

Microsoft

Exam Questions AB-731

AI Transformation Leader (beta)

NEW QUESTION 1

You need to recommend a service that supports indexing information and knowledge mining by extracting insights from documents. What should you recommend?

- A. Microsoft Foundry
- B. Azure Vision in Foundry Tools
- C. Azure Document Intelligence in Foundry Tools
- D. Azure AI Search

Answer: D

NEW QUESTION 2

HOTSPOT

HOTSPOT - Select the answer that correctly completes the sentence. Microsoft 365 Copilot can be used to .

Answer Area

Microsoft 365 Copilot can be used to

- monitor network traffic and alerts in real time.
- create a Microsoft Word document.
- create a list in Microsoft SharePoint.
- modify administrative permissions for Microsoft SharePoint files.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Microsoft 365 Copilot can be used to

- monitor network traffic and alerts in real time.
- create a Microsoft Word document.
- create a list in Microsoft SharePoint.
- modify administrative permissions for Microsoft SharePoint files.

NEW QUESTION 3

HOTSPOT

- Select the answer that correctly completes the sentence.

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to .

Answer Area

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to

- configure and deploy AI models in the organization's Azure environment.
- guide AI strategy, ensure responsible AI oversight, and promote alignment across business units.
- manage day-to-day model training and labeling tasks for AI development teams.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to

configure and deploy AI models in the organization's Azure environment.

guide AI strategy, ensure responsible AI oversight, and promote alignment across business units.

manage day-to-day model training and labeling tasks for AI development teams.

NEW QUESTION 4

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
For a user to access organizational data from a mobile device, the user needs a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To reason over your organizational data by using Microsoft Graph, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To use the Analyst agent, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
For a user to access organizational data from a mobile device, the user needs a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
To reason over your organizational data by using Microsoft Graph, you need a Microsoft 365 Copilot license.	<input checked="" type="radio"/>	<input type="radio"/>
To use the Analyst agent, you need a Microsoft 365 Copilot license.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 5

You plan to meet with stakeholders to discuss how generative AI can benefit your company. You need to provide a relevant description of generative AI. Which description should you use?

- A. Generative AI is designed to generate responses based on a user's natural language prompts.
- B. Generative AI is designed to translate documents into other languages.
- C. Generative AI is designed to predict future trends based on historical data.
- D. Generative AI is designed to recommend products based on user behavior.

Answer: A

NEW QUESTION 6

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Foundry provides a unified platform for developers and data professionals to create custom end-to-end AI solutions.	<input type="radio"/>	<input type="radio"/>
Microsoft Foundry provides a unified platform for low-code developers and business users to create custom end-to-end AI solutions.	<input type="radio"/>	<input type="radio"/>
You need a Microsoft 365 Copilot license to access Microsoft Foundry services.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

- Microsoft Foundry provides a unified platform for developers and data professionals to create custom end-to-end AI solutions.
- Microsoft Foundry provides a unified platform for low-code developers and business users to create custom end-to-end AI solutions.
- You need a Microsoft 365 Copilot license to access Microsoft Foundry services.

Yes	No
<input checked="" type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input checked="" type="radio"/>
<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 7

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements

- Prompt engineering changes how a generative AI model was trained.
- Prompt engineering focuses on designing clear, concise, and context-rich instructions.
- Effective prompt engineering involves maximizing the number of tokens used in each request.

Yes	No
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

- Prompt engineering changes how a generative AI model was trained.
- Prompt engineering focuses on designing clear, concise, and context-rich instructions.
- Effective prompt engineering involves maximizing the number of tokens used in each request.

Yes	No
<input type="radio"/>	<input checked="" type="radio"/>
<input checked="" type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 8

HOTSPOT

HOTSPOT - Select the answer that correctly completes the sentence.

You use to train a model that will forecast product demand based on historical sales data.

