interface.
Box 2: No
The following software combinations are the supported recommendations for consuming PowerApps with a screen reader:
Windows: Microsoft Edge / Narrator macOS: Safari / VoiceOver Android: PowerApps app / Talkback iOS: PowerApps app / VoiceOver
Box 3: Yes
Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the Accessibility checker in PowerApps Studio. This tool not only finds potential accessibility issues but also explains why each might be a potential problem for users who have a specific disability and offers suggestions on how to resolve each issue. The Accessibility checker detects screen-reader and keyboard issues for you, and you can find information about how to fix color-contrast issues by using accessible colors.

NEW QUESTION 4
You create a user-owned custom entity by using Common Data Service.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can change the entity ownership from User to Organization-owned.	O	O
You can create a business rule for a custom entity that can be used in a Flow.	O	O

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
Common Data Service supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the entity is created and can't be changed.
Box 2: Yes
By combining conditions and actions, you can do any of the following with business rules: Set field values
Clear field values
Set field requirement levels Show or hide fields
Enable or disable fields
Validate data and show error messages
Create business recommendations based on business intelligence.

NEW QUESTION 5
Your company has an on premises Microsoft SQL Server database that contains legacy sales data. You must display information from the database in a new Power Apps app.
You need to establish a secure connection between the database and the app. What should you use?

A. Data source
B. App
C. Gateway
D. Flow

Answer: C

Explanation:
For an on-premises database, identify a data gateway that was shared with you (or create one).
Specify Connect using on-premises data gateway, type or paste the server name, the database name, the user name, and the password for the database that you want to use, and specify the authentication type and the gateway.

NEW QUESTION 6
A rapidly growing company wants to empower users to build apps, automate business processes, and analyze data without requiring I expertise or development skills and without increasing IT expenses and dependencies.
You need to recommend tools so that users can accomplish specific tasks.
Which tools should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Scenario	Application
Build automatic workflows that access multiple data sources.	▼
	AI Builder
	Power Apps
	Microsoft Flow
	Azure Functions
	Power BI
Create custom apps that address specific business needs.	▼
	AI Builder
	Power Apps
	Microsoft Flow
	Azure Functions
	Power BI
Design insightful data visualizations.	▼
	AI Builder
	Power Apps
	Microsoft Flow
	Azure Functions
	Power BI

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Microsoft Flow
Microsoft Flow, now called Power Automate, is cloud-based software that allows employees to create and automate workflows and tasks across multiple applications and services without help from developers.
Box 2: Power Apps
PowerApps is a suite of apps, services, connectors and data platform that provides a rapid application development environment to build custom apps for your business needs.
Box 3: Power BI
Power BI is a business analytics solution that lets youvisualizeyour data and share insights across your organization, or embed them in your app or website. Connect to hundreds of data sources and bring your data to life with live dashboards and reports.

NEW QUESTION 7
A company performs on-site inspections and services for air industrial equipment.
Field technicians must perform a series of maintenance checks every time they visit a customer site. Every technician performs maintenance tasks in a different order. Some technicians miss steps.
You need to ensure that all technicians perform the same steps in the same order. What should you use?

A. Business process flow
B. AI Builder
C. Business rule
D. Virtual Agent

Answer: A

Explanation:
You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.

NEW QUESTION 8
A large retail company implements Power Apps, Microsoft Flow, and the Common Data Service.
The board of directors is asking whether users are finding value in the technology. The company would like to measure and report usage of the software.
You need to recommend a tool to determine software usage. What should you recommend?

A. Microsoft Intune
B. Azure Stream Analytics
C. Power Platform Analytics
D. Dynamics 365 Product Insights

Answer: C

Explanation:
The Power Platform Analytics Usage report is the default reports seen by the logged in environment admin. It provides total app launches and daily active users across all apps in the environment. Admins can filter the view with attributes like device platform, player version, country, state, and city.

NEW QUESTION 9
You need to implement Microsoft Business Applications along with the Microsoft Power platform. Which three Microsoft products are part of the Power platform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Microsoft Power Apps
B. Azure Active Directory
C. Microsoft Flow
D. Azure Machine Learning
E. Microsoft Power BI

Answer: ACE

Explanation:
The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize, extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

NEW QUESTION 10
A company plans to create an information portal that managers can use to view critical information about their teams.
You need to recommend the type of Power BI components that the company should use.
What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE. Each correct selection is worth one point.

Component types	Answer Area	

Component types
Dashboard
Report

Requirement	Component type
Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	Component type
Display the top departmental goal metrics and alert users when specific thresholds targets are met.	Component type
Display Sales charts that can be filtered by region.	Component type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Report
Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Box 2: Dashboard
Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen.
Box 3: Report
Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.
Note: Power BI dashboards are one placeholder to display the most important decision-making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.

