About Exambible

[Your Partner of IT Exam](#)

Found in 1998

Exambible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, Exambible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

- (Topic 1)

Which of the following types of attacks cannot be prevented by technical measures only?

- A. Social engineering
- B. Smurf DoS
- C. Brute force
- D. Ping flood attack

Answer: A

NEW QUESTION 2

- (Topic 1)

You are the project manager of SST project. You are in the process of collecting and distributing performance information including status report, progress measurements, and forecasts. Which of the following process are you performing?

- A. Perform Quality Control
- B. Verify Scope
- C. Report Performance
- D. Control Scope

Answer: C

NEW QUESTION 3

- (Topic 1)

Key Distribution Center is used in which authentication method?

- A. Multi-factor
- B. Smart cards
- C. Biometrics
- D. Security tokens
- E. Kerberos
- F. Challenge Handshake Authentication Protocol

Answer: E

NEW QUESTION 4

- (Topic 1)

Every network device contains a unique built in Media Access Control (MAC) address, which is used to identify the authentic device to limit the network access. Which of the following addresses is a valid MAC address?

- A. F936.28A1.5BCD.DEFA
- B. A3-07-B9-E3-BC-F9
- C. 1011-0011-1010-1110-1100-0001
- D. 132.298.1.23

Answer: B

NEW QUESTION 5

- (Topic 1)

Security is responsible for well-being of information and infrastructures in which the possibilities of successful yet undetected theft, tampering, and/or disruption of information and services are kept low or tolerable. Which of the following are the elements of security?

Each correct answer represents a complete solution. Choose all that apply.

- A. Availability
- B. Confidentiality
- C. Confidentiality
- D. Authenticity

Answer: ABCD

NEW QUESTION 6

- (Topic 1)

Which of the following statements about testing are true?

Each correct answer represents a complete solution. Choose all that apply.

- A. A stub is a program that simulates a calling unit, and a driver is a program that simulates a called unit.
- B. In unit testing, each independent unit of an application is tested separately.
- C. In integration testing, a developer combines two units that have already been tested into a component.
- D. The bottom-up approach to integration testing helps minimize the need for stubs.

Answer: BCD

NEW QUESTION 7

- (Topic 1)

You work as a SharePoint Administrator for TechWorld Inc. You must protect your SharePoint server farm from viruses that are accidentally uploaded to the SharePoint libraries. You have installed antivirus software that is designed for use with Windows SharePoint server. You have logged on to the Central Administration site.

How can you configure the SharePoint site so that the document libraries are protected?

- A. SharePoint does not support antivirus solutions.
- B. Restrict users to read only on document libraries.
- C. Choose the Scan documents on upload option in the antivirus settings.
- D. Require all documents to be scanned on the local PC before uploading to the SharePoint site.

Answer: C

NEW QUESTION 8

- (Topic 1)

According to the case study, what protocol should be used to protect a customer's privacy and credit card information?

(Click the Exhibit button on the toolbar to see the case study.)

- A. L2TP
- B. FTP
- C. HTTP
- D. MS-CHAP
- E. HTTPS
- F. PPTP

Answer: E

NEW QUESTION 9

- (Topic 1)

John works as a professional Ethical Hacker. He has been assigned a project to test the security of www.we-are-secure.com. On the We-are-secure login page, he enters "or" as a username and successfully logs in to the user page of the Web site. The We-are-secure login page is vulnerable to a _____.

- A. Social engineering
- B. Smurf DoS
- C. Brute force
- D. Ping flood attack

Answer: A

NEW QUESTION 10

- (Topic 1)

You are the security manager of Microliss Inc. Your enterprise uses a wireless network infrastructure with access points ranging 150-350 feet. The employees using the network complain that their passwords and important official information have been traced. You discover the following clues:

The information has proved beneficial to another company.

The other company is located about 340 feet away from your office. The other company is also using wireless network.

The bandwidth of your network has degraded to a great extent. Which of the following methods of attack has been used?

- A. A piggybacking attack has been performed.
- B. The information is traced using Bluebugging.
- C. A DOS attack has been performed.
- D. A worm has exported the information.

Answer: A

NEW QUESTION 10

- (Topic 1)

You work as an Incident handling manager for Orangesect Inc. You detect a virus attack incident in the network of your company. You develop a signature based on the characteristics of the detected virus.

Which of the following phases in the Incident handling process will utilize the signature to resolve this incident?

- A. Recovery
- B. Identification
- C. Containment
- D. Eradication

Answer: D

NEW QUESTION 13

- (Topic 1)

Victor wants to use Wireless Zero Configuration (WZC) to establish a wireless network connection using his computer running on Windows XP operating system.

Which of the following are the most likely threats to his computer?

Each correct answer represents a complete solution. Choose two.

- A. Attacker can use the Ping Flood DoS attack if WZC is used.
- B. Attacker by creating a fake wireless network with high power antenna cause Victor's computer to associate with his network to gain access.
- C. Information of probing for networks can be viewed using a wireless analyzer and may be used to gain access.
- D. It will not allow the configuration of encryption and MAC filtering.
- E. Sending information is not secure on wireless network.

Answer: BC

NEW QUESTION 17

- (Topic 1)

Which of the following protocols can help you get notified in case a router on a network fails?

- A. SMTP
- B. SNMP
- C. TCP
- D. ARP

Answer: B

NEW QUESTION 19

- (Topic 1)

Which project management risk event would you be using if you changed the sequence of activities to reduce the probability of the project being delayed?

- A. Enhancing
- B. Withdrawal
- C. Exploiting
- D. Avoidance

Answer: D

NEW QUESTION 22

- (Topic 1)

Which of the following service provider classes is used to create a digital signature?

- A. RC2CryptoServiceProvider
- B. RNGCryptoServiceProvider
- C. DESCryptoServiceProvider
- D. SHA1CryptoServiceProvider
- E. MD5CryptoServiceProvider
- F. DSACryptoServiceProvider

Answer: F

NEW QUESTION 24

- (Topic 1)

Which Wireless network standard operates at 2.4 GHz and transfers data at a rate of 54 Mbps?

