

## 70-735 Dumps

### OEM Manufacturing and Deployment for Windows 10

<https://www.certleader.com/70-735-dumps.html>

#### NEW QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a new image of Windows 10 that contains a push-button reset solution. You need to test whether push-button reset works as expected.

Solution: You start the computer from the installation media for Windows 10. You click Troubleshoot, you click System Restore, you click the Windows 10 installation, and then you restore a system restore point.

Does this meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:** References:

<https://support.microsoft.com/en-us/help/12415/windows-10-recovery-options> <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/push-button-resetoverview>

#### NEW QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a new image of Windows 10 that contains a push-button reset solution. You need to test whether push-button reset works as expected.

Solution: From Windows 10, you open the Settings app, you click Update & security, and then you click Recovery. From Reset this PC, you click Get Started.

Does this meet the goal?

A. Yes

B. No

**Answer: A**

**Explanation:** References:

<https://support.microsoft.com/en-us/help/12415/windows-10-recovery-options> <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/push-button-resetoverview>

#### NEW QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You copy all the updates to the same folder. You run `dism.exe/Add-Package` once and specify the `/PackagePath` parameter once.

Does this meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-or-removepackages-offline-using-dism>

#### NEW QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition. Solution: You create a primary partition of 250 MB that uses the NTFS file system. Does this meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:** This partition must be at least 300 MB References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefigptbased-hard-drive-partitions>

#### NEW QUESTION 5

You plan to create an image of Windows 10 that contains a push-button reset solution. The solution will have custom settings for each edition of Windows 10.

You need to prepare the push-button reset solution. What should you include in the solution?

- A. an unattended file and a bare metal recovery configuration
- B. an unattended file and extensibility scripts
- C. extensibility scripts and system restore points
- D. a bare metal recovery configuration and Scanstate packages

**Answer:** B

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-a-script-to-pushbutton-reset-features>

**NEW QUESTION 6**

HOTSPOT

You have a reference computer that runs Windows 10. The computer contains a provisioning package named Package1.ppkg. Package1.ppkg is located in C:\Packages\.

You plan to create an image of the reference computer.

You run sysprep.exe on the computer, and then you start the computer by using Windows Preinstallation Environment (Windows PE).

You need to ensure that the image uses the least amount of disk space possible.

How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

dism.exe

- /Add-ProvisioningPackage
- /Append-Image
- /Apply-CustomDataImage

- /Compact
- /SingleInstance
- /Verify
- /WIMBoot

:C:\packages\package1.ppkg/ImagePath:C:\

- /ApplyDrive
- /Configfile
- /Confirmtrustedfile
- /CustomDataImage
- /Skipplatformcheck

**Answer:**

**Explanation:** Answer Area

dism.exe

- /Add-ProvisioningPackage
- /Append-Image
- /Apply-CustomDataImage

- /Compact
- /SingleInstance
- /Verify
- /WIMBoot

:C:\packages\package1.ppkg/ImagePath:C:\

- /ApplyDrive
- /Configfile
- /Confirmtrustedfile
- /CustomDataImage
- /Skipplatformcheck

**NEW QUESTION 7**

HOTSPOT

You extract an image of Windows 10 in audit mode to a computer named Computer1. You install an application named App1 on Computer1.

You need to create a siloed provisioning package of App1.

How should you create the package? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Tool to use to create the siloed provisioning package:

File extension to use for the siloed provisioning package:

**Answer:**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-desktop-appswith-spps-sxs>

**NEW QUESTION 8**

You have a computer named Computer1.

You deploy an image of Windows 10 to Computer1. You start Computer1 in audit mode, and then you install several device drivers.

You need to capture an image of Computer1. Which tool should you use?

- A. Windows System Image Manager (Windows SIM)
- B. dism.exe
- C. Express Deployment Tool (EDT) for Windows 10
- D. scanstate.exe

**Answer: B**

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/prepare-a-snapshot-of-the-pc-generalize-and-capture-windows-images-blue-sxs>

**NEW QUESTION 9**

DRAG DROP

You are creating an image of Windows 10 for a new model of computers that will have Microsoft Office 2016 installed.

