

Exam Questions Identity-and-Access-Management-Designer

Salesforce Certified Identity and Access Management Designer (SP19)

<https://www.2passeasy.com/dumps/Identity-and-Access-Management-Designer/>

NEW QUESTION 1

Universal Container's (UC) is using Salesforce Experience Cloud site for its container wholesale business. The identity architect wants to an authentication provider for the new site.

Which two options should be utilized in creating an authentication provider? Choose 2 answers

- A. A custom registration handler can be set.
- B. A custom error URL can be set.
- C. The default login user can be set.
- D. The default authentication provider certificate can be set.

Answer: AB

NEW QUESTION 2

Universal containers (UC) uses a home-grown employee portal for their employees to collaborate. UC decides to use salesforce ideas to allow the employees to post ideas from the employee portal. When clicking some links in the employee portal, the users should be redirected to salesforce, authenticated, and presented with relevant pages. What scope should be requested when using the OAuth token to meet this requirement?

- A. Web
- B. Full
- C. API
- D. Visualforce

Answer: A

NEW QUESTION 3

Universal containers wants salesforce inbound OAuth-enabled integration clients to use SAML-BASED single Sign-on for authentication. What OAuth flow would be recommended in this scenario?

- A. User-Agent OAuth flow
- B. SAML assertion OAuth flow
- C. User-Token OAuth flow
- D. Web server OAuth flow

Answer: B

NEW QUESTION 4

Northern Trail Outfitters (NTO) is planning to roll out a partner portal for its distributors using Experience Cloud. NTO would like to use an external identity provider (IdP) and for partners to register for access to the portal. Each partner should be allowed to register only once to avoid duplicate accounts with Salesforce. What should a identity architect recommend to create partners?

- A. On successful creation of Partners using Self Registration page in Experience Cloud, create identity in Ping.
- B. Create a custom page in Experience Cloud to self register partner with Experience Cloud and Ping identity store.
- C. Create a custom web page in the Portal and create users in the IdP and Experience Cloud using published APIs.
- D. Allow partners to register through the IdP and create partner users in Salesforce through an API.

Answer: B

NEW QUESTION 5

Universal Containers (UC) wants to build a few applications that leverage the Salesforce REST API. UC has asked its Architect to describe how the API calls will be authenticated to a specific user. Which two mechanisms can the Architect provide? Choose 2 Answers

- A. Authentication Token
- B. Session ID
- C. Refresh Token
- D. Access Token

Answer: CD

NEW QUESTION 6

Universal containers (UC) wants to implement Delegated Authentication for a certain subset of Salesforce users. Which three items should UC take into consideration while building the Web service to handle the Delegated Authentication request? Choose 3 answers

- A. The web service needs to include Source IP as a method parameter.
- B. UC should whitelist all salesforce ip ranges on their corporate firewall.
- C. The web service can be written using either the soap or rest protocol.
- D. Delegated Authentication is enabled for the system administrator profile.
- E. The return type of the Web service method should be a Boolean value

Answer: ABE

NEW QUESTION 7

Universal containers (UC) is setting up Delegated Authentication to allow employees to log in using their corporate credentials. UC's security team is concerned about the risk of exposing the corporate login service on the Internet and has asked that a reliable trust mechanism be put in place between the login service and salesforce. What mechanism should an architect put in place to enable a trusted connection between the login services and salesforce?

- A. Include client ID and client secret in the login header callout.
- B. Set up a proxy server for the login service in the DMZ.
- C. Require the use of Salesforce security Tokens on password.
- D. Enforce mutual Authentication between systems using SSL.

Answer: C

NEW QUESTION 8

A technology enterprise is planning to implement single sign-on login for users. When users log in to the Salesforce User object custom field, data should be populated for new and existing users.

Which two steps should an identity architect recommend? Choose 2 answers

- A. Implement Auth.SamlJitHandler Interface.
- B. Create and update methods.
- C. Implement RegistrationHandler Interface.
- D. Implement SessionManagement Class.

Answer: AB

NEW QUESTION 9

Northern Trail Outfitters is implementing a business-to-business (B2B) collaboration site using Salesforce Experience Cloud. The partners will authenticate with an existing identity provider and the solution will utilize Security Assertion Markup Language (SAML) to provide single sign-on to Salesforce. Delegated administration will be used in the Experience Cloud site to allow the partners to administer their users' access.

How should a partner identity be provisioned in Salesforce for this solution?

