

70-339 Dumps

Managing Microsoft SharePoint Server 2016

<https://www.certleader.com/70-339-dumps.html>

NEW QUESTION 1

- (Exam Topic 1)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the SharePoint administrator for a company.

The SharePoint environment is causing excessive information to be recorded in the diagnostic logs.

You need to configure the SharePoint farm to only write events to the Windows event log that are equal to or more severe than the Error level.

You run the following Windows PowerShell command: Start-SPDiagnosticsSession -TraceLevel High

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 2

- (Exam Topic 1)

You manage the SharePoint2016 environment for a multinational company with 195 offices in 57 different regions. Each department in the company has its own site collection. Business users have Contribute access to their own department sites and Read access to all other department sites.

You have the following requirements:

- Maintain a standardized list of office locations across all departments.
- Track the office location as metadata for contract documents that are stored in each of the departmental site collections.
- Business users must be able to add new office locations directly when they save new files to SharePoint.
- When a user adds a new office location, the location information must be accessible to all users for use on other documents.

You need to configure SharePoint to track office location for contract documents.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Configure the column to allow multiple values.	
Create a managed Metadata site column based on the Term Set.	
Configure the Column to allow any value.	
Import the office locations to a custom list and grant edit access to all users.	✓
Import the office locations list to the Term Store and set the value of the term Set to Closed.	⏪
Import the office locations list to the Term Store and set the value of the Term Set to Open.	✓
Configure the column to display a drop-down list.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
Configure the column to allow multiple values.	Import the office locations list to the Term Store and set the value of the Term Set to Open.
Create a managed Metadata site column based on the Term Set.	Create a managed Metadata site column based on the Term Set.
Configure the Column to allow any value.	Configure the Column to allow any value.
Import the office locations to a custom list and grant edit access to all users.	<input checked="" type="radio"/>
Import the office locations list to the Term Store and set the value of the term Set to Closed.	<input type="radio"/>
Import the office locations list to the Term Store and set the value of the Term Set to Open.	<input checked="" type="radio"/>
Configure the column to display a drop-down list.	<input type="radio"/>

NEW QUESTION 3

- (Exam Topic 1)

You are the SharePoint administrator for Contoso. You are establishing a disaster recovery (DR) location for the SharePoint farm. You plan to create service application databases for the DR environment that are configured to use read-only mode.

You need to add the service applications to the passive farm.

For each service application, which option should you implement? To answer, select the appropriate option from each list in the answer area.

Service Application	Option
User Profile	<input checked="" type="radio"/> <p>Failover SQL Server to the DR environment Grant the DR farm read and write access to the primary SQL Server Create a new database in the failover farm</p>
Managed metadata	<input checked="" type="radio"/> <p>Failover SQL Server to the DR environment Grant the DR farm read and write access to the primary SQL Server Create a new database in the failover farm</p>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Service Application	Option
User Profile	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; border-bottom: 1px dashed black; margin-bottom: 5px;">▼</div> <p>Failover SQL Server to the DR environment Grant the DR farm read and write access to the primary SQL Server Create a new database in the failover farm</p> </div>
Managed metadata	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; border-bottom: 1px dashed black; margin-bottom: 5px;">▼</div> <p>Failover SQL Server to the DR environment Grant the DR farm read and write access to the primary SQL Server Create a new database in the failover farm</p> </div>

NEW QUESTION 4

- (Exam Topic 1)

You manage a SharePoint environment for a company. The file size for the tempdb database is set to 500 megabytes (MB).

You observe an increase in the consumption of system disk space by the tempdb database. You need to minimize the space requirements and optimize the performance of the tempdb database.

You need to optimize the performance for the tempdb database.

How should you configure the database? To answer, select the appropriate option from each list in the answer area.

Recovery model	File growth increment
<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; border-bottom: 1px dashed black; margin-bottom: 5px;">▼</div> <p>full bulk-logged simple</p> </div>	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; border-bottom: 1px dashed black; margin-bottom: 5px;">▼</div> <p>20 Megabytes (MB) 10 percent</p> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Simple TempDB Optimization

First, the TempDB recovery model should be set to simple. Indeed, this model automatically reclaims log space to keep space requirements small.