- A. 802.11a
- B. 802.11n
- C. 802.11b
- D. 802.11g

Answer: D

NEW QUESTION 29

- (Topic 1)

You are working on your computer system with Linux Operating system. After working for a few hours, the hard disk goes to the inactive state (sleep). You try to restart the system and check the power circuits. You later discover that the hard disk has crashed. Which of the following precaution methods should you apply to keep your computer safe from such issues?

- A. Use Incident handling
- B. Use OODA loop
- C. Use Information assurance
- D. Use SMART model.

Answer: D

NEW QUESTION 32

- (Topic 1)

John works as a Network Administrator for Bordeaux Inc. He is planning to design a strategy, so that the employees can connect to a scheduling application.

Which of the following strategies is best suited for the company?

(Click the Exhibit button on the toolbar to see the case study.)

- A. Deploy a VPN server on the VLAN network, and an IIS server on the corporate LAN at the headquarters.
- B. Deploy a VPN server on the VLAN network, and an IIS server on DMZ.
- C. Deploy a VPN server on the corporate LAN at the headquarters, and an IIS server on DMZ.
- D. Deploy a VPN server on DMZ, and an IIS server on the corporate LAN at the headquarters.

Answer: D

NEW QUESTION 33

- (Topic 1)

John works as a professional Ethical Hacker. He has been assigned a project to test the security of www.we-are-secure.com. He wants to test the effect of a virus on the We-are-secure server. He injects the virus on the server and, as a result, the server becomes infected with the virus even though an established antivirus program is installed on the server. Which of the following do you think are the reasons why the antivirus installed on the server did not detect the virus injected by John?

Each correct answer represents a complete solution. Choose all that apply.

- A. The virus, used by John, is not in the database of the antivirus program installed on the server.
- B. The mutation engine of the virus is generating a new encrypted code.
- C. John has created a new virus.
- D. John has changed the signature of the virus.

Answer: ABCD

NEW QUESTION 37

- (Topic 1)

You work as a Security manager for Qualoxizz Inc. Your company has number of network switches in the site network infrastructure. Which of the following actions will you perform to ensure the security of the switches in your company?

- A. Set long session timeouts.
- B. Open up all the unused management ports.
- C. Set similar passwords for each management port.
- D. Ignore usage of the default account settings.

Answer: D

NEW QUESTION 40

- (Topic 1)

Your Company is receiving false and abusive e-mails from the e-mail address of your partner company. When you complain, the partner company tells you that they have never sent any such e-mails. Which of the following types of cyber crimes involves this form of network attack?

- A. Cyber squatting
- B. Cyber Stalking
- C. Man-in-the-middle attack
- D. Spoofing

Answer: D

NEW QUESTION 43

- (Topic 1)

Computer networks and the Internet are the prime mode of Information transfer today. Which of the following is a technique used for modifying messages, providing Information and Cyber security, and reducing the risk of hacking attacks during communications and message passing over the Internet?

- A. Risk analysis
- B. Firewall security
- C. OODA loop
- D. Cryptography

Answer: D

NEW QUESTION 45

- (Topic 1)

Which of the following types of authentications supported by OSPF? Each correct answer represents a complete solution. Choose three.

- A. MD5 authentication
- B. Simple password authentication
- C. Null authentication
- D. Kerberos v5 authentication

Answer: ABC

NEW QUESTION 47

- (Topic 1)

Mark is implementing security on his e-commerce site. He wants to ensure that a customer sending a message is really the one he claims to be. Which of the following techniques will he use to ensure this?

- A. Packet filtering
- B. Authentication
- C. Firewall
- D. Digital signature

Answer: D

NEW QUESTION 52

- (Topic 1)

Which of the following are the examples of administrative controls?

Each correct answer represents a complete solution. Choose all that apply.

- A. Data Backup
- B. Security policy
- C. Security awareness training
- D. Auditing

Answer: BC

NEW QUESTION 54

- (Topic 1)

Your network utilizes a coax cable for connections between various network segments. Your predecessor made sure none of the coax cables were in an exposed area that could easily be accessed. This caused the use of significant extra cabling. Why do you think this was done?

- A. This was an error you should correct
- B. It wastes the cable and may make maintenance more difficult.
- C. He was concerned about wireless interception of data.
- D. He was concerned about electromagnetic emanation being used to gather data.
- E. He was concerned about vampire taps.

Answer: D

NEW QUESTION 56

- (Topic 1)

Which of the following cryptographic system services ensures that information will not be disclosed to any unauthorized person on a local network?

- A. Authentication
- B. Confidentiality
- C. Integrity
- D. Non-repudiation

Answer: B

NEW QUESTION 60

- (Topic 1)

You work as a project manager for TYU project. You are planning for risk mitigation. You need to identify the risks that will need a more in-depth analysis. Which of the following activities will help you in this?

- A. Quantitative analysis
- B. Qualitative analysis
- C. Estimate activity duration
- D. Risk identification

Answer: B

NEW QUESTION 64

- (Topic 1)

Which of the following terms is used for a router that filters traffic before it is passed to the firewall?

- A. Screened host
- B. Demilitarized zone (DMZ)
- C. Honey pot
- D. Bastion host

Answer: A

NEW QUESTION 69

- (Topic 1)

Which of the following is a remote access protocol that supports encryption?

- A. PPP
- B. SLIP
- C. UDP
- D. SNMP

Answer: A

NEW QUESTION 71

- (Topic 1)

You have an antivirus program for your network. It is dependent upon using lists of known viruses. What is this type of scan called?

- A. Heuristic
- B. Fixed List
- C. Dictionary
- D. Host Based

Answer: C

NEW QUESTION 74

- (Topic 1)

Which of the following protocols are used by Network Attached Storage (NAS)?
Each correct answer represents a complete solution. Choose all that apply.