- A. Create only a contact.
- B. Create a contactless user.
- C. Create a user and a related contact.
- D. Create a person account.

Answer: C

NEW QUESTION 10

Universal Containers wants to implement SAML SSO for their internal Salesforce users using a third-party IdP. After some evaluation, UC decides not to set up My Domain for their Salesforce org. How does that decision impact their SSO implementation?

- A. SP-initiated SSO will not work.
- B. Neither SP- nor IdP-initiated SSO will work.
- C. Either SP- or IdP-initiated SSO will work.
- D. IdP-initiated SSO will not work.

Answer: B

NEW QUESTION 10

An Identity and Access Management (IAM) Architect is recommending Identity Connect to integrate Microsoft Active Directory (AD) with Salesforce for user provisioning, deprovisioning and single sign-on (SSO).

Which feature of Identity Connect is applicable for this scenario?

- A. When Identity Connect is in place, if a user is deprovisioned in an on-premise AD, the user's Salesforce session is revoked immediately.
- B. If the number of provisioned users exceeds Salesforce license allowances, Identity Connect will start disabling the existing Salesforce users in First-in, First-out (FIFO) fashion.
- C. Identity Connect can be deployed as a managed package on Salesforce org, leveraging High Availability of Salesforce Platform out-of-the-box.
- D. When configured, Identity Connect acts as an identity provider to both Active Directory and Salesforce, thus providing SSO as a default feature.

Answer: A

NEW QUESTION 13

An architect needs to advise the team that manages the identity provider how to differentiate Salesforce from other service providers. What SAML SSO setting in Salesforce provides this capability?

- A. Entity ID
- B. Issuer
- C. Identity provider login URL
- D. SAML identity location

Answer: A

NEW QUESTION 16

Northern Trail Outfitters (NTO) uses Salesforce Experience Cloud sites (previously known as Customer Community) to provide a digital portal where customers can login using their Google account.

NTO would like to automatically create a case record for first time users logging into Salesforce Experience Cloud.

What should an Identity architect do to fulfill the requirement?

- A. Configure an authentication provider for Social Login using Google and a custom registration handler.
- B. Implement a Just-in-Time handler class that has logic to create cases upon first login.
- C. Create an authentication provider for Social Login using Google and leverage standard registration handler.
- D. Implement a login flow with a record create component for Case.

Answer: D

NEW QUESTION 19

Ttie executive sponsor for an organization has asked if Salesforce supports the ability to embed a login widget into its service providers in order to create a more seamless user experience.

What should be used and considered before recommending it as a solution on the Salesforce Platform?

- A. OpenID Connect Web Server Flo
- B. Determine if the service provider is secure enough to store the client secret on.
- C. Embedded Logi
- D. Identify what level of UI customization will be required to make it match the service providers look and feel.
- E. Salesforce REST api
- F. Ensure that Secure Sockets Layer (SSL) connection for the integration is used.
- G. Embedded Logi
- H. Consider whether or not it relies on third party cookies which can cause browser compatibility issues.

Answer: C

NEW QUESTION 23

Universal containers wants to set up SSO for a selected group of users to access external applications from salesforce through App launcher. Which three steps must be completed in salesforce to accomplish the goal?

- A. Associate user profiles with the connected Apps.
- B. Complete my domain and Identity provider setup.
- C. Create connected apps for the external applications.
- D. Complete single Sign-on settings in security controls.
- E. Create named credentials for each external system.

Answer: ABC

NEW QUESTION 28

Which two are valid choices for digital certificates when setting up two-way SSL between Salesforce and an external system. Choose 2 answers

- A. Use a trusted CA-signed certificate for salesforce and a trusted CA-signed cert for the external system
- B. Use a trusted CA-signed certificate for salesforce and a self-signed cert for the external system
- C. Use a self-signed certificate for salesforce and a self-signed cert for the external system
- D. Use a self-signed certificate for salesforce and a trusted CA-signed cert for the external system

Answer: CD

NEW QUESTION 33

An identity architect wants to secure Salesforce APIs using Security Assertion Markup Language (SAML). For secunty purposes, administrators will need to authorize the applications that will be consuming the APIs.

Which Salesforce OAuth authorization flow should be used?

- A. OAuth 2-0 SAML Bearer Assertion Flow
- B. OAuth 2.0 JWT Bearer Flow
- C. SAML Assertion Flow
- D. OAuth 2.0 User-Agent Flow

Answer: C

NEW QUESTION 38

Universal containers(UC) has decided to build a new, highly sensitive application on Force.com platform. The security team at UC has decided that they want users to provide a fingerprint in addition to username/Password to authenticate to this application. How can an architect support fingerprints as a form of identification for salesforce Authentication?

