Exam Questions AB-900

Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

NEW QUESTION 1

HOTSPOT

A user named User5 navigates to <https://myapps.microsoft.com>. After entering their username and password, User5 receives the displayed message on their mobile device.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Are you trying to sign in?

Contoso Ltd.
User5@sk2508.onmicrosoft.com

Enter the number shown to sign in.

Enter number here

YES

NO, IT'S NOT ME

I CAN'T SEE THE NUMBER

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

User5 is using for multifactor authentication (MFA).

- email OTP
- the Microsoft Authenticator app
- SMS
- a Temporary Access Pass

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Are you trying to sign in?

Contoso Ltd.
User5@sk2508.onmicrosoft.com

Enter the number shown to sign in.

Enter number here

YES

NO, IT'S NOT ME

I CAN'T SEE THE NUMBER

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

User5 is using _____ for multifactor authentication (MFA).

- email OTP
- the Microsoft Authenticator app
- SMS
- a Temporary Access Pass

NEW QUESTION 2

HOTSPOT

Select the answer that correctly completes the sentence.

Conditional Access policies

- are configured by using the Microsoft Defender portal.
- are applied only to on-premises resources.
- provide control over how users can access cloud apps.
- require a Microsoft Exchange mailbox.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Conditional Access policies

- are configured by using the Microsoft Defender portal.
- are applied only to on-premises resources.
- provide control over how users can access cloud apps.
- require a Microsoft Exchange mailbox.

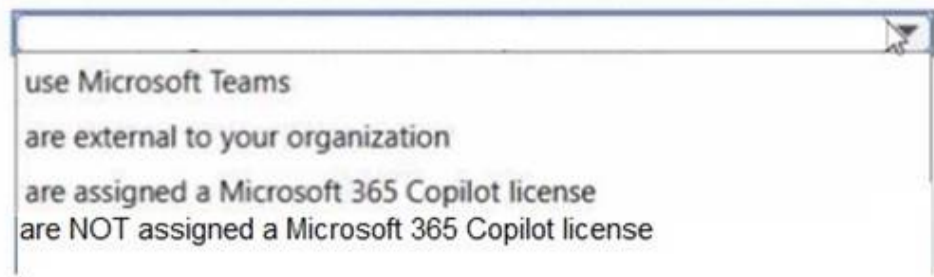

NEW QUESTION 3

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

In the Microsoft 365 admin center, the Credits used metric in the Copilot credits report shows the total credits used by users in your organization that

and are interacting with work grounded agents in Microsoft 365 Copilot Chat.

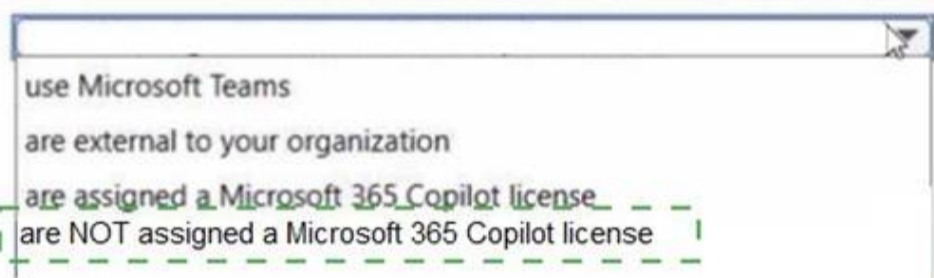

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

In the Microsoft 365 admin center, the Credits used metric in the Copilot credits report shows the total credits used by users in your organization that

and are interacting with work grounded agents in Microsoft 365 Copilot Chat.

NEW QUESTION 4

Your company plans to use Microsoft 365 Copilot. You need to provide a user with the ability to use Microsoft 365 Copilot, including the Researcher and Analyst agent. What should you use?

- A. the Microsoft Entra admin center
- B. the Microsoft Purview portal
- C. the Microsoft Defender portal
- D. the Microsoft 365 admin center

Answer: D

NEW QUESTION 5

You need to identify files and emails that contain social security numbers (SSNs) and credit card numbers. What should you use in the Microsoft Purview portal?