Box 2: 20 Megabytes (MB)

With 20 MB increments the TempDB will remain smaller. References:

NEW QUESTION 5

- (Exam Topic 1)

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.

Once you answer a question in this section you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution.

You must store all personal sites in Office 365.

You create App Management service, Managed Metadata service, and User Profile service applications. You create a web application and site collection for the My Site Host. You grant users the Create Personal Site and Follow People and Edit Profile permissions. Then, you create an audience for the users that will be redirected to Office 365. In the SharePoint Central Administration, you configure hybrid OneDrive for Business settings.

Does this solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 6

- (Exam Topic 1)

You manage the term store for a company's on-premises SharePoint farm. You plan to replicate the production environment term store to a development environment.

When you attempt to export the term store from the production environment, you receive the following error message:

You do not have permission to use the bulk load statement. You need to complete the import of the term store.

What should you do?

- A. Add the SharePoint farm administrator account to the SQL Server security administrator role.
- B. Grant the FullControl permissions to the farm administrator account for the \\MyShared_location\MMS folder.
- C. Use an account that has the SQL administrator role assigned to it to perform the task.
- D. Add the MMS Service account to the SQL Server bulk admin role.

Answer: B

NEW QUESTION 7

- (Exam Topic 1)

You administer a SharePoint farm.

A site administrator in the marketing department asks permission to view the site usage report. You add the user to the Usage Monitors SharePoint group. The administrator reports that the page fails to load and displays an Access Denied message.

You need to ensure that the marketing department site administrator can view the site usage report. Which List permission should you add?

- A. Override List Behaviors
- B. View Application Pages
- C. Manage Personal Views
- D. Use Remote Interfaces

Answer: B

NEW QUESTION 8

- (Exam Topic 1)

You manage a SharePoint 2016 farm.

You need to import user profiles and photos from Active Directory to the SharePoint 2016 farm. Which tool or service should you use?

- A. User Profile service application
- B. Active Directory Import
- C. Microsoft Identity Manager
- D. Microsoft Forefront Identity Manager

Answer: A

Explanation:

References:

<https://technet.microsoft.com/en-us/library/jj219646.aspx>

NEW QUESTION 9

- (Exam Topic 1)

You are the administrator for a SharePoint 2016 farm.

You need to integrate Microsoft System Center Operations Manager dashboards and real-time diagnostic data with the SharePoint 2016 farm.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. Configure Microsoft SharePoint Insights.
- B. Configure Visio Services.
- C. ConfigureSystemCenter Integration with Office 365 by using private cloud integration.
- D. Deploy the Microsoft System Center Operations Manager SharePoint web part.

Answer: BD

NEW QUESTION 10

- (Exam Topic 1)

You manage a SharePoint Server. The operating system, Search index files, and blob cache are located on separate drives.

You observe the following issues:

file lock out errors

delays in indexing of content

overall poor SharePoint Search performance

occasional virus and malware warning

You determine that antivirus scans are causing the issues. You need to resolve the issues.
How should you configure antivirus scanning? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Item	Action
Blob Cache folders	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <div style="padding: 2px;">exclude</div> <div style="padding: 2px;">include</div> </div>
Search index files	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <div style="padding: 2px;">exclude</div> <div style="padding: 2px;">include</div> </div>
Operating System files	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <div style="padding: 2px;">exclude</div> <div style="padding: 2px;">include</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://support.microsoft.com/en-us/help/952167/certain-folders-may-have-to-be-excluded-from-antivirus-scann>

NEW QUESTION 10

- (Exam Topic 1)

You are the administrator for a SharePoint 2016 farm. You configure a connection to the SharePoint Store. Users report that they cannot select or install specific apps from the SharePoint Store. Users can install other apps. You need to allow users to purchase and install any type of apps from the SharePoint Store. What should you do?

- A. Activate the Internet-facing endpoints feature for apps.
- B. Configure the Store settings to allow users to purchase apps.
- C. Deploy an App Catalog.
- D. Delete the existing App Catalog.
- E. Then, delete and provision the Subscription Setting and App Management service applications.