- A. Use salesforce Two-factor Authentication with callouts to a third-party fingerprint scanning application.
- B. Use Delegated Authentication with callouts to a third-party fingerprint scanning application.
- C. Use an appexchange product that does fingerprint scanning with native salesforce identity confirmation.
- D. Use custom login flows with callouts to a third-party fingerprint scanning application.

Answer: D

NEW QUESTION 40

Universal Containers is using OpenID Connect to enable a connection from their new mobile app to its production Salesforce org.

What should be done to enable the retrieval of the access token status for the OpenID Connect connection?

- A. Query using OpenID Connect discovery endpoint.
- B. A Leverage OpenID Connect Token Introspection.
- C. Create a custom OAuth scope.
- D. Enable cross-origin resource sharing (CORS) for the /services/oauth2/token endpoint.

Answer: B

NEW QUESTION 43

In a typical SSL setup involving a trusted party and trusting party, what consideration should an Architect take into account when using digital certificates?

- A. Use of self-signed certificate leads to lower maintenance for trusted party because multiple self-signed certs need to be maintained.
- B. Use of self-signed certificate leads to higher maintenance for trusted party because they have to act as the trusted CA
- C. Use of self-signed certificate leads to lower maintenance for trusting party because there is no trusted CA cert to maintain.
- D. Use of self-signed certificate leads to higher maintenance for trusting party because the cert needs to be added to their truststore.

Answer: C

NEW QUESTION 46

A group of users try to access one of universal containers connected apps and receive the following error message : "Failed : Not approved for access". what is most likely to cause of the issue?

- A. The use of high assurance sections are required for the connected App.
- B. The users do not have the correct permission set assigned to them.
- C. The connected App setting "All users may self-authorize" is enabled.
- D. The salesforce administrators gave revoked the Oauth authorization.

Answer: B

NEW QUESTION 48

Universal Containers (UC) has a strict requirement to authenticate users to Salesforce using their mainframe credentials. The mainframe user store cannot be accessed from a SAML provider. UC would also like to have users in Salesforce created on the fly if they provide accurate mainframe credentials. How can the Architect meet these requirements?

- A. Use a Salesforce Login Flow to call out to a web service and create the user on the fly.
- B. Use the SOAP API to create the user when created on the mainframe; implement Delegated Authentication.
- C. Implement Just-In-Time Provisioning on the mainframe to create the user on the fly.
- D. Implement OAuth User-Agent Flow on the mainframe; use a Registration Handler to create the user on the fly.

Answer: C

NEW QUESTION 53

Universal containers (UC) has an e-commerce website while customers can buy products, make payments, and manage their accounts. UC decides to build a customer Community on Salesforce and wants to allow the customers to access the community for their accounts without logging in again. UC decides to implement ansp-Initiated SSO using a SAML-BASED complaint IDP. In this scenario where salesforce is the service provider, which two activities must be performed in salesforce to make sp-Initiated SSO work? Choose 2 answers

- A. Configure SAML SSO settings.
- B. Configure Delegated Authentication
- C. Create a connected App
- D. Set up my domain

Answer: AD

NEW QUESTION 57

which three are features of federated Single Sign-on solutions? Choose 3 answers

- A. It federates credentials control to authorized applications.
- B. It establishes trust between Identity store and service provider.
- C. It solves all identity and access management problems.
- D. It improves affiliated applications adoption rates.
- E. It enables quick and easy provisioning and deactivating of users.

Answer: BCE

NEW QUESTION 61

Universal containers (UC) is setting up their customer Community self-registration process. They are uncomfortable with the idea of assigning new users to a default account record. What will happen when customers self-register in the community?

- A. The self-registration process will produce an error to the user.
- B. The self-registration page will ask user to select an account.
- C. The self-registration process will create a person Account record.
- D. The self-registration page will create a new account record.

Answer: A

NEW QUESTION 63

A third-party app provider would like to have users provisioned via a service endpoint before users access their app from Salesforce. What should an identity architect recommend to configure the requirement with limited changes to the third-party app?

- A. Use a connected app with user provisioning flow.
- B. Create Canvas app in Salesforce for third-party app to provision users.
- C. Redirect users to the third-party app for registration.
- D. Use Salesforce identity with Security Assertion Markup Language (SAML) for provisioning users.

