

## Exam Questions AZ-600

Configuring and Operating a Hybrid Cloud with Microsoft Azure Stack Hub

<https://www.2passeasy.com/dumps/AZ-600/>

### NEW QUESTION 1

- (Exam Topic 1)

You need to identify the certificate for the integrated system in Chicago. The solution must meet the technical requirements.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Certificate issuer:

	▼
Enterprise CA	
Public CA	
Self-signed	

Certificate subject name:

	▼
adminmanagement.northcentralus.litwareinc.com	
adminportal.northcentralus.litwareinc.com	
management.northcentralus.litwareinc.com	

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

When deploying Azure Stack Hub in disconnected mode it is recommended to use certificates issued by an enterprise certificate authority. This is important because clients accessing Azure Stack Hub endpoints must be able to contact the certificate revocation list (CRL).

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-pki-certs?view=azs-2008>

### NEW QUESTION 2

- (Exam Topic 1)

You need to implement the App Service infrastructure to address the current issues and support the planned changes for Azure Functions in Boston.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To implement the planned changes, deploy:

	▼
Web worker – dedicated instances – medium	
Web worker – dedicated instances – small	
Web worker – shared instances	

To address the current issues, scale out the following App Service role:

	▼
Controller	
Front End	
Worker	

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-app-service-capacity-planning?view=azs-200>

### NEW QUESTION 3

- (Exam Topic 2)

You remove all the workloads from the int1 region and change the registration model to capacity.

You prepare additional Azure AD tenants for each partner. You need to configure multitenancy.

Which two actions should you perform for each guest tenant? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Run the Register-AzSWWithMyDirectoryTenant cmdlet and specify https://management.int1.northwind.com as the endpoint.
- B. Run the Register-AzSGuestDirectoryTenant cmdlet and specify https://management.int1.northwind.com as the endpoint.
- C. Run the Register-AzSGuestDirectoryTenant cmdlet and specify https:// adminmanagement.int1.northwind.com as the endpoint.
- D. Change the registration model to pay-as-you-use.
- E. Run the Register-AzSWWithMyDirectoryTenant cmdlet and specify https:// adminmanagement.int1.northwind.com as the endpoint.

**Answer:** AC

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-enable-multitenancy?view=azs-2008>

**NEW QUESTION 4**

- (Exam Topic 3)

Your company is a Cloud Solution Provider (CSP) that provides Azure Stack Hub services to multiple customers in a multitenant environment.

User subscriptions are linked to Azure CSP subscriptions for billing reconciliation.

You need to view the usage of all the customers for the current day and the last seven days. What should you do?

- A. Query the Azure Stack Hub usage API
- B. Query the Partner Center Usage API
- C. From Partner Center, download the daily-rated usage reconciliation CSV
- D. From Partner Center, view the usage associated to the Azure Partner Shared Services (APSS) subscription

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-provider-resource-api?view=azs-2008>

**NEW QUESTION 5**

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that uses an Active Directory Federation Services (AD FS) identity provider and capacity-based billing.

You have a plan named Plan1 that has the following quota configurations for Microsoft.Compute:

- Maximum number of Availability Sets: 10
- Maximum number of virtual machines: 50
- Maximum number of virtual machine cores: 100
- Maximum number of virtual machine scale sets: 10

You link two offers named Offer1 and Offer2 to Plan1.

Two user subscriptions named Customer1 and Customer2 are created based on Offer1. A user subscription named Customer3 is created based on Offer2.

Customer1 receives a warning that it provisioned 50 virtual machines.

You need to ensure that Customer1 can provision an additional 25 virtual machines within its existing subscription. The solution must NOT affect the quotas of the other user subscriptions.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add NewPlan as an add-on to Offer1
- B. Create a new plan named NewPlan that has the maximum number of virtual machines quota set to 75
- C. Add NewPlan to the Customer1 user subscription
- D. Create a new plan named NewPlan that has the maximum number of virtual machines quota set to 25
- E. Update the quota for Microsoft.Compute in Plan1 to have the maximum number of virtual machines set to 75
- F. Create a new offer named Offer3 based on Plan1 and create a new user subscription for Customer1 by using Offer3

**Answer:** AD

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/service-plan-offer-subscription-overview?view=azs-2008>

<https://docs.microsoft.com/en-us/azure-stack/operator/create-add-on-plan?view=azs-2008>

**NEW QUESTION 6**

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that has the following configurations:

- A deployment prefix of AzS
- A physical prefix of AzP

You need to renew the certificates for the integrated system.