- A. Apple Filing Protocol (AFP)
- B. Server Message Block (SMB)
- C. Network File System (NFS)
- D. Distributed file system (Dfs)

Answer: ABC

NEW QUESTION 78

- (Topic 1)

Which of the following provides a credential that can be used by all Kerberos-enabled servers and applications?

- A. Remote Authentication Dial In User Service (RADIUS)
- B. Internet service provider (ISP)
- C. Network Access Point (NAP)
- D. Key Distribution Center (KDC)

Answer: D

NEW QUESTION 81

- (Topic 1)

Your company is going to add wireless connectivity to the existing LAN. You have concerns about the security of the wireless access and wish to implement encryption. Which of the following would be the best choice for you to use?

- A. WAP
- B. WEP
- C. DES
- D. PKI

Answer: B

NEW QUESTION 86

- (Topic 1)

You work as a security manager for hackoxiss Inc. The company consists of a perimeter network as its internal network. A number of ethical hackers are employed in the company. You are getting complaints that some employees of the company are trying to intrude other systems on the outer network (Internet). In which of the following ways will you secure the internal as well as the outer network?

- A. Deny the access of outer users to internal network.
- B. Use distributed firewalls.
- C. Deny the access of internal users to outer network.
- D. Configure ACL on your company's router.

Answer: B

NEW QUESTION 87

- (Topic 1)

Which of the following techniques are used after a security breach and are intended to limit the extent of any damage caused by the incident?

- A. Corrective controls
- B. Detective controls
- C. Safeguards
- D. Preventive controls

Answer: A

NEW QUESTION 91

- (Topic 1)

You work as an Incident handler in Mariotrixt.Inc. You have followed the Incident handling process to handle the events and incidents. You identify Denial of Service attack (DOS) from a network linked to your internal enterprise network. Which of the following phases of the Incident handling process should you follow next to handle this incident?

- A. Containment
- B. Preparation
- C. Recovery
- D. Identification

Answer: A

NEW QUESTION 96

- (Topic 1)

NIST Special Publication 800-50 is a security awareness program. It is designed for those people who are currently working in the information technology field and want to the information security policies.

Which of the following are its significant steps?

Each correct answer represents a complete solution. Choose two.

- A. Awareness and Training Material Effectiveness
- B. Awareness and Training Material Development
- C. Awareness and Training Material Implementation
- D. Awareness and Training Program Design

Answer: BD

NEW QUESTION 98

- (Topic 1)

Which of the following factors determine the strength of the encryption?

- A. Character-set encoding
- B. Length of the key
- C. Operating system
- D. Ease of use

Answer: B

NEW QUESTION 99

- (Topic 1)

Which of the following are application layer protocols of Internet protocol (IP) suite? Each correct answer represents a complete solution. Choose two.

- A. IGP
- B. IGRP
- C. Telnet
- D. SMTP

Answer: CD

NEW QUESTION 102

- (Topic 1)

Which of the following tools combines two programs, and also encrypts the resulting package in an attempt to foil antivirus programs?

- A. NetBus
- B. EliteWrap
- C. Trojan Man
- D. Tiny

Answer: C

NEW QUESTION 104

- (Topic 1)

Hardening a system is one of the practical methods of securing a computer system. Which of the following techniques is used for hardening a computer system?

- A. Disabling all user accounts
- B. Applying egress filtering
- C. Applying Access Control List (ACL)
- D. Applying a patch to the OS kernel

Answer: D

NEW QUESTION 105

- (Topic 1)

Which of the following techniques allows an attacker to take network traffic coming towards a host at one port and redirect it from that host to another host?

- A. Blackbox testing
- B. Firewalking
- C. Brainstorming
- D. Port redirection

Answer: D

NEW QUESTION 107

- (Topic 1)

Which of the following books is used to examine integrity and availability?

- A. Brown Book
- B. Red Book
- C. Purple Book
- D. Orange Book

Answer: B

NEW QUESTION 110

- (Topic 1)

Which of the following protocols is used to provide remote monitoring and administration to network management machines on the network? The management machines will use this protocol to collect information for network monitoring. At times, the protocol can also be used for remote configuration.

- A. NNTP
- B. Telnet
- C. SSH
- D. SNMP

Answer: D

NEW QUESTION 112

- (Topic 1)

Which of the following cryptographic algorithms uses a single key to encrypt and decrypt data?

- A. Asymmetric
- B. Symmetric
- C. Numeric
- D. Hashing

Answer: B

NEW QUESTION 117

- (Topic 1)

Which of the following protocols work at the Network layer of the OSI model?

- A. Internet Group Management Protocol (IGMP)
- B. Simple Network Management Protocol (SNMP)
- C. Routing Information Protocol (RIP)
- D. File Transfer Protocol (FTP)

Answer: AC

NEW QUESTION 120

- (Topic 1)

The MBR of a hard disk is a collection of boot records that contain disk information such as disk architecture, cluster size, and so on. The main work of the MBR is to locate and run necessary operating system files that are required to run a hard disk. In the context of the operating system, MBR is also known as the boot loader. Which of the following viruses can infect the MBR of a hard disk?

Each correct answer represents a complete solution. Choose two.

- A. Boot sector
- B. Multipartite
- C. File
- D. Stealth

Answer: AB

NEW QUESTION 122

- (Topic 1)

Based on the case study, to implement more security, which of the following additional technologies should you implement for laptop computers? (Click the Exhibit button on the toolbar to see the case study.) Each correct answer represents a complete solution. Choose two.

- A. Encrypted Data Transmissions
- B. Digital certificates
- C. Two-factor authentication
- D. PAP authentication
- E. Encrypting File System (EFS)

Answer: BE

NEW QUESTION 127

- (Topic 1)

You are configuring the Terminal service. What Protocols are required with Terminal services? (Click the Exhibit button on the toolbar to see the case study.) Each correct answer represents a part of the solution. Choose two.

- A. L2TP
- B. TCP/IP
- C. RDP
- D. CHAP
- E. PPTP

Answer: BC

NEW QUESTION 131

- (Topic 1)

Which of the following processes is described in the statement below?