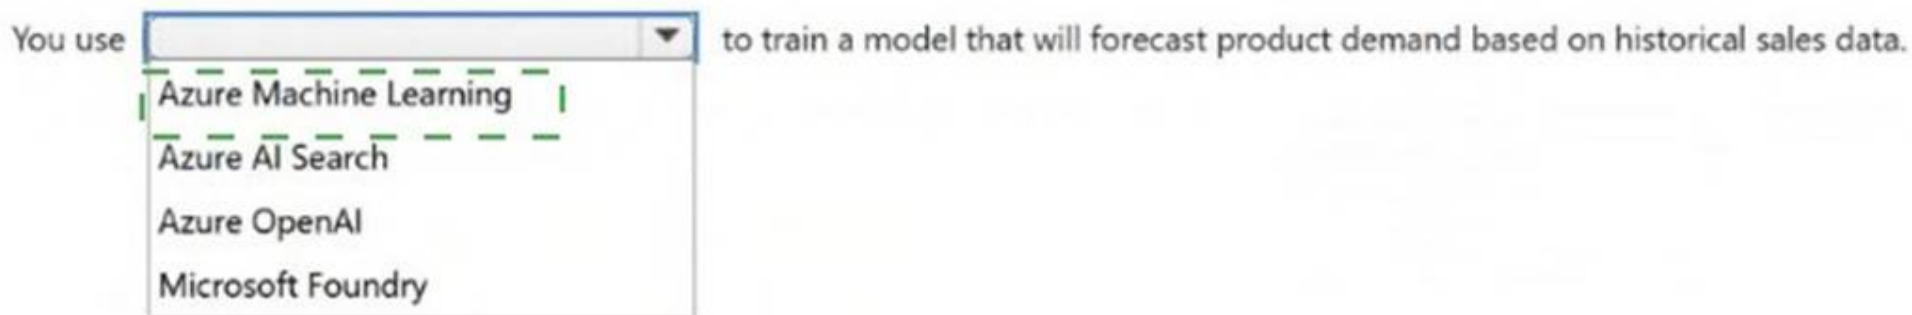

You use to train a model that will forecast product demand based on historical sales data.

- Azure Machine Learning
- Azure AI Search
- Azure OpenAI
- Microsoft Foundry

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 9

Your company is preparing to adopt Microsoft 365 Copilot and wants to follow Microsoft responsible AI principles. As a business leader, you propose establishing an AI governance council to ensure alignment with the responsible AI principles. What is the primary purpose of the council? More than one answer choice may achieve the goal. Select the BEST answer.

- A. to monitor user behavior and enforce compliance with internal IT policies
- B. to train employees on how to use Copilot features effectively
- C. to oversee implementation, manage technical performance, and ensure successful AI deployment
- D. to guide strategy, provide oversight, and ensure cross-functional alignment for responsible AI adoption

Answer: D

Explanation:

An AI governance council (often called an AI Council) exists primarily to set direction and provide cross-functional oversight so AI adoption stays aligned to the organization's values, risk posture, and Responsible AI commitments. That maps most directly to D. Microsoft's guidance on creating an AI Council describes leadership responsibilities such as defining and communicating the organization's AI vision, values, and policies, reviewing and approving AI use cases/projects, and coordinating with enablement and technical readiness teams to understand risks, issues, and opportunities. It also emphasizes representation across distinct functions (for example: senior leadership, legal, compliance, risk, ethics, data, technology, business, HR) to ensure governance decisions reflect a broad, accountable perspective.

The other options describe activities that may be supporting outcomes of governance, but they are not the council's primary purpose. A is narrow (IT policy enforcement/user monitoring) and is typically handled by security/compliance operations rather than the top-level governance body. B is user enablement/training (commonly owned by adoption/change management teams). C focuses on technical delivery and performance management (often owned by engineering/MLOps/service owners). The governance council's central value is strategic guidance + oversight + cross-functional alignment to ensure Responsible AI adoption is consistent, accountable, and sustainable across the business.

NEW QUESTION 10

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files.	<input type="radio"/>	<input type="radio"/>
Azure Vision in Foundry Tools can generate images based on natural language descriptions.	<input type="radio"/>	<input type="radio"/>
Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files. Answer: No

Azure Vision in Foundry Tools can generate images based on natural language descriptions. Answer: No

Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes. Answer: Yes

No— Azure Vision in Foundry Tools focuses on computer vision tasks such as image analysis and OCR (reading text from images and documents). While it can extract text from scanned PDFs via OCR, key phrase extraction is a natural language processing capability provided by Azure Language in Foundry Tools, not Azure Vision. Key phrase extraction analyzes text to identify main concepts, which is a different service family than vision.

No— Azure Vision can analyze existing images (for example, generate captions/descriptions of an image), but generating new images from a text prompt is a generative model capability (for example, DALL-E through Azure OpenAI/Azure AI Foundry model endpoints), not an Azure Vision feature. Vision describes what it sees; it doesn't synthesize new images from natural language.