Answer: A

NEW QUESTION 65

Northern Trail Outfitters (NTO) uses a Security Assertion Markup Language (SAML)-based Identity Provider (IdP) to authenticate employees to all systems. The IdP authenticates users against a Lightweight Directory Access Protocol (LDAP) directory and has access to user information. NTO wants to minimize Salesforce license usage since only a small percentage of users need Salesforce.

What is recommended to ensure new employees have immediate access to Salesforce using their current IdP?

- A. Install Salesforce Identity Connect to automatically provision new users in Salesforce the first time they attempt to login.
- B. Build an integration that queries LDAP periodically and creates new active users in Salesforce.
- C. Configure Just-in-Time provisioning using SAML attributes to create new Salesforce users as necessary when a new user attempts to login to Salesforce.
- D. Build an integration that queries LDAP and creates new inactive users in Salesforce and use a login flow to activate the user at first login.

Answer: C

NEW QUESTION 67

What are three capabilities of Delegated Authentication? Choose 3 answers

- A. It can be assigned by Custom Permissions.
- B. It can connect to SOAP services.
- C. It can be assigned by Permission Sets.
- D. It can be assigned by Profiles.
- E. It can connect to REST services.

Answer: BCE

NEW QUESTION 71

Universal Containers (UC) uses Active Directory (AD) as their identity store for employees and must continue to do so for network access. UC is undergoing a major transformation program and moving all of their enterprise applications to cloud platforms including Salesforce, Workday, and SAP HANA. UC needs to implement an SSO solution for accessing all of the third-party cloud applications and the CIO is inclined to use Salesforce for all of their identity and access management needs.

Which two Salesforce license types does UC need for its employees? Choose 2 answers

- A. Company Community and Identity licenses
- B. Identity and Identity Connect licenses
- C. Chatter Only and Identity licenses
- D. Salesforce and Identity Connect licenses

Answer: BD

NEW QUESTION 76

Universal Containers (UC) has built a custom token-based Two-factor authentication (2FA) system for their existing on-premise applications. They are now implementing Salesforce and would like to enable a

Two-factor login process for it, as well. What is the recommended solution as Architect should consider?

- A. Use the custom 2FA system for on-premise applications and native 2FA for Salesforce.
- B. Replace the custom 2FA system with an AppExchange App that supports on-premise application and Salesforce.
- C. Use Custom Login Flows to connect to the existing custom 2FA system for use in Salesforce.
- D. Replace the custom 2FA system with Salesforce 2FA for on-premise applications and Salesforce.

Answer: D

NEW QUESTION 77

In an SP-Initiated SAML SSO setup where the user tries to access a resource on the Service Provider, What HTTP param should be used when submitting a SAML Request to the IdP to ensure the user is returned to the intended resource after authentication?

- A. RedirectURL
- B. RelayState
- C. DisplayState
- D. StartURL

Answer: B

NEW QUESTION 82

Universal Containers (UC) has implemented SSO according to the diagram below. uses SAML while Salesforce Org 1 uses OAuth 2.0. Users usually start their day by first attempting to log into Salesforce Org 2 and then later in the day, they will log into either the Financial System or CPQ system depending upon their job position. Which two systems are acting as Identity Providers?

- A. Financial System
- B. Pingfederate
- C. Salesforce Org 2
- D. Salesforce Org 1

Answer: BD

NEW QUESTION 84

Northern Trail Outfitters (NTO) leverages Microsoft Active Directory (AD) for management of employee usernames, passwords, permissions, and asset access. NTO also owns a third-party single sign-on (SSO) solution. The third-party SSO solution is used for all corporate applications, including Salesforce.

NTO has asked an architect to explore Salesforce Identity Connect for automatic provisioning and deprovisioning of users in Salesforce. What role does identity Connect play in the outlined requirements?

- A. Service Provider
- B. Single Sign-On
- C. Identity Provider
- D. User Management

Answer: D

NEW QUESTION 86

Universal containers (UC) has built a custom based Two-factor Authentication (2fa) system for their existing on-premise applications. They are now implementing Salesforce and would like to enable a Two-factor login process for it, as well. What is the recommended solution an architect should consider?

- A. Replace the custom 2fa system with Salesforce 2fa for on-premise application and Salesforce.
- B. Use the custom 2fa system for on-premise applications and native 2fa for Salesforce.
- C. Replace the custom 2fa system with an app exchange app that supports on-premise applications and Salesforce.
- D. Use custom login flows to connect to the existing custom 2fa system for use in Salesforce.