NEW QUESTION 10
A company plans to use Power BI to visualize data from business systems.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can display data aggregates and raw data in a Power BI report.	○	○
You can display related data from Dynamics 365 Customer Engagement and Excel in the same Power BI report.	○	○
You create a Power App to supply data for a Power BI report. You can modify the data directly in the report.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
The following list provides advantages to using aggregations:
Query performance over big data - as users interact with visuals on Power BI reports, DAX queries are submitted to the dataset. Boost query speeds by caching data at the aggregated level, using a fraction of the resources required at the detail level. Unlock big data in a way that would otherwise be impossible.
Box 2: No
You can connect to model-driven apps in Dynamics 365 with Power BI Desktop to create custom reports and dashboards for use with the Power BI service.
You can use similar steps to connect to model-driven apps in Dynamics 365 using Office Excel Power Query by selecting From Other Sources on the Power Query tab in Excel.
Box 3: Yes

Using the PowerApps custom visual, you will be able to pass context aware data to a PowerApps app which updates in real time as you make changes to your report.

NEW QUESTION 15
A bank uses Power Platform apps and flows to support business processes.
The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected.
You need to use AI Builder to implement the solution.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Publish the model.

Export data into AI Builder.

Train the model.

Import data into Common Data Service.

Use the model in PowerApps or Microsoft Flow.

Answer area

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Import data into Common Data Service.
AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data Service is the platform on which Dynamics 365 apps are built so if you're a Dynamics 365 customer, your data is already in Common Data Service.
Step 2: Train the model Step 3: Publish the model
The last step is to publish your model.
Step 4: Use the model in PowerApps or Microsoft Flow.

NEW QUESTION 16
A company uses Dynamics 365 Supply Chain Management.
You need to use Microsoft Flow to automate the process of receiving and tracking raw materials. Which type of connector should you use?

A. Common Data Service
B. Dynamics 365
C. Dynamics 365 for Fin & Ops
D. Dynamic Signal

Answer: A

Explanation:
Dynamics 365 for Finance and Operations is now being licensed as Dynamics 365 Finance and Dynamics 365 Supply Chain Management.
You can use Common Data Service to enable the flow of data between Finance and Operations apps and Dynamics 365 Sales.

NEW QUESTION 21
Users within a company use Flow for personal productivity.
Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.
You need to ensure that users can revert a flow to the current state.
Which two options can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Export
B. Rename
C. Save As
D. Share

Answer: AC

Explanation:
A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.

C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.
Here's how:
Go to your My flows page. Click on the More (…) menu item next to the flow that you want to create a copy of. Click on the Save As command.

NEW QUESTION 26
A business is evaluating AI Builder. Which actions can you perform?
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can use a text classification model in AI Builder to retrieve text and perform sentiment analysist for ServiceNow incidents.	◯	◯
You can tag Instagram posts that mention your new product.	◯	◯
You can send results about the number of mentions of your new product in Instagram to Power BI for inclusion on a dashboard.	◯	◯

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statement	Yes	No
You can use a text classification model in AI Builder to retrieve text and perform sentiment analysist for ServiceNow incidents.	◯	◯
You can tag Instagram posts that mention your new product.	◯	◯
You can send results about the number of mentions of your new product in Instagram to Power BI for inclusion on a dashboard.	◯	◯

NEW QUESTION 28
A distribution company has multiple warehouses.
Tax rates charged on sales orders need to be calculated based on locality and region. You need to recommend a cost-effective solution that can be implemented quickly. What should you recommend?

A. Check AppSource for a tax add-on.
B. Create alerts in Dynamics 365 Finance for tax table changes.
C. Implement the Common Data Model.
D. Run a Power BI report.
E. Write scripts and code tax updates.

Answer: B

NEW QUESTION 29
You create a business rule on contact entity to enforce the requirement that users must enter either a telephone number, fax number, or an email when creating a new record.
The company decides to remove fax number from the condition. You need to update the business rule.
What are two ways of achieving the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Save a copy of the rule and change the conditio
B. Deactivate and delete the original rule.
C. Deactivate the business rule and change the condition.
D. Take a snapshot of the business rule and change the condition.
E. Change the condition and activate the change.