"It is the process of implementing risk response plans, tracking identified risks, monitoring residual risk, identifying new risks, and evaluating risk process

effectiveness throughout the project."

- A. Perform Quantitative Risk Analysis
- B. Perform Qualitative Risk Analysis
- C. Monitor and Control Risks
- D. Identify Risks

Answer: C

NEW QUESTION 135

- (Topic 1)

You work as a Network Administrator for Marioxnet Inc. You have the responsibility of handling two routers with BGP protocol for the enterprise's network. One of the two routers gets flooded with an unexpected number of data packets, while the other router starves with no packets reaching it. Which of the following attacks can be a potential cause of this?

- A. Denial-of-Service
- B. Eavesdropping
- C. Spoofing
- D. Packet manipulation

Answer: A

NEW QUESTION 139

- (Topic 1)

TCP FIN scanning is a type of stealth scanning through which the attacker sends a FIN packet to the target port. If the port is closed, the victim assumes that this packet was sent mistakenly by the attacker and sends the RST packet to the attacker. If the port is open, the FIN packet will be ignored and the port will drop the packet. Which of the following operating systems can be easily identified with the help of TCP FIN scanning?

- A. Windows
- B. Red Hat
- C. Solaris
- D. Knoppix

Answer: A

NEW QUESTION 143

- (Topic 1)

In which type of access control do user ID and password system come under?

- A. Physical
- B. Power
- C. Technical
- D. Administrative

Answer: C

NEW QUESTION 144

- (Topic 1)

Which of the following are the differences between routed protocols and routing protocols?

Each correct answer represents a complete solution. Choose two.

- A. A routing protocol is configured on an interface and decides the method of packet delivery.
- B. A routing protocol decides the path for a packet through the network.
- C. A routed protocol is configured on an interface and decides how a packet will be delivered.
- D. A routed protocol works on the transport layer of the OSI model.

Answer: BC

NEW QUESTION 147

- (Topic 1)

The security of a computer against the unauthorized usage largely depends upon the efficiency of the applied access control method. Which of the following statements are true about a computer access control method?

Each correct answer represents a complete solution. Choose all that apply.

- A. It can be based upon fingerprint or eye recognition.
- B. It can be time-synchronous.
- C. It provides security against the virus attacks.
- D. It provides security against Eavesdropping.
- E. It checks the authenticity of a person.
- F. It is used to encrypt a message before transmitting it on a network.

Answer: ABE

NEW QUESTION 151

- (Topic 1)

Which of the following is a pillar of Information Assurance CIA triad?

- A. Integrity
- B. Affiliation
- C. Accessibility
- D. Isolation

Answer: A

NEW QUESTION 152

- (Topic 1)

Which of the following tools can be used to perform tasks such as Windows password cracking Windows enumeration, and VoIP session sniffing?

- A. John the Ripper
- B. Obiwan
- C. Cain
- D. L0phtcrack

Answer: C

NEW QUESTION 153

- (Topic 1)

Which of the following Acts enacted in United States allows the FBI to issue National Security Letters (NSLs) to Internet service providers (ISPs) ordering them to disclose records about their customers?

- A. Electronic Communications Privacy Act of 1986
- B. Economic Espionage Act of 1996
- C. Computer Fraud and Abuse Act
- D. Wiretap Act

Answer: A

NEW QUESTION 156

- (Topic 2)

Victor works as a professional Ethical Hacker for SecureNet Inc. He wants to use Steganographic file system method to encrypt and hide some secret information.

Which of the following disk spaces will he use to store this secret information?

Each correct answer represents a complete solution. Choose all that apply.

- A. Slack space
- B. Unused Sectors
- C. Dumb space
- D. Hidden partition

Answer: ABD

NEW QUESTION 160

- (Topic 2)

Which of the following U.S.C. laws is governs the fraudulent activities associated with computers?

- A. 18 U.S.
- B. 2251
- C. 18 U.S.
- D. 3771
- E. 18 U.S.
- F. 2257
- G. 18 U.S.
- H. 1030

Answer: D

NEW QUESTION 161

- (Topic 2)

In a complex network, Router transfers data packets by observing some form of parameters or metrics provided in the routing table. Which of the following metrics is NOT included in the routing table?

- A. Bandwidth
- B. Load
- C. Delay
- D. Frequency

Answer: D

NEW QUESTION 164

- (Topic 2)

Mark works as a Customer Support Technician for uCertify Inc. The company provides troubleshooting support to users. Mark is troubleshooting a computer of a user who is working on Windows Vista. The user reports that his sensitive data is being accessed by someone because of security vulnerability in the component of Windows Vista. Which of the following features of Windows Security Center should Mark configure to save the user's data?

- A. Automatic updating

- B. Firewall
- C. Malware protection
- D. Content Advisor

Answer: A

NEW QUESTION 166

- (Topic 2)

Which of the following protocols implements VPN using IPSec?

- A. SLIP
- B. PPTP
- C. PPP
- D. L2TP

Answer: D

NEW QUESTION 167

- (Topic 2)

Which of the following statements are true about classless routing protocols? Each correct answer represents a complete solution. Choose two.

- A. They extend the IP addressing scheme.
- B. The same subnet mask is used everywhere on the network.
- C. They support VLSM and discontinuous networks.
- D. IGRP is a classless routing protocol.

Answer: AC

NEW QUESTION 171

- (Topic 2)

You work as a Security manager for Orangesect Inc. The enterprise is using the OODA loop strategy to counter the security issues in the enterprise. Some of the IP addresses of the enterprise have been hacked. You match up the present hacking issue and condition with the past hacking experiences to find a solution. Which of the following phases of the OODA loop involves the procedure followed by you?

- A. The decide phase
- B. The orient phase
- C. The observe phase
- D. The act phase

Answer: B

NEW QUESTION 172

- (Topic 2)

Which of the following statements are true about security risks? Each correct answer represents a complete solution. Choose three.