You install the Office Deployment Tool.

You need to install Office 2016. The solution must install Microsoft Word and Excel without installing any other Office applications.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Run setup.exe and specify the /packager parameter.	
Create a Configuration.xml file.	
Run setup.exe and specify the /configure parameter.	
Run setup.exe and specify the /download parameter.	
Create an Install.json file.	

**Answer:**

**Explanation:**

References:

<https://support.office.com/en-us/article/Overview-of-the-Office-2016-Deployment-Tool-bb5b62d9-1168-47e9-9d54-15a958acfcca?ui=en-US&rs=en-US&ad=US>

**NEW QUESTION 10**

You have a computer that runs Windows 10. The computer starts in UEFI mode and has a 64-bit processor.

You insert a USB key in the computer. The USB key has a drive letter of F.

You need to ensure that you can start the computer by using Windows Preinstallation Environment (Windows PE) from the USB key.

Which two commands should you run? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. makewinpemedia.cmd /UFD C:\WinPe F:
- B. makewinpemedia.cmd /ISO C:\WinPe F:
- C. copy.cmd amd64 C:\WinPe
- D. dism.exe /Export-Image/SourceImageFile:C:\WinPE\boot.wim/SourceIndex:1/DestinationImageFile:F:\boot.wim
- E. copy.cmd x86 C:\WinPe

**Answer: AE**

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-create-usbbootable-drive>

**NEW QUESTION 10**

You are preparing a push-button reset solution.

You extract a Windows Recovery Environment (Windows RE) boot image from an image of Windows 10.

You plan to use scanstate.exe to capture several Windows desktop applications.

Which two folders from the Windows Assessment and Deployment Kit (Windows ADK) should you include in the Windows CK build environment?

- A. User State Migration Tool (USMT) and Windows Preinstallation Environment
- B. Windows Preinstallation Environment and Common
- C. User State Migration Tool (USMT) and Windows Setup
- D. Windows Setup and Deployment Tools

**Answer:** C

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/deploy-push-buttonreset-features>

**NEW QUESTION 15**

**HOTSPOT**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
You can add up to five custom tools to the Boot Options menu of Windows Recovery Environment (Windows RE).	<input type="radio"/>	<input type="radio"/>
You must copy files for a custom recovery tool that appears on the Boot Options menu of Windows Recovery Environment (Windows RE) to the \Sources\Recovery\Tools folder in the Windows RE image.	<input type="radio"/>	<input type="radio"/>
To ensure that a custom recovery tool appears on the Boot Options menu of Windows Recovery Environment (Windows RE), you must create a file named Autounattend.xml in the root of the Windows RE image.	<input type="radio"/>	<input type="radio"/>

**Answer:**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-a-custom-tool-to-the-windows-re-boot-options-menu>

**NEW QUESTION 19**

You have an image of Windows 10 that runs the Windows 10 Anniversary Update. You plan to deploy the image to several new computers.

You add Microsoft Office 2016 to the image.

You need to ensure that when the image is deployed, users will see the Office 2016 tiles on the Start menu as shown in the exhibit. (Click the Exhibit tab.)

What should you do?

- A. Create a LayoutModification.xml file and save the file in the C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\ folder.
- B. Modify the DefaultLayouts.xml file and save the file in the C:\Users\Default\AppData\Local\Microsoft\WindowsApps\ folder.
- C. Modify the DefaultLayouts.xml file and save the file in the C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\ folder.
- D. Create a LayoutModification.xml file and save the file in the C:\Users\Default\AppData\Local\Microsoft\WindowsApps\ folder.

**Answer:** A

**NEW QUESTION 23**

You have a computer named Computer1 that runs Windows 10.

On Computer1, you have a DVD that contains the installation source files of Windows 10 Pro. You open Windows System Image Manager as shown in the exhibit. (Click the Exhibit tab.)

You need to configure the answer file for Windows 10 by using Windows System Image Manager (Windows SIM). What should you do first?

