

Exam Questions 70-735

OEM Manufacturing and Deployment for Windows 10

<https://www.2passeasy.com/dumps/70-735/>

NEW QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition. Solution: You create an MSR partition of 120 MB that uses the ReFS file system. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefigptbased-hard-drive-partitions>

NEW QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition. Solution: You create a primary partition of 250 MB that uses the NTFS file system. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

This partition must be at least 300 MB References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefigptbased-hard-drive-partitions>

NEW QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition.

Solution: You create an EFI system partition of 150 MB that uses the NTFS file system. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefigptbased-hard-drive-partitions>

NEW QUESTION 4

HOTSPOT

You have a reference computer that runs Windows 10. The computer contains a provisioning package named Package1.ppkg. Package1.ppkg is located in C:\Packages\.

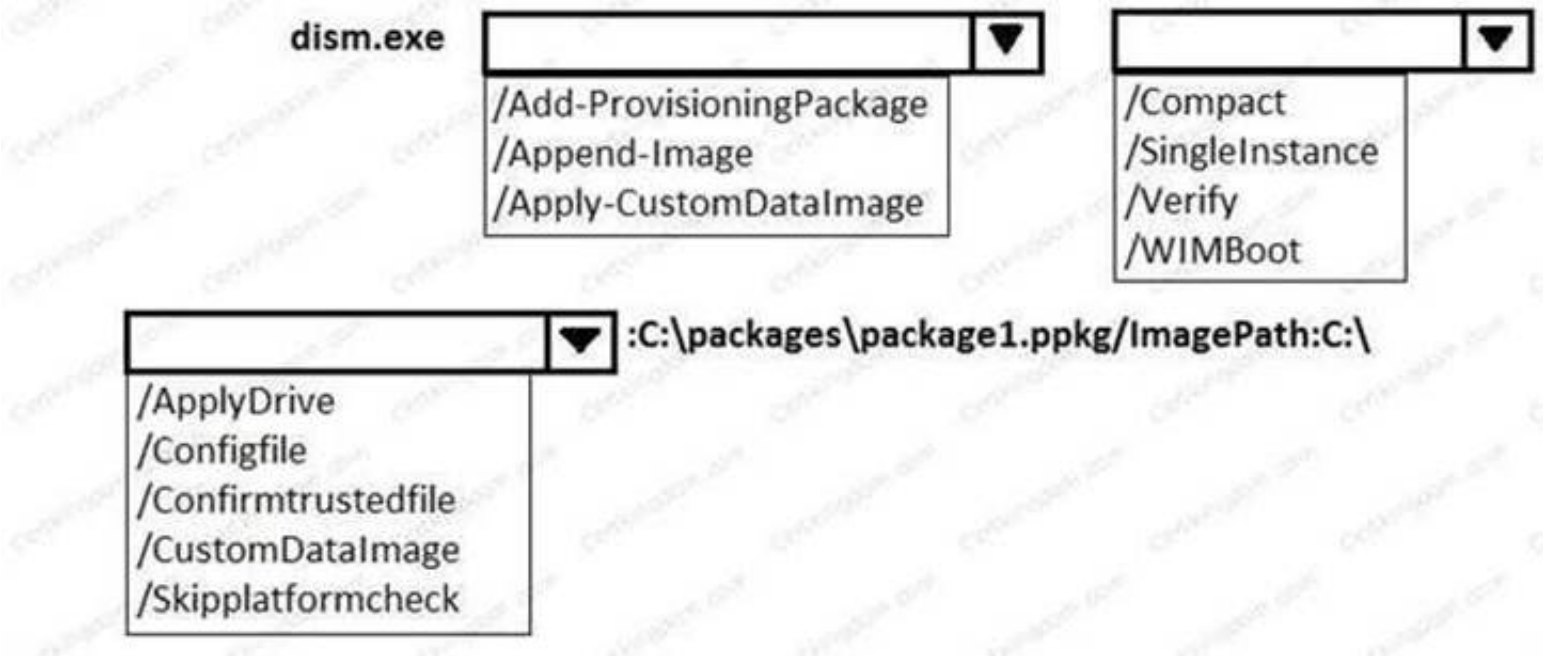

You plan to create an image of the reference computer.

You run sysprep.exe on the computer, and then you start the computer by using Windows Preinstallation Environment (Windows PE).

You need to ensure that the image uses the least amount of disk space possible.