Answer: AD

NEW QUESTION 30
A company plans to implement Power Platform apps. The company does not plan to use any development tools or plug-ins.
Which actions can you perform?
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can synchronize account names with a third-party proprietary database.	○	○
You can create invoices from orders and then send the invoices to the customer.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize,
extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

NEW QUESTION 31
A company uses a third party application and an approval process via email. At the end of the month, the IT department enters the data into Microsoft Excel to create pivot charts.
The Excel pivot charts must use the same data source as Dynamics 365 Field Service to generate charts and reports.
You need to recommend a solution.
What should you recommend? To answer, select the appropriate configuration in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Create an approval workflow.	▼
	Dynamics 365 Workflow Notifications
	Microsoft Outlook Integration
	AI Builder
	Microsoft Flow
Connect to report data.	▼
	Common Data Service and Power BI
	Third-party from AppSource
	Custom Code flat file integration
	Dynamics 365 Field Service

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Dynamics 365 Workflow notifications
You can configure the system to send email messages to users when workflow-related events occur. Note:

➤ Go to Navigation pane > Modules > System administration > Users > Users.

➤ In the list, find and select the desired record.

➤ On the Action pane, click User options.

➤ Click the Workflow tab. Make sure that the Notifications section is expanded. In the Notifications section, you can specify how you want the user to be notified about workflow-related events.
Box 2: Dynamics 365 Field Service
Supply Chain Management enables synchronization of business processes between Dynamics 365 Supply Chain Management and Dynamics 365 Field Service. The integration scenarios are configured by using extensible Data integrator templates and Common Data Service to enable the synchronization of business processes. Standard templates can be used to create custom integration projects, where additional standard and custom fields and entities can be mapped to adjust the integration and meet specific business needs.

NEW QUESTION 33
A company plans to use Power Apps to connect to a series of custom services. There are no connectors available for the custom services.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statement	Yes	No
Custom connectors for customer-specific services do not require review and certification by Microsoft.	○	○
You can build a custom connector once and reuse the connector for Power Apps and Microsoft Flow.	○	○
You can make custom connectors publicly available for all Power Platform users without having Microsoft certify the connector.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
Only if you would like to share your connector with all users of Logic Apps, Microsoft Flow, and PowerApps, you can submit your connector for Microsoft certification. Microsoft will review your connector.
Box 2: Yes
Connectors created in Microsoft Flow are available in PowerApps. Likewise, connectors created in PowerApps are available in Microsoft Flow.
Box 3: No
If you would like to share your connector with all users of Logic Apps, Microsoft Flow, and PowerApps, you can submit your connector for Microsoft certification. Microsoft will review your connector.

NEW QUESTION 37
You have a Power BI report.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can export data from a visualization in a Power BI report.	○	○
You can show the data behind a visual report on your screen without exporting the data.	○	○
You must export data to view supporting data for a KPI.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
If you'd like to see the data that Power BI uses to create a visualization, you can display that data in Power BI. You can also export that data to Excel as an .xlsx or .csv file. The option to export the data requires a Pro or Premium license and edit permissions to the dataset and report.
Note: Export data from a Power BI dashboard

≫ Choose the Export data icon.

≫ Power BI exports the data to a .csv file. If you've filtered the visualization, then the app will filter the downloaded data.

≫ Your browser will prompt you to save the file. Once saved, open the .csv file in Excel.
Box 2: No
Underlying data: Select this option if you want to see the data in the visual and additional data from the model (see chart below for details). If your visualization has an aggregate, selecting Underlying data removes the aggregate. When you select Export, Power BI exports the data to an .xlsx file and your browser prompts you to save the file. Once saved, open the file in Excel.
Box 3: Yes
A KPI dataset needs to contain goal values for a KPI. If your dataset doesn't contain goal values, you can create them by adding an Excel sheet with goals to your data model or PBIX file.
Note: A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.

NEW QUESTION 38
A company needs to create a series of mobile applications to empower their field engineers to accomplish several tasks with varying degrees of complexity.
Match each option to its answer.
Instructions: To answer, drag the appropriate app type from the column on the left to its definition on the right. Each app type may be used once, more than once, or not at all.
NOTE: Each correct match is worth one point.

App types	Answer Area	
	Definition	**App type**
model-driven	Quickly create apps for very complex business processes with very little or no code.	App type
dashboard		
dataset	Create simple apps with a highly customizable user interface layouts.	App type
canvas		

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: canvas
Both model-driven and canvas apps allow you to easily build business apps. They both share access to the Common Data Service providing standard and custom entities. Canvas apps start with your user experience, crafting a highly tailored interface with the power of a blank canvas and connecting it to 200 data sources. Canvas apps can be built for web, mobile, and tablet applications. Model-driven apps start with your data model – building up from the shape of your core business data and processes in the Common Data Service to model forms, views, and other components. Model-driven apps automatically generate great UI that is responsive across devices.
Box 2: model-driven
