

## Microsoft

### Exam Questions AB-900

Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

**NEW QUESTION 1**

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

In the Microsoft 365 admin center, the Credits used metric in the Copilot credits report shows the total credits used by users in your organization that  and are interacting with work grounded agents in Microsoft 365 Copilot Chat.

- use Microsoft Teams
- are external to your organization
- are assigned a Microsoft 365 Copilot license
- are NOT assigned a Microsoft 365 Copilot license

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

In the Microsoft 365 admin center, the Credits used metric in the Copilot credits report shows the total credits used by users in your organization that  and are interacting with work grounded agents in Microsoft 365 Copilot Chat.

- use Microsoft Teams
- are external to your organization
- are assigned a Microsoft 365 Copilot license
- are NOT assigned a Microsoft 365 Copilot license

**NEW QUESTION 2**

You plan to create an agent in the Microsoft 365 Copilot app to solve a business issue. What are two reasons to create the agent? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. You need to group related chats into a Copilot notebook.
- B. You need to use a custom AI model.
- C. You need to use a custom set of instructions that differ from those of the chat experience.
- D. You need to reason over a specific website.

Answer: CD

**NEW QUESTION 3**

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.

Yes

No

Content retrieved by using Microsoft Graph is used by Microsoft to train models.

Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.

**NEW QUESTION 4**

You need to create a Microsoft 365 Copilot agent that can create charts and visualizations based on a Microsoft Excel workbook. What should you configure for the agent?

- A. the Scrum Assistant template
- B. the Customer Insights Assistant template
- C. the code interpreter capability
- D. the image generator capability

**Answer: C**

**Explanation:**

The correct answer is C. the code interpreter capability. Microsoft Learn states that the code interpreter capability for Microsoft 365 Copilot declarative agents allows the agent to generate and execute Python code to analyze data and generate visualizations. Microsoft's agent schema documentation explicitly describes Code Interpreter as a capability used to solve complex math problems, analyze data, and generate visualizations. That directly matches the requirement to create charts and visualizations from a Microsoft Excel workbook.

Microsoft documentation also explains that code interpreter supports working with Excel files and is used for scenarios such as data analysis, statistical computations, and generating charts. This makes it the correct configuration for an agent that must reason over workbook data and produce chart-based outputs. By contrast, the image generator capability is for creating images, not for analyzing workbook data. The Scrum Assistant and Customer Insights Assistant options are templates, not the specific technical capability required to read data and build charts from an Excel workbook.

**NEW QUESTION 5**

**HOTSPOT**

Your organization has a Microsoft 365 subscription.

You need to use Microsoft Purview to meet the following requirements:

- Discover and classify sensitive data across multiple platforms.
- Block users from sharing intellectual property with external users.

Which Microsoft Purview solution should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Discover and classify sensitive data across multiple platforms:

▼

- Communication Compliance
- Data Loss Prevention
- Information Protection
- Insider Risk Management

Block users from sharing intellectual property with external users:

▼

- Communication Compliance
- Data Loss Prevention
- Information Protection
- insider Risk Management

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Answer Area

Discover and classify sensitive data across multiple platforms:

Communication Compliance
Data Loss Prevention
Information Protection
Insider Risk Management

Block users from sharing intellectual property with external users:

Communication Compliance
Data Loss Prevention
Information Protection
insider Risk Management

**NEW QUESTION 6**

You need to identify files and emails that contain social security numbers (SSNs) and credit card numbers. What should you use in the Microsoft Purview portal?

- A. Information Protection reports
- B. Data explorer
- C. Information Protection policies
- D. Activity explorer

**Answer:** B

**Explanation:**

The correct answer is B. Data explorer. Microsoft Learn states that Data explorer in Microsoft Purview shows a current snapshot of items that have been classified as a sensitive information type in your organization. Microsoft's sensitive information type documentation specifically lists examples such as social security numbers and credit card numbers, which means Data explorer is the appropriate portal feature for identifying files and emails that contain those data types. Data explorer is designed to help administrators see where sensitive data exists across supported Microsoft 365 locations. The other options are less appropriate for this task. Information Protection reports focus more broadly on label and protection reporting. Information Protection policies are for configuring classification and protection behavior, not for finding existing files and emails containing SSNs or credit card numbers. Activity explorer is primarily used to review user and policy-related activities, such as label changes or DLP events, rather than to provide the direct sensitive-data inventory view requested here. Since the question asks to identify the files and emails containing specific sensitive information types, Microsoft's documented answer is Data explorer.