How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

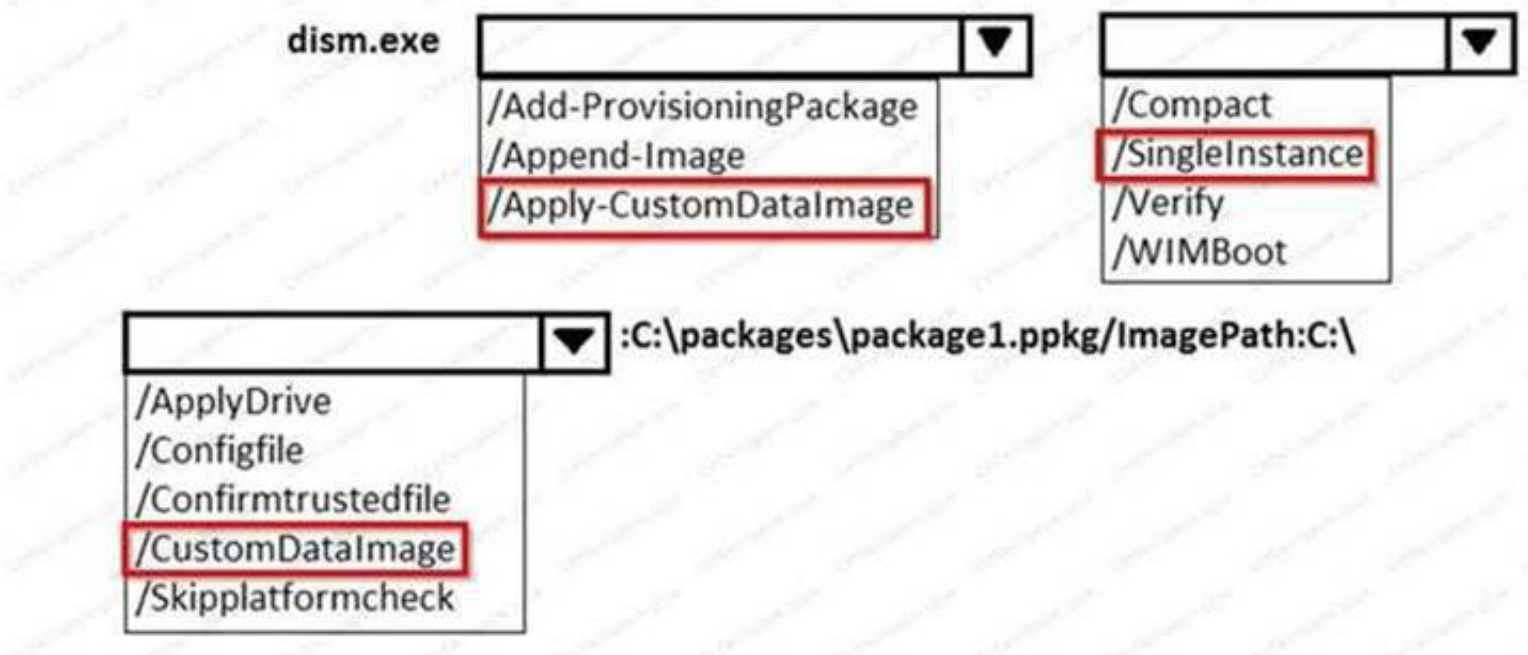

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 5

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Scanstate.exe can capture configurations from an offline image of Windows.	<input type="radio"/>	<input type="radio"/>
Scanstate.exe can be run from Windows Preinstallation Environment (Windows PE).	<input type="radio"/>	<input type="radio"/>
Scanstate.exe can be configured to capture a single registry setting.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-scanstate-syntax>

NEW QUESTION 6

You have a computer that runs Windows 10. The computer starts in UEFI mode and has a 64-bit processor.
You insert a USB key in the computer. The USB key has a drive letter of F.
You need to ensure that you can start the computer by using Windows Preinstallation Environment (Windows PE) from the USB key.
Which two commands should you run? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. makewinpemedia.cmd /UFD C:\WinPe F:
- B. makewinpemedia.cmd /ISO C:\WinPe F:
- C. copype.cmd amd64 C:\WinPe
- D. dism.exe /Export-Image/SourceImageFile:C:\WinPE\boot.wim/SourceIndex:1/DestinationImageFile:F:\boot.wim
- E. copype.cmd x86 C:\WinPe

Answer: AE

Explanation:

References:
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-create-usbbootable-drive>

NEW QUESTION 7

You are preparing a push-button reset solution.
You extract a Windows Recovery Environment (Windows RE) boot image from an image of Windows 10.
You plan to use scanstate.exe to capture several Windows desktop applications.
Which two folders from the Windows Assessment and Deployment Kit (Windows ADK) should you include in the Windows CK build environment?