Answer: D

NEW QUESTION 89

Universal Containers wants to allow its customers to log in to its Experience Cloud via a third party authentication provider that supports only the OAuth protocol. What should an identity architect do to fulfill this requirement?

- A. Contact Salesforce Support and enable delegate single sign-on.
- B. Create a custom external authentication provider.
- C. Use certificate-based authentication.
- D. Configure OpenID Connect authentication provider.

Answer: B

NEW QUESTION 93

An identity architect has been asked to recommend a solution that allows administrators to configure personalized alert messages to users before they land on the Experience Cloud site (formerly known as Community) homepage. What is recommended to fulfill this requirement with the least amount of customization?

- A. Customize the registration handler Apex class to create a routing logic navigating to different home pages based on the user profile.
- B. Use Login Flows to add a screen that shows personalized alerts.
- C. Build a Lightning web Component (LWC) for a homepage that shows custom alerts.
- D. Create custom metadata that stores user alerts and use a LWC to display alerts.

Answer: B

NEW QUESTION 98

A large consumer company is planning to create a community and will require login through the customer's social identity. The following requirements must be met:

- * 1. The customer should be able to login with any of their social identities, however Salesforce should only have one user per customer.
- * 2. Once the customer has been identified with a social identity, they should not be required to authorize Salesforce.
- * 3. The customer's personal details from the social sign-on need to be captured when the customer logs into Salesforce using their social identity.
- * 3. If the customer modifies their personal details in the social site, the changes should be updated in Salesforce.

Which two options allow the Identity Architect to fulfill the requirements? Choose 2 answers

- A. Use Login Flows to call an authentication registration handler to provision the user before logging the user into the community.
- B. Use authentication providers for social sign-on and use the custom registration handler to insert or update personal details.
- C. Redirect the user to a custom page that allows the user to select an existing social identity for login.
- D. Use the custom registration handler to link social identities to Salesforce identities.

Answer: BD

NEW QUESTION 102

Northern Trail Outfitters (NTO) is setting up Salesforce to authenticate users with an external identity provider. The NTO Salesforce Administrator is having trouble getting things setup.

What should an identity architect use to show which part of the login assertion is fading?

- A. SAML Metadata file importer
- B. Identity Provider Metadata download
- C. Connected App Manager
- D. Security Assertion Markup Language Validator

Answer: D

NEW QUESTION 104

Universal Containers (UC) has implemented SAML SSO to enable seamless access across multiple applications. UC has regional Salesforce orgs and wants its users to be able to access them from their main Salesforce org seamlessly. Which action should an architect recommend?

- A. Configure the main Salesforce org as an Authentication provider.
- B. Configure the main Salesforce org as the Identity provider.

- C. Configure the regional salesforce orgs as Identity Providers.
- D. Configure the main Salesforce org as a service provider.

Answer: B

NEW QUESTION 106

Universal containers (UC) has multiple salesforce orgs and would like to use a single identity provider to access all of their orgs. How should UC'S architect enable this behavior?

- A. Ensure that users have the same email value in their user records in all of UC's salesforce orgs.
- B. Ensure the same username is allowed in multiple orgs by contacting salesforce support.
- C. Ensure that users have the same Federation ID value in their user records in all of UC's salesforce orgs.
- D. Ensure that users have the same alias value in their user records in all of UC's salesforce orgs.

Answer: C

NEW QUESTION 108

Universal containers(UC) has implemented SAML-BASED single Sign-on for their salesforce application and is planning to provide access to salesforce on mobile devices using the salesforce1 mobile app. UC wants to ensure that single Sign-on is used for accessing the salesforce1 mobile app. Which two recommendations should the architect make? Choose 2 answers

- A. Use the existing SAML SSO flow along with user agent flow.
- B. Configure the embedded Web browser to use my domain URL.
- C. Use the existing SAML SSO flow along with Web server flow
- D. Configure the salesforce1 app to use the my domain URL

Answer: AD

NEW QUESTION 111

What is one of the roles of an Identity Provider in a Single Sign-on setup using SAML?

- A. Validate token
- B. Create token
- C. Consume token
- D. Revoke token

Answer: B

NEW QUESTION 115

Which three are features of federated Single sign-on solutions? Choose 3 Answers

- A. It establishes trust between Identity Store and Service Provider.
- B. It federates credentials control to authorized applications.
- C. It solves all identity and access management problems.
- D. It improves affiliated applications adoption rates.
- E. It enables quick and easy provisioning and deactivating of users.