To which virtual machine should you establish a PowerShell session?

- A. AzS-ERCS02
- B. AzS-CA01
- C. AzS-WAS01
- D. AzP-S1-N01

**Answer:** A

**NEW QUESTION 7**

- (Exam Topic 3)

You have an Azure Stack Hub integrated system and an offer to which users can subscribe.

You need to prevent users and operators from creating new user subscriptions based on the offer without affecting the existing user subscriptions.

What should you do?

- A. Change the offer state to Private.
- B. Change the offer state to Decommissioned.
- C. Change the offer state to Public.
- D. Delete the offer and create a new private offer.

Answer: B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-create-offer?view=azs-2008>

**NEW QUESTION 8**

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that has 10 user subscriptions. Each subscription contains approximately 50 virtual machines.

You are planning a backup and restore strategy for the integrated system.

You need to identify which type of backup to use to back up specific resources.

What should you identify for each resource? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Role-based access control (RBAC) permissions and roles:	<div>▼</div> <div>Azure Resource Manager template export</div> <div>Infrastructure backup</div> <div>Virtual machine backup</div>
Operating system disks:	<div>▼</div> <div>Azure Resource Manager template export</div> <div>Infrastructure backup</div> <div>Virtual machine backup</div>
Storage quotas:	<div>▼</div> <div>Azure Resource Manager template export</div> <div>Infrastructure backup</div> <div>Virtual machine backup</div>

A. Mastered

B. Not Mastered

Answer: A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-backup-enable-backup-console?view=azs-200>

**NEW QUESTION 9**

- (Exam Topic 3)

You have an Azure Stack Hub integrated system.

You are an operator, and you have read access to a user subscription named Fabrikam1.

Users in Fabrikam1 request help creating a custom role-based access control (RBAC) role based on an existing built-in Azure role.

You connect to the Azure subscription, create the respective role definition, and save the role definition as a JSON file.

Which three actions should you perform to create the custom role? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Request owner access to the user subscription.

B. Modify the custom role definition to include the target subscription ID as an AssignableScope, set the IsCustom field to true, and set Id to Null.

C. Connect to the administrator management endpoint and run the New-AzureRmRoleDefinition cmdlet.

D. Connect to the user management endpoint and run the New-AzureRmRoleDefinition cmdlet.

E. Modify the custom role definition to include the target default provider subscription ID as an AssignableScope, set the IsCustom field to true, and set Id to Null.

Answer: ABD

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/role-based-access-control/tutorial-custom-role-powershell>

**NEW QUESTION 10**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You plan to install an update to an Azure Stack Hub integrated system.

You need to verify whether the integrated system is healthy, and whether you can apply the update. You must achieve the goal as quickly as possible.

Solution: From a privileged endpoint (PEP) session, you run Test-AzureStack -Group "Default".

Does this meet the goal?

A. Yes

B. No

Answer: B

**Explanation:**

Reference:

https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-diagnostic-test?view=azs-2008

NEW QUESTION 10

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that is registered to an Azure Active Directory (Azure AD) tenant named contoso.com. The integrated system region name is region1.

You need to retrieve only critical infrastructure alerts from the integrated system by using the REST API. Which URI query should you use? To answer, drag the appropriate values to the correct locations. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Values	Answer Area
adminmanagement	https:// [ ] . [ ]
region1	.contoso.com/subscriptions/8f586592-077b-4433-966e-150c9c953bdd/resourcegroups/system. [ ]
management	/providers/microsoft.infrastructureinsights.
local	admin/regionhealths/ [ ]
subscription	/Alerts?\$filter=(Properties/State eq 'Active') and (Properties/Severity eq 'Critical')&\$orderby=Properties/CreatedTimestamp desc&api-version=2016-05-01"

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

https://docs.microsoft.com/en-us/azure-stack/user/azure-stack-rest-api-use?view=azs-2008

NEW QUESTION 13

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that connects to the Internet. You need to enable multitenant billing. What should you do first?