- A. Copy the installation files for Windows 10 to a hard disk.
- B. Create a catalog file (.clg).
- C. Select a distribution share.
- D. Select an image of Windows 10.

**Answer:** A

**Explanation:** References:

[https://technet.microsoft.com/en-us/library/cc749317\(v=ws.10\).aspx](https://technet.microsoft.com/en-us/library/cc749317(v=ws.10).aspx)

**NEW QUESTION 28**

You deploy an image of Windows 10 to several computers by using an answer file. The answer file contains the following information.

```
<OEMInformation>
  <Manufacturer>Fabrikam, Inc.</Manufacturer>
  <SupportHours>8 AM - 8 PM (CST) Monday - Friday</SupportHours>
  <SupportPhone>1-800-555-1212</SupportPhone>
  <SupportURL>HTTP://SUPPORT.FABRIKAM.COM</SupportURL>
  <Logo>%windir%\system32\oobe\info\fabrikam.bmp</Logo>
</OEMInformation>
```

You need to verify whether the support information is displayed in Windows. What should you do?

- A. From the Start menu, open Msconfig.
- B. From the Settings app, click System, and then click About.
- C. From the Start menu, open Msinfo32.
- D. From Control Panel, open System

**Answer:** D

**Explanation:** This is a tricky question. The support information is displayed in two places as defined in answers B and D. However, the logo will only be displayed in the System Control Panel applet.

**NEW QUESTION 30**

**HOTSPOT**

You plan to deploy an image of Windows 10 to several computers by using an answer file.

You need to identify which configuration pass you must use to configure each of the following settings: Manufacturer in the Microsoft-Windows-Shell-Setup component.

UILanguage in the Microsoft-Windows-International-Core component

Which configuration pass should you use for each setting? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

**Manufacturer:**  ▼  
 AuditSystem  
 Specialize  
 WindowsPE

**UILanguage:**  ▼  
 Generalize  
 OobeSystem  
 WindowsPE

**Answer:**

**Explanation:** Answer Area

**Manufacturer:**  ▼  
 AuditSystem  
Specialize  
 WindowsPE

**UILanguage:**  ▼  
 Generalize  
OobeSystem  
 WindowsPE

**NEW QUESTION 33**

This question requires that you evaluate the underlined text to determine if it is correct.

To provide the default product key for OEM activation, you create an answer file by using Windows System Image Manager (Windows SIM), and you add the Microsoft-Windows-Shell-Setup component and the ProductKey component to the generalize pass.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. auditSystem pass
- C. specialize pass
- D. windowsPE pass

**Answer:** C

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/unattend/microsoft-windows-shell-setup-productkey>

**NEW QUESTION 37**

You have a server named Server1 that runs Windows Server 2016. Server1 is located on a network that is disconnected from the Internet.

You have a computer named Computer1 that runs Windows 10.

You download the Windows Assessment and Deployment Kit (Windows ADK) setup on Computer1. You need to create an installation source on a USB drive that can be used to install Windows ADK on Server1.

Which installation option should you use when you run the Windows ADK setup on Computer1?