- A. User State Migration Tool (USMT) and Windows Preinstallation Environment
- B. Windows Preinstallation Environment and Common
- C. User State Migration Tool (USMT) and Windows Setup
- D. Windows Setup and Deployment Tools

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/deploy-push-buttonreset-features>

NEW QUESTION 8

You deploy an image of Windows 10 to several computers by using an answer file. The answer file contains the following information.

```
<OEMInformation>
  <Manufacturer>Fabrikam, Inc.</Manufacturer>
  <SupportHours>8 AM - 8 PM (CST) Monday - Friday</SupportHours>
  <SupportPhone>1-800-555-1212</SupportPhone>
  <SupportURL>HTTP://SUPPORT.FABRIKAM.COM</SupportURL>
  <Logo>%windir%\system32\oobe\info\fabrikam.bmp</Logo>
</OEMInformation>
```

You need to verify whether the support information is displayed in Windows. What should you do?

- A. From the Start menu, open Msconfig.
- B. From the Settings app, click System, and then click About.
- C. From the Start menu, open Msinfo32.
- D. From Control Panel, open System

Answer: D

Explanation:

This is a tricky question. The support information is displayed in two places as defined in answers B and D. However, the logo will only be displayed in the System Control Panel applet.

NEW QUESTION 9

You create the working directories for a custom Windows Preinstallation Environment (Windows PE) image.
You need to create an ISO image of Windows PE that can be written to a DVD. The ISO image must be bootable.
Which command should you use?

- A. bcdboot.exe
- B. oscdimg.exe
- C. bootsect.exe
- D. etfsboot.exe

Answer: B

Explanation:

References:
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/oscdimg-commandline-options>

NEW QUESTION 10

You use an answer file to automate the installation of Windows 10.
You need to add your company's support information to computers that you deploy. Which component should you add to the answer file?

- A. Microsoft-Windows-Setup
- B. Microsoft-Windows-PnpCustomizationsNonWinPE
- C. Microsoft-Windows-Shell-Setup
- D. Microsoft-Windows-Deployment

Answer: C

Explanation:

References:
https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/unattend/microsoft-windows-shell-setup-oeminformation

NEW QUESTION 10

You have a reference image of the 64-bit version of Windows 10. The reference image contains an application named App1. You need to ensure that App1 is pinned to the Start menu. Which tool or tools should you use to apply the custom Start layout to the image?

- A. image.exe and Windows Preinstallation Environment (Windows PE)
- B. dism.exe and File Explorer
- C. Microsoft Application Compatibility Toolkit (ACT)
- D. Windows System Image Manager (Windows SIM)

Answer: D

Explanation:

References:
https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/customize-the-startscreen

NEW QUESTION 13

DRAG DROP

You are building an image of Windows 10 for a new computer model. The computer uses specific out-of-box device drivers. The Windows 10 image is stored in C:\OEM\Install.wim. Install.wim contains only one image named Windows. The drivers are stored in the C:\Mydrivers folder on your management computer. The drivers are stored in the INF format. You need to add the drivers to a new image in the Install.wim file. Which three commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Commands	Answer Area
dism.exe /Image:C:\OEM\install.wim /Add-Driver /Driver:c:\Mydrivers /recurse	
dism.exe /Unmount-Image /MountDir:C:\mount\offline /Commit	
dism.exe /Unmount-Image /MountDir:C:\mount\offline /Commit /Append	
dism.exe /Get-ImageInfo /ImageFile:C:\OEM\install.wim	
dism.exe /Image:C:\mount\offline /Add-Driver /Driver:c:\Mydrivers /recurse	
dism.exe /Mount-Image /ImageFile:C:\OEM\install.wim /Name:"Windows" /MountDir:C:\mount\offline	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Commands	Answer Area
dism.exe /Image:C:\OEM\install.wim /Add-Driver /Driver:c:\Mydrivers /recurse	dism.exe /Mount-Image /ImageFile:C:\OEM\install.wim /Name:"Windows" /MountDir:C:\mount\offline
dism.exe /Unmount-Image /MountDir:C:\mount\offline /Commit	dism.exe /Image:C:\mount\offline /Add-Driver /Driver:c:\Mydrivers /recurse
dism.exe /Unmount-Image /MountDir:C:\mount\offline /Commit /Append	dism.exe /Unmount-Image /MountDir:C:\mount\offline /Commit
dism.exe /Get-ImageInfo /ImageFile:C:\OEM\install.wim	
dism.exe /Image:C:\mount\offline /Add-Driver /Driver:c:\Mydrivers /recurse	
dism.exe /Mount-Image /ImageFile:C:\OEM\install.wim /Name:"Windows" /MountDir:C:\mount\offline	