Answer: ADE

NEW QUESTION 120

Universal Containers (UC) uses Salesforce as a CRM and identity provider (IdP) for their Sales Team to seamlessly login to internaJ portals. The IT team at UC is now evaluating Salesforce to act as an IdP for its remaining employees. Which Salesforce license is required to fulfill this requirement?

- A. External Identity
- B. Identity Verification
- C. Identity Connect
- D. Identity Only

Answer: D

NEW QUESTION 123

Northern Trail Outfitters (NTO) has a number of employees who do NOT need access Salesforce objects. Trie employees should sign in to a custom Benefits web app using their Salesforce credentials. Which license should the identity architect recommend to fulfill this requirement?

- A. Identity Only License
- B. External Identity License
- C. Identity Verification Credits Add-on License
- D. Identity Connect License

Answer: A

NEW QUESTION 127

Universal Containers (UC) has a classified information system that its call center team uses only when they are working on a case with a record type "Classified".

They are only allowed to access the system when they own an open "Classified" case, and their access to the system is removed at all other times. They would like to implement SAML SSO with Salesforce as the IdP, and automatically allow or deny the staff's access to the classified information system based on whether they currently own an open "Classified" case record when they try to access the system using SSO. What is the recommended solution for automatically allowing or denying the access to the classified information system based on the open "classified" case record criteria?

- A. Use Salesforce reports to identify users that currently owns open "Classified" cases and should be granted access to the Classified information system.
- B. Use Apex trigger on case to dynamically assign permission Sets that Grant access when an user is assigned with an open "Classified" case, and remove it when the case is closed.
- C. Use Custom SAML JIT Provisioning to dynamically query the user's open "Classified" cases when attempting to access the classified information system.
- D. Use a Common Connected App Handler using Apex to dynamically allow access to the system based on whether the staff owns any open "Classified" Cases.

Answer: D

NEW QUESTION 132

Universal Containers (UC) uses Salesforce for its customer service agents. UC has a proprietary system for order tracking which supports Security Assertion Markup Language (SAML) based single sign-on. The VP of customer service wants to ensure only active Salesforce users should be able to access the order tracking system which is only visible within Salesforce.

What should be done to fulfill the requirement? Choose 2 answers

- A. Setup Salesforce as an identity provider (IdP) for order Tracking.
- B. Set up the Corporate Identity store as an identity provider (IdP) for Order Tracking,
- C. Customize Order Tracking to initiate a REST call to validate users in Salesforce after login.
- D. Setup Order Tracking as a Canvas app in Salesforce to POST IdP initiated SAML assertion.

Answer: AB

NEW QUESTION 134

Universal Containers (UC) has a mobile application for its employees that uses data from Salesforce as well as uses Salesforce for Authentication purposes. UC wants its mobile users to only enter their credentials the first time they run the app. The application has been live for a little over 6 months, and all of the users who were part of the initial launch are complaining that they have to re-authenticate. UC has also recently changed the URI Scheme associated with the mobile app. What should the Architect at UC first investigate? Universal Containers (UC) has a mobile application for its employees that uses data from Salesforce as well as uses Salesforce for Authentication purposes. UC wants its mobile users to only enter their credentials the first time they run the app. The application has been live for a little over 6 months, and all of the users who were part of the initial launch are complaining that they have to re-authenticate. UC has also recently changed the URI Scheme associated with the mobile app. What should the Architect at UC first investigate?

- A. Check the Refresh Token policy defined in the Salesforce Connected App.
- B. Validate that the users are checking the box to remember their passwords.
- C. Verify that the Callback URL is correctly pointing to the new URI Scheme.
- D. Confirm that the access Token's Time-To-Live policy has been set appropriately.

Answer: A

NEW QUESTION 138

Universal Containers (UC) wants to use Salesforce for sales orders and a legacy system for order fulfillment. The legacy system must update the status of orders in Salesforce in real time as they are fulfilled. UC decides to use OAuth for connecting the legacy system to Salesforce. What OAuth flow should be considered that doesn't require storing credentials, client secret or refresh tokens?

- A. Web Server flow
- B. JWT Bearer Token flow
- C. Username-Password flow
- D. User Agent flow

Answer: B

NEW QUESTION 143

Universal containers (UC) has implemented ansP-Initiated SAML flow between an external IDP and Salesforce. A user at UC is attempting to login to Salesforce for the first time and is being prompted for Salesforce credentials instead of being shown the IDP login page. What is the likely cause of the issue?

