Exam Questions AB-900

Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

NEW QUESTION 1

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	☐	☐
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	☐	☐
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	☒	☐
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	☒	☐
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	☐	☒

NEW QUESTION 2

You need to identify files and emails that contain social security numbers (SSNs) and credit card numbers. What should you use in the Microsoft Purview portal?

- A. Information Protection reports
- B. Data explorer
- C. Information Protection policies
- D. Activity explorer

Answer: B

Explanation:

The correct answer is B. Data explorer. Microsoft Learn states that Data explorer in Microsoft Purview shows a current snapshot of items that have been classified as a sensitive information type in your organization. Microsoft's sensitive information type documentation specifically lists examples such as social security numbers and credit card numbers, which means Data explorer is the appropriate portal feature for identifying files and emails that contain those data types. Data explorer is designed to help administrators see where sensitive data exists across supported Microsoft 365 locations. The other options are less appropriate for this task. Information Protection reports focus more broadly on label and protection reporting. Information Protection policies are for configuring classification and protection behavior, not for finding existing files and emails containing SSNs or credit card numbers. Activity explorer is primarily used to review user and policy-related activities, such as label changes or DLP events, rather than to provide the direct sensitive-data inventory view requested here. Since the question asks to identify the files and emails containing specific sensitive information types, Microsoft's documented answer is Data explorer.

NEW QUESTION 3

FILL IN THE BLANK

Select the answer that correctly completes the sentence.

Answer Area

You can use the Microsoft Purview solution to find all the content that relates to the term "Project Falcon" in the emails exchanged by two users.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
eDiscovery

NEW QUESTION 4

What can you use to block a user account automatically when a risky sign-in is detected?

- A. Microsoft Entra ID Protection
- B. Microsoft Defender for Office 365
- C. Microsoft Entra Privileged Identity Management (PIM)
- D. Microsoft Defender for Identity

Answer: A

NEW QUESTION 5

Your organization has a Microsoft 365 subscription.
You need to evaluate your organization??s Identity Secure Score.
Which two factors affect the score? Each correct answer presents a complete the solution. NOTE: Each correct selection is worth one point.

- A. the SharePoint site permissions
- B. the number of global administrators
- C. passwords that are never expired
- D. the location of the users

Answer: BC

NEW QUESTION 6

HOTSPOT
Select the answer that correctly completes the sentence.

Answer Area		
Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	☐	☐
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	☐	☐
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	☐	☒
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	☐	☒
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	☒	☐

NEW QUESTION 7

Your company has a written compliance policy that requires all emails be retained for seven years, and then permanently deleted. Which Microsoft Purview solution should you use?

- A. Information Protection
- B. Insider Risk Management
- C. Data Loss Prevention
- D. Data Lifecycle Management

Answer: D

Explanation:

The correct answer is D. Data Lifecycle Management. Microsoft Learn states that Microsoft Purview retention policies and retention labels, managed under Data Lifecycle Management, support three core outcomes: retain-only, delete-only, and retain and then delete. The requirement in this question is exact: keep email for seven years and then permanently delete it. That is a textbook retain and then delete retention configuration, which Microsoft documents as part of Purview's retention capabilities. Microsoft also recommends using Microsoft 365 retention policies and labels for retaining and deleting emails rather than relying on older Exchange-only approaches in most modern compliance scenarios. The other options do not meet the requirement. Information Protection focuses on labeling and protecting sensitive information. Insider Risk Management is used to detect and investigate risky user behavior. Data Loss Prevention helps prevent inappropriate sharing or exfiltration of sensitive data. None of those are designed to enforce a timed seven-year retention period followed by automatic permanent deletion. The Microsoft Purview solution explicitly built for that lifecycle requirement is Data Lifecycle Management.

NEW QUESTION 8

Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

- A. an auto-labeling policy
- B. a trainable classifier
- C. a retention label policy
- D. a sensitivity label policy

Answer: D

Explanation:

The correct answer is D. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself does not make it available to users. Microsoft Learn states that after you create sensitivity labels, you must publish them by creating a label policy so that users and groups can see and apply those labels in Microsoft 365 apps and services. Publishing controls which labels are available and to whom they are shown. This is why a sensitivity label policy is required to ensure that users can apply Label1 to files. The other options do not meet the requirement. Auto-labeling policies apply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. A trainable classifier is used to identify content categories, not to publish a label. A retention label policy publishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using a sensitivity label policy.

NEW QUESTION 9

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	☐	☐
Zero Trust is a security strategy, NOT a specific product.	☐	☐
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	☐	☐

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	☐	☒
Zero Trust is a security strategy, NOT a specific product.	☒	☐
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	☐	☒

NEW QUESTION 10

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

From the SharePoint admin center, you can create a

server.
user.
site.
role.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

From the SharePoint admin center, you can create a

server.
user.
site. |
role.

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
Microsoft Purview Communications Compliance can detect offensive text in images stored in Microsoft SharePoint sites.	☐	☐
Microsoft Purview Communications Compliance anonymizes user identities by default during investigations.	☐	☐
Microsoft Purview Communications Compliance adds a disclaimer to all monitored communications.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Purview Communications Compliance can detect offensive text in images stored in Microsoft SharePoint sites.	☒	☐
Microsoft Purview Communications Compliance anonymizes user identities by default during investigations.	☒	☐
Microsoft Purview Communications Compliance adds a disclaimer to all monitored communications.	☐	☒

NEW QUESTION 15

HOTSPOT

Your company uses Microsoft 365 Copilot pay-as-you-go billing.
The company wants greater visibility into Copilot usage costs and the ability to forecast departmental spending.
You need to ensure that you can see Copilot costs by department.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Portal:

The Microsoft 365 admin center

The Microsoft Entra admin center

The Microsoft Purview portal

Feature:

An auto-claim policy

A billing policy

A Copilot connector

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Portal:

The Microsoft 365 admin center

The Microsoft Entra admin center

The Microsoft Purview portal

Feature:

An auto-claim policy

A billing policy

A Copilot connector

NEW QUESTION 18

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

In Microsoft 365 Copilot, you should use

a notebook

Chat

the Analyst agent

the Researcher agent

to perform multi-step reasoning over unstructured data.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

In Microsoft 365 Copilot, you should use

to perform multi-step reasoning over unstructured data.

NEW QUESTION 22

HOTSPOT

Select the answer that correctly completes the sentence.

The Microsoft responsible AI principle of

requires the oversight of AI systems to ensure that humans remain in control.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The Microsoft responsible AI principle of

requires the oversight of AI systems to ensure that humans remain in control.