- A. They are considered an indicator of threats coupled with vulnerability.
- B. They can be mitigated by reviewing and taking responsible actions based on possible risks.
- C. They can be removed completely by taking proper actions.
- D. They can be analyzed and measured by the risk analysis process.

Answer: ABD

NEW QUESTION 173

- (Topic 2)

Which of the following refers to a small space having two sets of interlocking doors such that the first set of doors must close before the second set opens?

- A. Man-trap
- B. Man-in-the-middle
- C. Demilitarized zone (DMZ)
- D. Firewall

Answer: A

NEW QUESTION 176

- (Topic 2)

Mark is implementing security on his e-commerce site. He wants to ensure that a customer sending a message is really the one he claims to be. Which of the following techniques will he use to ensure this?

- A. Authentication
- B. Firewall
- C. Packet filtering
- D. Digital signature

Answer: D

NEW QUESTION 181

- (Topic 2)

Which of the following processes is responsible for low risk, frequently occurring low cost changes?

- A. Incident Management
- B. IT Facilities Management
- C. Request Fulfillment
- D. Release Management

Answer: C

NEW QUESTION 184

- (Topic 2)

You are the Administrator for a corporate network. You are concerned about denial of service attacks. Which of the following measures would be most helpful in defending against a Denial-of-Service (DoS) attack?

- A. Shorten the timeout for connection attempts.
- B. Place a honey pot in the DMZ.
- C. Implement a strong password policy.
- D. Implement network based antivirus.

Answer: A

NEW QUESTION 189

- (Topic 2)

Which of the following encryption techniques does digital signatures use?

- A. MD5
- B. RSA
- C. IDEA
- D. Blowfish

Answer: C

NEW QUESTION 191

- (Topic 2)

Which of the following tools can be used for stress testing of a Web server? Each correct answer represents a complete solution. Choose two.

- A. Internet bots
- B. Spyware
- C. Scripts
- D. Anti-virus software

Answer: AC

NEW QUESTION 192

- (Topic 2)

Which of the following is the maximum variable key length for the Blowfish encryption algorithm?

- A. 448 bit
- B. 256 bit
- C. 64 bit
- D. 16 bit

Answer: A

NEW QUESTION 195

- (Topic 2)

The method used to encrypt messages by transposing or scrambling the characters in a certain manner is known as _____.

- A. Quantum cipher
- B. Transposition cipher
- C. Hybrid systems
- D. Mathematical cipher
- E. Substitution cipher
- F. Steganography

Answer: B

NEW QUESTION 196

CORRECT TEXT - (Topic 2)

Fill in the blank with the appropriate value. SHA-1 produces a _____ -bit message digest.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

SHA-1 produces a 160-bit message digest

NEW QUESTION 197

- (Topic 2)

Which of the following refers to the ability to ensure that the data is not modified or tampered with?

- A. Availability
- B. Integrity
- C. Confidentiality
- D. Non-repudiation

Answer: B

NEW QUESTION 198

- (Topic 2)

Which of the following types of firewall functions at the Session layer of OSI model?

- A. Circuit-level firewall
- B. Application-level firewall
- C. Switch-level firewall
- D. Packet filtering firewall

Answer: A

NEW QUESTION 199

- (Topic 2)

Which of the following types of firewalls looks deep into packets and makes granular access control decisions?

- A. Stateful
- B. Application level proxy
- C. Circuit level proxy
- D. Packet filtering

Answer: B

NEW QUESTION 201

- (Topic 2)

Jane works as a Consumer Support Technician for McRoberts Inc. The company provides troubleshooting support to users. A user named Peter installs Windows Vista on his computer. He connects his computer on the network. He wants to protect his computer from malicious software and prevent hackers from gaining access to his computer through the network. Which of the following actions will Jane assist Peter to perform to accomplish the task?

- A. Don't stay logged on as an administrator.
- B. Use a firewall.
- C. Keep the computer up-to-date.
- D. Run antivirus software on the computer.

Answer: B

NEW QUESTION 206

- (Topic 2)

You discover that someone has been logging onto your network after office hours. After investigating this you find the login belongs to someone who left the company 12 months ago. What would have been the best method to prevent this?

- A. A policy with time of day restrictions.
- B. An IDS system.
- C. A policy with account expiration.
- D. A DMZ firewall.

Answer: C

NEW QUESTION 208

- (Topic 2)

John used to work as a Network Administrator for We-are-secure Inc. Now he has resigned from the company for personal reasons. He wants to send out some secret information of the company. To do so, he takes an image file and simply uses a tool image hide and embeds the secret file within an image file of the famous actress, Jennifer Lopez, and sends it to his Yahoo mail id. Since he is using the image file to send the data, the mail server of his company is unable to filter this mail. Which of the following techniques is he performing to accomplish his task?

- A. Web ripping
- B. Email spoofing
- C. Steganography
- D. Social engineering

Answer: C

NEW QUESTION 210

- (Topic 2)

Which of the following refers to the process of verifying the identity of a person, network host, or system process?

- A. Hacking
- B. Authentication
- C. Packet filtering
- D. Auditing

Answer: B

NEW QUESTION 215

- (Topic 2)

Tom and Gary are in a debate over which software should be purchased as part of their project. Gary tells Tom that because he's the senior software developer and has been with the company for 12 years, he'll be making the decision on the software. What type of conflict resolution has happened in this instance?

- A. Avoiding
- B. Forcing
- C. Compromising
- D. Smoothing

Answer: B

NEW QUESTION 219

- (Topic 2)

You are the Network Administrator for a company that frequently exchanges confidential emails without outside parties (clients, vendors, etc.). You want those emails to be encrypted, however, you want the least overhead/difficulty in the encryption process. Which of the following should you choose?

- A. MD5
- B. DES
- C. Symmetric Encryption
- D. Asymmetric Encryption

Answer: D

NEW QUESTION 221

- (Topic 2)

You have created a Web site, which will be used for e-commerce. You want to ensure that the transactions are highly secured. For this purpose, you have to create a system to verify the identity of a potential customer. Which of the following security techniques will you use?