- A. The "Redirect to Identity Provider" option has been selected in the my domain configuration.
- B. The user has not configured the Salesforce1 mobile app to use my domain for login
- C. The "Redirect to identity provider" option has not been selected the SAML configuration.
- D. The user has not been granted the "Enable single Sign-on" permission

Answer: B

NEW QUESTION 148

The security team at Universal Containers (UC) has identified exporting reports as a high-risk action and would like to require users to be logged into Salesforce with their Active Directory (AD) credentials when doing so. For all other users of Salesforce, users should be allowed to use AD Credentials or Salesforce credentials. What solution should be recommended to prevent exporting reports except when logged in using AD credentials while maintaining the ability to view reports when logged in with Salesforce credentials?

- A. Use SAML Federated Authentication and block access to reports when accessed through a Standard Assurance session.
- B. Use SAML Federated Authentication and Custom SAML JIT Provisioning to dynamically add or remove a permission set that grants the Export Reports Permission.
- C. Use SAML federated Authentication, treat SAML Sessions as High Assurance, and raise the session level required for exporting reports.
- D. Use SAML federated Authentication with a Login Flow to dynamically add or remove a Permission Set that grants the Export Reports Permission.

Answer: C

NEW QUESTION 153

How should an Architect automatically redirect users to the login page of the external Identity provider when using an SP-Initiated SAML flow with Salesforce as a Service Provider?

- A. Use visualforce as the landing page for My Domain to redirect users to the Identity Provider login Page.
- B. Enable the Redirect to the Identity Provider setting under Authentication Services on the My domain Configuration.
- C. Remove the Login page from the list of Authentication Services on the My Domain configuration.
- D. Set the Identity Provider as default and enable the Redirect to the Identity Provider setting on the SAML Configuration.

Answer: C

NEW QUESTION 158

Universal containers (UC) has a custom, internal-only, mobile billing application for users who are commonly out of the office. The app is configured as a connected App in salesforce. Due to the nature of this app, UC would like to take the appropriate measures to properly secure access to the app. Which two are recommendations to make the UC? Choose 2 answers

- A. Disallow the use of single Sign-on for any users of the mobile app.
- B. Require high assurance sessions in order to use the connected App
- C. Use Google Authenticator as an additional part of the logical processes.
- D. Set login IP ranges to the internal network for all of the app users profiles.

Answer: BC

NEW QUESTION 159

Universal Containers (UC) built an integration for their employees to post, view, and vote for ideas in Salesforce from an internal Company portal. When ideas are posted in Salesforce, links to the ideas are created in the company portal pages as part of the integration process. The Company portal connects to Salesforce using OAuth. Everything is working fine, except when users click on links to existing ideas, they are always taken to the Ideas home page rather than the specific idea, after authorization. Which OAuth URL parameter can be used to retain the original requested page so that a user can be redirected correctly after OAuth authorization?

- A. Redirect_uri
- B. State
- C. Scope
- D. Callback_uri

Answer: A

NEW QUESTION 162

After a recent audit, universal containers was advised to implement Two-factor Authentication for all of their critical systems, including salesforce. Which two actions should UC consider to meet this requirement? Choose 2 answers

- A. Require users to provide their RSA token along with their credentials.
- B. Require users to supply their email and phone number, which gets validated.
- C. Require users to enter a second password after the first Authentication
- D. Require users to use a biometric reader as well as their password

Answer: AD

NEW QUESTION 164

Universal Containers uses Salesforce as an identity provider and Concur as the Employee Expense management system. The HR director wants to ensure Concur accounts for employees are created only after the appropriate approval in the Salesforce org. Which three steps should the identity architect use to implement this requirement? Choose 3 answers

- A. Create an approval process for a custom object associated with the provisioning flow.
- B. Create a connected app for Concur in Salesforce.
- C. Enable User Provisioning for the connected app.
- D. Create an approval process for user object associated with the provisioning flow.
- E. Create an approval process for UserProvisioningRequest object associated with the provisioning flow.

Answer: BCE

NEW QUESTION 168

customer service representatives at Universal containers (UC) are complaining that whenever they click on links to case records and are asked to login with SAML SSO, they are being redirected to the salesforce home tab and not the specific case record. What item should an architect advise the identity team at UC to investigate first?