Answer: A

NEW QUESTION 11

- (Exam Topic 1)

You are assisting Company1 in the development of a website that displays information about their products to customers on the Internet. Company1 web publishers will not have access to publish directly to the Internet site.

You have the following requirements:

- Web publishers must be able to update web pages from a SharePoint site collection that is only accessible on the Company1 internal network.
- Web page updates must be published on an automated basis to a SharePoint site collection that is accessible from the Internet.

You need to configure the website.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Configure content type publishing
- Create a content deployment job
- Configure content sources
- Create source and destination site collections
- Create a content deployment path
- Create publishing content types

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

- Configure content type publishing
- Create a content deployment job
- Configure content sources
- Create source and destination site collections
- Create a content deployment path
- Create publishing content types

NEW QUESTION 12

- (Exam Topic 1)

You are a SharePoint administrator for Contoso, Ltd. You are migrating a SharePoint 2010 farm to SharePoint 2016. The SharePoint 2010 farm has only classic mode web applications.

You observe that the WSS_Content_ProjectArchive content database is not attached to the SharePoint 2013 farm.

You need to migrate the SharePoint 2010 WSS_Content_ProjectArchive content database to an existing SharePoint 2013 claims-based web application named WebApp1

Which four actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Attach the WSS_Content_ProjectArchive content database to WebApp1.

Attach the WSS_Content_ProjectArchive content database to ClassicAuthApp.

Run the following Windows PowerShell command:
Convert-SPWebApplication-Identity WebApp1-To Claims-RetainPermissions

Run a Windows PowerShell script to convert WebApp1 to a classic mode web application while retaining permission settings.

Run the following Windows PowerShell command:
New-SPWebApplication-name "ClassicAuthApp"-Port 100 -ApplicationPool "ClassicAuthAppPool" -ApplicationPoolAccount (Get-SPManagedAccount "contoso\User1")

Attach the SharePoint 2010 project archive content database to ClassicAuthApp.

Run the following Windows PowerShell command:
New-SPWebApplication-name "ClassicAuthApp"-Port 100 -ApplicationPool "ClassicAuthAppPool" -ApplicationPoolAccount (Get-SPManagedAccount "contoso\User1") -AuthenticationProvider (New-SPAuthenticationProvider)

Run the following Windows PowerShell command:
Convert-SPWebApplication- Identity ClassiAuthApp -To Claims- RetainPermissions

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Attach the WSS_Content_ProjectArchive content database to WebApp1.

Attach the WSS_Content_ProjectArchive content database to ClassicAuthApp.

Run the following Windows PowerShell command:
Convert-SPWebApplication-Identity WebApp1-To Claims-RetainPermissions

Run a Windows PowerShell script to convert WebApp1 to a classic mode web application while retaining permission settings.

Run the following Windows PowerShell command:
New-SPWebApplication-name "ClassicAuthApp"-Port 100 -ApplicationPool "ClassicAuthAppPool" -ApplicationPoolAccount (Get-SPManagedAccount "contoso\User1")

Attach the SharePoint 2010 project archive content database to ClassicAuthApp.

Run the following Windows PowerShell command:
New-SPWebApplication-name "ClassicAuthApp"-Port 100 -ApplicationPool "ClassicAuthAppPool" -ApplicationPoolAccount (Get-SPManagedAccount "contoso\User1") -AuthenticationProvider (New-SPAuthenticationProvider)

Run the following Windows PowerShell command:
Convert-SPWebApplication- Identity ClassiAuthApp -To Claims- RetainPermissions

Run the following Windows PowerShell command:
New-SPWebApplication-name "ClassicAuthApp"-Port 100 -ApplicationPool "ClassicAuthAppPool" -ApplicationPoolAccount (Get-SPManagedAccount "contoso\User1")

Run the following Windows PowerShell command:
Attach the WSS_Content_ProjectArchive content database to ClassicAuthApp.

Run the following Windows PowerShell command:
Convert-SPWebApplication- Identity ClassiAuthApp -To Claims- RetainPermissions

Run the following Windows PowerShell command:
Attach the WSS_Content_ProjectArchive content database to WebApp1.

NEW QUESTION 17

- (Exam Topic 1)

You manage a SharePoint environment.

You need to block all ports on the SharePoint Servers that are not used for essential communications.

