NEW QUESTION 10

Your company has a written compliance policy that requires all emails be retained for seven years, and then permanently deleted. Which Microsoft Purview solution should you use?

- A. Information Protection

- B. Insider Risk Management
- C. Data Loss Prevention
- D. Data Lifecycle Management

Answer: D

Explanation:

The correct answer is D. Data Lifecycle Management. Microsoft Learn states that Microsoft Purview retention policies and retention labels, managed under Data Lifecycle Management, support three core outcomes: retain-only, delete-only, and retain and then delete. The requirement in this question is exact: keep email for seven years and then permanently delete it. That is a textbook retain and then delete retention configuration, which Microsoft documents as part of Purview's retention capabilities. Microsoft also recommends using Microsoft 365 retention policies and labels for retaining and deleting emails rather than relying on older Exchange-only approaches in most modern compliance scenarios. The other options do not meet the requirement. Information Protection focuses on labeling and protecting sensitive information. Insider Risk Management is used to detect and investigate risky user behavior. Data Loss Prevention helps prevent inappropriate sharing or exfiltration of sensitive data. None of those are designed to enforce a timed seven-year retention period followed by automatic permanent deletion. The Microsoft Purview solution explicitly built for that lifecycle requirement is Data Lifecycle Management.

NEW QUESTION 24

HOTSPOT

Your organization has a Microsoft 365 subscription.

A user named John is assigned an admin role as shown in the following exhibit.

Manage admin roles

John selected

Admin roles give users permission to view data and complete tasks in admin centers. Give users only the access they need by assigning the least-permissive role.

[Learn more about admin roles](#)

☐ User (no admin center access)

☒ Admin center access

Global readers have read-only access to admin centers, while Global admins have unlimited access to edit all settings. Users assigned other roles are more limited in what they can see and do.

☒ Global Reader ⓘ

☐ AI Administrator ⓘ

☐ Exchange Administrator ⓘ

☐ Global Administrator ⓘ

☐ Helpdesk Administrator ⓘ

☐ Service Support Administrator ⓘ

☐ SharePoint Administrator ⓘ

☐ User Administrator ⓘ

☐ User Experience Success Manager ⓘ

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

John can [answer choice].

View all the users in the Microsoft Entra tenant

view all the content in Microsoft SharePoint sites

read all the content in Microsoft Exchange mailboxes

perform eDiscovery of Microsoft 365 Copilot prompts

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The correct answer is View all the users in the Microsoft Entra tenant. In the exhibit, John is assigned the Global Reader role. Microsoft documents that the Global Reader role is intended for users who need to view administrator features and settings in admin centers that a Global Administrator can view, but without edit permissions. That makes it appropriate for read-only visibility into tenant-wide directory and admin information, including users in Microsoft Entra. The other answer choices are not supported by the Global Reader role. Microsoft distinguishes admin-center visibility from access to content in workloads such as SharePoint sites and Exchange mailboxes. Global Reader is a read-only administrative role, not a content access role for reading all documents or mailbox items. Likewise, performing eDiscovery of Microsoft 365 Copilot prompts requires Purview eDiscovery permissions or role group membership, not merely the Global Reader role. Microsoft documents eDiscovery permissions separately in Purview role groups. Therefore, based on the assigned role shown, the valid completion is that John can view all the users in the Microsoft Entra tenant.

NEW QUESTION 25

Your company has a Microsoft SharePoint site named Site1. Site1 contains all the policies of the company's HR department. The policies are saved as Microsoft Word documents.

All users have read access to Site1.

The HR department manager reports that user requests about the policies are NOT being addressed in a timely manner, especially around major holidays.

You need to recommend a solution to enable the users to find the HR department policies. The solution must provide the users with a list of common queries and ensure that responses are grounded only in Site1. What should you include in the recommendation?

- A. the personal assistant in Copilot in Word
- B. a Microsoft 365 Copilot notebook