**NEW QUESTION 7**

**HOTSPOT**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	<input type="radio"/>	<input type="radio"/>
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	<input checked="" type="radio"/>	<input type="radio"/>
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 8**

What can you use to block a user account automatically when a risky sign-in is detected?

- A. Microsoft Entra ID Protection
- B. Microsoft Defender for Office 365
- C. Microsoft Entra Privileged Identity Management (PIM)
- D. Microsoft Defender for Identity

**Answer:** A

**NEW QUESTION 9**

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input type="radio"/>
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input checked="" type="radio"/>
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 10**

Your organization has a Microsoft 365 subscription.

Which two tasks can you perform by using the Exchange admin center? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a mail flow rule.
- B. Add a custom domain.
- C. Assign a Microsoft Exchange license.
- D. Create a shared mailbox.

**Answer:** AD

**NEW QUESTION 10**

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	<input type="radio"/>	<input checked="" type="radio"/>

Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 15**

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Administrators can block specific websites from being used by Microsoft 365 Copilot.	<input type="radio"/>	<input type="radio"/>
Administrators can block Microsoft 365 Copilot from using web search when responding to user prompts.	<input type="radio"/>	<input type="radio"/>
Administrators can block access to the Researcher agent in Microsoft 365 Copilot, while allowing access to the Analyst agent.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Statements	Yes	No
Administrators can block specific websites from being used by Microsoft 365 Copilot.	<input type="radio"/>	<input checked="" type="radio"/>
Administrators can block Microsoft 365 Copilot from using web search when responding to user prompts.	<input checked="" type="radio"/>	<input type="radio"/>
Administrators can block access to the Researcher agent in Microsoft 365 Copilot, while allowing access to the Analyst agent.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 20**

Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

- A. an auto-labeling policy
- B. a trainable classifier
- C. a retention label policy
- D. a sensitivity label policy

**Answer:** D

**Explanation:**

The correct answer is D. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself does not make it available to users. Microsoft Learn states that after you create sensitivity labels, you must publish them by creating a label policy so that users and groups can see and apply those labels in Microsoft 365 apps and services. Publishing controls which labels are available and to whom they are shown. This is why a sensitivity label policy is required to ensure that users can apply Label1 to files.

The other options do not meet the requirement. Auto-labeling policies apply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. A trainable classifier is used to identify content categories, not to publish a label. A retention label policy publishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using a sensitivity label policy.

**NEW QUESTION 25**

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

When you need to add a domain to a Microsoft 365 subscription, you must verify the domain by

adding a public DNS record.

confirming your business address.

Uploading a certificate

uploading a webpage.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

When you need to add a domain to a Microsoft 365 subscription, you must verify the domain by

adding a public DNS record.

confirming your business address.

**NEW QUESTION 27**

A user named User1 is responsible for quarterly sales reporting.

User1 needs to identify performance trends, generate visual insights, and create a summary of anomalies across multiple files that contain various datasets.

What should you use

- A. the Researcher agent in Microsoft 365 Copilot
- B. Microsoft 365 Copilot Search
- C. Copilot in Excel
- D. the Analyst agent in Microsoft 365 Copilot

Answer: D

**NEW QUESTION 32**

**HOTSPOT**

You have a Microsoft SharePoint site named Site1 and a security group named Group1.

You need to prevent all users that currently have access to Site1 from accessing the site content unless the user is also a member of Group1.

Which settings should you configure? To answer, select the appropriate settings in the answer area.

**Site1**  
Public group

Email View site Delete

Site 1

General Activity Membership Settings

**Email**

- Let people outside the organization email this team
- Send copies of team emails and events to team members' inboxes
- Don't show team email address in Outlook

You can use a Microsoft Entra security group to assign permissions to Microsoft Entra ID resources.	<input checked="" type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign Microsoft 365 licenses.	<input checked="" type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign permissions to Microsoft Exchange mailboxes.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 40**

**HOTSPOT**

You open the Microsoft Entra admin center as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

**Answer Area**

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles

**NEW QUESTION 45**

**HOTSPOT**

Your organization has a Microsoft 365 subscription.

The HR department at your company asks for a copy of all the recent files that were modified by a user named User1.

What should you use in the Microsoft Purview portal? To answer, select the appropriate solutions in the answer area.