To answer, drag the appropriate set of ports or port ranges to the correct service. Each set of ports or port ranges may be used once, more than once, or not at all.

You may need to drag the split bar between the panes or scroll to view content.

Note: Each correct selection is worth one point.

Ports and Protocols	Service	Ports and protocols
TCP 9354, TCP 9355, TCP 9356	Service Applications	Ports and Protocols
TCP 32843, TCP 32844, TCP 32845	People Search/ MIM	Ports and Protocols
TCP 5725	Search Index component	Ports and Protocols
TCP 16500-16519	Name resolution	Ports and Protocols
TCP/UDP 53	Kerberos	Ports and Protocols
TCP/UDP 88		
TCP 22233-22236		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Ports and Protocols	Service	Ports and protocols
TCP 9354, TCP 9355, TCP 9356	Service Applications	TCP 32843, TCP 32844, TCP 32845

TCP 16500-16519	Name resolution	TCP/UDP 53
TCP/UDP 53	Kerberos	TCP/UDP 88
TCP/UDP 88		
TCP 22233-22236		

NEW QUESTION 18

- (Exam Topic 1)

You are the SharePoint administrator for a company that manufactures and sells computer hardware components. You plan to create a public-facing website that allows customers to search for and purchase components.

Customers must be able to navigate the website by component type, and then further refine searches by the operating systems that the components support. The URL that displays when a customer selects an item must indicate the component type. The URL must not display the full path to the page.

You need to implement a SharePoint site that allows customers to find the appropriate parts.

Which SharePoint site template and metadata feature should you use? To answer, select the appropriate option from each list in the answer area.

Answer area

SharePoint object	Selection
Site template	<input type="text"/> <ul style="list-style-type: none"> Project Enterprise Publishing Record Center
Metadata feature	<input type="text"/> <ul style="list-style-type: none"> Open term set Cross-farm Managed Metadata service subscription Enterprise keywords Friendly URL

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer area

SharePoint object

Selection

Site template

- Project
- Enterprise
- Publishing
- Record Center

Metadata feature

- Open term set
- Cross-farm Managed Metadata service subscription
- Enterprise keywords
- Friendly URL

NEW QUESTION 19

- (Exam Topic 1)

You are a SharePoint administrator for Contoso, Ltd. You manage an on-premises SharePoint environment. A user named User1 is the site collection administrator for the Human Resources (HR) site. User1 leaves the company and is replaced with a user named User2.

Access requests for the HR SharePoint site are still being sent to User1. You need to ensure that User2 receives all access requests to the HR site.

How should you complete the Windows PowerShell commands? To answer, select the appropriate Windows PowerShell segment from each list in the answer area.

\$obj= **http://contoso.com/sites/HR**

- Get-SPSite
- Get-SPWeb
- Get-SPSiteUrl

\$obj.RequestAccessEmail= "User2@contoso.com"

- \$obj Update()
- Set-SPSite
- Set-SRWeb
- Set-SPSiteURL
- \$obj Close()

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

\$obj=

Get-SPSite
Get-SPWeb
Get-SPSiteUrl

\$obj.RequestAccessEmail= "User2@contoso.com"

\$obj Update()
Set-SPSite
Set-SRWeb
Set-SPSiteURL
\$obj Close()

NEW QUESTION 20

- (Exam Topic 1)

You are preparing to migrate content from your SharePoint Server 2016 farm to a new location. All content is hosted within a single web application across 150 site collections.

You have the following requirements:

- * Users must be able to view existing content during the migration, but must not make changes.
- * You must minimize the amount of time that the migration takes.
- * You must return all access rights to their previous state once migration is complete. You need to configure the SharePoint site collections.

What should you configure?

- A. an information management policy
- B. privacy options
- C. Read only access for content
- D. alternate access mappings
- E. a user policy

Answer: C

NEW QUESTION 23

- (Exam Topic 1)

You plan to install SharePoint Server 2016 in a new environment. You need to install the SharePoint Server prerequisite components.

For each prerequisite installation method, which tool or command line utility should you use?