- A. Information Protection reports
- B. Data explorer
- C. Information Protection policies
- D. Activity explorer

Answer: B

Explanation:

The correct answer is B. Data explorer. Microsoft Learn states that Data explorer in Microsoft Purview shows a current snapshot of items that have been classified as a sensitive information type in your organization. Microsoft's sensitive information type documentation specifically lists examples such as social security numbers and credit card numbers, which means Data explorer is the appropriate portal feature for identifying files and emails that contain those data types. Data explorer is designed to help administrators see where sensitive data exists across supported Microsoft 365 locations. The other options are less appropriate for this task. Information Protection reports focus more broadly on label and protection reporting. Information Protection policies are for configuring classification and protection behavior, not for finding existing files and emails containing SSNs or credit card numbers. Activity explorer is primarily used to review user and policy-related activities, such as label changes or DLP events, rather than to provide the direct sensitive-data inventory view requested here. Since the question asks to identify the files and emails containing specific sensitive information types, Microsoft's documented answer is Data explorer.

NEW QUESTION 6

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	<input type="radio"/>	<input type="radio"/>
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	<input checked="" type="radio"/>	<input type="radio"/>
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 7

FILL IN THE BLANK

Select the answer that correctly completes the sentence.

Answer Area

You can use the Microsoft Purview solution to find all the content that relates to the term "Project Falcon" in the emails exchanged by two users.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

eDiscovery

NEW QUESTION 8

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point

Answer Area

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	<input type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	<input type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

A site member of a Microsoft SharePoint site can invite users to access the content in the site.

Yes

No

A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.

Yes

No

A site owner of a Microsoft SharePoint site can remove another site owner from the site.

Yes

No

NEW QUESTION 9

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

In Microsoft Entra Privileged Identity Management (PIM), an administrator has made you eligible for the User Administrator role. Before you can create a user account, you must

▼

Activate the role

install the Microsoft Authenticator app.

request a license.

update your location information.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

In Microsoft Entra Privileged Identity Management (PIM), an administrator has made you eligible for the User Administrator role. Before you can create a user account, you must

▼

Activate the role

install the Microsoft Authenticator app.

request a license.

update your location information.

NEW QUESTION 10

Your organization has a Microsoft 365 subscription. All users are assigned a Microsoft 365 Copilot license. You need to prevent the users from generating images by using Copilot. What should you use?

- A. the Microsoft Defender portal
- B. the Microsoft Purview portal
- C. the Microsoft 365 admin center
- D. the Microsoft Entra admin center

Answer: C

Explanation:

The correct answer is C. the Microsoft 365 admin center. Microsoft Learn documents a specific Copilot image generation setting in the Microsoft 365 admin center under Copilot > Settings > Copilot actions > Copilot image generation. Microsoft states that when this scenario is allowed, users can ask Copilot to create, design, and edit images. When it is not allowed, Copilot does not generate images and instead responds with stock or brand images. This directly matches the requirement to prevent users from generating images by using Copilot.

The other options are incorrect because Microsoft does not document this control as being managed from Defender, Purview, or Entra for this scenario. Microsoft also separately notes that organizations can control access to Designer image generation through policy, but the admin experience for managing the Microsoft 365 Copilot scenario itself is explicitly surfaced in the Microsoft 365 admin center. Therefore, for an exam question focused on where an admin should go to disable image generation in Copilot, the best and documented answer is the Microsoft 365 admin center.

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input type="radio"/>
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input checked="" type="radio"/>
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 12

Your company is piloting the use of Microsoft 365 Copilot and has purchased 100 Microsoft 365 Copilot licenses. You need to view detailed reports about Copilot usage in Microsoft Teams, such as meeting hours summarized by Copilot and meeting actions taken by using Copilot. What should you use?

- A. the Microsoft 365 Apps usage report in the Microsoft 365 admin center
- B. the Microsoft 365 Copilot readiness report in the Microsoft 365 admin center
- C. the Microsoft 365 Copilot dashboard in Microsoft Viva Insights
- D. the Microsoft 365 Copilot usage report in the Microsoft 365 admin center

Answer: C

NEW QUESTION 15

Your company is evaluating Microsoft 365 Copilot pay-as-you-go billing instead of purchasing a Microsoft 365 Copilot license. In which scenario can pay-as-you-go billing apply?