- A. /list
- B. /layout
- C. /ceip
- D. /features
- E. /installpath

**Answer:** B

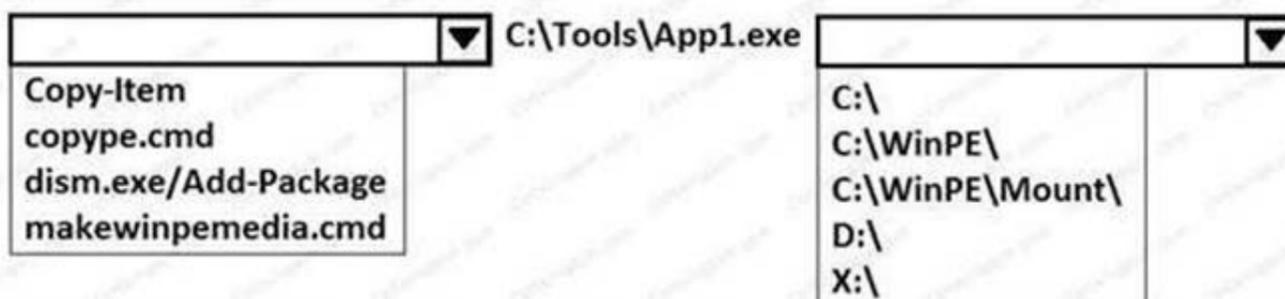

**Explanation:** References:  
<https://technet.microsoft.com/en-gb/library/dn621908.aspx>

**NEW QUESTION 40**

HOTSPOT

You are building a Windows Preinstallation Environment (Windows PE) image on a computer named Computer1. You have an executable file named App1.exe in the C:\Tools\ folder. App1.exe is a command line tool that can be run in Windows PE. You run the following commands on Computer1. copyype.cmd amd64 C:\WinPE  
dism.exe /Mount- Image /ImageFile:c:\WinPE\media\sources\boot.wim/index:1 /MountDir:C:\WinPE\Mount  
You need to ensure that you can run App1.exe from Windows PE. App1.exe must be in the root of X: when Windows PE starts. Which command should you run? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

**Answer:**

**Explanation:** References:  
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-mount-andcustomize>

**NEW QUESTION 42**

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
You can install a language interface pack for Windows 10 Version 1511 on Windows 10 Version 1607.	<input type="radio"/>	<input type="radio"/>
You can install a language interface pack for Windows 10 Version 1607 on Windows 10 Version 1511.	<input type="radio"/>	<input type="radio"/>
A language interface pack is dependent on a parent language pack.	<input type="radio"/>	<input type="radio"/>

**Answer:**

**Explanation:** References:  
<https://dpcenter.microsoft.com/en/Windows/Build/cc-windows-10-v1607-Language-Interface-Packs> <https://technet.microsoft.com/en-us/windows/release-info.aspx>

**NEW QUESTION 45**

You have an image of Windows 10. You obtain a feature update for Windows 10. You need to include the feature update in the image. The solution must minimize the size of the image. What should you do?

- A. Mount the imag
- B. Run dism.exe /Add-Package, and then run dism.exe /Optimize-Imag
- C. Unmount the image.
- D. Deploy the image to a compute
- E. Install the feature updat
- F. Optimize the drive, and then capture the image.
- G. Download the new installation media for Windows 10. Install Windows 10 on a computer, and then capture the image.
- H. Mount the imag
- I. Run dism.exe /Add-Package, and then run dism.exe /Cleanup-Wi
- J. Unmount the image.

**Answer:** C

**NEW QUESTION 47**

**DRAG DROP**

You need to add drivers to an offline image of Windows 10 by using an answer file.

How should you complete the answer file? To answer, drag the appropriate values to the correct locations. Each value may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Values	Answer Area
OfflineServicing	<pre>&lt;?xml version="1.0"?&gt;&lt;unattend xmlns="urn:schemas-microsoft-com:asm.v3" xmlns:wcm="http://schemas.microsoft.com/WMIConfig/2002/State"&gt; &lt;settings pass="Value"&gt; &lt;component name="Value" processorArchitecture = "amd64" publicKeyToken="31bf385ad364e35" language="neutral" versionScope="nonSxS" &lt;DriverPaths&gt; &lt;PathAndCredentials wcm:keyValue="1"&gt; &lt;Path&gt;\\server\share\drivers&lt;/Path&gt; &lt;Credentials&gt; &lt;Domain&gt;Fabrikam&lt;/Domain&gt; &lt;Username&gt;MyUserName&lt;/Username&gt;</pre>
Microsoft-Windows-Shell-Setup	
WindowsPe	
Microsoft-Windows-FnpCustomizationsNonWinPE	