Yes— Azure Document Intelligence in Foundry Tools is designed for intelligent document processing, including automating extraction of structured fields from financial documents. Microsoft provides prebuilt models for invoices and supports custom extraction for similar document types, which makes it suitable for automating workflows involving invoices and credit-note style documents (field extraction, validation, routing).

NEW QUESTION 10

You have a business unit that uses an AI solution to process loan applications. You discover that the solution rejects the application of all applicants that are older than 60 years of age. Which Microsoft responsible AI principle is this violating?

- A. accountability
- B. transparency
- C. fairness
- D. reliability and safety

Answer: C

NEW QUESTION 15

Your company manages an online catalog of office supplies. You plan to use a generative AI solution to create product descriptions for your company's website. The solution must ensure descriptions can be posted immediately after creation, enable selection/inclusion of product details, and be fast and simple for non-technical staff. What is the best type of solution to use? Select the BEST answer.

- A. custom Azure Machine Learning model
- B. the Researcher agent in Microsoft 365 Copilot
- C. an interactive AI agent
- D. a fine-tuned large language model LLM

Answer: D

NEW QUESTION 20

HOTSPOT

- Select the answer that correctly completes the sentence.

Adopting Microsoft responsible AI principles is important for your organization because the principles .

Adopting Microsoft responsible AI principles is important for your organization

because the principles

▼

ensure that AI models deliver consistent and equitable results.

help organizations increase trust in fully autonomous AI systems.

promote the ethical and accountable use of AI.

standardize model development practices across AI teams.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Adopting Microsoft responsible AI principles is important for your organization

because the principles

▼

ensure that AI models deliver consistent and equitable results.

help organizations increase trust in fully autonomous AI systems.

promote the ethical and accountable use of AI.

standardize model development practices across AI teams.

NEW QUESTION 25

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot connectors enable you to index data from multiple sources to make the data available in Copilot.	<input type="radio"/>	<input type="radio"/>
You can build a custom Microsoft 365 Copilot connector when the available connectors do NOT meet your data integration requirements.	<input type="radio"/>	<input type="radio"/>
To use Microsoft 365 Copilot connectors, you need a Microsoft Copilot Studio license.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

Microsoft 365 Copilot connectors enable you to index data from multiple sources to make the data available in Copilot.

Yes	No
<input checked="" type="radio"/>	<input type="radio"/>
<input checked="" type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input checked="" type="radio"/>

You can build a custom Microsoft 365 Copilot connector when the available connectors do NOT meet your data integration requirements.

To use Microsoft 365 Copilot connectors, you need a Microsoft Copilot Studio license.

NEW QUESTION 29

HOTSPOT

- Select the answer that correctly completes the sentence. The primary goal of generative AI is _____ .

Answer Area

The primary goal of generative AI is

to analyze trends and classify data sources.

to create new content, such as text, images, or code.

to make predictions based on historical data.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

to create new content, such as text, images, or code.

Generative AI is defined by its ability to produce new outputs—content that did not previously exist in exactly that form—based on patterns learned from large datasets. That content can be text (emails, summaries, policies), images (design mockups, marketing visuals), code (snippets, scripts), audio, and more.

Therefore, the correct completion is ??to create new content, such as text, images, or code.??

The other options describe different AI categories. ??Analyze trends and classify data sources?? is primarily analytical/classification work, typically associated with traditional machine learning models (for example, clustering, categorization, fraud classification). ??Make predictions based on historical data?? is predictive AI (forecasting demand, predicting churn, estimating failure probability). While generative AI can assist those workflows by explaining results or drafting narratives, its primary purpose is not classification or forecasting—it is content synthesis.

In practical business value terms, this is why generative AI is commonly deployed for productivity tasks like drafting and rewriting content, summarizing long documents, generating customer communications, creating knowledge assistants, and producing structured outputs (tables, bullet lists, JSON) from unstructured prompts. The model's differentiator is its ability to transform instructions and context into coherent, human-like content.

NEW QUESTION 32

Your company uses a non-reasoning generative AI model to create textual content. You discover that the model's responses are inconsistent and do NOT meet expectations. You need to improve the prompts. What should you do? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Provide the prompts with extensive examples of the expected output.
- B. Add the context, sources, and expectations to the prompts.
- C. Use technical terms in the prompts to enhance AI comprehension.
- D. Add only a single concise requirement to the prompts.