- A. Generate a service principal to connect the Azure Billing API to Azure Commerce
- B. Run the New-AzResource cmdlet
- C. Create a blob storage account named AzSCommerceStaging that stores CSV usage metadata before you send the metadata to Azure Commerce
- D. Email the registration subscription ID, resource group name, and registration name to azstcsp@microsoft.com

Answer: D

Explanation:

Reference:

https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-csp-howto-register-tenants?view=azs-2008&t

NEW QUESTION 15

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that has syslog forwarding configured. You need to remove syslog forwarding and the associated certificate.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Connect to the administrator portal	
Export the client certificate	
Select Region management	⤵ ⤴
Connect to the privileged endpoint (PEP)	⤴ ⤵
Run the Set-SyslogClient cmdlet	
Run the Set-SyslogServer cmdlet	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-integrate-security?view=azs-2008>

**NEW QUESTION 20**

- (Exam Topic 3)

You have a multitenant Azure Stack Hub integrated system for a Cloud Solution Provider (CSP). The integrated system is used by several customers.

You hire a new support technician to help manage the integrated system.

You need to configure access for the support technician. The solution must meet the following requirements: ➤ The technician must be prevented from accessing customer resources.

- The technician must be able to monitor the status of infrastructure backups.
- The technician must be able to create and manage plans, offers, and quotas.

Which built-in role should you assign to the support technician?

- A. Reader
- B. Owner
- C. Use Access Administrator
- D. Contributor
- E. Backup Operator

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-manage-permissions?view=azs-2008>

**NEW QUESTION 22**

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that uses an Azure Active Directory (Azure AD) identity provider.

You have a group named AppGroup1.

You need to provide an application with the ability to access Azure Stack Hub resources by using AppGroup1. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

**Answer Area**

Sign in to the Azure portal

Connect to the administrator portal

Add a certificate to an Azure key vault

Create an app registration

Generate a client secret

Create a managed identify

Add the app to a group

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-create-service-principals?view=azs-2008&tab>

**NEW QUESTION 23**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack Hub integrated system that connects to the Internet. The integrated system uses an Enterprise Agreement (EA) for licensing.

You are creating an Azure Resource Manager template to generate a marketplace item for a virtual machine that runs Windows Server 2019 Datacenter and a

custom application.

You need to ensure that Windows Server is licensed by using the bring-your-own-license model. Solution: You add licenseType: None to the Azure Resource Manager template.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-windows-server-faq?view=azs-2008&tabs=az>

**NEW QUESTION 25**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You plan to install an update to an Azure Stack Hub integrated system.

You need to verify whether the integrated system is healthy, and whether you can apply the update. You must achieve the goal as quickly as possible.

Solution: From the administrator management endpoint, you run Test-AzureStack –Group "UpdateReadiness".

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-diagnostic-test?view=azs-2008>

**NEW QUESTION 30**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack Hub integrated system that connects to the Internet. The integrated system uses an Enterprise Agreement (EA) for licensing.

You are creating an Azure Resource Manager template to generate a marketplace item for a virtual machine that runs Windows Server 2019 Datacenter and a custom application.

You need to ensure that Windows Server is licensed by using the bring-your-own-license model. Solution: You add licenseType: Windows\_Server to the Azure Resource Manager template. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**NEW QUESTION 34**

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that uses an Azure Active Directory (Azure AD) tenant named fabrikam.com as an identity provider. The integrated system region name is region1, and the external domain name is fabrikam.com.

The integrated system has the following domains enabled for multitenancy:

- > fabrikam.onmicrosoft.com
- > contoso.onmicrosoft.com
- > fabrikam.com
- > contoso.com

You need to disable multitenancy for contoso.com.