**Answer:**

**Explanation:**

Values	Answer Area
OfflineServicing	<pre>&lt;?xml version="1.0"?&gt;&lt;unattend xmlns="urn:schemas-microsoft-com:asm.v3" xmlns:wcm="http://schemas.microsoft.com/WMIConfig/2002/State"&gt; &lt;settings pass="OfflineServicing"&gt; &lt;component name="Microsoft-Windows- FnpCustomizationsNonWinPE" processorArchitecture = "amd64" publicKeyToken="31bf385ad364e35" language="neutral" versionScope="nonSxS" &lt;DriverPaths&gt; &lt;PathAndCredentials wcm:keyValue="1"&gt; &lt;Path&gt;\\server\share\drivers&lt;/Path&gt; &lt;Credentials&gt; &lt;Domain&gt;Fabrikam&lt;/Domain&gt; &lt;Username&gt;MyUserName&lt;/Username&gt;</pre>
Microsoft-Windows-Shell-Setup	
WindowsPe	
Microsoft-Windows-FnpCustomizationsNonWinPE	

**NEW QUESTION 51**

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You create the working directories for the customization of a Windows Preinstallation Environment (Windows PE) image.

You need to add scripting support to Windows PE. What should you do first?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

**Answer: B**

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-addingpowershell-support-to-windows-pe>

**NEW QUESTION 53**

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You are building a new image of Windows 10.

You need to specify how the hard disk will be partitioned during the Windows 10 installation. What should you do?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

**Answer: D**

**NEW QUESTION 58**

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You install Windows 10 on several devices.

You need to add a trusted root certificate to the devices. You must achieve the goal without reinstalling Windows 10.

What should you do?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

**Answer:** F

#### NEW QUESTION 62

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You are building a new image of Windows 10.

You copy the installation media for Windows 10 to Computer1. You need to add drivers to the Windows 10 image.

What should you do first?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

**Answer:** A

#### NEW QUESTION 65

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You have an image of Windows 10 that you plan to deploy to a new computer. You need to add the latest cumulative updates to the image.

Which parameter should you specify when you run dism.exe?

- A. /Add-Capability
- B. /Add-Driver
- C. /Add-Package
- D. /Add-ProvisionedAppxPackage
- E. /Apply-CustomDataImage
- F. /Apply-Image
- G. /Apply-Unattend
- H. /Export-Image

**Answer:** C

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/servicing-the-imagewith-windows-updates-sxs>

#### NEW QUESTION 66

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You have an image of Windows 10 that you plan to deploy to a new computer. You need to apply a Universal Windows Platform (UWP) app to the image. Which parameter should you specify when you run dism.exe?

- A. /Add-Capability
- B. /Add-Driver
- C. /Add-Package
- D. /Add-ProvisionedAppxPackage
- E. /Apply-CustomDataImage
- F. /Apply-Image
- G. /Apply-Unattend
- H. /Export-Image

**Answer:** D

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-universal-apps-sxs>

#### NEW QUESTION 69

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You have an image of Windows 10 that contains a recovery image. You modify the recovery image.

You need to remove all the unnecessary resource files from the recovery image. Which parameter should you specify when you run dism.exe?

- A. /Add-Capability
- B. /Add-Driver
- C. /Add-Package
- D. /Add-ProvisionedAppxPackage
- E. /Apply-CustomDataImage
- F. /Apply-Image
- G. /Apply-Unattend
- H. /Export-Image

**Answer:** H

**NEW QUESTION 73**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition.

Solution: You create an EFI system partition of 120 MB that uses the FAT32 file system. Does this meet the goal?

- A. Yes
- B. NO

**Answer:** B

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefigptbased-hard-drive-partitions>