Answer: AB

NEW QUESTION 34

HOTSPOT

- Select the answer that correctly completes the sentence.

When you use Microsoft 365 Copilot connectors to connect external content to _____, your users can find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

Answer Area

When you use Microsoft 365 Copilot connectors to connect external content to

, your users can

find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

When you use Microsoft 365 Copilot connectors to connect external content to

, your users can

find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

NEW QUESTION 37

In which scenario is Azure Machine Learning most likely to deliver strategic value for an organization?

- A. Using historical sales data to forecast demand across product categories.
- B. Digitizing a paper-based process to reduce errors.
- C. Entering customer feedback into a spreadsheet to understand sentiment.
- D. Sending personalized emails to customers based on the customer location.

Answer: A

NEW QUESTION 41

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) architectures require that a large language model (LLM) be retrained on proprietary data.	<input type="radio"/>	<input type="radio"/>
Retrieval-Augmented Generation (RAG) grounds a language model to produce more factual and context-relevant responses.	<input type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) retrieves information from external knowledge sources at runtime instead of relying solely on the knowledge of a generative AI model.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) architectures require that a large language model (LLM) be retrained on proprietary data.	<input type="radio"/>	<input checked="" type="radio"/>
Retrieval-Augmented Generation (RAG) grounds a language model to produce more factual and context-relevant responses.	<input checked="" type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) retrieves information from external knowledge sources at runtime instead of relying solely on the knowledge of a generative AI model.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 42

Your company is developing an AI-powered customer support agent. You need to ensure that the solution follows Microsoft responsible AI principles. Which two actions should you perform? Select the two BEST answers. Each correct answer presents part of the solution.

- A. Retain all customer conversations.
- B. Test the agent to ensure that responses are inclusive and culturally sensitive.
- C. Enable the agent to operate independently.
- D. Ensure that the agent can be used for multiple purposes.
- E. Provide a clear disclaimer that users are interacting with an AI solution.

Answer: BE

NEW QUESTION 44

Your company plans to use an AI-powered solution to analyze customer feedback for insights related to future product designs. You need to mitigate the privacy risks associated with the solution. What is the best approach to achieve the goal? Select the BEST answer.

- A. Anonymize the source data to remove customer Personally Identifiable Information (PII) from the feedback.
- B. Delete all the feedback data immediately after analysis.
- C. Ensure that feedback is attributable to the customer so that it can be deleted upon request.
- D. Limit privacy reviews to the final stage of the AI project lifecycle.

Answer: A

NEW QUESTION 49

Your company discovers that several employees use personal ChatGPT accounts to assist with work tasks. You are concerned about proprietary data being shared externally. You need to evaluate the business value of rolling out Microsoft 365 Copilot. Which capability is a key benefit of using Copilot instead of a personal ChatGPT account?

- A. analyzing and producing reports based on complex data
- B. generating ideas and solving issues
- C. drafting documents, emails, presentations, and marketing materials
- D. accessing internal data in accordance with existing Microsoft 365 policies

Answer: D

NEW QUESTION 54

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Allowing AI models to make autonomous decisions supports the Microsoft responsible AI principle of accountability.	<input type="radio"/>	<input type="radio"/>
Regularly testing AI models for fairness and inclusiveness helps ensure they align with Microsoft's Responsible AI principles.	<input type="radio"/>	<input type="radio"/>
Protecting user data and limiting access to personal information supports the Microsoft responsible AI principles of privacy and security.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

Allowing AI models to make autonomous decisions supports the Microsoft responsible AI principle of accountability.

Yes

No

Regularly testing AI models for fairness and inclusiveness helps ensure they align with Microsoft's Responsible AI principles.

Protecting user data and limiting access to personal information supports the Microsoft responsible AI principles of privacy and security.

NEW QUESTION 59

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements

Microsoft Copilot provides a single AI app that has identical features and experiences across all Microsoft products.

Yes

No

Microsoft 365 Copilot delivers AI capabilities for business users that use Microsoft 365 apps.

Microsoft Security Copilot helps companies understand risks and the organizational security posture.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

Microsoft Copilot provides a single AI app that has identical features and experiences across all Microsoft products.

Yes

No

Microsoft 365 Copilot delivers AI capabilities for business users that use Microsoft 365 apps.

Microsoft Security Copilot helps companies understand risks and the organizational security posture.