Install from a network share

Setup.exe
PrerequisiteInstaller.exe
SharePoint Products Configuration Wizard
Microsoft SharePoint Products and Technologies 2016 Preparation Tool

Install from the Internet

Setup.exe
PrerequisiteInstaller.exe
SharePoint Products Configuration Wizard
Microsoft SharePoint Products and Technologies
2016 Preparation Tool

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 25

- (Exam Topic 1)

You administer a SharePoint 2016 farm. You plan to implement My Site functionality. You need to configure the schedules for the timer jobs related to My Sites. For each job, which service should you modify? To answer, select the appropriate service from each list in the answer area.

Answer Area

Service	Job to modify
Microsoft SharePoint Foundation Web Application	<ul style="list-style-type: none"> My Site cleanup job Notification job Timer service recycle job
Microsoft SharePoint Foundation Timer Service	<ul style="list-style-type: none"> User Profile to SharePoint quick synchronization User Profile to SharePoint full synchronization User Profile service application - user profile change

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Service	Job to modify
Microsoft SharePoint Foundation Web Application	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right;">▼</div> <div style="border-bottom: 1px dashed green; padding: 2px;">My Site cleanup job</div> <div style="padding: 2px;">Notification job</div> <div style="padding: 2px;">Timer service recycle job</div> </div>
Microsoft SharePoint Foundation Timer Service	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right;">▼</div> <div style="border-bottom: 1px dashed green; padding: 2px;">User Profile to SharePoint quick synchronization</div> <div style="border-bottom: 1px dashed green; padding: 2px;">User Profile to SharePoint full synchronization</div> <div style="padding: 2px;">User Profile service application - user profile change</div> </div>

NEW QUESTION 27

- (Exam Topic 1)

You have a SharePoint Online environment. You enable the Delve feature.

The human resources (HR) team is concerned that private, sensitive documents from the HR team site are appearing in Delve. You have created a HideFromDelve column in the library and the documents continue to appear in Delve. The column is a Yes/No type and every item in the library must have a value. You need to perform steps to configure Delve to show only specific documents and update existing items in the library with minimum effort.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Re-index the document library.	<div style="display: flex; justify-content: space-between; align-items: center;"> <div style="text-align: center;"> ⬅ ➡ </div> <div style="width: 60%; height: 200px; border: 1px solid gray;"></div> <div style="text-align: center;"> ⬆ ⬇ </div> </div>
Reset the crawl index.	
Do not specify a default value for the site column.	
Create a new crawl property named ows_HideFromDelve .	
Set the default value for the site column to No .	
Update the value of the HideFromDelve property for each item.	
Set the default value for the site column to Yes .	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 28

- (Exam Topic 2)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You need to monitor the environment.

You configure System Center Operations Manager 2012 R2 with a web application monitor. Does the solution meet the goal?

- A. Yes.
- B. No.

Answer: A

NEW QUESTION 32

- (Exam Topic 2)

You need to obtain the external data required for the Help Desk website.

What should you use?

- A. Business Data Connectivity Services application
- B. an Office 365 REST endpoint
- C. Microsoft Power BI
- D. a Content Query web part

Answer: A

NEW QUESTION 37

- (Exam Topic 2)

You need to deploy the web application to support the marketing department.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create a teams managed path for the web application.	
Enable Self-Service Site Creation for all departmental web applications.	
Enable Self-Service Site Creation for the marketing department web application.	
Create a products managed path for the web application.	
Enable anonymous access for the web application.	
Create a web application for all departments.	
Create a web application for the marketing department.

Create a teams managed path for the web application.	Create a web application for the marketing department.
Enable Self-Service Site Creation for all departmental web applications.	Create a products managed path for the web application.
Enable Self-Service Site Creation for the marketing department web application.	Enable Self-Service Site Creation for the marketing department web application.
Create a products managed path for the web application.	
Enable anonymous access for the web application.	
Create a web application for all departments.	
Create a web application for the marketing department.	

NEW QUESTION 39

- (Exam Topic 3)

You need to ensure that users can edit SharePoint pages. What should you do?