- A. Asymmetric encryption
- B. Symmetric encryption
- C. Spoofing
- D. Digital certificate

Answer: D

NEW QUESTION 224

- (Topic 2)

Your computer continues to operate even if its disk drive has failed. This ability is known as _____.

- A. Recovery
- B. Fault Tolerance
- C. Backups
- D. Disaster Recovery
- E. Hashing
- F. Independent Disks

Answer: B

NEW QUESTION 229

- (Topic 2)

Peter is a merchant. He uses symmetric encryption to send confidential messages to different users of his Web site. Which of the following is the other name for asymmetric encryption?

- A. Session key encryption
- B. Public key encryption
- C. Secret key encryption
- D. Shared key encryption

Answer: B

NEW QUESTION 230

- (Topic 2)

You are concerned about possible hackers doing penetration testing on your network as a prelude to an attack. What would be most helpful to you in finding out if this is occurring?

- A. Examining your firewall logs

- B. Examining your DNS Server logs
- C. Examining your domain controller server logs
- D. Examining your antivirus logs

Answer: A

NEW QUESTION 233

- (Topic 2)

You are developing an online business solution for National Institute of Meteorological and Oceanographic Research (NIMOR). A case study for the organization is given in the exhibit. Based on the case study, you need to implement Internet security so that no user can hack confidential data. According to you, which of the following security options will you use for your solution? Each correct answer represents a complete solution. Choose all that apply. (Click the Exhibit button on the toolbar to see the case study.)

- A. Antivirus and antispyware software
- B. Secure Sockets Layer and digital certificates
- C. Firewall security
- D. Automatic Updates in Windows XP

Answer: AC

NEW QUESTION 235

- (Topic 2)

Adam works as a Professional Penetration Tester for Umbrella Inc. A project has been assigned to him to carry out a Black Box penetration testing as a regular evaluation of the system security and integrity of the company's network. Which of the following statements are true about the Black Box penetration testing? Each correct answer represents a complete solution. Choose all that apply.

- A. Black box testing provides the testers with complete knowledge of the infrastructure to be tested.
- B. Black box testing simulates an attack from someone who is unfamiliar with the system.
- C. Black box testing simulates an attack from someone who is familiar with the system.
- D. Black box testing assumes no prior knowledge of the infrastructure to be tested.

Answer: BC

NEW QUESTION 238

- (Topic 2)

You work as a Computer Hacking Forensic Investigator for SecureNet Inc. You want to investigate Cross-Site Scripting attack on your company's Website. Which of the following methods of investigation can you use to accomplish the task? Each correct answer represents a complete solution. Choose all that apply.

- A. Use a Web proxy to view the Web server transactions in real time and investigate any communication with outside servers.
- B. Look at the Web servers logs and normal traffic logging.
- C. Use Wireshark to capture traffic going to the server and then searching for the requests going to the input page, which may give log of the malicious traffic and the IP address of the source.
- D. Review the source of any HTML-formatted e-mail messages for embedded scripts or links in the URL to the company's site.

Answer: ABD

NEW QUESTION 241

- (Topic 2)

You are hired by Techmart Inc. to upgrade its existing network. You have prepared a case study for planning the network. According to your study, how many domains are required to setup the network of Techmart Inc.? (Click the Exhibit button on the toolbar to see the case study.)

- A. Two
- B. Four
- C. Three
- D. One

Answer: D

NEW QUESTION 242

- (Topic 2)

Which of the following methods of encryption uses a single key to encrypt and decrypt data?

- A. S/MIME
- B. Asymmetric
- C. PGP
- D. Symmetric

Answer: D

NEW QUESTION 245

- (Topic 2)

You work as a Network administrator for Infonet Inc. The company has 135 Windows XP Professional computers and twenty Windows 2003 Server computers. You want to specify the number of invalid logon attempts allowed before a user account is locked out. What will you do to accomplish the task?

- A. Reset Account Lockout Counter After policy

- B. Set Account Lockout Threshold policy
- C. Enforce Password Must Meet Complexity Requirements policy
- D. Set Account Lockout Duration policy

Answer: B

NEW QUESTION 246

- (Topic 2)

Which of the following viruses is designed to prevent antivirus researchers from examining its code by using various methods that make tracing and disassembling difficult?

- A. Multipartite virus
- B. Polymorphic virus
- C. Armored virus
- D. Stealth virus

Answer: C

NEW QUESTION 251

- (Topic 2)

Which of the following best describes the identification, analysis, and ranking of risks?

- A. Design of experiments
- B. Fast tracking
- C. Fixed-price contracts
- D. Plan Risk management

Answer: D

NEW QUESTION 255

- (Topic 2)

Rick is the project manager of a construction project. He is in a process to procure some construction equipments. There are four vendors available for supplying the equipments. Rick does not want one of them to participate in the bidding as he has some personal grudges against the owner of the vendor. This is the violation of which of the following categories of the Project Management Institute Code of Ethics and Professional Conduct?

- A. Respect
- B. Honesty
- C. Responsibility
- D. Fairness

Answer: D

NEW QUESTION 260

- (Topic 2)

Which of the following authentication methods uses MD5 hash encoding while transferring credentials over a network?

- A. .NET Passport authentication
- B. Advanced Digest authentication
- C. Integrated Windows authentication
- D. Digest authentication

Answer: B

NEW QUESTION 263

- (Topic 2)

You work as a Consumer Support Technician for ABC Inc. The company provides troubleshooting support to users. You are troubleshooting a computer of a user who is working on Windows Vista.

He reports that his sensitive data is being accessed by someone because of security vulnerability in the component of Windows Vista. Which of the following features of Windows Security Center will you configure to save the user's data?

- A. Malware protection
- B. Automatic updating
- C. Firewall
- D. Other security settings

Answer: C

NEW QUESTION 267

- (Topic 2)

Which of the following types of viruses can prevent itself from being detected by an antivirus application?