NEW QUESTION 14

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question. You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed. You create the working directories for the customization of a Windows Preinstallation Environment (Windows PE) image. You need to add scripting support to Windows PE. What should you do first?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-addingpowershell-support-to-windows-pe>

NEW QUESTION 19

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question. You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed. You are building a new image of Windows 10. You need to specify how the hard disk will be partitioned during the Windows 10 installation. What should you do?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Answer: D

NEW QUESTION 23

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question. You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed. You are building a new image of Windows 10. You copy the installation media for Windows 10 to Computer1. You need to add drivers to the Windows 10 image. What should you do first?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.

- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Answer: A

NEW QUESTION 27

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question. You have an image of Windows 10 that you plan to deploy to a new computer. You need to add the latest cumulative updates to the image. Which parameter should you specify when you run dism.exe?

- A. /Add-Capability
- B. /Add-Driver
- C. /Add-Package
- D. /Add-ProvisionedAppxPackage
- E. /Apply-CustomDataImage
- F. /Apply-Image
- G. /Apply-Unattend
- H. /Export-Image

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/servicing-the-imagewith-windows-updates-sxs>

NEW QUESTION 31

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question. You have an image of Windows 10 for a new desktop computer model. You plan to deploy the computer to multiple regions around the world. You need to add new languages to the image by using Features on Demand language packs. Which parameter should you specify when you run dism.exe?

- A. /Add-Capability
- B. /Add-Driver
- C. /Add-Package
- D. /Add-ProvisionedAppxPackage
- E. /Apply-CustomDataImage
- F. /Apply-Image
- G. /Apply-Unattend
- H. /Export-Image

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-drivers-langsuniversal-apps-sxs>

NEW QUESTION 34

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies. You need to add all the update packages to the image in the correct order.

Solution: You run dism.exe/Add-Package 10 times. Each time you run the command, you specify the /IgnoreCheck and /PreventPending parameters. Does this meet the goal?

- A. Yes
- B. NO

Answer: B

NEW QUESTION 39

Your company plans to release a new computer model that uses an NVMe Express (NVMe) host controller interface.

You have a USB key that is used to start Windows Pre installation Environment (Windows PE). You need to ensure that when you start the new computers from the USB key, the drivers of the NVMe host controller are available.

Which command should you run?

- A. dism.exe
- B. oscdimg.exe
- C. copyype.cmd
- D. bcdboot.exe

Answer: C

NEW QUESTION 42

You have a computer named Computer1. Computer1 has a folder named Folder1. Folder1 contains the following files:

- Drv2.dll
- File2.sys
- File2.doc
- File1.mp3
- Data2.zip
- Data1.cab

You create a DISM configuration file named Config1.ini that contains the following information.

- A. File2.sys
- B. File2.doc
- C. File1.mp3
- D. Data2.zip
- E. Drv2.dll

Answer: A

NEW QUESTION 47

HOTSPOT

Exhibit:

You have a computer named Computer 1 that runs Windows 10.

You open Disk Management on Computer 1 as shown in the exhibit. (Click the Exhibit tab.)

You start Windows Pre installation Environment (Windows PE) on Computer 1 by using PXE. You need to capture the Windows installation to the data partition on Disk 1.

Which command should you run from Windows PE? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Dism.exe /capture-image /ImageFile: C:\ Image.wim /CaptureDir: C:\ /Name: "Windows 10"

NEW QUESTION 51

You have a WIM file in a shared folder. The WTM file contains an image of Windows 10 and is 10 GB. You have Windows Pre installation Environment (Windows PE) installed on a bootable USB drive that uses the FAT32 file system.

You plan to use the USB drive to deploy the Windows 10 image to a computer that starts in UEFI mode.

You need to copy the image to the USB disk. Which command should you run first?