- A. generating a recap of a Microsoft Teams meeting
- B. using a custom agent that is grounded in work data
- C. performing multi-step reasoning by using the Researcher agent
- D. using the AI assistant to edit a document in Copilot in Word

Answer: B

NEW QUESTION 17

Your organization has a Microsoft 365 subscription. Which two tasks can you perform by using the Exchange admin center? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Create a mail flow rule.
- B. Add a custom domain.
- C. Assign a Microsoft Exchange license.
- D. Create a shared mailbox.

Answer: AD

NEW QUESTION 21

Your company has a written compliance policy that requires all emails be retained for seven years, and then permanently deleted. Which Microsoft Purview solution should you use?

- A. Information Protection
- B. Insider Risk Management
- C. Data Loss Prevention
- D. Data Lifecycle Management

Answer: D

Explanation:

The correct answer is D. Data Lifecycle Management. Microsoft Learn states that Microsoft Purview retention policies and retention labels, managed under Data Lifecycle Management, support three core outcomes: retain-only, delete-only, and retain and then delete. The requirement in this question is exact: keep email for seven years and then permanently delete it. That is a textbook retain and then delete retention configuration, which Microsoft documents as part of Purview's retention capabilities. Microsoft also recommends using Microsoft 365 retention policies and labels for retaining and deleting emails rather than relying on older Exchange-only approaches in most modern compliance scenarios.

The other options do not meet the requirement. Information Protection focuses on labeling and protecting sensitive information. Insider Risk Management is used to detect and investigate risky user behavior. Data Loss Prevention helps prevent inappropriate sharing or exfiltration of sensitive data. None of those are designed to enforce a timed seven-year retention period followed by automatic permanent deletion. The Microsoft Purview solution explicitly built for that lifecycle requirement is Data Lifecycle Management.

NEW QUESTION 24

Your organization has a Microsoft 365 E5 subscription.

You need to ensure that a third-party cloud service can authenticate to Microsoft Entra. What should you configure?

- A. a Microsoft 365 Copilot connector
- B. multifactor authentication (MFA)
- C. a Conditional Access policy
- D. an app registration

Answer: D

NEW QUESTION 28

Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

- A. an auto-labeling policy
- B. a trainable classifier
- C. a retention label policy
- D. a sensitivity label policy

Answer: D

Explanation:

The correct answer is D. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself does not make it available to users. Microsoft Learn states that after you create sensitivity labels, you must publish them by creating a label policy so that users and groups can see and apply those labels in Microsoft 365 apps and services. Publishing controls which labels are available and to whom they are shown. This is why a sensitivity label policy is required to ensure that users can apply Label1 to files.

The other options do not meet the requirement. Auto-labeling policies apply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. A trainable classifier is used to identify content categories, not to publish a label. A retention label policy publishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using a sensitivity label policy.

NEW QUESTION 31

Your organization has a Microsoft 365 subscription that contains a user named User1. User1 plans to leave your company in two weeks. You need to capture the activity of User1 to identify whether the user is exfiltrating data. Which Microsoft Purview solution should you use?

- A. Communication Compliance
- B. Data Security Posture Management
- C. Insider Risk Management
- D. Data Lifecycle Management

Answer: C

NEW QUESTION 33

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	<input type="radio"/>	<input type="radio"/>
Zero Trust is a security strategy, NOT a specific product.	<input type="radio"/>	<input type="radio"/>
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	<input type="radio"/>	<input checked="" type="radio"/>
Zero Trust is a security strategy, NOT a specific product.	<input checked="" type="radio"/>	<input type="radio"/>
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 36

Your organization has a Microsoft 365 subscription.
 You create a security group named Group1 and assign a Microsoft 365 E3 license to the group.
 You discover that a user named User1 does NOT have access to the Microsoft 365 E3 features.
 You need to ensure that User1 can access all the Microsoft 365 E3 features.
 Which two actions can you perform? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Add User1 to Group1.
- B. Assign a Conditional Access policy to Group1.
- C. Assign a Conditional Access policy to User1.
- D. Assign a license to User1.