- A. My domain is configured and active within salesforce.
- B. The salesforce SSO settings are using http post
- C. The identity provider is correctly preserving the Relay state
- D. The users have the correct Federation ID within salesforce.

Answer: C

NEW QUESTION 173

Universal Containers is implementing Salesforce Identity to broker authentication from its enterprise single sign-on (SSO) solution through Salesforce to third party applications using SAML.

What role does Salesforce Identity play in its relationship with the enterprise SSO system?

- A. Identity Provider (IdP)
- B. Resource Server
- C. Service Provider (SP)
- D. Client Application

Answer: C

NEW QUESTION 174

Universal Containers (UC) uses Global Shipping (GS) as one of their shipping vendors. Regional leads of GS need access to UC's Salesforce instance for reporting damage of goods using Cases. The regional leads also need access to dashboards to keep track of regional shipping KPIs. UC internally uses a third-party cloud analytics tool for capacity planning and UC decided to provide access to this tool to a subset of GS employees. In addition to regional leads, the GS capacity planning team would benefit from access to this tool. To access the analytics tool, UC IT has set up Salesforce as the Identity provider for Internal users and would like to follow the same approach for the GS users as well. What are the most appropriate license types for GS Regional Leads and the GS Capacity Planners? Choose 2 Answers

- A. Customer Community Plus license for GS Regional Leads and External Identity for GS Capacity Planners.
- B. Customer Community Plus license for GS Regional Leads and Customer Community license for GS Capacity Planners.
- C. Identity License for GS Regional Leads and External Identity license for GS capacity Planners.
- D. Customer Community license for GS Regional Leads and Identity license for GS Capacity Planners.

Answer: BD

NEW QUESTION 176

A group of users try to access one of Universal Containers' Connected Apps and receive the following error message: "Failed: Not approved for access." What is the most likely cause of this issue?

- A. The Connected App settings "All users may self-authorize" is enabled.
- B. The Salesforce Administrators have revoked the OAuth authorization.
- C. The Users do not have the correct permission set assigned to them.
- D. The User of High Assurance sessions are required for the Connected App.

Answer: C

NEW QUESTION 177

Universal Containers (UC) would like its community users to be able to register and log in with LinkedIn or Facebook Credentials. UC wants users to clearly see Facebook & LinkedIn Icons when they register and login. What are the two recommended actions UC can take to achieve this Functionality? Choose 2 answers

- A. Enable Facebook and LinkedIn as Login options in the login section of the Community configuration.
- B. Create custom Registration Handlers to link LinkedIn and Facebook accounts to user records.
- C. Store the LinkedIn or Facebook user IDs in the Federation ID field on the Salesforce User record.
- D. Create custom buttons for Facebook and LinkedIn using JavaScript/CSS on a custom Visualforce page.

Answer: AB

NEW QUESTION 182

A company's external application is protected by Salesforce through OAuth. The identity architect for the project needs to limit the level of access to the data of the protected resource in a flexible way.

What should be done to improve security?

- A. Select "Admin approved users are pre-authorized" and assign specific profiles.
- B. Create custom scopes and assign to the connected app.
- C. Define a permission set that grants access to the app and assign to authorized users.
- D. Leverage external objects and data classification policies.

Answer: B

NEW QUESTION 186

Northern Trail Outfitters (NTO) is planning to build a new customer service portal and wants to use passwordless login, allowing customers to login with a one-time passcode sent to them via email or SMS.

How should the quantity of required Identity Verification Credits be estimated?

- A. Each community comes with 10,000 Identity Verification Credits per month and only customers with more than 10,000 logins a month should estimate additional SMS verifications needed.
- B. Identity Verification Credits are consumed with each SMS (text message) sent and should be estimated based on the number of login verification challenges for SMS verification users.
- C. Identity Verification Credits are consumed with each verification sent and should be estimated based on the number of logins that will incur a verification challenge.
- D. Identity Verification Credits are a direct add-on license based on the number of existing member-based or login-based Community licenses.

Answer: B

NEW QUESTION 191

Containers (UC) has an existing Customer Community. UC wants to expand the self-registration capabilities such that customers receive a different community experience based on the data they provide during the registration process. What is the recommended approach an Architect Should recommend to UC?

- A. Create an After Insert Apex trigger on the user object to assign specific custom permissions.
- B. Create separate login flows corresponding to the different community user personas.
- C. Modify the Community pages to utilize specific fields on the User and Contact records.
- D. Modify the existing Communities registration controller to assign different profiles.

Answer: C