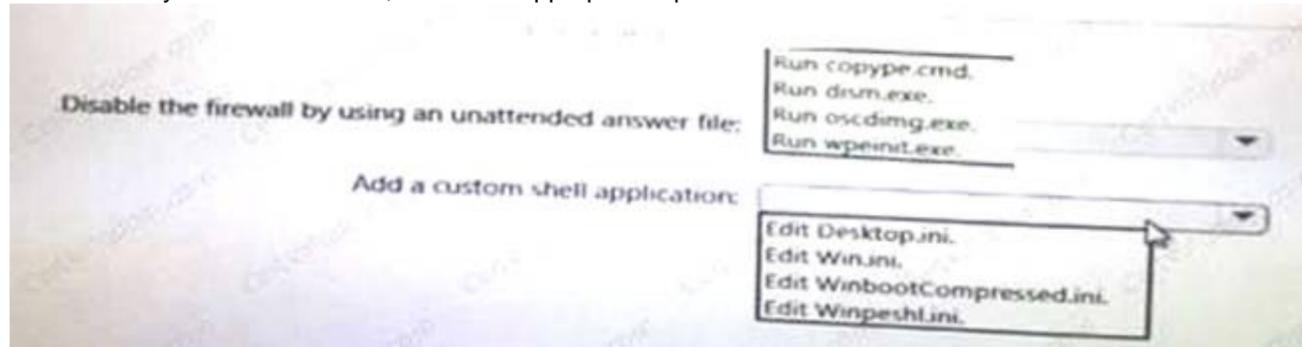

**NEW QUESTION 75**

HOTSPOT

You are building a Windows Pre installation Environment (Windows PE) image. You need to perform the following actions:

- Disable the firewall by using an unattended answer file.
- Add a custom shell application.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

**Explanation:** Disable the firewall by using an unattended answer file = Run Wpeinit.exe

Add a custom shell application = Winpeshl.ini file [https://technet.microsoft.com/en-us/windows/dn938390\(v=vs.60\)](https://technet.microsoft.com/en-us/windows/dn938390(v=vs.60))

**NEW QUESTION 80**

You have a computer named Computer1. Computer 1 has a folder named Folder1. Folder 1 contains the following files:

- Drv2.dll
- File2.sys
- File2.doc
- File1.mp3
- Data2.zip
- Data1.cab

You create a DISM configuration tile named Config1.ini that contains the following information.