- A. dism.exe with the /Split Image parameter
- B. dism.exe with the /Append Image parameter
- C. dism.exe with the /Export Image parameter
- D. dism.exe with the /Cleanup-Image parameter

Answer: A

NEW QUESTION 54

DRAG DROP

You have an image of Windows 10 for a new model of computers.

You seal the image, copy the image to an external hard disk, and then connect the disk to a computer.

You need to deploy the image to the computer. Which three actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 57

HOTSPOT

You are creating an image of Windows 10.

In audit mode, you apply Windows updates, and then you customize the image. You need to minimize the size of the image.

Which command should you run? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 60

You are customizing a Windows Recovery Environment (Windows RE) image. You plan to customize the push-button reset experience by using extensibility scripts. You need to add a file to Windows RE that will execute at an extensibility point. Which extension should the file have?

- A. .Js
- B. .exe
- C. .vbs
- D. .msi

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/deploy-push-buttonreset-features>

NEW QUESTION 65

DRAG DROP

You plan to configure the push-button reset feature for an image of Windows 10 Pro. You add an application named CRM App to the image.

You need to capture CRM App to a siloed provisioning package.

How should you complete the command? To answer, drag the appropriate values to the correct locations. Each value may be used once, more than once, or not at all. You may need to drag the splits bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

ScanState.exe /apps :-sysdrive /o /v:13 / config:Config_AppsOnly.xml / ppkg e:\repository\SPP_bs

NEW QUESTION 69

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You are configuring an image of Windows 10 for a new model of computers that will be deployed to a multilingual region. You need to ensure that the image supports multiple languages.

Which parameter should you specify when you run dism.exe?

- A. /Add-Capability
- B. /Add-Driver
- C. /Add-Package
- D. /Add-ProvisionedAppxPackage
- E. /Capture-Image
- F. /Cleanup-Image
- G. /Export-Image
- H. /Split-Image

Answer: F

NEW QUESTION 71

You have an image of Windows 10. The image contains a Windows Store app. You test the app and discover that the app fails to run correctly.

You need to verify the dependencies of the app. Which command or cmdlet should you run?