- A. File virus
- B. Boot sector virus
- C. Multipartite virus
- D. Stealth virus

Answer: D

NEW QUESTION 272

- (Topic 2)

You work as a Network Security Analyzer. You got a suspicious email while working on a forensic project. Now, you want to know the IP address of the sender so that you can analyze various information such as the actual location, domain information, operating system being used, contact information, etc. of the email sender with the help of various tools and resources. You also want to check whether this email is fake or real. You know that analysis of email headers is a good starting point in such cases.

The email header of the suspicious email is given below:

```

Answer: D

NEW QUESTION 275

- (Topic 2)

Which of the following firewalls operates at three layers- Layer3, Layer4, and Layer5?

- A. Circuit-level firewall
- B. Application layer firewall
- C. Proxy firewall
- D. Dynamic packet-filtering firewall

Answer: D

NEW QUESTION 280

- (Topic 2)

Mark works as a Network Administrator for NetTech Inc. The company has a Windows Server 2008 domain-based network. The network contains four Windows 2008 member servers and 250 Windows Vista client computers. One of the member servers works as a Web server that hosts an intranet Web site. According to the company security policy, Mark needs to fulfill the following requirements:

- * 1. Encryption should be used for authentication of all traffic to the Web site.
- * 2. SSL should not be used on the Web server for performance reasons.
- * 3. Users should be authenticated using their Active Directory credentials.

In order to fulfill the requirements, Mark has disabled the Anonymous Authentication setting on the server. What else does he have to do?

- A. Enable the Anonymous Authentication setting on the server.
- B. Enable the Encrypting File System (EFS) on the server.
- C. Enable the Digest Authentication setting on the server.
- D. Enable the Windows Authentication setting on the server.

Answer: CD

NEW QUESTION 282

- (Topic 2)

You work as a Network Administrator for McRoberts Inc. You are required to upgrade a client computer on the company's network to Windows Vista Ultimate. During installation, the computer stops responding, and the screen does not change. What is the most likely cause?

- A. Teardrop attack
- B. Replay attack
- C. Denial-of-Service (DoS) attack
- D. Polymorphic shell code attack

Answer: C

NEW QUESTION 284

- (Topic 2)

Web applications play a vital role in deploying different databases with user accessibility on the Internet. Which of the following allows an attacker to get unauthorized access to the database of a Web application by sending (attacking) user-supplied data to an interpreter as part of a command or query?

- A. Cross Site Scripting
- B. Injection flaw
- C. Cross Site Request Forgery (CSRF)
- D. Malicious File Execution

Answer: B

NEW QUESTION 285

- (Topic 2)

Bluetooth uses the _____ specification in the _____ band with FHSS technology.

- A. IEEE 802.11, 2.4-2.5 GHz
- B. IEEE 802.11, 1.4-2.5 GHz
- C. IEEE 802.15, 1.5-2.0 GHz
- D. IEEE 802.15, 2.4-2.5 GHz

Answer: D

NEW QUESTION 287

- (Topic 2)

Your corporate network uses a Proxy Server for Internet access. The Manufacturing group has access permission for WWW protocol in the Web Proxy service, and access permission for POP3 protocol, in the WinSock Proxy service. The Supervisors group has access permission for WWW and FTP Read protocols in the Web Proxy service, and access permission for the SMTP protocol in the WinSock Proxy service. The Quality Control group has access permission only for WWW protocol in the Web Proxy service. The Interns group has no permissions granted in any of the Proxy Server services. Kate is a member of all four groups. In the Proxy Server services, which protocols does Kate have permission to use?

- A. WWW only
- B. FTP Read and SMTP only
- C. WWW, FTP Read, POP3, and SMTP
- D. WWW and POP3 only

Answer: C

NEW QUESTION 290

- (Topic 2)

Victor works as a professional Ethical Hacker for SecureEnet Inc. He wants to scan the wireless network of the company. He uses a tool that is a free open-source utility for network exploration.

The tool uses raw IP packets to determine the following:

What ports are open on our network systems. What hosts are available on the network. Identify unauthorized wireless access points.

What services (application name and version) those hosts are offering. What operating systems (and OS versions) they are running.

What type of packet filters/firewalls are in use. Which of the following tools is Victor using?

- A. Nessus
- B. Kismet
- C. Nmap
- D. Sniffer

Answer: C

NEW QUESTION 294

- (Topic 2)

Which of the following combines the characteristics of a bridge and a router?

- A. Firewall
- B. Brouter
- C. Switch
- D. Hub
- E. Repeater

Answer: B

NEW QUESTION 296

- (Topic 2)

Which of the following is a correct sequence of different layers of Open System Interconnection (OSI) model?

- A. Physical layer, data link layer, network layer, transport layer, presentation layer, session layer, and application layer
- B. Physical layer, network layer, transport layer, data link layer, session layer, presentation layer, and application layer
- C. application layer, presentation layer, network layer, transport layer, session layer, data link layer, and physical layer
- D. Physical layer, data link layer, network layer, transport layer, session layer, presentation layer, and application layer

Answer: D

NEW QUESTION 301

- (Topic 2)

Which of the following are the levels of public or commercial data classification system? Each correct answer represents a complete solution. Choose all that apply.

- A. Sensitive
- B. Unclassified
- C. Confidential
- D. Public
- E. Secret
- F. Private

Answer: ACDF

NEW QUESTION 306

- (Topic 2)

Which of the following IDS/IPS detection methods do the URLs use to detect and prevent an attack?

- A. Encryption-based detection
- B. Policy-based detection
- C. Signature-based detection
- D. Internet bot detection

Answer: C

NEW QUESTION 309

- (Topic 2)

At which OSI layer does UDP operate?

- A. Network layer
- B. Data-link layer
- C. Session layer
- D. Transport layer
- E. Presentation layer

Answer: D

NEW QUESTION 311

- (Topic 2)

You work as a Network Administrator for McRoberts Inc. You are required to upgrade a client computer on the company's network to Windows Vista Ultimate. During installation, the computer stops responding, and the screen does not change. What is the most likely cause?

- A. Antivirus software is running on the computer.
- B. You have provided an improper product key.
- C. The computer is running a driver that is incompatible with Vista.
- D. The computer has a hardware device that is incompatible with Vista.