How should you complete the PowerShell script? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

<input type="text" value="-AdminResourceManagerEndpoint"/>	
<div>Unregister-AzSGuestDirectoryTenant</div> <div>Unregister-AzsWithMyDirectoryTenant</div> <div>Unregister-AzureRmResourceProvider</div> <div>Update-AzsHomeDirectoryTenant</div>	<div>"https://adminmanagement.region1.contoso.com"</div> <div>"https://adminmanagement.region1.fabrikam.com"</div> <div>"https://adminportal.region1.contoso.com"</div> <div>"https://adminportal.region1.fabrikam.com"</div>
<input type="text" value="-DirectoryTenantName"/>	<input type="text" value="-GuestDirectoryTenantName"/>
<div>"contoso.com"</div> <div>"contoso.onmicrosoft.com"</div> <div>"fabrikam.com"</div> <div>"fabrikam.onmicrosoft.com"</div>	<div>"contoso.com"</div> <div>"contoso.onmicrosoft.com"</div> <div>"fabrikam.com"</div> <div>"fabrikam.onmicrosoft.com"</div>
<input type="text" value="-ResourceGroupName \$RGName"/>	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 36**

- (Exam Topic 3)

You have an Azure Stack Hub integrated system.

You need to update the integrated system to use a non-Windows NTP service that has a host name of ntp1.contoso.com.

How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

	-TimeServer		-resync
<div> <div>▼</div> <div> Get-AzSTimeSource  Reset-DatacenterintegrationConfiguration  Set-AzsTimeSource  Set-Culture  Set-Telemetry  Set-TimeZone </div> </div>		<div> <div>▼</div> <div> "ntp1.contoso.com"  "ntp1.contoso.com,0x0"  "ntp1.contoso.com,0x8" </div> </div>	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-configure-time?view=azs-2008>

**NEW QUESTION 38**

- (Exam Topic 3)

You plan to deploy a highly available Azure App Service resource provider to an Azure Stack Hub integrated system.

You need to ensure that the App Service resource meets the prerequisites. The solution must minimize costs. Which two resources should you deploy? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a highly available Microsoft SQL Server 2019 instance in the default provider subscription
- B. a highly available file server in a dedicated user subscription
- C. a highly available file server in the default provider subscription
- D. a highly available Microsoft SQL Server 2019 instance in a dedicated user subscription
- E. a single file server in the default provider subscription
- F. a single Microsoft SQL Server 2019 instance in the default provider subscription

**Answer:** AC

**Explanation:**

Reference:

<https://blog.apps.id.au/adventures-cloud-operator-highly-available-app-service-1-4-azure-stack-step-2-deployme>

**NEW QUESTION 42**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack Hub integrated system that connects to the Internet. The integrated system uses an Enterprise Agreement (EA) for licensing.

You are creating an Azure Resource Manager template to generate a marketplace item for a virtual machine that runs Windows Server 2019 Datacenter and a custom application.

You need to ensure that Windows Server is licensed by using the bring-your-own-license model. Solution: You remove the licenseType section from the Azure Resource Manager template. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 44**

- (Exam Topic 3)

You start the update of an Azure Stack Hub integrated system. The Update run details are shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

Answer Area

Currently, the update status is [answer choice].

running with three errors  
succeeded with three errors  
failed and the update will retry automatically  
failed and the update will NOT retry automatically

In this situation, the Azure Stack Hub operator should [answer choice].

cancel the update  
contact Microsoft Support  
run the Repair-AzsScaleUnitNode cmdlet  
run the Restart-AzsInfrastructureRole cmdlet  
run the Stop-AzureStack and Start-AzureStack cmdlets

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-apply-updates?view=azs-2008>

NEW QUESTION 45

- (Exam Topic 3)  
You have an Azure Stack Hub integrated system.  
A scale unit node has a hardware failure.  
You replace the physical server based on the field replacement unit (FRU) documentation of the OEM hardware vendor.  
You need to reintroduce the node to the scale unit. Which PowerShell cmdlet should you run?

- A. Enable-AzsScaleUnitNode
- B. Repair-AzsScaleUnitNode
- C. Start-AzsScaleUnitNode
- D. Restart-AzsInfrastructureRole
- E. Add-AzsScaleUnitNode

Answer: B

Explanation:  
Reference:  
<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-node-actions?view=azs-2008&tabs=az1#repair>