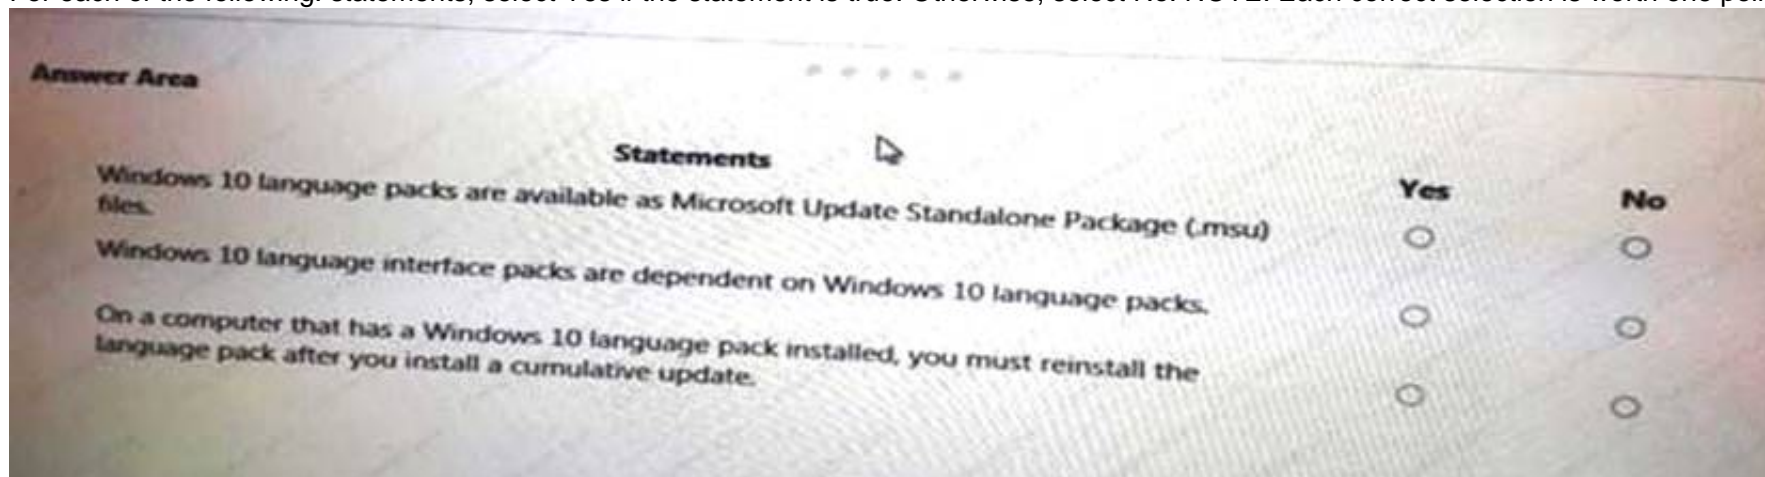

- A. Get-WindowsPackage
- B. Get-AppxPackage
- C. dism.exe /Get-Capabilities
- D. dism.exe /Get-AppxProvisionedPackage

Answer: C

NEW QUESTION 75

HOTSPOT

For each of the following: statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Windows 10 language packs are available as Microsoft Update Standalone package (.msu) = Yes Windows 10 language interface packs are dependent on Windows 10 language packs. = No
 On a computer that has a Windows 10 language pack installed, you must reinstall the language pack after you install a cumulative update. Yes

NEW QUESTION 76

You are creating an image of Windows 10 that will contain a Windows Recovery Environment (Windows RE) image. The Windows CK image will be 250 MB. What is the minimum size that you should set for the Windows CK partition?

- A. 251 MB
- B. 300 MB
- C. 500MB
- D. 620 MB

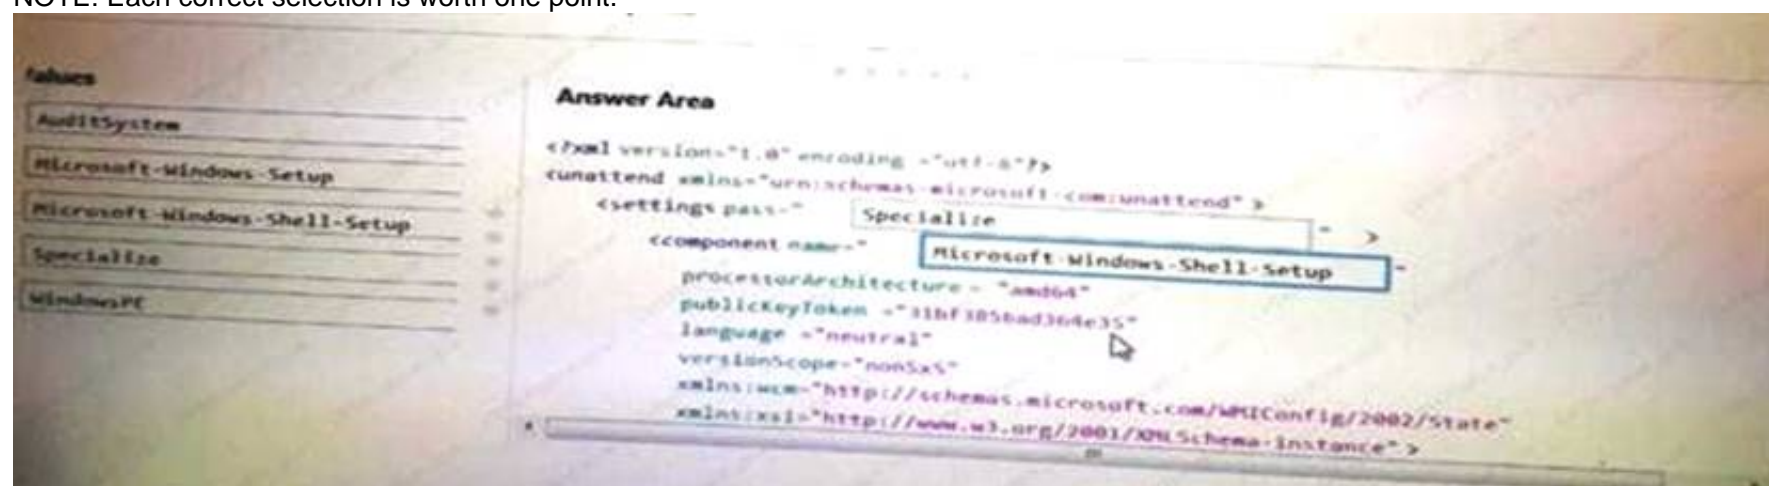

Answer: C

NEW QUESTION 81

DRAG DROP

You plan to deploy a new image of the 64-bit version of Windows 10 by using an answer file. You need to add your company's OEM information to the answer file. What should you modify in the answer file? To answer, drag the appropriate values to the correct locations. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