Answer: A

NEW QUESTION 314

- (Topic 2)

Which of the following is an examination of the controls within an Information technology (IT) infrastructure?

- A. Risk analysis
- B. ITIL
- C. ADP audit
- D. SMART

Answer: C

NEW QUESTION 319

- (Topic 2)

You work as a Product manager for Marioiss Inc. You have been tasked to start a project for securing the network of your company. You want to employ configuration management to efficiently manage the procedures of the project. What will be the benefits of employing configuration management for completing this project?

Each correct answer represents a complete solution. Choose all that apply.

- A. It provides the risk analysis of project configurations.
- B. It provides object, orient, decide and act strategy.
- C. It provides the versions for network devices.
- D. It provides a live documentation of the project.

Answer: CD

NEW QUESTION 323

- (Topic 2)

Which of the following is the phase of Incident handling process in which the distinction between an event and an incident is made?

- A. Preparation phase
- B. Eradication phase
- C. Differential phase
- D. Identification phase

Answer: D

NEW QUESTION 327

- (Topic 2)

Which of the following roles is used to ensure that the confidentiality, integrity, and availability of the services are maintained to the levels approved on the Service Level Agreement (SLA)?

- A. The Service Level Manager
- B. The Configuration Manager
- C. The IT Security Manager
- D. The Change Manager

Answer: C

NEW QUESTION 330

- (Topic 2)

Which of the following is used to determine whether or not a principal is allowed to perform a requested action?

- A. Authentication
- B. Security policy
- C. Authorization
- D. Principal

Answer: C

NEW QUESTION 335

- (Topic 2)

Which of the following statements about Public Key Infrastructure (PKI) is true?

- A. It uses symmetric key pairs.
- B. It uses public key encryption.
- C. It is a digital representation of information that identifies users.
- D. It provides security using data encryption and digital signature.

Answer: D

NEW QUESTION 336

- (Topic 3)

Which of the following statements about a brute force attack is true?

- A. It is a program that allows access to a computer without using security checks.
- B. It is an attack in which someone accesses your e-mail server and sends misleading information to others.
- C. It is a virus that attacks the hard drive of a computer.
- D. It is a type of spoofing attack.
- E. It is an attempt by an attacker to guess passwords until he succeeds.

Answer: E

NEW QUESTION 340

- (Topic 3)

Which of the following is used in asymmetric encryption?

- A. Public key and user key
- B. Public key and private key
- C. SSL
- D. NTFS

Answer: B

NEW QUESTION 344

- (Topic 3)

Fred is the project manager for the TCC Company. His company has an internal policy that states each year they will provide free services to a nonprofit organization. Therefore, the company and its employees are not allowed to charge or receive money or gifts from the nonprofit organization they choose to provide free services. This year, the TCC Company offers to provide project management services to the children's hospital for a marketing campaign to raise money. Due to the TCC Company's project management services, the nonprofit agency exceeded previous years fund raising efforts. To show appreciation the nonprofit organization offered to reimburse the project manager for his travel expenses. Which of the following best describes how the project manager should handle the situation?

- A. Say thank you and let them pay for the travel, it is the least they can do.
- B. Tell the hospital no thank you and explain it is against company policy to accept payment for services provided to their pro bono customers.
- C. Say nothing as to not hurt the feelings of the children's hospital.
- D. Ask if the hospital could pay for some of the supplies too.

Answer: B

NEW QUESTION 348

- (Topic 3)

Which of the following logs contains events pertaining to security as defined in the Audit policy?

- A. DNS server log
- B. Application log
- C. System log
- D. Directory Service log
- E. Security log
- F. File Replication Service log

Answer: E

NEW QUESTION 350

- (Topic 3)

You are the project manager for BlueWell Inc. You are reviewing the risk register for your project. The risk register provides much information to you, the project manager and to the project team during the risk response planning. All of the following are included in the risk register except for which item?

- A. Trends in qualitative risk analysis results
- B. Symptoms and warning signs of risks
- C. List of potential risk responses
- D. Network diagram analysis of critical path activities

Answer: D

NEW QUESTION 352

- (Topic 3)

Which of the following representatives of incident response team takes forensic backups of the systems that are the focus of the incident?

- A. Technical representative
- B. Legal representative
- C. Lead investigator
- D. Information security representative

Answer: A

NEW QUESTION 356

- (Topic 3)

You work as the Security Administrator for Prodotxiss Inc. You want to ensure the security of your Wi-Fi enterprise network against the wireless snooping attacks. Which of the following measures will you take over the site network devices of the network?

- A. Apply firewalls at appropriate spots.
- B. Download and install new firmware patch for the router.
- C. Disable the SSID broadcast feature of the router.
- D. Apply a standard ACL on the router.

Answer: C

NEW QUESTION 361

- (Topic 3)

You are the Network Administrator for a software development company. Your company creates various utilities and tools. You have noticed that some of the files your company creates are getting deleted from systems. When one is deleted, it seems to be deleted from all the computers on your network. Where would you first look to try and diagnose this problem?

- A. Antivirus log
- B. System log
- C. IDS log
- D. Firewall log

Answer: A

NEW QUESTION 366

- (Topic 3)

Which of the following are parts of applying professional knowledge? Each correct answer represents a complete solution. Choose all that apply.

- A. Maintaining cordial relationship with project sponsors
- B. Reporting your project management appearance
- C. Staying up-to-date with project management practices
- D. Staying up-to-date with latest industry trends and new technology

Answer: BCD

NEW QUESTION 371

- (Topic 3)

Which of the following technologies is used to detect unauthorized attempts to access and manipulate computer systems locally or through the Internet or an intranet?

- A. Packet filtering

- B. Firewall
- C. Intrusion detection system (IDS)
- D. Demilitarized zone (DMZ)

Answer: C