Answer: AD

NEW QUESTION 38

A user named User1 is responsible for quarterly sales reporting.
 User1 needs to identify performance trends, generate visual insights, and create a summary of anomalies across multiple files that contain various datasets.
 What should you use

- A. the Researcher agent in Microsoft 365 Copilot
- B. Microsoft 365 Copilot Search
- C. Copilot in Excel
- D. the Analyst agent in Microsoft 365 Copilot

Answer: D

NEW QUESTION 39

HOTSPOT

You have a Microsoft SharePoint site named Site1 and a security group named Group1.
 You need to prevent all users that currently have access to Site1 from accessing the site content unless the user is also a member of Group1.
 Which settings should you configure? To answer, select the appropriate settings in the answer area.

Site1

NEW QUESTION 48

Your organization has a Microsoft 365 subscription that contains Microsoft SharePoint sites and Microsoft Teams teams. You discover that the sites and the teams are shared to users outside your organization. You need to identify which sites and teams were shared to the external users.

What should you use?

- A. the SharePoint admin center
- B. the Microsoft Teams admin center
- C. the Microsoft 365 admin center
- D. the Microsoft Defender portal

Answer: A

NEW QUESTION 49

HOTSPOT

Your organization has a Microsoft 365 subscription. A user named John is assigned an admin role as shown in the following exhibit.

Manage admin roles

John selected

Admin roles give users permission to view data and complete tasks in admin centers. Give users only the access they need by assigning the least-permissive role.

[Learn more about admin roles](#)

User (no admin center access)

Admin center access

Global readers have read-only access to admin centers, while Global admins have unlimited access to edit all settings. Users assigned other roles are more limited in what they can see and do.

- Global Reader ⓘ
- AI Administrator ⓘ
- Exchange Administrator ⓘ
- Global Administrator ⓘ
- Helpdesk Administrator ⓘ
- Service Support Administrator ⓘ
- SharePoint Administrator ⓘ
- User Administrator ⓘ
- User Experience Success Manager ⓘ

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

John can [answer choice].

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The correct answer is View all the users in the Microsoft Entra tenant. In the exhibit, John is assigned the Global Reader role. Microsoft documents that the Global Reader role is intended for users who need to view administrator features and settings in admin centers that a Global Administrator can view, but without edit permissions. That makes it appropriate for read-only visibility into tenant-wide directory and admin information, including users in Microsoft Entra. The other answer choices are not supported by the Global Reader role. Microsoft distinguishes admin-center visibility from access to content in workloads such as SharePoint sites and Exchange mailboxes. Global Reader is a read-only administrative role, not a content access role for reading all documents or mailbox items. Likewise, performing eDiscovery of Microsoft 365 Copilot prompts requires Purview eDiscovery permissions or role group membership, not merely the Global Reader role. Microsoft documents eDiscovery permissions separately in Purview role groups. Therefore, based on the assigned role shown, the valid completion is that John can view all the users in the Microsoft Entra tenant.

NEW QUESTION 51

Your company has a Microsoft SharePoint site named Site1. Site1 contains all the policies of the company's HR department. The policies are saved as Microsoft Word documents. All users have read access to Site1. The HR department manager reports that user requests about the policies are NOT being addressed in a timely manner, especially around major holidays. You need to recommend a solution to enable the users to find the HR department policies. The solution must provide the users with a list of common queries and ensure that responses are grounded only in Site1. What should you include in the recommendation?

- A. the personal assistant in Copilot in Word
- B. a Microsoft 365 Copilot notebook
- C. a custom Microsoft 365 Copilot agent
- D. the Researcher agent in Microsoft 365 Copilot

Answer: C

NEW QUESTION 54

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

_____ is a unified enterprise suite that coordinates detection, prevention, investigation, applications to provide integrated protection against sophisticated attacks.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Microsoft Defender XDR
 Microsoft Entra Conditional Access
 Microsoft Entra ID Protection
 Microsoft Purview

is a unified enterprise suite that coordinates detection, prevention, investigation, applications to provide integrated protection against sophisticated attacks.

NEW QUESTION 55

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
Microsoft Purview Communications Compliance can detect offensive text in images stored in Microsoft SharePoint sites.	<input type="radio"/>	<input type="radio"/>
Microsoft Purview Communications Compliance anonymizes user identities by default during investigations.	<input type="radio"/>	<input type="radio"/>
Microsoft Purview Communications Compliance adds a disclaimer to all monitored communications.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area