NEW QUESTION 64

Your company receives thousands of scanned invoices each month. You need to recommend an AI solution that can automatically extract key details, such as invoice numbers, vendor names, and total amounts. What is the best solution to recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Azure Document Intelligence in Foundry Tools
- B. Azure Vision in Foundry Tools
- C. Azure AI Search
- D. Azure Machine Learning

Answer: A

NEW QUESTION 65

HOTSPOT

- Select the answer that correctly completes the sentence.
 Using high-quality grounding data in a generative AI solution .

Answer Area

Using high-quality grounding data in a generative AI solution

ensures that all responses are factually accurate.

increases performance of an AI model.

improves the accuracy and reliability of the predictions and outputs of AI.

increases the amount of storage required to host an AI model.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Using high-quality grounding data in a generative AI solution

ensures that all responses are factually accurate.

increases performance of an AI model.

improves the accuracy and reliability of the predictions and outputs of AI.

increases the amount of storage required to host an AI model.

NEW QUESTION 68

You need to create a custom Azure Machine Learning model. The data used to train the model is consistent and uniform. What should you do first?

- A. Prepare the training data.
- B. Evaluate the model.
- C. Train the model.
- D. Tune hyperparameters.
- E. Deploy the model.

Answer: A

Explanation:

Even when training data is already consistent and uniform, the first step in building a custom Azure Machine Learning model is still to prepare the training data. Consistent data reduces the amount of cleaning you may need, but preparation is broader than cleaning: you still must confirm the schema, validate data types, handle missing values (if any), ensure label quality (for supervised learning), select/engineer features, and split data into training/validation/test sets. Those actions determine whether training will be stable and whether evaluation metrics will be meaningful.

If you skip preparation and go directly to training (C), the model might learn from the wrong columns, inconsistent labels, or poorly partitioned data, producing misleading results. Evaluation (B) comes after training because you need a trained model to score and measure. Hyperparameter tuning (D) is an optimization activity that presupposes you already have a working training pipeline and a baseline model to improve. Deployment (E) is last, after you have validated performance and selected the model candidate.

Azure Machine Learning commonly operationalizes these steps through pipelines, where data preparation is a foundational stage that precedes training and evaluation (and can also be iterated as you refine features and quality).

NEW QUESTION 69

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A text-to-image generator can be used to translate content into other languages.	<input type="radio"/>	<input type="radio"/>
A predictive analytics model can generate new marketing content for a company's online ads.	<input type="radio"/>	<input type="radio"/>
A generative AI chatbot can engage customers in personalized conversations and recommend products.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A text-to-image generator can be used to translate content into other languages.	<input type="radio"/>	<input checked="" type="radio"/>
A predictive analytics model can generate new marketing content for a company's online ads.	<input type="radio"/>	<input checked="" type="radio"/>
A generative AI chatbot can engage customers in personalized conversations and recommend products.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 73

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) requires model fine-tuning.	<input type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) is helpful when you need a generative AI solution that can access current, verifiable information.	<input type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) enables you to get more relevant responses based on your organization's documents without retraining the base model.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) requires model fine-tuning.	<input type="radio"/>	<input checked="" type="radio"/>
Retrieval Augmented Generation (RAG) is helpful when you need a generative AI solution that can access current, verifiable information.	<input checked="" type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) enables you to get more relevant responses based on your organization's documents without retraining the base model.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 78

Your company plans to use generative AI to help summarize and analyze internal business documents. You need to recommend a solution to prevent generative AI from accessing confidential or classified information. What should you include in the recommendation?

- A. an information barrier (IB) policy
- B. data governance
- C. a data retention policy
- D. communication monitoring

Answer: B

NEW QUESTION 82

HOTSPOT

HOTSPOT - For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Larger datasets can increase the cost of a generative AI solution that uses an Azure Machine Learning workspace.	<input type="radio"/>	<input type="radio"/>
The cost of consuming Azure OpenAI models is primarily identified by the number of input and output tokens processed.	<input type="radio"/>	<input type="radio"/>
The cost of custom generative AI solutions always remains the same regardless of the model version or capability used.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

Larger datasets can increase the cost of a generative AI solution that uses an Azure Machine Learning workspace.

Yes

No

The cost of consuming Azure OpenAI models is primarily identified by the number of input and output tokens processed.

The cost of custom generative AI solutions always remains the same regardless of the model version or capability used.