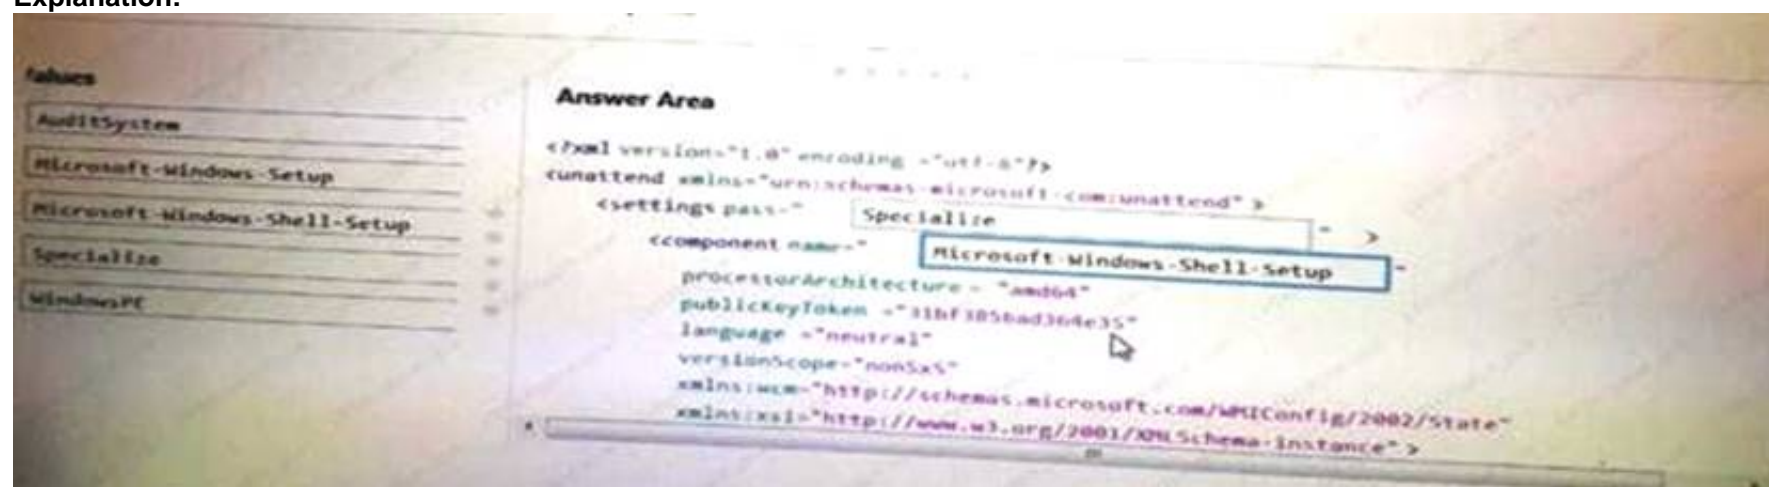

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 84

You are deploying Windows 10 and Windows Recovery Environment (Windows RE) to a computer named Computer L. Windows CK includes a custom tool. You register the Windows RF image to the image of Windows 10 on Computer 1. You need to register the Windows CK boot image to the Windows 10 image. You need to register the Windows CK command should you use?

- A. bcdedit.exe
- B. reagent.exe
- C. bcdboot.exe
- D. diskpart.exe

Answer: C

NEW QUESTION 87

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a generalized image of Windows 10 that is reseated to the Out of-Box-Experience (OOBE). You apply the image to a computer, and then you restart the computer. You need to enter audit mode on the computer. Solution: You insert the installation media for Windows 10, and then you press F8. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 89

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a generalized image of Windows 10 that is reseated to the Out-of-Box-Experience (OOBE). You apply the image to a computer, and then you restart the computer. You need to enter audit mode on the computer. Solution; You press the CTRL+ ALT+ END keyboard shortcut. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 94

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a generalized image of Windows 10 that is reseated to the Out-of Box Experience (OOBE). You apply the image to a computer, and then you restart the computer. You need to enter audit mode on the computer. Solution: You press the CTRL+ SHIFT+ F3 keyboard shortcut Does that meet the goal?

- A. Yes
- B. No

Answer: A