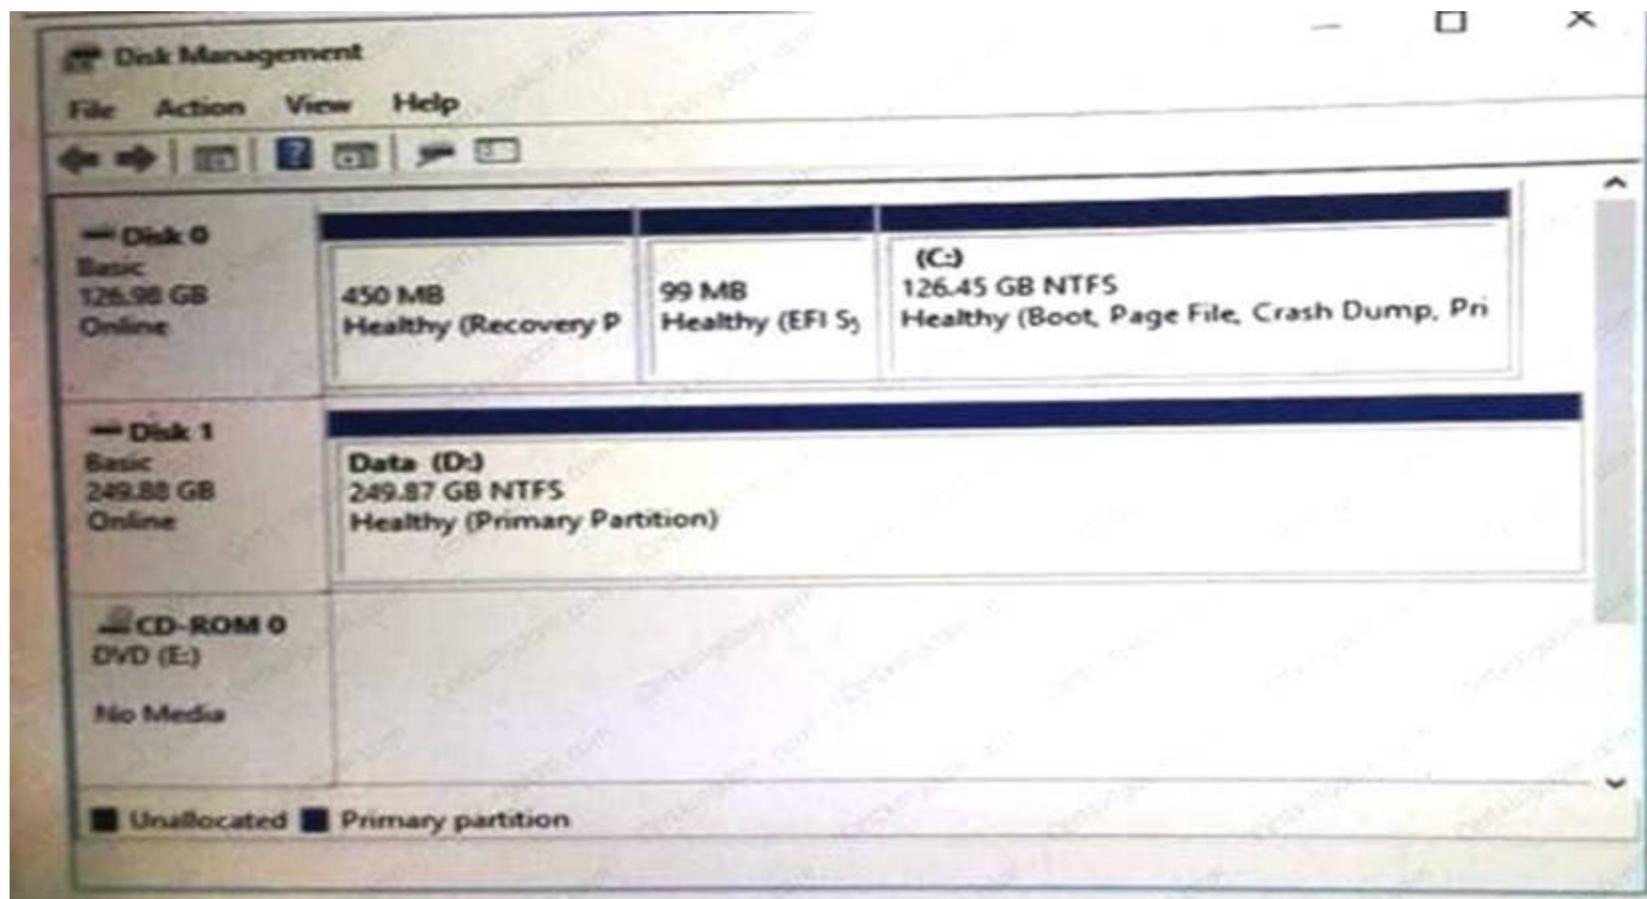

- A. File2.sys
- B. File2.doc
- C. File1.mp3
- D. Data2.zip
- E. Drv2.dll

**Answer:** A

**NEW QUESTION 81**

HOTSPOT

Exhibit:

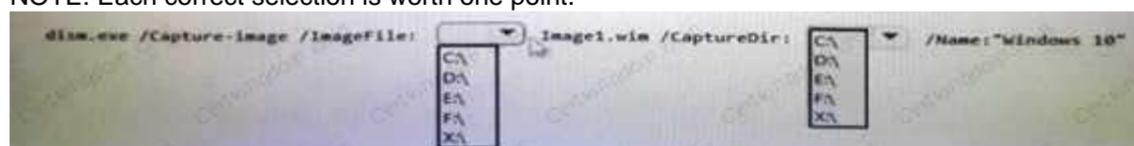

You have a computer named Computer 1 that runs Windows 10.

You open Disk Management on Computer 1 as shown in the exhibit. (Click the Exhibit tab.)

You start Windows Pre installation Environment (Windows PE) on Computer 1 by using PXE. You need to capture the Windows installation to the data partition on Disk 1.

Which command should you run from Windows PE? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

**Explanation:** Dism.exe /capture-image /ImageFile: C:\ Image.wim /CaptureDir: C:\ /Name: "Windows 10"