- A. Run the following PowerShell command: `$webAppObj = Get-SPWebApplication -Identity [URL]$webAppObj.AllowDesigner = $true$webAppObj.Update()`
- B. Enable SMTP connection encryption.
- C. In the System Settings section of Central Administration, convert the server role to Custom.
- D. Run the following PowerShell cmdlet: `Set-SPO365LinkSettings`

Answer: A

NEW QUESTION 41

- (Exam Topic 3)

You need to monitor the resources for the Beijing office.

Which three components should you implement? Each correct answer presents part of the solution.

- A. search
- B. proxy settings
- C. Distributed Cache
- D. SAML authentication
- E. claims authentication

Answer: BDE

NEW QUESTION 42

- (Exam Topic 3)

How should you complete the Windows PowerShell command? To answer, select the appropriate Windows PowerShell segment from each list in the answer area.

Answer area

<input type="text"/>	<input type="text"/>
<ul style="list-style-type: none"> Restore-SPSite Restore-SPFarm Backup-SPSite Restore-SPDeletedSite 	<ul style="list-style-type: none"> -Directory -Identity

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer area

<ul style="list-style-type: none"> Restore-SPSite Restore-SPFarm Backup-SPSite Restore-SPDeletedSite 	<ul style="list-style-type: none"> -Directory <li style="background-color: #333; color: white;">-Identity

NEW QUESTION 44

- (Exam Topic 3)

You need to ensure that users can share sales data.

For each authentication method, which option should you use? To answer, drag the appropriate option to the correct authentication method. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

Options	Authentication method	Option
S2S authentication	Account for Office Online Services	<i>Option</i>
SAML authentication	Authentication for Excel Online	<i>Option</i>
oData authentication	Authentication for PowerPivot	<i>Option</i>
network Service account		
Local Administrator account		
Authenticated users		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Options	Authentication method	Option
S2S authentication	Account for Office Online Services	network Service account
SAML authentication	Authentication for Excel Online	Authenticated users
oData authentication	Authentication for PowerPivot	Authenticated users
network Service account		
Local Administrator account		
Authenticated users		

NEW QUESTION 49

- (Exam Topic 3)

You need to create the managed paths for all site collections.

For each site collection, which inclusion type should you use? To answer, select the appropriate inclusion type from each list in the answer area.

Site collection	Inclusion type
Corporate	<input type="text" value="Explicit Wildcard"/>
IT	<input type="text" value="Explicit Wildcard"/>
Finance	<input type="text" value="Explicit Wildcard"/>
Trading	<input type="text" value="Explicit Wildcard"/>
Manufacturing	<input type="text" value="Explicit Wildcard"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Site collection	Inclusion type
Corporate	Explicit Wildcard
IT	Explicit Wildcard
Finance	Explicit Wildcard
Trading	Explicit Wildcard
Manufacturing	Explicit Wildcard

NEW QUESTION 52

- (Exam Topic 4)

In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.

Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You need to display the values for the Document Status and Department properties. You create a term set and Managed Metadata column. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

The requirement is to change the values of metadata field settings from a single location and changes to the settings should be applied to all the site collections and existing documents. So Term Set and Managed Metadata column is the preferred way to implement the Document Status and Department properties.

NEW QUESTION 54

- (Exam Topic 4)

You need to complete the configuration of the Search2016 farm.

How should you complete the Windows PowerShell command? To answer, drag the appropriate Windows PowerShell segment to the correct location or locations. Each Windows PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Windows PowerShell segments	Answer Area
SPConfigurationDatabase	Connect <i>PowerShell segment</i>
ServerRole2016	-DatabaseServer <i>PowerShell segment</i>
Search	-DatabaseNameSP2016Config '
Distributed Cache	-Passphrase C0mpany2919** '
Search2016	-LocalServerRole <i>PowerShell segment</i>
Install-SPService	
ServerRole2013	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Windows PowerShell segments	Answer Area
SPConfigurationDatabase	Connect SPConfigurationDatabase
ServerRole2016	-DatabaseServer ServerRole2016
Search	-DatabaseNameSP2016Config '
Distributed Cache	-Passphrase C0mpany2919** '
Search2016	-LocalServerRole Search
Install-SPService	
ServerRole2013	

NEW QUESTION 58

- (Exam Topic 5)

You are planning the hybrid environment for OneDrive for Business.

You need to determine what the end-user experience will be for Dallas and Seattle SharePoint users.

What should you conclude? To answer, select the appropriate end-user experience from each list in the answer area.

End-users

OneDrive for Business Location

Dallas on-premises SharePoint users

On-premises
Office 365

Seattle on-premises SharePoint users

On-premises
Office 365

Dallas Office 365 SharePoint users

On-premises
Office 365

Seattle Office 365 SharePoint users

On-premises
Office 365

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: On-premises

You must configure the Dallas SharePoint farm as a hybrid environment with the Office 365 tenant. Box 2: Office 365

Seattle: You must implement a new SharePoint environment. Box 3: Office 365

You must configure the Dallas SharePoint farm as a hybrid environment with the Office 365 tenant. Box 4: Office 365

Seattle: You must implement a new SharePoint environment.

NEW QUESTION 61

- (Exam Topic 5)

You need to ensure that sales department users can create sites.

You grant sales department users the Full Control permission for the <http://Dallas.contoso.com/sites/Sales> site. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Wrong URL. Sales users must be able to create child sites under the <http://customer.contoso.com> web application.

NEW QUESTION 65

- (Exam Topic 5)

You need to configure the hybrid SharePoint environments.

In the table below, identify the features that you must deploy to each environment.

NOTE: Make only one selection in each column. Each correct selection is worth one point.

Answer area

SharePoint environment features

Dallas

Seattle

Hybrid site features

Hybrid OneDrive for Business

Cloud hybrid search

Deploy Microsoft Identity Management Server

Deploy Azure Active Directory Connect

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Dallas: You must support OneDrive for Business, Site following, Profiles, and the Extensible app launcher (= Hybrid Site Features)
Seattle: You must support only OneDrive for Business and Profiles (= Hybrid OneDrive for Business).

NEW QUESTION 70

- (Exam Topic 5)

You need to configure Office Online Server integration for Chicago.

How should you complete the Windows PowerShell commands? To answer, select the appropriate Windows PowerShell segment or value from each list in the answer area.

-ServerName

New-SPWOPIBinding

New-SPOPISuppressionSetting

Set-SPOWPIBinding

-zone

Chicago.contoso.com

oos-chi.contoso.com

-zone

Set-SPWOPIZone

Set-SPWOPIBinding

"external-http"

"internal-http"

"external-https"

"internal-https"

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: New-SPWOPIBinding

From the SharePoint 2016 Management Shell, run the following commands to register a new WOPI Binding for the Office Online Server and allow authentication over HTTP connections:

New-SPWOPIBinding -ServerName <Office Online Server FQDN> -AllowHTTP Set-SPWOPIZone -zone internal-http
Etc.

Box 2: oos-chi.contoso.com

Scenario: You must deploy a new Office Online Server farm named oos-chi.contoso.com to the environment. This farm will be used from within the network and externally. All connections to the Office Online Server farm must use IPSec.

Box 3: Set-SPWOPIZone

From the SharePoint 2016 Management Shell, run the following commands to register a new WOPI Binding for the Office Online Server and allow authentication over HTTP connections:

New-SPWOPIBinding -ServerName <Office Online Server FQDN> -AllowHTTP Set-SPWOPIZone -zone internal-http
Etc.

Box 4: internal-http

NEW QUESTION 72

- (Exam Topic 5)

You need to upgrade the SharePoint farm for warehouse users. Which Windows PowerShell cmdlet should you run first?

- A. Mount-SPContentDatabase
- B. Test-SPContentDatabase
- C. Convert-SPWebApplication
- D. Test-SPSite

Answer: A

Explanation:

Scenario: Boston: You must upgrade the existing SharePoint farm to SharePoint 2016. Employees who use the farm must be able to continue using the farm during the upgrade process.

The Mount-SPContentDatabase cmdlet attaches an existing content database to the farm. If the database being mounted requires an upgrade, this cmdlet will cause the database to be upgraded.

The default behavior of this cmdlet causes an upgrade of the schema of the database and initiates upgraded builds for all site collections within the specified content database if required. To prevent initiation of upgraded builds of site collections, use the NoB2BSiteUpgrade parameter. This cmdlet does not trigger version-to-version upgrade of any site collections.
